<b>Glossary of Terms and Acronyms</b>	<i>xxiii</i>
<b>How to Use This Book</b>	<i>xxix</i>

### Part I Food Safety Challenges in the 21st Century 1

<b>1</b>	<b>Origin and Evolution of the Modern System of Food Safety Management: HACCP and Prerequisite Programmes</b>	<b>3</b>
1.1	Historical Perspectives	3
1.2	Origin and Evolution of HACCP	5
1.3	The Necessity of Prerequisite Programmes	11
1.4	Recent Regulatory Developments in the United States	11
1.5	The Future of HACCP	12
1.6	Conclusions	13
<b>2</b>	<b>Lessons Learned from Food Safety Successes and Failures</b>	<b>15</b>
2.1	Introduction	15
2.2	Benefits of Using HACCP: Lessons Learned from a Successful Implementation	15
2.3	Misconceptions or ‘Failure to Understand HACCP’	18
2.4	Barriers to Effective HACCP Use	20
2.5	Reasons for Failure	22
2.5.1	Lessons Learned from Major Food Safety Events	22
2.5.2	Commonly Observed Mistakes in the <i>Implementation</i> of HACCP and Management of Food Safety Programmes	28
2.6	Difficulties with Applying HACCP through the Entire Food Supply Chain	30
2.7	Roles and Responsibilities: Lessons Learned	32
2.7.1	Industry	33
2.7.2	Government	33
2.7.3	Retailers/Foodservice Establishments	34

2.7.4	Trade and Professional Associations	34
2.7.5	Academia	35
2.7.6	Consumers	35
2.7.7	The Media	36
2.7.8	Advocacy and Pressure Groups	36
2.7.9	Influencers and Experts	37
2.8	Conclusions	37
<b>3</b>	<b>Food Safety Challenges in the Global Supply Chain</b>	<b>39</b>
3.1	Introduction	39
3.2	Increased Complexity of the Global Supply Chain	41
3.2.1	Economic Factors	41
3.2.2	Environmental Factors	43
3.2.3	Social Factors	47
3.3	Food Safety Issues in Global Trade	49
3.3.1	Lack of Uniformity in Regulations and Requirements	52
3.3.2	Lack of Uniformity in Standards and Audit Requirements	54
3.4	Strategic Level Responses	55
3.4.1	Government Communications Systems	55
3.4.2	Global Food Safety Private Audit Standards and Schemes	56
3.4.3	Verification and Auditor Competency	57
3.4.4	Global Food Traceability Systems	57
3.4.5	Public-Private Partnerships	57
3.4.6	Food Waste Reduction through Labelling Improvements	58
3.5	Tactical Level Responses	58
3.5.1	Supplier Audits and Approvals	59
3.5.2	Business Continuity Planning	60
3.5.3	Sharing Technology	60
3.5.4	Shared Training and Education Resources	61
3.5.5	Increased Awareness of Emerging Issues	61
3.6	Conclusions	61
<b>4</b>	<b>The Future of Food Safety and HACCP in a Changing World</b>	<b>63</b>
4.1	Introduction	63
4.2	Food Safety Issues	64
4.2.1	Emerging Pathogens	64
4.2.2	Changes in Distribution of Pathogens	65
4.2.3	Additional Control Measures	65
4.2.4	Antibiotic-Resistant Pathogens	65
4.2.5	Allergens	65
4.2.6	Other Chemical Hazards	66
4.2.7	Physical Hazards	66
4.2.8	Economically Motivated Contamination	66
4.3	Technology Advancements: Processing and Laboratories	67
4.4	Food Safety Management	68
4.4.1	HACCP Preliminary Steps and Principles	68

- 4.4.2 Additions to Current Prerequisite Programmes (Codex Principles of Food Hygiene) 70
- 4.4.3 The Human Factor 70
- 4.4.4 Global Food Safety Assurance 74
- 4.5 Changes in Thinking/Policy Making 78
- 4.5.1 Food Safety Objectives 78
- 4.5.2 End Product Testing 79
- 4.5.3 Hazard Analysis versus Risk Assessment 79
- 4.6 Conclusions 80

## **Part II Foodborne Hazards and Their Control 81**

- 5 Recognising Food Safety Hazards 83**
  - 5.1 Introduction 83
    - 5.1.1 What is a Food Safety Hazard? 83
    - 5.1.2 What is not a Food Safety Hazard? 83
  - 5.2 Biological Hazards 84
    - 5.2.1 Epidemiology and Morbidity Statistics 84
    - 5.2.2 Characteristics of Foodborne Illnesses 86
    - 5.2.3 Bacterial Pathogens: Special Considerations and Features 91
    - 5.2.4 Viral Pathogens 94
    - 5.2.5 Prions 96
    - 5.2.6 Protozoan Parasites 98
    - 5.2.7 Parasitic Worms 98
    - 5.2.8 Biological Hazards, Zoonoses, and Food Chain Biosecurity Issues 98
  - 5.3 Chemical Hazards 99
    - 5.3.1 Allergens 99
    - 5.3.2 Mycotoxins 100
    - 5.3.3 Marine Foodborne Toxins 101
    - 5.3.4 Genetically Modified (GM) Foods 101
    - 5.3.5 Antibiotics 102
    - 5.3.6 Persistent Organic Pollutants (POP) 102
    - 5.3.7 Heavy Metals 103
    - 5.3.8 Chemicals Used in Food Processing Environments 104
    - 5.3.9 Chemicals Used in Food Packaging Materials 104
    - 5.3.10 Unanticipated Potential Chemical Hazards 104
  - 5.4 Physical Hazards 105
    - 5.4.1 Sources of Foreign Material 105
    - 5.4.2 Injuries Associated with Physical Hazards 106
  - 5.5 Conclusions 106
- 6 Designing Safety into a Food Product 107**
  - 6.1 Introduction 107
  - 6.2 Formulation Intrinsic Control Factors 107
    - 6.2.1 Water Activity 108
    - 6.2.2 pH 110

6.2.3	Chemical Food Preservatives	111
6.2.4	Oxidation-Reduction Potential	115
6.2.5	Interactions between Preservative Factors	116
6.3	Use of Experimental Design and Analysis	118
6.3.1	Challenge Testing	118
6.3.2	Accelerated Shelf Life Testing	121
6.3.3	Predictive Microbiology and Mathematical Modelling	122
6.3.4	Theory versus Reality	123
6.4	Ingredient Considerations	123
6.4.1	High-Risk Ingredients	124
6.4.2	Novel Ingredients	126
6.5	Considering the 'Unintended' Use	126
6.6	Conclusions	127

<b>7</b>	<b>Designing a Safe Food Process</b>	<b>129</b>
7.1	Introduction	129
7.2	Process Control of Microbiological Hazards	130
7.2.1	Destruction of Microorganisms	130
7.2.2	Prevention of Microbial Growth	137
7.2.3	Prevention of Contamination	140
7.3	Process Control of Chemical Hazards	143
7.3.1	Allergen Control	143
7.3.2	White Powder Control	144
7.3.3	Cleaning and Maintenance Chemicals	144
7.4	Process Control of Physical Hazards	145
7.4.1	Exclusion Techniques	145
7.4.2	Removal Techniques	146
7.4.3	Detection Techniques	147
7.5	Conclusion	147

### **Part III Systematic Food Safety Management in Practice 149**

<b>8</b>	<b>Overview of a World-Class Food Safety Programme</b>	<b>151</b>
8.1	Introduction	151
8.2	Preliminary Concepts and Definitions	152
8.2.1	The Evolving World-Class Food Safety Programme	152
8.2.2	Key Definitions of Relevance to World-Class Food Safety Programmes	153
8.3	World-Class Food Safety Programmes: System Elements	155
8.3.1	Safe Product/Process Design	155
8.3.2	Prerequisite Programmes	156
8.3.3	HACCP	156
8.3.4	Food Fraud and Food Defence	156
8.4	World-Class Food Safety Programmes: Fundamental Supporting Elements	157
8.4.1	Essential Management Practices	157
8.4.2	Food Safety Culture	158

8.5	World-Class Food Safety Programmes: Further Supporting Elements	158
8.6	World-Class Food Safety Programmes in the Global Food Supply Chain	159
8.7	Continuous Improvement of the World-Class Food Safety Programme	160
8.8	Conclusions	161
<b>9</b>	<b>Building the Foundations of a World-Class Food Safety Management Programme: Essential Steps and Practices</b>	<b>163</b>
9.1	Introduction	163
9.2	Essential Management Practices	165
9.2.1	Management Commitment and its Role in Food Safety Culture	165
9.2.2	Assignment of Roles and Responsibilities	166
9.2.3	Training and Education	166
9.2.4	Resource Management	172
9.2.5	Documentation	173
9.2.6	Supplier/Customer Partnerships	173
9.2.7	Continuous Improvement	173
9.3	Food Safety Culture	174
9.4	Preparation Activities for Food Safety Programmes	175
9.4.1	Preparing a Project Plan	175
9.4.2	Structure the HACCP Programme	176
9.4.3	Carry out a Gap Assessment	176
9.5	Prioritisation of Corrective Actions	183
9.6	Conclusions	185
<b>10</b>	<b>Formalised Prerequisite Programmes in Practice</b>	<b>187</b>
10.1	Introduction	187
10.2	Prerequisite Definitions and Standards	188
10.3	Prerequisite Programmes: The Essentials	189
10.3.1	Primary Production	189
10.3.2	Establishment: Design and Facilities	192
10.3.3	Control of Operation	194
10.3.4	Establishment: Maintenance and Sanitation	198
10.3.5	Establishment: Personal Hygiene	206
10.3.6	Transportation	207
10.3.7	Product Information and Consumer Awareness	207
10.3.8	Training	209
10.4	Prerequisite Programmes and Operational Prerequisites	210
10.5	Validation and Verification of Prerequisite Programmes	212
10.6	Further Reading on Prerequisite Programmes	213
10.7	Conclusions	214
<b>11</b>	<b>Conducting a Product Safety Assessment</b>	<b>215</b>
11.1	Introduction	215
11.1.1	Who Is Involved in Product Safety Assessments?	215
11.1.2	Timing of the Product Safety Assessment Process	217
11.1.3	Product Safety Assessment Process	217

11.2	Training for Research and Development Personnel	218
11.3	Example of a Product Safety Assessment	219
11.3.1	Process Flow Diagram	221
11.4	Conclusions and Principles for Effective Product Safety Assessment	223
<b>12</b>	<b>Developing and Implementing a HACCP Plan</b>	<b>225</b>
12.1	Introduction	225
12.2	Preliminary Concepts	226
12.2.1	HACCP Principles	226
12.2.2	The HACCP Plan and Documentation Approaches	226
12.2.3	HACCP Application Process	228
12.2.4	Codex Logic Sequence	228
12.3	Applying the Codex Logic Sequence to Develop a HACCP Plan	230
12.3.1	HACCP Study Terms of Reference and Scope	230
12.3.2	Codex Logic Sequence Step 1: HACCP Teams	230
12.3.3	Codex Logic Sequence Step 2: Product/Process Descriptions	232
12.3.4	Codex Logic Sequence Step 3: Identify Intended Use	233
12.3.5	Codex Logic Sequence Step 4: Construct Process Flow Diagram(s)	234
12.3.6	Codex Logic Sequence Step 5: On-Site Confirmation of Flow Diagram	237
12.3.7	Codex Logic Sequence Step 6: List All Potential Hazards, Conduct a Hazard Analysis, and Consider Control Measures (Apply HACCP Principle 1)	238
12.3.8	Codex Logic Sequence Step 7: Determine CCPs (HACCP Principle 2)	249
12.3.9	Codex Logic Sequence Step 8: Establish Critical Limits for each CCP (HACCP Principle 3)	252
12.3.10	Codex Logic Sequence Step 9: Establish a Monitoring System for each CCP (HACCP Principle 4)	252
12.3.11	Codex Logic Sequence Step 10: Establish Corrective Actions (HACCP Principle 5)	255
12.3.12	Codex Logic Sequence Step 11: Establish Verification Procedures (HACCP Principle 6)	255
12.3.13	Codex Logic Sequence Step 12: Establish Documentation and Record Keeping (HACCP Principle 7)	257
12.4	Implementing a HACCP Plan	257
12.4.1	Activities for Implementation of a HACCP Plan	257
12.4.2	The Validated HACCP Plan	258
12.4.3	Implementation Action Planning	259
12.4.4	Training	259
12.4.5	CCP Management Systems	261
12.4.6	HACCP Required Activities	262
12.4.7	Verification of Implementation	263
12.4.8	Handover to Operations Staff	263
12.4.9	Considerations for Implementing Updates and Changes to an Existing HACCP System	263
12.5	Conclusions	264

<b>13</b>	<b>Food Fraud and Food Defence</b>	<b>265</b>
13.1	Introduction	265
13.2	Essential Definitions	265
13.2.1	Food Fraud	266
13.2.2	Food Terrorism	266
13.2.3	Food Defence	267
13.2.4	Food Protection	267
13.3	Food Fraud	268
13.3.1	The Food Fraud Problem	268
13.3.2	Learning from Examples of Food Fraud	269
13.4	Food Terrorism	275
13.4.1	Food Terrorism Examples	275
13.5	Food Defence	276
13.5.1	Food Fraud Prediction	276
13.5.2	Practical Food Defence Strategies	279
13.6	Conclusion	282
<b>14</b>	<b>Maintaining and Improving a Food Safety Programme</b>	<b>283</b>
14.1	Introduction	283
14.2	What Is Food Safety Programme Maintenance?	283
14.3	Responsibility for Food Safety Programme Maintenance	285
14.4	Maintenance of Prerequisite Programme Elements	285
14.5	Maintenance of HACCP System Elements	286
14.5.1	HACCP Verification Activities	286
14.5.2	HACCP Maintenance Activities	287
14.6	Maintenance of Food Fraud and Food Defence Systems	288
14.7	Use of Audit for Successful Food Safety System Maintenance	289
14.7.1	Audit Definitions	289
14.7.2	The Auditor and Audit Skills	290
14.7.3	Audit Checklists	292
14.7.4	Use of External Audit and Certification Schemes as Part of Food Safety Programme Maintenance	293
14.8	Incident Management	294
14.9	Conclusions	294
<b>15</b>	<b>Food Safety Culture: Evaluate, Map, and Mature</b>	<b>297</b>
	<i>Lone Jespersen, Ph.D.</i>	
15.1	Introduction	297
15.1.1	Food Safety Culture: Accepted Assumptions, Not Malicious Intent	297
15.1.2	Essential Definitions	298
15.2	Supply Chain and Critical Food Safety Behaviours	298
15.2.1	Dimensions of Food Safety Culture	300
15.2.2	Follow the Leafy Greens ...	300
15.3	Organisational Culture and Food Safety	302

- 15.4 Evaluate and Map Food Safety Maturity 303
- 15.4.1 Map to Food Safety Maturity 303
- 15.4.2 Walking the Food Safety Talk 303
- 15.4.3 Importance of Using Multiple Methods to Evaluate Food Safety Culture 307
- 15.5 Tactics to Mature Food Safety Culture 309
- 15.6 Conclusions 310

#### **Part IV Food Safety Management in Practice: Current Issues and Challenges in Areas of the Global Food Supply Chain 313**

### **16 Food Safety in Agriculture: Determining Farm-Derived Food Safety Risk 315**

*Louise Manning and Pieterneel Luning*

- 16.1 Introduction 315
- 16.2 Notions of Food Quality and Food Safety 315
- 16.3 Value as a Food Attribute in Primary Agriculture 316
- 16.3.1 Case Study 1: BSE and the United Kingdom 318
- 16.4 Uncertainty and Ambiguity Affecting Risk Perceptions and Decisions 319
- 16.4.1 Case Study 2: Red Tractor Standards 320
- 16.5 Risks Inherent to Farmers' Context Characteristics 320
- 16.5.1 Case Study 3: Quality Egg 325
- 16.6 Supply Chain Governance and Food Safety 326
- 16.7 Risk Mitigation at Farm Level 327
- 16.8 Conclusion 329

### **17 Helping to Overcome Food Safety Challenges in Developing Markets 331**

- 17.1 Introduction 331
- 17.2 Sri Lanka Hygiene and Management Systems Development Projects 332
- 17.2.1 Context 332
- 17.2.2 Support for the Development and Implementation of Environmental Management Plans 332
- 17.2.3 A Manufacturer of Dairy-Based Curd and Popsicles 334
- 17.2.4 A Small Packaging Manufacturer in Sri Lanka 336
- 17.2.5 A Small Dairy (Ice-Cream) Processor 337
- 17.2.6 A Coconut Processor in Sri Lanka 339
- 17.2.7 Quality and GMP Training in Sri Lanka 340
- 17.3 Rwanda Dairy Development Projects 342
- 17.3.1 Context 342
- 17.3.2 A Growing Dairy Company in Northern Rwanda 342
- 17.3.3 Yogurt and Fermented Milk Processor 343

17.4	Bangladesh Milk Supply Chain Development Project	346
17.4.1	Context	346
17.4.2	Project	347
17.4.3	Insights and Lessons Learned	347
17.5	Key Points Learned as Assignees to a Less-Developed Country	348
17.6	Kenya Development Project: International Water and Health Alliance (IWHA)	349
17.6.1	Context	349
17.6.2	Challenges in Low-Income Countries	350
17.6.3	Addressing the Water-Testing Challenge in Low-Income Countries	351
17.6.4	Accomplishments	352
17.7	Conclusions	353
<b>18</b>	<b>Consumer Food Safety</b>	<b>355</b>
18.1	Introduction	355
18.2	Potential Hazards	356
18.3	Potential Control Measures	357
18.3.1	Safe Water and Raw Materials	357
18.3.2	Refrigeration	358
18.3.3	Heating (Cooking)	358
18.3.4	Separation, Cleaning, Sanitation, and Personal Hygiene	359
18.4	Potential CCPs and Preventive Controls (PCs) in the Home	360
18.5	Consumer Education	360
18.6	Good Consumer Practices (GCPs)	361
18.7	Case Studies	364
18.7.1	Fictional Case Study: Microbiological Food Safety	364
18.7.2	Real Life Case Study: Allergen Food Safety	366
18.8	Conclusion	369
<b>19</b>	<b>Food Safety in Foodservice Operations</b>	<b>371</b>
19.1	Introduction	371
19.2	Mapping the Foodservice Landscape	372
19.3	Quick-Service Restaurants	376
19.3.1	Challenges in Quick-Service Chain Restaurants	376
19.3.2	Ongoing Control of Food Safety in Quick-Serve Restaurants	378
19.4	Institutional Catering	380
19.5	Foodservice SMEs: Owner-led Restaurants, Cafés, and Snack Bars	381
19.6	Fine Dining, Star Ratings, and Celebrity Chefs	383
19.7	Mobile Foodservice: Market Stalls, Food Vans/Trucks, Festivals, and Pop-Up Facilities	385
19.8	Conclusions	386

## About the Authors

**Professor Carol A. Wallace** is Co-Director of the International Institute of Nutritional Sciences & Applied Food Safety Studies and Professor of Food Safety Management Systems at the University of Central Lancashire, UK, where she leads research themes in food safety effectiveness. Having entered the food industry as a microbiology graduate, she soon became involved in the early days of HACCP and food safety management systems in the UK and went on to gain 20 years of practical experience in the UK and international food industry before joining academia in 2004. She earned a PhD for her study of factors impacting HACCP effectiveness and has authored numerous

books and research articles on HACCP, food safety management systems, and food safety culture. Carol continues to work closely with international food companies and organisations for the ongoing improvement of food safety standards and currently chairs *Salus, the Food Safety Culture Science Group*, an international research group investigating the role of food safety culture in the provision of safe food.

**William H. Sperber** studied biological and chemical sciences at the University of Wisconsin, Madison, culminating in a PhD degree in microbiology. This 'Friendly Microbiologist' has worked in research and management positions with major global food companies for 50 years, the majority with the Pillsbury Company where the HACCP system of food safety management originated. In his current retirement career, Bill is president of the Friendly Microbiologist, LLC, in which capacity he is an advocate of the broader use of Good Consumer Practices as an additional Prerequisite Programme to support the HACCP system.

**Sara E. Mortimore** has more than 30 years of food-manufacturing experience in food safety and quality management. Since 2008, she has been the Vice President of Product Safety, Quality and Regulatory Affairs at Land O'Lakes Inc., one of America's premier farmer-owned cooperatives operating in both the food and agricultural sector, including dairy-based products, animal feed, seed, and crop protection. Previously she worked in various international roles covering quality, food safety, and global sourcing for Pillsbury and General Mills. During this time, she gained a deep cultural understanding of the attitudes and behaviours of people towards food safety in manufacturing around the globe. As a result of this she has developed a major interest in the development of integrated food safety and quality management using the HACCP approach and in the impact of the operating environment.
