Contents

Introduction	Safety and Laboratory Guidelines	1
	A Word About Experimental Design	6
	Data Presentation: Tables and Graphs	7
	Data Presentation: Be Creative, But Complete!	8
SECTION 1	Fundamental Skills for the Microbiology Laboratory	11
	EXERCISE 1-1 Glo-Germ™ Hand Wash Education System	12
	Basic Growth Media	14
	EXERCISE 1-2 Nutrient Broth and Nutrient Agar Preparation	14
	Aseptic Transfers and Inoculation Methods	17
	EXERCISE 1-3 Common Aseptic Transfers and Inoculation Methods	18
	EXERCISE 1-4 Streak Plate Methods of Isolation	25
	EXERCISE 1-5 Spread Plate Method of Isolation	29
SECTION 2	Microbial Growth	33
	Diversity and Ubiquity of Microorganisms	34
	EXERCISE 2-1 Ubiquity of Microorganisms	34
	EXERCISE 2-2 Colony Morphology	36
	EXERCISE 2-3 Growth Patterns on Slants	44
	EXERCISE 2-4 Growth Patterns in Broth	45
	Environmental Factors Affecting Microbial Growth	46
	EXERCISE 2-5 Evaluation of Media	46
	Aerotolerance	48
	EXERCISE 2-6 Agar Deep Stabs	48
	EXERCISE 2-7 Fluid Thioglycollate Medium	50
	EXERCISE 2-8 Anaerobic Jar	52
	EXERCISE 2-9 The Effect of Temperature on Microbial Growth	54
	EXERCISE 2-10 The Effect of pH on Microbial Growth	56
	EXERCISE 2-11 The Effect of Osmotic Pressure on Microbial Growth	58
	Control of Pathogens: Physical and Chemical Methods	60
	EXERCISE 2-12 Steam Sterilization	61
	EXERCISE 2-13 The Lethal Effect of Ultraviolet Radiation on Microbial Growth	64
	EXERCISE 2-14 Chemical Germicides: Disinfectants and Antiseptics	66

SECTION 3	Microscopy and Staining	69
	Microscopy	70
	EXERCISE 3-1 Introduction to the Light Microscope	70
	EXERCISE 3-2 Calibration of the Ocular Micrometer	76
	EXERCISE 3-3 Microscopic Examination of Eukaryotic Microbes	79
	EXERCISE 3-4 Microscopic Examination of Pond Water	84
	Bacterial Structure and Simple Stains	95
	EXERCISE 3-5 Simple Stains	100
	EXERCISE 3-6 Negative Stains	103
	Differential and Structural Stains	105
	EXERCISE 3-7 Gram Stain	105
	EXERCISE 3-8 Acid-Fast Stains	110
	EXERCISE 3-9 Capsule Stain	115
	EXERCISE 3-10 Endospore Stain	117
	EXERCISE 3-11 Parasporal Crystal Stain	121
	EXERCISE 3-12 Wet Mount and Hanging Drop Preparations	122
	EXERCISE 3-13 Flagella Stain	124
	EXERCISE 3-14 Morphological Unknown	126
SECTION 4	Selective Media	129
	A Word About Selective Media	130
	Selective Media for Isolation of Gram-Positive Cocci	131
	EXERCISE 4-1 Phenylethyl Alcohol Agar	131
	EXERCISE 4-2 Columbia CNA With 5% Sheep Blood Agar	133
	EXERCISE 4-3 Bile Esculin Test	135
	EXERCISE 4-4 Mannitol Salts Agar	137
	Selective Media for Isolation of Gram-Negative Rods	139
	EXERCISE 4-5 MacConkey Agar	139
	EXERCISE 4-6 Eosin Methylene Blue Agar	142
	EXERCISE 4-7 Hektoen Enteric Agar	145
	EXERCISE 4-8 Xylose Lysine Desoxycholate Agar	147
SECTION 5	Differential Tests	149
	A Word About Biochemical Tests and Acid-Base Reactions	150
	Introduction to Energy Metabolism Tests	151
	EXERCISE 5-1 Reduction Potential	152
	EXERCISE 5-2 Oxidation–Fermentation Test	155
	Fermentation Tests	158
	EXERCISE 5-3 Phenol Red Broth	158
	EXERCISE 5-4 Methyl Red and Voges-Proskauer Tests	161
	Tests Identifying Microbial Ability to Respire	165
	EXERCISE 5-5 Catalase Test	165
	EXERCISE 5-6 Oxidase Test	168
	EXERCISE 5-7 Nitrate Reduction Test	171

Nutrient Utilization Tests	175
EXERCISE 5-8 Citrate Test	175
EXERCISE 5-9 Malonate Test	177
Decarboxylation and Deamination Tests	179
EXERCISE 5-10 Decarboxylation Tests	179
EXERCISE 5-11 Phenylalanine Deaminase Test	182
Tests Detecting Hydrolytic Enzymes	184
EXERCISE 5-12 Starch Hydrolysis	184
EXERCISE 5-13 Urea Hydrolysis	187
EXERCISE 5-14 Casein Hydrolysis Test	190
EXERCISE 5-15 Gelatin Hydrolysis Test	192
EXERCISE 5-16 DNA Hydrolysis Test	194
EXERCISE 5-17 Lipid Hydrolysis Test	196
EXERCISE 5-18 ONPG Test	198
EXERCISE 5-19 PYR Test	200
Combination Differential Media	202
EXERCISE 5-20 SIM Medium	202
EXERCISE 5-21 Triple Sugar Iron Agar / Kligler Iron Agar	206
EXERCISE 5-22 Lysine Iron Agar	209
EXERCISE 5-23 Litmus Milk Medium	211
Antibacterial Susceptibility Testing	214
EXERCISE 5-24 Bacitracin, Novobiocin, and Optochin Susceptibility Tests	214
Other Differential Tests	217
EXERCISE 5-25 Blood Agar	217
EXERCISE 5-26 CAMP Test	220
EXERCISE 5-27 Coagulase Tests	222
EXERCISE 5-28 Motility Test	224
Multiple Test Systems	226
EXERCISE 5-29 API 20 E Identification System for <i>Enterobacteriaceae</i> and Other Gram-negative Rods	226
EXERCISE 5-30 Enterotube® II	232
Bacterial Unknowns Project	237
EXERCISE 5-31 Bacterial Unknowns Project	237
SECTION 6 Quantitative Techniques	243
EXERCISE 6-1 Standard Plate Count (Viable Count)	244
EXERCISE 6-2 Urine Culture	248
EXERCISE 6-3 Direct Count (Petroff-Hausser)	250
EXERCISE 6-4 Closed-System Growth	252
EXERCISE 6-5 Plaque Assay of Virus Titre	255
EXERCISE 6-6 Thermal Death Time Versus Decimal Reduction Value	259

SECTION 7	Medical Microbiology	263
EXERCISE 7-1	Snyder Test	264
EXERCISE 7-2	Lysozyme Assay	266
EXERCISE 7-3	Antimicrobial Susceptibility Test (Kirby-Bauer Method)	268
EXERCISE 7-4	Clinical Biofilms	272
EXERCISE 7-5	Morbidity and Mortality Weekly Report (MMWR) Assignment	274
EXERCISE 7-6	Epidemic Simulation	276
EXERCISE 7-7	Identification of <i>Enterobacteriaceae</i>	278
EXERCISE 7-8	Identification of Gram-positive Cocci	284
EXERCISE 7-9	Identification of Gram-positive Rods	289
SECTION 8	Environmental Microbiology	295
EXERCISE 8-1	Winogradsky Column	296
	Introduction to the Nitrogen Cycle	299
EXERCISE 8-2	Nitrogen Fixation	300
EXERCISE 8-3	Nitrification: The Production of Nitrate	305
EXERCISE 8-4	Ammonification	308
EXERCISE 8-5	Denitrification: Nitrate Reduction	310
	A Word About Trophic Groups	312
	Sulfur Cycle—Introduction	313
EXERCISE 8-6	Photosynthetic Sulfur Bacteria	315
EXERCISE 8-7	Chemolithotrophic Sulfur-Oxidizing Bacteria	318
EXERCISE 8-8	Sulfur-Reducing Bacteria	321
EXERCISE 8-9	Bioluminescence	324
EXERCISE 8-10	Soil Slide Culture	326
EXERCISE 8-11	Soil Microbial Count	329
EXERCISE 8-12	Membrane Filter Technique	332
EXERCISE 8-13	Multiple Tube Fermentation Method for Total Coliform Determination	336
SECTION 9	Food Microbiology	341
EXERCISE 9-1	Methylene Blue Reductase Test	342
EXERCISE 9-2	Making Yogurt	344
SECTION 10	Microbial Genetics	345
EXERCISE 10-1	Extraction of DNA from Bacterial Cells	346
EXERCISE 10-2	Restriction Digest	350
EXERCISE 10-3	Bacterial Transformation: The pGLO™ System	354
EXERCISE 10-4	Polymerase Chain Reaction	359
EXERCISE 10-5	Ultraviolet Radiation Damage and Repair	364
EXERCISE 10-6	Ames Test	367
EXERCISE 10-7	Phage Typing of <i>E. coli</i> Strains	371

SECTION	11 Hematology and Serology	373
EXERCISE	11-1 Differential Blood Cell Count	374
	Simple Serological Reactions	377
EXERCISE	11-2 Precipitin Ring Test	377
EXERCISE	11-3 Radial Immunodiffusion	380
EXERCISE	11-4 Slide Agglutination	382
EXERCISE	11-5 Blood Typing	384
EXERCISE	11-6 Mononucleosis Hemagglutination Test	387
EXERCISE	11-7 Quantitative Indirect ELISA	389
SECTION	12 Eukaryotic Microbes	397
EXERCISE	12-1 The Fungi—Common Yeasts and Molds	398
	Yeasts of Medical or Economic Importance	399
	Molds of Medical or Economic Importance	400
EXERCISE	12-2 Fungal Slide Culture	406
EXERCISE	12-3 Examination of Common Protozoans	
	of Clinical Importance	409
	Amoeboid Protozoans Found in Clinical Specimens	409
	Ciliate Protozoan Found in Clinical Specimens	410
	Flagellate Protozoans Found in Clinical Specimens	411
	Sporozoan Protozoans Found in Clinical Specimens	412
EXERCISE	12-4 Parasitic Helminths	416
	Trematode Parasites Found in Clinical Specimens	416
	Cestode Parasites Found in Clinical Specimens	417
	Nematode Parasites Found in Clinical Specimens	421
APPENDIX	A Biochemical Pathways	425
	Oxidation of Glucose: Glycolysis, Entner-Doudoroff and Pentose-Phosphate Pathways	425
	Oxidation of Pyruvate: The Krebs Cycle and Fermentation	428
APPENDIX	B Miscellaneous Transfer Methods	433
	Transfers Using a Sterile Cotton Swab	433
	Stab Inoculation of Agar Tubes Using an Inoculating Needle	434
	Spot Inoculation of an Agar Plate	435
APPENDIX	C Transfer from a Broth Culture Using a Glass Pipette	437
	Filling a Glass Pipette	438
	Inoculation of Broth Tubes with a Pipette	439
	Inoculation of Agar Plates with a Pipette	440
APPENDIX	D Transfer from a Broth Culture Using a Digital Pipette	441
	Filling a Digital Pipettor	441
	Inoculation of Broth Tubes with a Digital Pipettor	442
	Inoculation of Agar Plates with a Pipettor	443

APPENDIX E	The Spectrophotometer	445
	Theory	445
	Instructions for Use of the Spectronic D20+	446
APPENDIX F	Alternative Procedures for Section 6	449
	Alternative Procedure for Exercise 6-1, Standard Plate Count (Viable Count)	449
	Alternative Procedure for Exercise 6-5, Plaque Assay of Virus Titre	450
	Alternative Procedure for Exercise 6-6, Thermal Death Time Versus Decimal Reduction Value	452
APPENDIX G	Agarose Gel Electrophoresis	455
	Gel Preparation and Staining for Exercises 10-2 and 10-4	455
APPENDIX H	Medium, Reagent, and Stain Recipes	459
	Media	459
	Reagents	471
	Solutions	472
	Stains	472
	Gram Stain Reagents	473
	Simple Stains	474
	Data Sheets	475
	SECTION 1 Fundamental Skills for the Microbiology Laboratory	477
	SECTION 2 Microbial Growth	487
	SECTION 3 Microscopy and Staining	525
	SECTION 4 Selective Media	555
	SECTION 5 Differential Tests	571
	SECTION 6 Quantitative Techniques	635
	SECTION 7 Medical Microbiology	655
	SECTION 8 Environmental Microbiology	679
	SECTION 9 Food Microbiology	707
	SECTION 10 Microbial Genetics	711
	SECTION 11 Hematology and Serology	731
	SECTION 12 Eukaryotic Microbes	745
	Glossary	757
	Index	765
