

ninth edition

Prescott's Microbiology

Joanne M. Willey

HOFSTRA UNIVERSITY

Linda M. Sherwood

MONTANA STATE UNIVERSITY

Christopher J. Woolverton

KENT STATE UNIVERSITY

About the Authors

Joanne M. Willey has been a professor at Hofstra University on Long Island, New York, since 1993, where she is Professor of Microbiology; she holds a joint appointment with the Hofstra University School of Medicine. Dr. Willey received her B.A. in Biology from the University of Pennsylvania, where her interest in microbiology began with work on cyanobacterial growth in eutrophic streams. She earned her Ph.D. in biological oceanography (specializing in marine microbiology) from the Massachusetts Institute of Technology–Woods Hole Oceanographic Institution Joint Program in 1987. She then went to Harvard University, where she spent her postdoctoral fellowship studying the filamentous soil bacterium *Streptomyces coelicolor*. Dr. Willey continues to investigate this fascinating microbe and has coauthored a number of publications that focus on its complex developmental cycle. She is an active member of the American Society for Microbiology (ASM), and served on the editorial board of the journal *Applied and Environmental Microbiology* for nine years and as Chair of the Division of General Microbiology. Dr. Willey regularly teaches microbiology to biology majors as well as medical students. She also teaches courses in cell biology, marine microbiology, and laboratory techniques in molecular genetics. Dr. Willey lives on the north shore of Long Island with her husband and two sons. She is an avid runner and enjoys skiing, hiking, sailing, and reading. She can be reached at joanne.m.willey@hofstra.edu.

Linda M. Sherwood is a member of the Department of Microbiology at Montana State University. Her interest in microbiology was sparked by the last course she took to complete a B.S. degree in Psychology at Western Illinois University. She went on to complete an M.S. degree in Microbiology at the University of Alabama, where she studied histidine utilization by *Pseudomonas acidovorans*. She subsequently earned a Ph.D. in Genetics at Michigan State University, where she studied sporulation in *Saccharomyces cerevisiae*. She briefly left the microbial world to study the molecular biology of *dunce* fruit flies at Michigan State University before moving to Montana State University. Dr. Sherwood has always had a keen interest in teaching, and her psychology training has helped her to understand current models of cognition and learning and their implications for teaching. Over the years, she has taught courses in general microbiology, genetics, biology, microbial genetics, and microbial physiology. She has served as the editor for ASM's *Focus on Microbiology Education* and has participated in and contributed to numerous ASM Conferences for Undergraduate Educators (ASMCUE). She also has worked with K–12 teachers to develop a kit-based unit to introduce microbiology into the elementary school curriculum and has coauthored with Barbara Hudson a general microbiology laboratory manual, *Explorations in Microbiology: A Discovery Approach*, published by Prentice-Hall. Her association with McGraw-Hill began when she prepared the study guides for the fifth and sixth editions of *Microbiology*. Her non-academic interests focus primarily on her family. She also enjoys reading, hiking, gardening, and traveling. She can be reached at lsherwood@montana.edu.

Christopher J. Woolverton is founding professor of Environmental Health Science, College of Public Health at Kent State University (Kent, OH), and is the Director of the Kent State University (KSU) Center for Public Health Preparedness, overseeing its BSL-3 Training Facility. Dr. Woolverton serves on the KSU graduate faculty of the College of Public Health, the School of Biomedical Sciences, and the Department of Biological Sciences. He holds a joint appointment at Akron Children's Hospital (Akron, OH). He earned his B.S. in Biology from Wilkes College (PA), and his M.S. and Ph.D. in Medical Microbiology from West Virginia University, School of Medicine. He spent two years as a postdoctoral fellow at UNC-Chapel-Hill. Dr. Woolverton's current research is focused on real-time detection and identification of pathogens using a liquid crystal (LC) biosensor that he patented in 2001. Dr. Woolverton has published and lectured widely on the mechanisms by which LCs act as biosensors and on the LC characteristics of microbial proteins. Professor Woolverton teaches microbiology, communicable diseases, immunology, prevention and control of disease, and microbial physiology. He is on the faculty of the National Institutes of Health National Biosafety and Biocontainment Training Program, teaching laboratory safety, risk assessment, decontamination strategies, and bioterrorism readiness. An active member of the American Society for Microbiology, Woolverton serves on its Board of Education and as the editor-in-chief of its *Journal of Microbiology and Biology Education*. Woolverton and his wife, Nancy, have three daughters, a son-in-law, and a grandson. He enjoys time with his family, ultra-light hiking and camping, and is an avid cyclist. His e-mail address is cwoolver@kent.edu.

About the Authors iii

Preface iv

Part One Introduction to Microbiology

| | |
|---|-----------|
| 1 The Evolution of Microorganisms and Microbiology | 1 |
| 1.1 Members of the Microbial World | 1 |
| 1.2 Microbial Evolution | 4 |
| 1.3 Microbiology and Its Origins | 11 |
| 1.4 Microbiology Today | 17 |
| 2 Microscopy | 22 |
| 2.1 Lenses and the Bending of Light | 22 |
| 2.2 Light Microscopes | 23 |
| 2.3 Preparation and Staining of Specimens | 31 |
| 2.4 Electron Microscopy | 34 |
| 2.5 Scanning Probe Microscopy | 39 |
| 3 Bacterial Cell Structure | 42 |
| 3.1 The "Prokaryote" Controversy | 42 |
| 3.2 A Typical Bacterial Cell | 43 |
| 3.3 Bacterial Plasma Membranes | 47 |
| 3.4 Bacterial Cell Walls | 53 |
| Microbial Diversity & Ecology 3.1 Gram Positive and Gram Negative or Monoderms and Diderms? | 54 |
| 3.5 Cell Envelope Layers Outside the Cell Wall | 61 |
| 3.6 Bacterial Cytoplasm | 62 |
| 3.7 External Structures | 69 |
| 3.8 Bacterial Motility and Chemotaxis | 72 |
| 3.9 Bacterial Endospores | 76 |
| 4 Archaeal Cell Structure | 82 |
| 4.1 A Typical Archaeal Cell | 82 |
| 4.2 Archaeal Cell Envelopes | 84 |
| 4.3 Archaeal Cytoplasm | 87 |
| 4.4 External Structures | 88 |
| 4.5 Comparison of <i>Bacteria</i> and <i>Archaea</i> | 90 |
| 5 Eukaryotic Cell Structure | 92 |
| 5.1 A Typical Eukaryotic Cell | 92 |
| 5.2 Eukaryotic Cell Envelopes | 94 |

| | |
|--|------------|
| 5.3 Cytoplasm of Eukaryotes | 96 |
| 5.4 Organelles of the Secretory and Endocytic Pathways | 97 |
| 5.5 Organelles Involved in Genetic Control of the Cell | 101 |
| 5.6 Organelles Involved in Energy Conservation | 103 |
| 5.7 External Structures | 104 |
| Microbial Diversity & Ecology 5.1 There Was an Old Woman Who Swallowed a Fly | 106 |
| 5.8 Comparison of Bacterial, Archaeal, and Eukaryotic Cells | 108 |
| 6 Viruses and Other Acellular Infectious Agents | 112 |
| 6.1 Viruses | 112 |
| 6.2 Virion Structure | 113 |
| Microbial Diversity & Ecology 6.1 Host-Independent Growth of an Archaeal Virus | 114 |
| 6.3 Viral Multiplication | 119 |
| 6.4 Types of Viral Infections | 124 |
| 6.5 Cultivation and Enumeration of Viruses | 127 |
| 6.6 Viroids and Satellites | 129 |
| 6.7 Prions | 130 |

Part Two Microbial Nutrition, Growth, and Control

| | |
|--|------------|
| 7 Microbial Growth | 133 |
| 7.1 Reproductive Strategies | 133 |
| 7.2 Bacterial Cell Cycle | 134 |
| Microbial Diversity & Ecology 7.1 Cytokinesis Without FtsZ | 137 |
| 7.3 Influences of Environmental Factors on Growth | 141 |
| 7.4 Microbial Growth in Natural Environments | 149 |
| 7.5 Laboratory Culture of Cellular Microbes | 154 |
| 7.6 Growth Curve: When One Becomes Two and Two Become Four . . . | 160 |
| 7.7 Measurement of Microbial Population Size | 164 |
| 7.8 Continuous Culture of Microorganisms | 168 |
| 8 Control of Microorganisms in the Environment | 172 |
| 8.1 Principles of Microbial Control | 172 |
| 8.2 The Pattern of Microbial Death | 174 |
| 8.3 Mechanical Removal Methods | 175 |

Contents

| | | | | | |
|----------|--|------------|---|---|------------|
| 8.4 | Physical Control Methods | 177 | 11.7 | Anaerobic Respiration | 247 |
| 8.5 | Chemical Control Agents | 180 | 11.8 | Fermentation | 248 |
| 8.6 | Evaluation of Antimicrobial Agent Effectiveness | 184 | 11.9 | Catabolism of Organic Molecules Other Than Glucose | 251 |
| 8.7 | Biological Control of Microorganisms | 186 | 11.10 | Chemolithotrophy | 253 |
| 9 | Antimicrobial Chemotherapy | 189 | Microbial Diversity & Ecology 11.1 | | |
| 9.1 | The Development of Chemotherapy | 189 | Acid Mine Drainage | | 255 |
| 9.2 | General Characteristics of Antimicrobial Drugs | 190 | 11.11 | Phototrophy | 256 |
| 9.3 | Determining the Level of Antimicrobial Activity | 193 | | | |
| 9.4 | Antibacterial Drugs | 195 | 12 | Anabolism: The Use of Energy in Biosynthesis | 266 |
| 9.5 | Antifungal Drugs | 201 | 12.1 | Principles Governing Biosynthesis | 266 |
| 9.6 | Antiviral Drugs | 203 | 12.2 | Precursor Metabolites | 268 |
| 9.7 | Antiprotozoan Drugs | 205 | 12.3 | CO ₂ Fixation | 269 |
| 9.8 | Factors Influencing Antimicrobial Drug Effectiveness | 206 | 12.4 | Synthesis of Carbohydrates | 272 |
| | | | 12.5 | Synthesis of Amino Acids | 274 |
| | | | 12.6 | Synthesis of Purines, Pyrimidines, and Nucleotides | 281 |
| | | | 12.7 | Lipid Synthesis | 283 |

Part Three Microbial Metabolism

| | | |
|-----------|--|------------|
| 10 | Introduction to Metabolism | 210 |
| 10.1 | Metabolism: Important Principles and Concepts | 211 |
| 10.2 | ATP: The Major Energy Currency of Cells | 213 |
| 10.3 | Redox Reactions: Reactions of Central Importance in Metabolism | 215 |
| 10.4 | Electron Transport Chains: Sets of Sequential Redox Reactions | 216 |
| 10.5 | Biochemical Pathways | 219 |
| 10.6 | Enzymes and Ribozymes | 220 |
| 10.7 | Regulation of Metabolism | 224 |
| 11 | Catabolism: Energy Release and Conservation | 230 |
| 11.1 | Metabolic Diversity and Nutritional Types | 230 |
| 11.2 | Chemoorganotrophic Fueling Processes | 232 |
| 11.3 | Aerobic Respiration | 235 |
| 11.4 | From Glucose to Pyruvate | 235 |
| 11.5 | Tricarboxylic Acid Cycle | 239 |
| 11.6 | Electron Transport and Oxidative Phosphorylation | 239 |

Part Four Microbial Molecular Biology and Genetics

| | | |
|-----------|--|------------|
| 13 | Bacterial Genome Replication and Expression | 287 |
| 13.1 | DNA as Genetic Material | 288 |
| 13.2 | Nucleic Acid and Protein Structure | 288 |
| 13.3 | DNA Replication in Bacteria | 293 |
| 13.4 | Bacterial Gene Structure | 301 |
| 13.5 | Transcription in Bacteria | 304 |
| 13.6 | The Genetic Code | 309 |
| 13.7 | Translation in Bacteria | 311 |
| 13.8 | Protein Maturation and Secretion | 319 |
| 14 | Regulation of Bacterial Cellular Processes | 325 |
| 14.1 | Levels of Regulation | 326 |
| 14.2 | Regulation of Transcription Initiation | 326 |
| 14.3 | Regulation of Transcription Elongation | 333 |
| 14.4 | Regulation of Translation | 336 |
| 14.5 | Regulating Complex Cellular Processes | 338 |

| | | | |
|--|------------|---|------------|
| 15 Eukaryotic and Archaeal Genome Replication and Expression | 353 | 18.5 Proteomics | 437 |
| 15.1 Why Consider Eukaryotic and Archaeal Genetics Together? | 354 | 18.6 Systems Biology | 440 |
| 15.2 DNA Replication | 354 | 18.7 Comparative Genomics | 440 |
| 15.3 Transcription | 358 | 18.8 Metagenomics | 443 |
| 15.4 Translation and Protein Maturation and Localization | 363 | | |
| 15.5 Regulation of Cellular Processes | 367 | | |
| 16 Mechanisms of Genetic Variation | 372 | Part Five The Diversity of the Microbial World | |
| 16.1 Mutations | 372 | 19 Microbial Taxonomy and the Evolution of Diversity | 447 |
| 16.2 Detection and Isolation of Mutants | 378 | 19.1 Introduction to Microbial Taxonomy | 448 |
| 16.3 DNA Repair | 380 | 19.2 Taxonomic Ranks | 449 |
| 16.4 Creating Additional Genetic Variability | 383 | 19.3 Exploring Microbial Taxonomy and Phylogeny | 450 |
| 16.5 Transposable Elements | 385 | 19.4 Phylogenetic Trees | 456 |
| 16.6 Bacterial Conjugation | 387 | 19.5 Evolutionary Processes and the Concept of a Microbial Species | 459 |
| 16.7 Bacterial Transformation | 393 | 19.6 <i>Bergey's Manual of Systematic Bacteriology</i> | 464 |
| 16.8 Transduction | 396 | Microbial Diversity & Ecology 19.1 | |
| 16.9 Evolution in Action: The Development of Antibiotic Resistance in Bacteria | 398 | "Official" Nomenclature Lists—A Letter from <i>Bergey's</i> | 465 |
| 17 Recombinant DNA Technology | 404 | 20 The Archaea | 469 |
| 17.1 Key Developments in Recombinant DNA Technology | 405 | 20.1 Overview of the Archaea | 470 |
| Techniques & Applications 17.1 | | 20.2 Phylum <i>Crenarchaeota</i> | 476 |
| Streptavidin-Biotin Binding and Biotechnology | 410 | 20.3 Phylum <i>Euryarchaeota</i> | 480 |
| 17.2 Polymerase Chain Reaction | 411 | 21 The Deinococci, Mollicutes, and Nonproteobacterial Gram-Negative Bacteria | 489 |
| 17.3 Cloning Vectors and Creating Recombinant DNA | 412 | 21.1 <i>Aquificae</i> and <i>Thermotogae</i> | 490 |
| Techniques & Applications 17.2 | | 21.2 <i>Deinococcus-Thermus</i> | 490 |
| How to Build a Microorganism | 416 | 21.3 Class <i>Mollicutes</i> (Phylum <i>Tenericutes</i>) | 491 |
| 17.4 Construction of Genomic Libraries | 417 | 21.4 Photosynthetic Bacteria | 494 |
| 17.5 Introducing Recombinant DNA into Host Cells | 418 | 21.5 Phylum <i>Planctomycetes</i> | 501 |
| 17.6 Expressing Foreign Genes in Host Cells | 419 | 21.6 Phylum <i>Chlamydiae</i> | 501 |
| | | 21.7 Phylum <i>Spirochaetes</i> | 504 |
| | | 21.8 Phylum <i>Bacteroidetes</i> | 506 |
| | | 21.9 Phylum <i>Verrucomicrobia</i> | 507 |
| 18 Microbial Genomics | 424 | 22 The Proteobacteria | 509 |
| 18.1 Determining DNA Sequences | 424 | 22.1 Class <i>Alphaproteobacteria</i> | 510 |
| 18.2 Genome Sequencing | 429 | 22.2 Class <i>Betaproteobacteria</i> | 518 |
| 18.3 Bioinformatics | 431 | 22.3 Class <i>Gammaproteobacteria</i> | 522 |
| 18.4 Functional Genomics | 433 | Microbial Diversity & Ecology 22.1 | |
| | | Bacterial Bioluminescence | 530 |
| | | 22.4 Class <i>Deltaproteobacteria</i> | 533 |
| | | 22.5 Class <i>Epsilonproteobacteria</i> | 538 |

Contents

| | | | |
|--|------------|--|------------|
| 23 Firmicutes: The Low G + C Gram-Positive Bacteria | 542 | Part Six Ecology and Symbiosis | |
| 23.1 Class <i>Clostridia</i> | 543 | 28 Biogeochemical Cycling and Global Climate Change | 632 |
| 23.2 Class <i>Bacilli</i> | 547 | 28.1 Biogeochemical Cycling | 633 |
| | | 28.2 Global Climate Change | 642 |
| 24 Actinobacteria: The High G + C Gram-Positive Bacteria | 555 | 29 Methods in Microbial Ecology | 646 |
| 24.1 Order <i>Actinomycetales</i> | 557 | 29.1 Culturing Techniques | 647 |
| 24.2 Order <i>Bifidobacteriales</i> | 566 | 29.2 Assessing Microbial Diversity | 651 |
| | | 29.3 Assessing Microbial Community Activity | 655 |
| 25 The Protists | 568 | 30 Microorganisms in Marine and Freshwater Ecosystems | 660 |
| 25.1 Overview of Protists | 569 | 30.1 Water as a Microbial Habitat | 661 |
| 25.2 Supergroup <i>Excavata</i> | 571 | 30.2 Microorganisms in Marine Ecosystems | 662 |
| 25.3 Supergroup <i>Amoebozoa</i> | 573 | 30.3 Microorganisms in Freshwater Ecosystems | 672 |
| 25.4 Supergroup <i>Rhizaria</i> | 574 | 31 Microorganisms in Terrestrial Ecosystems | 679 |
| 25.5 Supergroup <i>Chromalveolata</i> | 577 | 31.1 Soils as a Microbial Habitat | 680 |
| 25.6 Supergroup <i>Archaeplastida</i> | 584 | 31.2 Microorganisms in the Soil Environment | 683 |
| | | 31.3 Microbe-Plant Interactions | 684 |
| 26 The Fungi (Eumycota) | 588 | 31.4 The Subsurface Biosphere | 696 |
| 26.1 Overview of Fungal Biology | 590 | 32 Microbial Interactions | 699 |
| 26.2 <i>Chytridiomycota</i> | 593 | 32.1 Microbial Interactions | 700 |
| 26.3 <i>Zygomycota</i> | 593 | Microbial Diversity & Ecology 32.1 | |
| 26.4 <i>Glomeromycota</i> | 594 | <i>Wolbachia pipientis</i> : The World's Most Infectious Microbe? | 701 |
| 26.5 <i>Ascomycota</i> | 595 | 32.2 Human-Microbe Interactions | 713 |
| 26.6 <i>Basidiomycota</i> | 598 | Microbial Diversity & Ecology 32.2 | |
| Disease 26.1 | | Do Bacteria Make People Fat? | 714 |
| White-Nose Syndrome Is Decimating North American Bat Populations | 599 | 32.3 Normal Microbiota of the Human Body | 715 |
| 26.7 <i>Microsporidia</i> | 601 | | |
| | | Part Seven Pathogenicity and Host Response | |
| 27 Viruses | 604 | 33 Innate Host Resistance | 723 |
| 27.1 Virus Taxonomy and Phylogeny | 604 | 33.1 Innate Resistance Overview | 724 |
| 27.2 Double-Stranded DNA Viruses | 606 | 33.2 Physical and Mechanical Barrier Defenses of Innate Resistance | 725 |
| Microbial Diversity & Ecology 27.1 | | 33.3 Chemical Mediators in Innate Resistance | 728 |
| What Is a Virus? | 617 | 33.4 Cells, Tissues, and Organs of the Immune System | 735 |
| 27.3 Single-Stranded DNA Viruses | 617 | 33.5 Phagocytosis | 743 |
| 27.4 RNA Viruses: Unity Amidst Diversity | 619 | 33.6 Inflammation | 748 |
| 27.5 Double-Stranded RNA Viruses | 620 | | |
| 27.6 Plus-Strand RNA Viruses | 622 | | |
| 27.7 Minus-Strand RNA Viruses | 624 | | |
| 27.8 Retroviruses | 626 | | |
| 27.9 Reverse Transcribing DNA Viruses | 628 | | |

| | | | |
|--|------------|--|--|
| 34 Adaptive Immunity | 753 | | |
| 34.1 Overview of Adaptive Immunity | 753 | | |
| 34.2 Antigens | 755 | | |
| 34.3 Types of Adaptive Immunity | 756 | | |
| 34.4 Recognition of Foreignness | 757 | | |
| 34.5 T-Cell Biology | 760 | | |
| 34.6 B-Cell Biology | 764 | | |
| 34.7 Antibodies | 767 | | |
| Techniques & Applications 34.1 | | | |
| Monoclonal Antibody Therapy | 776 | | |
| 34.8 Action of Antibodies | 777 | | |
| 34.9 Acquired Immune Tolerance | 778 | | |
| 34.10 Immune Disorders | 779 | | |
| 35 Pathogenicity and Infection | 789 | | |
| 35.1 Pathogenicity and Infectious Disease | 790 | | |
| 35.2 Virulence | 793 | | |
| 35.3 Exposure and Transmission | 802 | | |
| Historical Highlights 35.1 | | | |
| The First Indications of Person-to-Person Spread of an Infectious Disease | 803 | | |
| <hr/> | | | |
| Part Eight Microbial Diseases, Detection, and Their Control | | | |
| 36 Clinical Microbiology and Immunology | 808 | | |
| 36.1 Overview of the Clinical Microbiology Laboratory | 808 | | |
| 36.2 Biosafety | 809 | | |
| 36.3 Identification of Microorganisms from Specimens | 812 | | |
| 36.4 Clinical Immunology | 820 | | |
| 37 Epidemiology and Public Health Microbiology | 830 | | |
| 37.1 Epidemiology | 830 | | |
| Historical Highlights 37.1 | | | |
| The Birth of Public Health in the United States | 831 | | |
| Historical Highlights 37.2 | | | |
| John Snow, the First Epidemiologist | 832 | | |
| 37.2 Epidemiological Methods | 832 | | |
| Historical Highlights 37.3 | | | |
| SARS: Evolution of a Virus | 833 | | |
| 37.3 Measuring Infectious Disease Frequency | 835 | | |
| 37.4 Patterns of Infectious Disease in a Population | 836 | | |
| Historical Highlights 37.4 | | | |
| “Typhoid Mary” | 837 | | |
| 37.5 Emerging and Reemerging Infectious Diseases and Pathogens | 839 | | |
| 37.6 Health-Care-Associated Infections | 841 | | |
| 37.7 Prevention and Control of Epidemics | 843 | | |

Brief Contents

About the Authors iii

Preface iv

Part One Introduction to Microbiology

- 1 The Evolution of Microorganisms and Microbiology 1
- 2 Microscopy 22
- 3 Bacterial Cell Structure 42
- 4 Archaeal Cell Structure 82
- 5 Eukaryotic Cell Structure 92
- 6 Viruses and Other Acellular Infectious Agents 112

Part Two Microbial Nutrition, Growth, and Control

- 7 Microbial Growth 133
- 8 Control of Microorganisms in the Environment 172
- 9 Antimicrobial Chemotherapy 189

Part Three Microbial Metabolism

- 10 Introduction to Metabolism 210
- 11 Catabolism: Energy Release and Conservation 230
- 12 Anabolism: The Use of Energy in Biosynthesis 266

Part Four Microbial Molecular Biology and Genetics

- 13 Bacterial Genome Replication and Expression 287
- 14 Regulation of Bacterial Cellular Processes 325
- 15 Eukaryotic and Archaeal Genome Replication and Expression 353
- 16 Mechanisms of Genetic Variation 372
- 17 Recombinant DNA Technology 404
- 18 Microbial Genomics 424

Part Five The Diversity of the Microbial World

- 19 Microbial Taxonomy and the Evolution of Diversity 447
- 20 The *Archaea* 469
- 21 The Deinococci, Mollicutes, and Nonproteobacterial Gram-Negative Bacteria 489
- 22 The Proteobacteria 509
- 23 Firmicutes: The Low G + C Gram-Positive Bacteria 542

- 24 Actinobacteria: The High G + C Gram-Positive Bacteria 555
- 25 The Protists 568
- 26 The *Fungi* (*Eumycota*) 588
- 27 Viruses 604

Part Six Ecology and Symbiosis

- 28 Biogeochemical Cycling and Global Climate Change 632
- 29 Methods in Microbial Ecology 646
- 30 Microorganisms in Marine and Freshwater Ecosystems 660
- 31 Microorganisms in Terrestrial Ecosystems 679
- 32 Microbial Interactions 699

Part Seven Pathogenicity and Host Response

- 33 Innate Host Resistance 723
- 34 Adaptive Immunity 753
- 35 Pathogenicity and Infection 789

Part Eight Microbial Diseases, Detection, and Their Control

- 36 Clinical Microbiology and Immunology 808
- 37 Epidemiology and Public Health Microbiology 830
- 38 Human Diseases Caused by Viruses and Prions 854
- 39 Human Diseases Caused by Bacteria 888
- 40 Human Diseases Caused by Fungi and Protists 932

Part Nine Applied Microbiology

- 41 Microbiology of Food 958
- 42 Biotechnology and Industrial Microbiology 979
- 43 Applied Environmental Microbiology 996

Appendix 1 A Review of the Chemistry of Biological Molecules A-1

Appendix 2 Common Metabolic Pathways A-9

Glossary G-1
