Part I Outbreak investigations	1
1 Tracing an outbreak of listeriosis in Austria: what an investigative microbiologist needs to consider	3
<i>D. Schoder, Institute of Milk Hygiene and Food Science, Austria, M. Wagner, Austrian Agency for Health and Food Safety, Austria and F. Allerberger, Christian-Doppler Laboratory for Molecular Food Analytics, Austria</i>	
1.1 Introduction to the case	3
1.2 Significance of the case	4
1.3 The case history continues	4
1.4 Resolution and outcomes	5
1.5 Commentary and personal reflections	7
1.6 Critical questions for discussion	9
1.7 References.....	9

2	A point-source outbreak of <i>Salmonella</i> in an ethnic community in the UK	11
	<i>A. G. Stewart, R. Vivancos and A. Keenan, Cheshire & Merseyside Health Protection Unit, UK and C. Theodore, Liverpool City Council, UK</i>	
2.1	Introduction.....	11
2.2	Significance of the situation.....	13
2.3	The case history continues.....	14
2.4	Resolution and outcomes.....	17
2.5	Commentary	18
2.6	Acknowledgements.....	20
2.7	Critical questions for discussion.....	21
2.8	Further reading.....	21
2.9	References.....	21
3	Investigating the source of a food poisoning incident in Cheshire, UK	23
	<i>A. G. Stewart and S. Ghebrehewet, Cheshire & Merseyside Health Protection Unit, UK</i>	
3.1	Introduction.....	23
3.2	Significance of the situation.....	25
3.3	The case history continues.....	27
3.4	Resolution and outcomes.....	29
3.5	Commentary	29
3.6	Acknowledgements.....	31
3.7	Critical questions for discussion.....	31
3.8	Further reading.....	31
3.9	References.....	31
4	Investigating a large outbreak of salmonellosis in the US involving fresh produce	33
	<i>M. A. Smith, Food and Drug Administration (FDA), USA and J. Hoorfar, Technical University of Denmark, Denmark</i>	
4.1	Introduction to the case.....	33
4.2	Significance of the case	35
4.3	Background information.....	36
4.4	The case history continues.....	38
4.5	Resolution and outcomes.....	39
4.6	Commentary and personal reflections	40
4.7	Critical questions for discussion.....	41
4.8	Further reading.....	41
4.9	References.....	41

5	What was the source of the 2011 outbreak of <i>Escherichia coli</i> in Germany and France?	43
	<i>L. D. Goodridge, Colorado State University, USA,</i> <i>J. T. LeJeune, The Ohio State University, USA and</i> <i>L. Beutin, Bundesinstitut für Risikobewertung (BfR), Germany</i>	
5.1	Introduction to the case.....	43
5.2	Significance of the case	44
5.3	The case continues	44
5.4	Resolution and outcomes	48
5.5	Commentary and personal reflections	49
5.6	Acknowledgments	51
5.7	Critical questions for discussion.....	51
5.8	References.....	51
6	Tracing the source of a community-wide gastroenteric outbreak caused by <i>Campylobacter</i> in Finland	54
	<i>M.-L. Hänninen, Helsinki University, Finland and</i> <i>A. Hörman, The Finnish Defence Forces, Finland</i>	
6.1	Introduction to the case.....	54
6.2	Significance of the case	55
6.3	The case history continues	56
6.4	Management of the outbreak and source tracing.....	57
6.5	Conclusions of the outbreak and attempts to identify its source	59
6.6	Commentary: how can safety be improved and what constitutes an outbreak?.....	60
6.7	Critical questions for discussion.....	62
6.8	Further reading.....	62
6.9	References.....	62
7	One pathogen but two different types of foodborne outbreak: <i>Bacillus cereus</i> in catering facilities in Germany	63
	<i>M. Ehling-Schulz, University of Veterinary Medicine Vienna,</i> <i>Austria and U. Messelh�usser, Bavarian Health and Food Safety</i> <i>Authority, Germany</i>	
7.1	Introduction to the cases	63
7.2	Significance of the cases	66
7.3	The case histories continue.....	67
7.4	Resolution and outcomes	68
7.5	Commentary and personal reflections	69
7.6	Critical questions for discussion.....	69
7.7	References.....	70

8 Investigating a suspected case of mycotoxin poisoning in South Africa	71
<i>M. F. Dutton, University of KwaZulu Natal, South Africa</i>	
8.1 Introduction to the case.....	71
8.2 Significance of the case	75
8.3 The case continues.....	75
8.4 Outcomes	77
8.5 Commentary	77
8.6 Critical questions for discussion.....	78
8.7 Further reading.....	78
8.8 References.....	78
9 Investigations of foodborne outbreaks caused by a parasite in Canada	80
<i>B. Dixon, Health Canada, Canada, L. Landry, Public Health Agency of Canada, Canada and F. Milord, Direction de la Santé Publique de la Montérégie, Canada</i>	
9.1 Introduction to the cases.....	80
9.2 Significance of the cases.....	82
9.3 The background to the cases: previous outbreaks and challenges associated with detection and control.....	84
9.4 The case histories continue: traceback investigations and follow-up.....	88
9.5 Resolution and outcomes.....	88
9.6 Commentary	89
9.7 Acknowledgments	89
9.8 Critical questions for discussion.....	89
9.9 References.....	90
Part II Source tracing	93
10 Troubleshooting the environmental source of contamination with <i>Listeria monocytogenes</i> in a typical small food manufacturing plant in Ireland	95
<i>K. N. Jordan, K. Hunt and E. M. Fox, Teagasc Food Research Centre, Ireland</i>	
10.1 Introduction to the case.....	95
10.2 Significance of the case	97
10.3 The case history continues	98
10.4 Resolution and outcomes.....	100
10.5 Commentary and personal reflections	100
10.6 Critical questions for discussion.....	100
10.7 Further reading.....	101

11 Tracing the source of persistent contamination of ready-to-eat chicken products with <i>Listeria monocytogenes</i> in Italy	102
<i>V. Biguzzi (retired), G. Pezzotti, Istituto Zooprofilattico Sperimentale dell'Umbria e le Marche, Italy and M. V. Gianfranceschi and D. De Medici, Istituto Superiore di Sanità, Italy</i>	
11.1 Introduction to the case.....	102
11.2 Significance of the case	103
11.3 The case history continues	105
11.4 Resolution and outcomes.....	107
11.5 Commentary	108
11.6 Acknowledgements.....	108
11.7 Critical questions for discussion	109
11.8 References.....	109
12 An unforeseen source of aflatoxins in milk in Sweden	110
<i>E. Nordkvist, National Veterinary Institute, Sweden</i>	
12.1 Introduction to the case.....	110
12.2 Significance of the case	111
12.3 The case continues	112
12.4 Resolution and outcomes.....	113
12.5 Commentary and personal reflections	113
12.6 Acknowledgments	114
12.7 Critical questions for discussion.....	114
12.8 References	115
13 Investigations prompted by the discovery of high levels of <i>Salmonella</i> in fresh herbs in the UK	116
<i>N. C. Elviss and F. Jørgensen, Health Protection Agency (HPA), UK</i>	
13.1 Introduction.....	116
13.2 Significance of the case	117
13.3 The case history continues	118
13.4 Resolution and outcomes	120
13.5 Commentary	120
13.6 Acknowledgements.....	121
13.7 Critical questions for discussion.....	121
13.8 References.....	122
14 Source tracing in Thailand following contamination of dog chew toys with <i>Salmonella</i>	123
<i>S. D. Pillai, Texas A&M University, USA</i>	
14.1 Introduction to the case.....	123
14.2 Significance of the case	124
14.3 Case history continues	124
14.4 Resolution and outcomes.....	126
14.5 Commentary and personal reflections	127

14.6	Acknowledgments	128
14.7	Critical questions for discussion	128
14.8	References.....	129
15	Analysing tap-water from households of patients with inflammatory bowel disease in Norway	130
	<i>K. Rudi, Hedmark University College and The Norwegian University for Life Sciences, Norway, P. Ricanek, Akershus University Hospital, Norway, T. Tannæs and S. Brackmann, University of Oslo, Norway, G. Perminow, Oslo University Hospital, Norway and M. H. Vatn, University of Oslo, Norway and Oslo University Hospital, Norway</i>	
15.1	Introduction to the case.....	130
15.2	Significance of the case	131
15.3	The case history continues.....	132
15.4	Resolution and outcomes.....	135
15.5	Commentary	135
15.6	Acknowledgments	136
15.7	Critical questions for discussion.....	136
15.8	References.....	136
Part III	Crisis management	139
16	A proactive attempt to control an outbreak of foodborne disease in humans after detection of <i>Salmonella</i> during surveillance and control of pork in Denmark.....	141
	<i>A. Wingstrand, National Food Institute, Technical University of Denmark, Denmark, T. Jensen, Danish Veterinary and Food Administration, Denmark, G. Sørensen, National Food Institute, Technical University of Denmark, Denmark, S. Gubbels, Statens Serum Institut, Denmark and European Centre for Disease Prevention and Control, Sweden, L. J. Porsbo, National Food Institute, Technical University of Denmark, Denmark, S. Ethelberg, Statens Serum Institut, Denmark, G. O. Bjerager, Danish Veterinary and Food Administration, Denmark and K. Kjeldsen, M. Torpdahl and K. G. Kuhn, Statens Serum Institut, Denmark</i>	
16.1	Introduction to the case.....	141
16.2	Significance of the case	144
16.3	The outbreak history continues	145
16.4	Resolution and outcomes.....	148
16.5	Comments and personal reflections	148
16.6	Acknowledgements.....	149
16.7	Critical questions for discussion.....	149
16.8	References.....	150

17 Managing and learning from an anthrax outbreak in a Swedish beef cattle herd	151
<i>R. Knutsson, V. Båverud, M. Elvander and E. Olsson Engvall, National Veterinary Institute (SVA), Sweden, K. Eliasson, National Board of Agriculture (SJV), Sweden and S. Sternberg Lewerin, Swedish University of Agricultural Sciences (SLU), Sweden</i>	
17.1 Introduction to the case	151
17.2 The Swedish outbreak in 2008: how did it all begin?	152
17.3 The case history continues	152
17.4 Significance of the case	153
17.5 Resolution and outcomes	155
17.6 Commentary	156
17.7 Critical questions	158
17.8 Acknowledgments	158
17.9 References.....	159
18 Mounting an effective response to an outbreak of viral disease involving street food vendors in Indonesia	161
<i>D. Orlando, Dennis, M. Suci Hardianti and F. M. C. Sigit Setyabudi, Universitas Gadjah Mada, Indonesia</i>	
18.1 Introduction to the case.....	161
18.2 Significance of the case	162
18.3 The case history continues.....	164
18.4 Commentary and personal reflections	166
18.5 Acknowledgements.....	166
18.6 Critical questions for discussion.....	166
18.7 References.....	166
19 Handling of the media during an incident in Romania involving dioxin contamination of yoghurts.....	168
<i>A. I. Nicolau, Dunarea de Jos University of Galati, Romania</i>	
19.1 Introduction to the case.....	168
19.2 Significance of the case	170
19.3 The case history continues	171
19.4 Resolution and outcomes.....	171
19.5 Commentary and personal reflections	172
19.6 Critical questions for discussion.....	176
19.7 References.....	176

Part IV Farm-level interventions	179
20 Is it possible to reduce foodborne <i>Campylobacter</i> infections in humans through vaccination of animals?	181
<i>J. Hoorfar, Technical University of Denmark, Denmark</i>	
20.1 Introduction to the case.....	181
20.2 Significance of the case	182
20.3 Why vaccinate poultry and not humans?.....	184
20.4 What vaccination strategy to use?	184
20.5 Resolutions and outcome.....	185
20.6 Critical questions for discussion	186
20.7 Acknowledgements.....	186
20.8 References.....	186
21 The free-range meat paradox: the conflict between free-range poultry production systems and biocontainment against zoonotic microorganisms	189
<i>L. S. Christensen, Islands Organic Ltd, Denmark</i>	
21.1 Introduction to the case.....	189
21.2 Significance of the case	193
21.3 The case continues.....	194
21.4 Resolution and outcomes.....	194
21.5 Commentary	196
21.6 Acknowledgements.....	196
21.7 Critical questions	196
21.8 References.....	197
22 How does Sweden control <i>Salmonella</i> before it enters the food chain?.....	198
<i>P. Häggblom, National Veterinary Institute, Sweden</i>	
22.1 Introduction to the case	198
22.2 Significance of the case	199
22.3 The case history continues	200
22.4 Resolution and outcomes.....	203
22.5 Commentary	203
22.6 Acknowledgements.....	204
22.7 Critical questions	204
22.8 References.....	205
23 Bovine spongiform encephalitis: the case of an unexpected and rapidly spreading epidemic in cattle with serious consequences.....	206
<i>N. Skovgaard, University of Copenhagen, Denmark</i>	
23.1 Introduction to the case.....	206
23.2 Significance of the case	207

23.3	Background to the case: the nature of BSE and vCJD	208
23.4	The case continues	209
23.5	Resolution and outcomes	211
23.6	Commentary	213
23.7	Acknowledgement	213
23.8	Critical questions for discussion	213
23.9	Further reading.....	214
24	The continuing debate over increasing consumption of raw (unpasteurised) milk: is it safe?	215
	<i>K. N. Jordan and K. Hunt, Teagasc Food Research Centre, Ireland and J. Hoorfar, Technical University of Denmark, Denmark</i>	
24.1	Introduction to the case.....	215
24.2	Significance of the case	218
24.3	The case continues	218
24.4	Commentary and personal reflections	219
24.5	Acknowledgement	220
24.6	Critical questions for discussion	220
24.7	Further reading.....	220
24.8	References.....	220
Part V	Safe food production	223
25	Challenges in food safety certification of a small enterprise producing a speciality product in Cyprus.....	225
	<i>E. H. Drosinos, S. G. Charalambidou and P. N. Skandamis, Agricultural University of Athens, Greece</i>	
25.1	Introduction to the case.....	225
25.2	Significance of the case	230
25.3	The case continues	231
25.4	Outcomes and commentary	234
25.5	Acknowledgments	235
25.6	References.....	235
26	The dilemma of regulatory testing of dairy foods in Australia: minimising risk to the public while avoiding unnecessary regulatory burden	237
