<i>Woodhead Publishing Series in Food Science, Technology and Nutrition</i>	<i>xv</i>
<i>Preface</i>	<i>xxiii</i>
Part I Environmental impacts of food production and processing	
1 Improving nutrient management in agriculture to reduce eutrophication, acidification and climate change	3
<i>C. Cederberg, SIK – the Swedish Institute for Food and Biotechnology, Sweden</i>	
1.1 Introduction	3
1.2 Eutrophication and acidification.....	4
1.3 Climate change.....	7
1.4 Mismanagement of nutrients.....	10
1.5 Future trends.....	12
1.6 References	14
2 Increasing the efficiency of water use in crop production	16
<i>P. S. Bindraban, R. E. E. Jongschaap and H. van Keulen, Agrosystems Research, Plant Research International, Wageningen University and Research Centre (WUR), The Netherlands</i>	
2.1 Introduction	16
2.2 Water scarcity: the global dimension.....	17
2.3 Future demand for water and food.....	20
2.4 Improving water use efficiency in agriculture	21
2.5 Future trends and options to increase water use efficiency	28
2.6 Conclusions	32
2.7 References	33

Part II Life Cycle Assessment of food production and processing

3	Life Cycle Assessment (LCA) of food production and processing: An introduction	37
	<i>S. J. McLaren, Massey University, New Zealand</i>	
3.1	Introduction	37
3.2	History of Life Cycle Assessment (LCA).....	38
3.3	LCA as a decision-support tool	40
3.4	Application of LCA to food systems	44
3.5	Future trends.....	53
3.6	Sources of further information and advice	55
3.7	References	56
4	Methodology for Life Cycle Assessment	59
	<i>A-M. Tillman, Chalmers University of Technology, Sweden</i>	
4.1	Introduction	59
4.2	Application of LCA	63
4.3	LCA methodology in short	66
4.4	Critical methodology choices.....	70
4.5	Examples of different applications' demands on methodology	76
4.6	Recent trends in LCA.....	77
4.7	Sources of further information and advice	79
4.8	References	80
5	Challenges relating to data and system delimitation in Life Cycle Assessments of food products	83
	<i>J. H. Schmidt, Aalborg University, Denmark</i>	
5.1	Introduction	83
5.2	System delimitation in agricultural Life Cycle Assessments (LCAs)	84
5.3	System delimitation in electricity LCAs.....	89
5.4	System delimitation and by-products in food LCAs.....	91
5.5	Future trends	95
5.6	Sources of further information and advice	96
5.7	References	96
6	Challenges in assessing the environmental impacts of crop production and horticulture	98
	<i>T. Nemecek and G. Gaillard, Agroscope Reckenholz-Tänikon Research Station ART, Switzerland</i>	
6.1	Introduction	98
6.2	Main challenges: (a) Defining agricultural systems	99
6.3	Main challenges: (b) Understanding agricultural systems	103
6.4	Implications and recommendations.....	109
6.5	Future trends.....	111

6.6	References	112
7	Complexities in assessing the environmental impacts of livestock products	117
	<i>T. L. T. Nguyen, L. Mogensen and J. E. Hermansen, Aarhus University, Denmark, and N. Halberg, International Centre for Research in Organic Food Systems (ICROFS), Denmark</i>	
7.1	Introduction	117
7.2	Complexities in assessing the environmental impacts of livestock systems	118
7.3	Inventory analysis	124
7.4	Impact assessment	131
7.5	Interpretation of results	135
7.6	Future trends	136
7.7	References	139
8	Challenges in assessing the environmental impacts of aquaculture and fisheries	142
	<i>F. Ziegler, SIK – the Swedish Institute for Food and Biotechnology, Sweden</i>	
8.1	Introduction	143
8.2	Overview of the biological impacts of fishing.....	144
8.3	Overview of the biological impacts of aquaculture	149
8.4	Energy use and carbon footprint of seafood supply chains.....	152
8.5	Eco-labeling of seafood.....	156
8.6	Conclusions and future trends.....	158
8.7	Acknowledgement.....	159
8.8	References	159
Part III Current and future applications of Life Cycle Assessment and related approaches		
9	Towards sustainable industrial food production using Life Cycle Assessment approaches	165
	<i>U. Sonesson and J. Berlin, SIK – the Swedish Institute for Food and Biotechnology, Sweden, and A. Hospido, University of Santiago de Compostela, Spain</i>	
9.1	Introduction	165
9.2	Case studies.....	166
9.3	Methodological approach: proposal of a framework	171
9.4	Discussion	174
9.5	Conclusions	175
9.6	References	176

10	Addressing land use and ecotoxicological impacts in Life Cycle Assessments of food production technologies	177
	<i>A. M. De Schryver, R. van Zelm and M. A. J. Huijbregts, Radboud University Nijmegen, The Netherlands, and M. Goedkoop, PRé Consultants b.v., The Netherlands</i>	
10.1	Introduction	177
10.2	Life cycle impact methods for land occupation and transformation	179
10.3	Life cycle impact methods for ecotoxicity	189
10.4	Future trends.....	199
10.5	Conclusions	200
10.6	Sources of further information and advice	200
10.7	References	201
11	Combining Life Cycle Assessment of food products with economic tools.....	207
	<i>E. Settanni, B. Notarnicola and G. Tassielli, University of Bari, Italy</i>	
11.1	Introduction	207
11.2	Methods of combining Life Cycle Assessment of food products with economics tools	208
11.3	Discussion and conclusion	215
11.4	References	216
12	Inclusion of social aspects in Life Cycle Assessment of food	219
	<i>S. A. Kruse, Ecotrust, USA</i>	
12.1	Introduction	219
12.2	Including social aspects in Life Cycle Assessment (LCA) of food	220
12.3	Methods of including social aspects in LCA of food	222
12.4	Applications	226
12.5	Future trends.....	230
12.6	Sources of further information and advice	231
12.7	References	232
13	Ecodesign of food products	234
	<i>M. Thrane, Aalborg University, Denmark, and A. Flysjö, Arla Foods, Denmark</i>	
13.1	Introduction	234
13.2	What is ecodesign?.....	235
13.3	The spiderweb approach	238
13.4	Perspectives	247
13.5	Future trends.....	250
13.6	Sources of further information and advice	251
13.7	References	252

14	Footprinting methods for assessment of the environmental impacts of food production and processing	255
	<i>R. Lillywhite, University of Warwick, UK</i>	
14.1	Introduction	255
14.2	Footprinting, comparison and contrast to Life Cycle Assessment (LCA)	256
14.3	An introduction to ecological footprinting.....	257
14.4	Water footprinting	261
14.5	Carbon footprinting	264
14.6	Environmental footprinting	266
14.7	Nitrogen footprinting.....	267
14.8	Non-environment footprinting.....	268
14.9	Future trends.....	268
14.10	Sources of further information and advice	269
14.11	References	269
15	Carbon footprinting and carbon labelling of food products.....	272
	<i>K. Plassmann and G. Edwards-Jones, Bangor University, UK</i>	
15.1	Introduction	272
15.2	Principles of carbon analysis and carbon labelling of food products.....	273
15.3	Examples of some food products for which carbon footprints have been published	276
15.4	Difficulties and uncertainties in calculating carbon footprints	286
15.5	Future trends.....	292
15.6	Sources of further information and advice	293
15.7	References	294
16	Sustainability indicators for the food supply chain	297
	<i>N. Yakovleva, Cardiff University, UK, J. Sarkis, Clark University, USA, and T. W. Sloan, University of Massachusetts Lowell, USA</i>	
16.1	Introduction	297
16.2	Sustainability indicators and sustainability benchmarking in the supply chain	299
16.3	Sustainability indicators for the food supply chain	302
16.4	Application of analytical network processing (ANP) to sustainability scores	311
16.5	Future trends	322
16.6	Sources of further information and advice	323
16.7	References	324

Part IV Environmental management in the food industry

17	Establishing an environmental management system in the food industry	333
	<i>C. Foster, EuGeos Limited, UK</i>	
17.1	Introduction	333
17.2	Drivers for and benefits of implementing environmental management systems (EMS) in the food industry	334
17.3	Food industry context.....	338
17.4	Implementing an EMS	340
17.5	Auditing environmental management systems.....	350
17.6	Success factors	352
17.7	Conclusions	353
17.8	Sources of further information and advice	354
17.9	References	355
18	Environmental training for the food industry	356
	<i>B. P. Weidema, 2.-0 LCA Consultants, Denmark</i>	
18.1	Introduction	356
18.2	The value and nature of environmental training.....	357
18.3	Training needs and improving environmental understanding throughout the organisation	358
18.4	The concept of the learning organisation: thinking in systems	360
18.5	Barriers to effective training	363
18.6	Learning in the supply chain.....	365
18.7	The external training situation: shared vision and the ‘learning lab’.....	366
18.8	On-the-job training.....	367
18.9	Internet-based training.....	368
18.10	Maintaining a learning organisation.....	369
18.11	Future trends.....	370
18.12	Sources of further information and advice	371
18.13	References	372
19	Eco-labelling of agricultural food products	374
	<i>H. A. Udo de Haes and G. R. de Snoo, Leiden University, The Netherlands</i>	
19.1	Introduction	374
19.2	Main approaches	376
19.3	Comparison	382
19.4	Effectiveness	387
19.5	Future trends.....	391
19.6	Conclusions	394
19.7	References	395
	<i>Index</i>	<i>399</i>
