<i>Woodhead Publishing Series in Food Science, Technology and Nutrition</i> .....	<i>xix</i>
<i>Preface</i> .....	<i>xxvii</i>

## Part I General issues with functional foods

<b>1 Defining functional foods and associated claims</b> .....	<b>3</b>
<i>M. Roberfroid, Catholic University of Louvain, Belgium</i>	
1.1 Introduction.....	3
1.2 Functional foods: defining the concept.....	5
1.3 Functional food science .....	10
1.4 Communicating functional claims .....	13
1.5 Case studies .....	18
1.6 Conclusions and future trends .....	21
1.7 References.....	22
<b>2 EU legislation and functional foods: a case study</b> .....	<b>25</b>
<i>P. Berry Ottaway and S. Jennings, Berry Ottaway &amp; Associates Ltd, UK</i>	
2.1 Introduction.....	25
2.2 Product description .....	26
2.3 Product positioning in the European market .....	26
2.4 Product composition .....	27
2.5 Claims .....	33
2.6 Packaging.....	36
2.7 Labelling .....	37

2.8	Manufacture.....	38
2.9	Conclusions.....	38
2.10	References.....	38
2.11	Appendix: note.....	40
<b>3</b>	<b>U.S. regulation of functional foods.....</b>	<b>41</b>
	<i>J. E. Hoadley, EAS Consulting Group, USA</i>	
3.1	Introduction.....	41
3.2	Food label health claims.....	42
3.3	Food label structure/function claims.....	46
3.4	Food label nutrient content claims.....	50
3.5	Medical food and food for special dietary use.....	53
3.6	Ingredient safety.....	56
3.7	Sources of further information and advice.....	57
3.8	References.....	58
3.9	Appendix: definitions.....	59
<b>4</b>	<b>Australia and New Zealand regulations on nutrition, health and related claims made on foods.....</b>	<b>64</b>
	<i>D. Ghosh, nutriConnect, Sydney, Australia</i>	
4.1	Introduction.....	64
4.2	Functional foods: current trends and market.....	65
4.3	Australia and New Zealand legislation and functional foods.....	66
4.4	Scientific substantiation of health claims.....	68
4.5	Australia and New Zealand regulatory framework in the light of global harmonisation.....	69
4.6	Implementation.....	69
4.7	Implications for the development and manufacture of functional foods.....	70
4.8	Future trends.....	70
4.9	Sources of further information and advice.....	71
4.10	References.....	71
<b>5</b>	<b>Legislation of functional foods in Asia.....</b>	<b>73</b>
	<i>J. Zawistowski, University of British Columbia, Canada</i>	
5.1	Introduction: historical background.....	73
5.2	Regulatory challenges for marketing of functional foods.....	76
5.3	Definition and categories of functional foods in various Asian countries.....	76
5.4	Food and drug interface: regulatory framework for functional foods.....	79
5.5	Nutrition and health claims.....	89
5.6	Labelling of functional foods.....	99
5.7	Health claims and consumer confidence.....	100

5.8	Future trends: harmonization of law and regulations of functional foods .....	102
5.9	Sources of further information and governmental websites .....	103
5.10	Acknowledgements.....	104
5.11	References.....	104
<b>6</b>	<b>Consumers and health claims for functional foods.....</b>	<b>109</b>
	<i>L. Lähteenmäki, Aarhus University, Denmark</i>	
6.1	Introduction.....	109
6.2	Consumer perceptions of health claims .....	112
6.3	Consumer acceptability of health claims .....	117
6.4	Implications for dairy product development.....	120
6.5	Future trends .....	123
6.6	Sources of further information and advice .....	124
6.7	References.....	124

## Part II Functional foods and health

<b>7</b>	<b>Functional foods and acute gastrointestinal infections.....</b>	<b>129</b>
	<i>H. Szajewska, The Medical University of Warsaw, Poland</i>	
7.1	Introduction.....	129
7.2	How the intervention might work.....	130
7.3	How to assess the effectiveness of probiotics and/or prebiotics.....	131
7.4	What is the aim of this chapter? .....	131
7.5	Probiotics .....	132
7.6	Prebiotics .....	142
7.7	Synbiotics .....	145
7.8	Conclusions and future trends .....	146
7.9	Sources of further information and advice .....	146
7.10	References.....	147
<b>8</b>	<b>Functional foods and coronary heart disease (CHD) .....</b>	<b>153</b>
	<i>Julie A. Lovegrove and Kim G. Jackson, University of Reading, UK</i>	
8.1	Introduction.....	153
8.2	Coronary heart disease and risk factors .....	156
8.3	Relevant lipid particles .....	162
8.4	Diet and coronary heart disease risk: the evidence.....	168
8.5	The effects of probiotics including fermented milk products and lactic acid bacteria on coronary heart disease.....	173
8.6	The effects of prebiotics on coronary heart disease.....	183
8.7	The effects of synbiotics including combinations of lactic acid bacteria and prebiotic fibres on coronary heart disease .....	190

8.8	Future trends .....	191
8.9	Sources of further information and advice .....	192
8.10	References.....	193
<b>9</b>	<b>Anti-tumour properties of functional foods.....</b>	<b>202</b>
	<i>I. T. Johnson, Institute of Food Research, UK</i>	
9.1	Introduction.....	202
9.2	Carcinogenesis and the biology of cancer .....	203
9.3	Protective effects of nutrients .....	208
9.4	Protective effects of phytochemicals .....	219
9.5	Carbohydrates and their fermentation products.....	222
9.6	Conclusion: the role of functional foods and future trends .....	225
9.7	Sources of further information and advice .....	226
9.8	References.....	226
<b>10</b>	<b>Functional foods and obesity.....</b>	<b>234</b>
	<i>S. B. Myrie and P. J. H. Jones, University of Manitoba, Canada</i>	
10.1	Introduction.....	234
10.2	Functional foods contribution to weight management .....	236
10.3	Formulating food products for weight control.....	251
10.4	Future trends .....	252
10.5	Sources of further information and advice .....	253
10.6	References.....	253
<b>11</b>	<b>Functional foods and prevention of diabetes.....</b>	<b>261</b>
	<i>J. Lindström, National Institute for Health and Welfare, Finland and S. M. Virtanen, National Institute for Health and Welfare, Finland and Tampere School of Public Health, Finland</i>	
11.1	Introduction.....	261
11.2	Food and diet as contributing factors to the rise in diabetes.....	263
11.3	Effects of different food components on insulin secretion, insulin resistance and development of diabetes.....	266
11.4	Formulating food products for diabetes prevention.....	268
11.5	Future trends .....	269
11.6	References.....	269
<b>12</b>	<b>Functional foods and cognition.....</b>	<b>277</b>
	<i>A. Scholey, D. Camfield, L. Owen, A. Pipingas and C. Stough, Swinburne University, Australia</i>	
12.1	Introduction.....	277
12.2	Modulators of cognitive functions.....	278
12.3	Selection of appropriate cognitive outcome measures .....	279
12.4	Nutraceuticals and cognitive function .....	280
12.5	Effects of ageing on cognition and brain biology.....	280
12.6	Effects of glucose and carbohydrates .....	282

12.7	Nutraceuticals for cognitive enhancement.....	283
12.8	Conclusions.....	298
12.9	Sources of further information and advice .....	299
12.10	References.....	299
<b>13</b>	<b>Functional foods and bone health.....</b>	<b>309</b>
	<i>S. J. Whiting and H. Vatanparast, University of Saskatchewan, Canada</i>	
13.1	Introduction.....	309
13.2	Overview of bone growth and maintenance .....	311
13.3	How key nutrients and dietary factors impact bone health.....	312
13.4	Dietary sources of nutrients and dietary factors related to bone health, and safety considerations .....	319
13.5	Case studies of functional foods designed to improve intake of bone health factors.....	323
13.6	Future trends .....	325
13.7	Issues related to product targeting and consumer acceptance of bone-healthy functional foods .....	327
13.8	References.....	328
<b>Part III</b>	<b>Developing functional food products</b>	
<b>14</b>	<b>Maximising the functional benefits of plant foods .....</b>	<b>337</b>
	<i>D. G. Lindsay, Euroscience Perspectives, Spain</i>	
14.1	Introduction.....	337
14.2	The concept of functionality .....	338
14.3	The situation in the developing world .....	339
14.4	The priorities for nutritional enhancement .....	340
14.5	Strategies for nutritional enhancement .....	341
14.6	Improvements in handling, storage and food processing technologies .....	350
14.7	Future trends .....	353
14.8	Sources of further information and advice .....	354
14.9	References.....	354
<b>15</b>	<b>Developing functional ingredients: a case study of pea protein .....</b>	<b>358</b>
	<i>A.-S. Sandberg, Chalmers University of Technology, Sweden</i>	
15.1	Introduction: the nutritional properties of peas .....	358
15.2	Improving pea protein.....	362
15.3	Processing issues in improving pea protein.....	363
15.4	Adding improved protein to food products .....	365
15.5	Evaluating the nutritional, functional and sensory properties of improved pea protein in food products.....	368

15.6	New technologies for improved nutritional and functional value of pea protein (NUTRIPEA) .....	371
15.7	Future trends .....	374
15.8	Sources of further information and advice: past and present EU projects, networks and special reports in the field.....	375
15.9	References.....	378
<b>16</b>	<b>Functional fats and spreads .....</b>	<b>383</b>
	<i>A. Turpeinen and P. Merimaa, Valio Ltd, Finland</i>	
16.1	Introduction.....	383
16.2	EU legislation on fats and spreads.....	384
16.3	Functional ingredients and chronic diseases: applications in fats and spreads.....	385
16.4	Methods for modifying fats and oils.....	393
16.5	Future trends .....	395
16.6	Sources of further information and advice .....	396
16.7	References.....	396
<b>17</b>	<b>Omega-3 polyunsaturated fatty acids (PUFAs) as food ingredients .....</b>	<b>401</b>
	<i>C. Jacobsen, National Food Institute, Denmark</i>	
17.1	Introduction.....	401
17.2	Health aspects of omega-3 polyunsaturated fatty acids (PUFAs).....	403
17.3	Sources of omega-3 PUFAs.....	403
17.4	The problems associated with using omega-3 PUFAs in foods .....	405
17.5	Factors affecting lipid oxidation in omega-3 PUFA enriched foods.....	408
17.6	The effect of antioxidant addition.....	414
17.7	Future trends .....	419
17.8	Sources of further information and advice .....	419
17.9	References.....	420
<b>18</b>	<b>Probiotic functional foods .....</b>	<b>425</b>
	<i>M. H. Saarela, VTT Technical Research Centre of Finland, Finland</i>	
18.1	Introduction to probiotics and their health effects .....	425
18.2	Probiotic food market in Europe and the United States .....	426
18.3	Probiotic technology and challenges in the probiotic formulation into foods .....	428
18.4	Probiotic food categories .....	429
18.5	Future trends .....	437
18.6	Sources of further information and advice .....	438
18.7	References.....	439

<b>19 Functional foods for the gut: probiotics, prebiotics and synbiotics.....</b>	<b>449</b>
<i>A. Drakoularakou, R. Rastall and G. Gibson, University of Reading, UK</i>	
19.1 Introduction.....	449
19.2 The composition of gastrointestinal (GI) microbiota .....	450
19.3 Probiotics .....	451
19.4 Prebiotics and synbiotics .....	455
19.5 Conclusions.....	463
19.6 References.....	463
<b>20 Bioactive milk proteins, peptides and lipids and other functional components derived from milk and bovine colostrum .....</b>	<b>471</b>
<i>H. J. Korhonen, MTT Agrifood Research Finland, Finland</i>	
20.1 Introduction.....	471
20.2 Bioactive proteins .....	472
20.3 Bioactive peptides.....	484
20.4 Bioactive lipids .....	492
20.5 Other bioactive components .....	496
20.6 Conclusions.....	497
20.7 Future trends .....	498
20.8 References.....	499
<b>21 Functional meat products.....</b>	<b>512</b>
<i>K. Arihara and M. Ohata, Kitasato University, Japan</i>	
21.1 Introduction.....	512
21.2 Meat consumption and human health .....	513
21.3 Meat-based bioactive compounds.....	515
21.4 Development of functional meat products.....	517
21.5 Future trends of functional meat products .....	526
21.6 Sources of further information and advice .....	527
21.7 References.....	528
<b>22 Functional soy products .....</b>	<b>534</b>
<i>C. W. Xiao, Health Canada and University of Ottawa, Canada</i>	
22.1 Introduction.....	534
22.2 Major compositions of soybeans .....	535
22.3 Soy consumption in different populations .....	535
22.4 Functional soy foods.....	536
22.5 Safety aspects of soy.....	548
22.6 Future trends .....	549
22.7 Sources of further information and advice .....	550
22.8 References.....	550

<b>23 Functional seafood products .....</b>	<b>557</b>
<i>M. Careche and A. J. Borderias, Institute of Food Science, Technology and Nutrition (ICTAN), Spain, I. Sánchez-Alonso, Institute of the Structure of Matter (IEM), Spain and E. K. Lund, Institute of Food Research (IFR), Norwich, UK</i>	
23.1 Introduction.....	557
23.2 Health aspects of seafood .....	558
23.3 Potential for development of functional seafood products .....	562
23.4 Development of functional seafood products with dietary fibres .....	566
23.5 Conclusions.....	574
23.6 References.....	575
<b>24 Dietary fibre functional products .....</b>	<b>582</b>
<i>F. Guillon, M. Champ, J. F. Thibault and L. Saulnier, INRA Research Centre, Nantes, France</i>	
24.1 Introduction.....	582
24.2 Defining dietary fibre .....	583
24.3 Sources of dietary fibre .....	589
24.4 Processing dietary fibre ingredients.....	597
24.5 Processing foods containing dietary fibre.....	602
24.6 The physiological effects of dietary fibre .....	605
24.7 Recommended intakes of dietary fibre .....	613
24.8 Conclusions and future trends .....	614
24.9 References.....	614
<i>Index .....</i>	<i>623</i>
