

Edited by James G. Brennan and Alistair S. Grandison

Food Processing Handbook

2nd edition

Volume 1

**WILEY-
VCH**

WILEY-VCH Verlag GmbH & Co. KGaA

Contents

Preface to the Second Edition XV

Preface to the First Edition XVII

List of Contributors XIX

Content of Volume 1

1	Postharvest Handling and Preparation of Foods for Processing	1
	<i>Alistair S. Grandison</i>	
1.1	Introduction	1
1.2	Properties of Raw Food Materials and Their Susceptibility to Deterioration and Damage	2
1.2.1	Raw Material Properties	3
1.2.1.1	Geometric Properties	3
1.2.1.2	Color	4
1.2.1.3	Texture	4
1.2.1.4	Flavor	5
1.2.1.5	Functional Properties	5
1.2.2	Raw Material Specifications	6
1.2.3	Deterioration of Raw Materials	6
1.2.4	Damage to Raw Materials	7
1.2.5	Improving Processing Characteristics through Selective Breeding and Genetic Engineering	7
1.3	Storage and Transportation of Raw Materials	9
1.3.1	Storage	9
1.3.1.1	Temperature	10
1.3.1.2	Humidity	11
1.3.1.3	Composition of Atmosphere	12
1.3.1.4	Other Considerations	12
1.3.2	Transportation	13
1.4	Raw Material Cleaning	13
1.4.1	Dry Cleaning Methods	14
1.4.2	Wet Cleaning Methods	17
1.4.3	Peeling	20
1.5	Sorting and Grading	20

1.5.1	Criteria and Methods of Sorting	20
1.5.2	Grading	23
1.6	Blanching	25
1.6.1	Mechanisms and Purposes of Blanching	25
1.6.2	Processing Conditions	27
1.6.3	Blanching Equipment	27
1.7	Sulfiting of Fruits and Vegetables	28
	References	29
2	Thermal Processing	31
	<i>Michael J. Lewis and Soojin Jun</i>	
2.1	Introduction	31
2.1.1	Reasons for Heating Foods	32
2.1.2	Safety and Quality Issues	33
2.1.3	Product Range	34
2.2	Reaction Kinetics	35
2.2.1	Microbial Inactivation	35
2.2.2	Heat Resistance at Constant Temperature	35
2.3	Temperature Dependence	37
2.3.1	Batch and Continuous Processing	39
2.3.2	Continuous Heat Exchangers	42
2.3.2.1	Direct Heating	44
2.4	Heat Processing Methods	46
2.4.1	Thermization	46
2.4.2	Pasteurization	47
2.4.2.1	HTST Pasteurization	48
2.4.2.2	Tunnel (Spray) Pasteurizers	51
2.4.2.3	Extended Shelf Life Products	52
2.4.3	Sterilization	52
2.4.3.1	In-Container Processing	52
2.4.3.2	UHT Processing	60
2.5	Special Problems with Viscous and Particulate Products	65
2.6	Ohmic Heating	67
2.6.1	Introduction	67
2.6.2	Fundamental Principles of Ohmic Heating	67
2.6.2.1	Electrochemical Reaction on Electrodes	68
2.6.2.2	Heating Pattern of Multiphase Food in Ohmic System	69
2.6.2.3	Modeling of Ohmic Heating	70
2.7	Filling Procedures	72
2.8	Storage	72
	References	73
3	Evaporation and Dehydration	77
	<i>James G. Brennan</i>	
3.1	Evaporation (Concentration, Condensing)	77
3.1.1	General Principles	77

3.1.2	Equipment Used in Vacuum Evaporation	79
3.1.2.1	Vacuum Pans	79
3.1.2.2	Short Tube Vacuum Evaporators	80
3.1.2.3	Long-Tube Evaporators	81
3.1.2.4	Plate Evaporators	82
3.1.2.5	Agitated Thin-Film Evaporators	83
3.1.2.6	Centrifugal Evaporators	83
3.1.2.7	Refractance Window Evaporator	83
3.1.2.8	Ancillary Equipment	84
3.1.3	Multiple-Effect Evaporation	84
3.1.4	Vapor Recompression	85
3.1.5	Applications for Evaporation	86
3.1.5.1	Concentrated Liquid Products	86
3.1.5.2	Evaporation as a Preparatory Step to Further Processing	88
3.1.5.3	The Use of Evaporation to Reduce Transport, Storage, and Packaging Costs	89
3.2	Dehydration (Drying)	91
3.2.1	General Principles	91
3.2.2	Drying Solid Foods in Heated Air	92
3.2.3	Equipment Used in Hot Air Drying of Solid Food Pieces	94
3.2.3.1	Cabinet (Tray) Dryer	94
3.2.3.2	Tunnel Dryer	94
3.2.3.3	Conveyor (Belt) Dryer	95
3.2.3.4	Bin Dryer	95
3.2.3.5	Fluidized Bed Dryer	96
3.2.3.6	Pneumatic (Flash) Dryer	98
3.2.3.7	Rotary Dryer	99
3.2.4	Drying of Solid Foods by Direct Contact with a Heated Surface	99
3.2.5	Equipment Used in Drying Solid Foods by Contact with a Heated Surface	100
3.2.5.1	Vacuum Cabinet (Tray or Shelf) Dryer	100
3.2.5.2	Double Cone Vacuum Dryer	100
3.2.6	Freeze Drying (Sublimation Drying, Lyophilization) of Solid Foods	101
3.2.7	Equipment Used in Freeze Drying Solid Foods	102
3.2.7.1	Cabinet (Batch) Freeze Dryer	102
3.2.7.2	Tunnel (Semi-continuous) Freeze Dryer	103
3.2.7.3	Continuous-Freeze Dryers	104
3.2.7.4	Vacuum Spray Freeze Dryer	104
3.2.8	Drying by the Application of Radiant (Infrared) Heat	105
3.2.9	Drying by the Application of Dielectric Energy	105
3.2.10	Electrohydrodynamic Drying (EHD)	107
3.2.11	Osmotic Dehydration	108
3.2.12	Sun and Solar Drying	110
3.2.13	Drying Food Liquids and Slurries in Heated Air	111

- 3.2.13.1 Spray Drying 111
- 3.2.14 Drying Liquids and Slurries by Direct Contact With a Heated Surface 116
 - 3.2.14.1 Drum (Roller, Film) Dryer 116
 - 3.2.14.2 Vacuum Band (Belt) Dryer 117
 - 3.2.14.3 Refractance Window Drying System 118
- 3.2.15 Other Methods Used for Drying Liquids and Slurries 118
- 3.2.16 Applications of Dehydration 119
 - 3.2.16.1 Dehydrated Vegetable Products 119
 - 3.2.16.2 Dehydrated Fruit Products 121
 - 3.2.16.3 Dehydrated Dairy Products 122
 - 3.2.16.4 Instant Coffee and Tea 123
 - 3.2.16.5 Dehydrated Meat Products 123
 - 3.2.16.6 Dehydrated Fish Products 123
- 3.2.17 Stability of Dehydrated Foods 124
 - References 126

4 Freezing 131

José Mauricio Pardo and Keshavan Niranjan

- 4.1 Introduction 131
- 4.2 Refrigeration Methods and Equipment 131
 - 4.2.1 Plate Contact Systems 132
 - 4.2.2 Gas Contact Refrigerators 132
 - 4.2.3 Immersion and Liquid Contact Refrigeration 133
 - 4.2.4 Cryogenic Freezing 134
- 4.3 Low Temperature Production 135
 - 4.3.1 Mechanical Refrigeration Cycle 135
 - 4.3.1.1 The Pressure and Enthalpy Diagram 137
 - 4.3.1.2 The Real Refrigeration Cycle (Standard Vapor Compression Cycle) 138
 - 4.3.2 Equipment for a Mechanical Refrigeration System 139
 - 4.3.2.1 Evaporators 139
 - 4.3.2.2 Condensers 140
 - 4.3.2.3 Compressors 141
 - 4.3.2.4 Expansion Valves 142
 - 4.3.2.5 Refrigerants 142
 - 4.3.3 Common Terms Used in Refrigeration System Design 143
 - 4.3.3.1 Cooling Load 144
 - 4.3.3.2 Coefficient of Performance 144
 - 4.3.3.3 Refrigerant Flow Rate 144
 - 4.3.3.4 Work Done by the Compressor 145
 - 4.3.3.5 Heat Exchanged in the Condenser and Evaporator 145
- 4.4 Freezing Kinetics 145
 - 4.4.1 Formation of the Microstructure during Solidification 146
 - 4.4.2 Mathematical Models for Freezing Kinetics 147

- 4.4.2.1 Neumann's Model 148
- 4.4.2.2 Plank's Model 148
- 4.4.2.3 Cleland's Model 149
- 4.4.2.4 Pham's Model 149
- 4.5 Effects of Refrigeration on Food Quality 150
- References 151

- 5 Irradiation 153**
Alistair S. Grandison
- 5.1 Introduction 153
- 5.2 Principles of Irradiation 153
 - 5.2.1 Physical Effects 154
 - 5.2.2 Chemical Effects 158
 - 5.2.3 Biological Effects 158
- 5.3 Equipment 160
 - 5.3.1 Isotope Sources 160
 - 5.3.2 Machine Sources 162
 - 5.3.3 Control and Dosimetry 162
- 5.4 Safety Aspects 165
- 5.5 Effects on the Properties of Food 165
- 5.6 Detection Methods for Irradiated Foods 167
- 5.7 Applications and Potential Applications 168
 - 5.7.1 General Effects and Mechanisms of Irradiation 169
 - 5.7.1.1 Inactivation of Microorganisms 169
 - 5.7.1.2 Inhibition of Sprouting 170
 - 5.7.1.3 Delay of Ripening and Senescence 171
 - 5.7.1.4 Insect Disinfestation 171
 - 5.7.1.5 Elimination of Parasites 171
 - 5.7.1.6 Miscellaneous Effects on Food Properties and Processing 172
 - 5.7.1.7 Combination Treatments 172
 - 5.7.2 Applications to Particular Food Classes 172
 - 5.7.2.1 Meat and Meat Products 172
 - 5.7.2.2 Fish and Shellfish 173
 - 5.7.2.3 Fruits and Vegetables 174
 - 5.7.2.4 Bulbs and Tubers 174
 - 5.7.2.5 Spices and Herbs 175
 - 5.7.2.6 Cereals and Cereal Products 175
 - 5.7.2.7 Other Miscellaneous Foods 175
 - References 176

- 6 High Pressure Processing 179**
Margaret F. Patterson, Dave A. Ledward, Craig Leadley, and Nigel Rogers
- 6.1 Introduction 179
- 6.2 Effect of High Pressure on Microorganisms 182
 - 6.2.1 Bacterial Spores 182
 - 6.2.2 Vegetative Bacteria 183

6.2.3	Yeasts and Molds	183
6.2.4	Viruses	184
6.2.5	Parasites	184
6.2.6	Strain Variation within a Species	185
6.2.7	Stage of Growth of Microorganisms	185
6.2.8	Magnitude and Duration of the Pressure Treatment	185
6.2.9	Effect of Temperature on Pressure Resistance	185
6.2.10	Substrate	186
6.2.11	Combination Treatments Involving Pressure	186
6.2.12	Effect of High Pressure on the Microbiological Quality of Foods	187
6.3	Ingredient Functionality	188
6.4	Enzyme Activity	189
6.5	Foaming and Emulsification	191
6.6	Gelation	193
6.7	Organoleptic Considerations	195
6.8	Equipment for HPP	196
6.8.1	HPP Systems	196
6.9	Pressure Vessel Considerations	197
6.9.1	High Pressure Pumps	198
6.9.2	Control Systems	199
6.10	Current and Potential Applications of HPP for Foods	200
	References	201

7 Emerging Technologies for Food Processing 205

Liliana Alamilla-Beltrán, Jorge Welti-Chanes, José Jorge Chanona-Pérez, Ma de Jesús Perea-Flores, and Gustavo F. Gutiérrez-López

7.1	Introduction	205
7.2	Pulsed Electric Field Processing	206
7.2.1	PEF Treatment Chambers	207
7.2.2	Effects of PEF on Microorganisms	208
7.2.3	Factors Affecting the Ability of PEF to Inactivate Microorganisms	209
7.2.3.1	Processing Factors	209
7.2.3.2	Microorganism Factors	210
7.2.3.3	Food Factors	210
7.2.4	Effects of PEF on Enzymes	212
7.2.5	Other Applications of PEF	214
7.3	Ultrasound Power	215
7.3.1	Applications of Ultrasound in the Food Industry	216
7.3.1.1	Low-Intensity Ultrasound	216
7.3.1.2	High-Intensity Ultrasound	217
7.3.2	Enzymes	217
7.3.3	Microorganisms	218
7.3.4	Fruits and Vegetables	218
7.4	Other Technologies	218
7.4.1	High-Pressure Carbon Dioxide	218

- 7.4.2 Ozonization 219
- 7.4.3 Plasma Processing 220
- 7.5 Conclusions 220
- References 221

- 8 Packaging 225**
James G. Brennan and Brian P.F. Day
- 8.1 Introduction 225
- 8.2 Factors Affecting the Choice of a Packaging Material and/or Container for a Particular Duty 226
 - 8.2.1 Mechanical Damage 226
 - 8.2.2 Permeability Characteristics 226
 - 8.2.3 Greaseproofness 228
 - 8.2.4 Temperature 228
 - 8.2.5 Light 229
 - 8.2.6 Chemical Compatibility of the Packaging Material and the Contents of the Package 229
 - 8.2.7 Protection against Microbial Contamination 230
 - 8.2.8 In-Package Microflora 231
 - 8.2.9 Protection against Insect and Rodent Infestation 231
 - 8.2.10 Taint 232
 - 8.2.11 Tamper-Evident/Resistant Packages 232
 - 8.2.12 Other Factors 233
- 8.3 Materials and Containers Used for Packaging Foods 233
 - 8.3.1 Papers, Paperboards, and Fiberboards 233
 - 8.3.1.1 Papers 233
 - 8.3.1.2 Paperboards 235
 - 8.3.1.3 Molded Pulp 236
 - 8.3.1.4 Fiberboards 236
 - 8.3.1.5 Composite Containers 236
 - 8.3.2 Wooden Containers 237
 - 8.3.3 Textiles 237
 - 8.3.4 Flexible Films 237
 - 8.3.4.1 Regenerated Cellulose 238
 - 8.3.4.2 Cellulose Acetate 239
 - 8.3.4.3 Polyethylene 239
 - 8.3.4.4 Polyvinyl Chloride 240
 - 8.3.4.5 Polyvinylidene Chloride 240
 - 8.3.4.6 Polypropylene 240
 - 8.3.4.7 Polyester 241
 - 8.3.4.8 Polystyrene 241
 - 8.3.4.9 Polyamides 241
 - 8.3.4.10 Polycarbonate 242
 - 8.3.4.11 Polytetrafluoroethylene 242
 - 8.3.4.12 Ethylene-Vinyl Acetate Copolymers 243

8.3.5	Metallized Films	243
8.3.6	Flexible Laminates	243
8.3.7	Heat-Sealing Equipment	244
8.3.8	Packaging in Flexible Films and Laminates	245
8.3.9	Rigid and Semi-rigid Plastic Containers	247
8.3.9.1	Thermoforming	247
8.3.9.2	Blow Molding	247
8.3.9.3	Injection Molding	248
8.3.9.4	Compression Molding	248
8.3.10	Metal Materials and Containers	248
8.3.10.1	Aluminum Foil	248
8.3.10.2	Tinplate	249
8.3.10.3	Electrolytic Chromium-Coated Steel	250
8.3.10.4	Aluminum Alloy	252
8.3.10.5	Metal Containers	252
8.3.11	Glass and Glass Containers	255
8.4	Modified Atmosphere Packaging	258
8.5	Aseptic Packaging	261
8.6	Active Packaging	264
8.6.1	Introduction	264
8.6.2	Oxygen Scavengers	264
8.6.3	Carbon Dioxide Scavengers	267
8.6.4	Carbon Dioxide Emitters	267
8.6.5	Ethylene Scavengers	268
8.6.6	Ethanol Emitters	268
8.6.7	Moisture Absorbers	269
8.6.8	Flavor/Odor Absorbers	269
8.6.9	Antioxidant Release	270
8.6.10	Antimicrobial Packaging	270
8.6.11	Lactose and Cholesterol Removers	271
8.6.12	UV Light Absorbers	271
8.6.13	Other Active Packaging Systems	272
8.7	Intelligent Packaging	272
8.7.1	Introduction	272
8.7.2	Time–Temperature Indicators (TTIs)	272
8.7.3	Quality Indicators and Sensors	273
8.7.3.1	Chemical Indicators	273
8.7.3.2	Microbial Indicators	273
8.7.3.3	Gas Concentration Indicators	273
8.7.4	Radiofrequency Identification Devices (RFID)	274
8.7.5	Other Intelligent Packaging Devices	274
8.7.6	Consumer Attitudes, Safety, and Legal Aspects of Active and Intelligent Packaging	275
8.8	The Role of Nanotechnology in Food Packaging	276
	References	276

Content of Volume 2

- 9 **Separations in Food Processing Part 1** 281
James G. Brennan and Alistair S. Grandison
- 10 **Separations in Food Processing: Part 2 – Membrane Processing, Ion Exchange, and Electrodialysis** 331
Michael J. Lewis and Alistair S. Grandison
- 11 **Mixing, Emulsification, and Size Reduction** 363
James G. Brennan
- 12 **Baking** 407
Stanley P. Cauvain
- 13 **Extrusion** 429
Paul Ainsworth
- 14 **Food Deep-Fat Frying** 455
Pedro Bouchon
- 15 **Safety in Food Processing** 491
Carol A. Wallace
- 16 **Traceability in Food Processing and Distribution** 515
Christopher Knight
- 17 **The Hygienic Design of Food Processing Plant** 533
Tony Hasting
- 18 **Process Control in Food Processing** 559
Keshavan Niranjana, Araya Ahromrit, and Ashok S. Khare
- 19 **Environmental Aspects of Food Processing** 571
Niharika Mishra, Ali Abd El-Aal Bakr, Keshavan Niranjana, and Gary Tucker
- 20 **Water and Waste Treatment** 593
R. Andrew Wilbey
- 21 **Process Realisation** 623
Kevan G. Leach
- 22 **Microscopy Techniques and Image Analysis for the Quantitative Evaluation of Food Microstructure** 667
Maria de Jesús Perea-Flores, Angélica Gabriela Mendoza-Madrigal, José Jorge Chanona-Pérez, Lilitiana Alamilla-Beltrán, and Gustavo Fidel Gutierrez-López

- 23** **Nanotechnology in the Food Sector** 693
Christopher J. Kirby
- 24** **Fermentation and the Use of Enzymes** 727
Dimitris Charalampopoulos
- Index** 753
