<i>Preface to Technical Series</i>	xiii
<i>Preface</i>	xiv
<i>Contributors</i>	xv
<b>1 On-Farm Hygienic Milk Production</b>	<b>1</b>
M.M.M. VISSERS AND F. DRIEHUIS	
1.1 Introduction	1
1.2 Sources of microbial contamination of bulk tank milk	2
1.2.1 Background	2
1.2.2 Mastitis	3
1.2.3 Environment	5
1.2.4 Milking equipment	7
1.2.5 Microbial growth during milk storage	8
1.3 Control of microbial contamination of bulk tank milk	8
1.3.1 Good farming practice	8
1.3.2 Animal health management	9
1.3.3 Control of feed	9
1.3.4 Facility hygiene	11
1.3.5 Milking operations	12
1.3.6 Milking machine design and operations	13
1.3.7 Bulk tank design and operations	14
1.3.8 Identification of effective control measures	14
1.4 Future developments in handling of the milk on the farm	15
1.4.1 Concentration of milk	15
1.4.2 Heat treatment of the milk	16
1.4.3 In/online monitoring of bulk tank milk quality	16
1.5 Conclusions	16
References	17
<b>2 Properties and Constituents of Cow's Milk</b>	<b>23</b>
T. HUPPERTZ AND A.L. KELLY	
2.1 Introduction	23
2.2 Milk composition	24
2.3 Milk constituents	25

2.3.1	Lactose	25
2.3.2	Milk salts	28
2.3.3	Lipids	29
2.3.4	Proteins	31
2.3.5	Indigenous milk enzymes	36
2.4	Heat-induced changes in physicochemical properties of milk	37
2.4.1	pH	37
2.4.2	Buffering capacity	38
2.4.3	Creaming	39
2.5	Heat-induced changes in processing characteristics of milk	39
2.5.1	Rennet-induced coagulation	39
2.5.2	Acid-induced coagulation	40
2.5.3	Heat-induced coagulation	40
2.6	Relationship between the quality of raw milk and that of products	41
2.7	Conclusions	43
	References	43
<b>3</b>	<b>Microbiology of Raw and Market Milks</b>	<b>48</b>
	V. TOUCH AND H.C. DEETH	
3.1	Introduction	48
3.2	Microflora of raw milk	48
3.2.1	Spoilage organisms	48
3.2.2	Pathogenic organisms	50
3.3	Microflora of pasteurised milk	51
3.3.1	Spoilage organisms	51
3.3.2	Pathogenic organisms	54
3.4	Microflora of UHT milk	55
3.4.1	Heat-resistant spore-formers	55
3.4.2	Post-sterilisation contaminants	56
3.5	Microflora of ESL milk	57
3.6	Sources of contamination	58
3.6.1	Raw milk	58
3.6.2	Pasteurised milk	60
3.6.3	UHT milk	61
3.7	Measures to reduce bacterial contamination of raw and market milks	61
3.7.1	Cleaning and sanitation	61
3.7.2	Cooling the milk during storage	62
3.7.3	Addition of carbon dioxide	62
3.7.4	Applications of bio-preservatives	62
3.7.5	Thermal treatments	64
3.7.6	Non-thermal treatments	65
3.7.7	Multitarget attack/integrative approaches	65
3.8	Conclusion	65
	References	66

<b>4</b>	<b>Quality Control</b>	<b>72</b>
	J. BELLOQUE, R. CHICÓN AND I. RECIO	
4.1	Introduction	72
4.2	Quality control of raw milk	72
4.3	Quality control of processed milk	73
4.4	Methods of analysis	74
	4.4.1 Analysis of abnormal milk	75
	4.4.2 Microbial analysis	75
	4.4.3 Mastitic milk – somatic cell count (SCC)	77
	4.4.4 Testing for residues compounds	78
4.5	Major components analysis	79
	4.5.1 Protein composition analysis	82
	4.5.2 Fat composition analysis	83
	4.5.3 Analysis of other milk components	83
	4.5.4 Analysis of degradation products formed during milk storage	84
	4.5.5 Evaluation of heat load	84
4.6	Analysis of fraudulent addition of ingredients and authentication	86
	4.6.1 Addition of water	86
	4.6.2 Addition of whey proteins	86
	4.6.3 Addition of non-dairy proteins	89
	4.6.4 Addition of reconstituted milk	89
	4.6.5 Substitution of milk from a different species of mammals	90
	4.6.6 Substitution of milk with different feeding or geographical origin	90
	4.6.7 Mislabelling of fortified and functional milks	90
4.7	Conclusion	91
	Acknowledgement	92

<b>5</b>	<b>Current Legislation of Market Milks</b>	<b>101</b>
	M. HICKEY	
5.1	Introduction	101
5.2	EU legislation	102
	5.2.1 Access to EU legislation	102
	5.2.2 Compositional requirements	102
	5.2.3 Amendment to existing compositional requirements	105
	5.2.4 Hygiene and food safety requirements	105
5.3	UK legislation	115
	5.3.1 Background	115
	5.3.2 Present legislation on composition	115
	5.3.3 Present legislation on hygiene	116
	5.3.4 The Dairy UK Code of Practice for HTST pasteurisation	118
	5.3.5 Permitted range of packaging sizes for milk in the UK	118

5.4	Irish legislation	119
5.4.1	Introduction	119
5.4.2	Present legislation on hygiene	119
5.4.3	Present legislation on composition	120
5.4.4	Range of packaging sizes for fresh drinking milk in Ireland	120
5.5	USA legislation	120
5.5.1	Background	120
5.5.2	Historical details	121
5.5.3	The Pasteurised Milk Ordinance (PMO) and the Code of Federal Regulations	122
5.5.4	Definitions and standards for milk in the USA	122
5.5.5	Sale of raw milk for direct consumption in the USA	124
5.6	The international perspective – Codex Alimentarius	125
5.6.1	What is Codex Alimentarius?	125
5.6.2	Codex Alimentarius Commission (CAC) membership and structures	125
5.6.3	Codex Alimentarius standards	126
5.6.4	Codex Alimentarius standards and milk for human consumption	128
5.7	Conclusions and possible future developments	132
	References	133
<b>6</b>	<b>The Safety of Raw Liquid Milk</b>	<b>139</b>
	M. O'MAHONY, S. FANNING AND P. WHYTE	
6.1	Introduction	139
6.2	Implication of milk in human disease	139
6.3	Microbial hazards in milk	140
6.3.1	<i>Salmonella</i> species	140
6.3.2	<i>Campylobacter</i> species	141
6.3.3	Verocytotoxigenic <i>Escherichia coli</i>	141
6.3.4	<i>Enterotoxigenic</i> Staphylococcus aureus	142
6.3.5	<i>Listeria monocytogenes</i>	143
6.3.6	<i>Mycobacterium bovis</i>	144
6.3.7	<i>Brucella abortus</i> and <i>Brucella melitensis</i>	145
6.4	Chemical contaminants and residues	146
6.4.1	Industrially derived contaminants	146
6.4.2	Biologically derived contaminants	147
6.4.3	Pesticides and residues of plant health agrichemicals	147
6.4.4	Residues of animal remedies	148
6.5	Poorly understood and emerging hazards	149
6.5.1	Bovine spongiform encephalopathy (BSE)	149
6.5.2	<i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	150
6.5.3	<i>Enterobacter sakazakii</i>	151
6.5.4	Antimicrobial resistance	152
6.6	Risk management strategies to ensure safety of liquid milk	156
6.6.1	Pre-harvest risk management	156

6.6.2	Harvest phase risk management	156
6.6.3	Post-harvest risk management	157
6.7	Summation	158
	References	158
<b>7</b>	<b>Heat Treatment of Milk</b>	<b>168</b>
	M.J. LEWIS AND H.C. DEETH	
7.1	Introduction	168
7.2	Milk composition	169
7.3	Reaction kinetics	170
7.4	Principles of heat transfer	170
7.5	Thermisation and tyndallisation	171
7.6	Pasteurisation	171
7.6.1	Introduction and principles	171
7.6.2	Methods of pasteurisation	174
7.6.3	Factors affecting the quality of pasteurised milk	177
7.7	Sterilisation – safety and spoilage considerations	180
7.8	In-container sterilisation	181
7.9	UHT processing	183
7.9.1	Introduction and principles	183
7.9.2	Methods of UHT processing	185
7.9.3	Factors affecting the quality of UHT milk	190
7.9.4	Heat stability, sediment formation and fouling	193
7.10	High-temperature processing (extended shelf life)	195
7.11	Reconstituted and recombined milk products	197
7.12	Conclusions	198
7.13	Appendix	199
7.13.1	Some heat transfer properties	199
7.13.2	Definitions and equations	199
	References	200
<b>8</b>	<b>Novel Methods of Milk Processing</b>	<b>205</b>
	M. VILLAMIEL, M.A.I. SCHUTYSER AND P. DE JONG	
8.1	Introduction	205
8.2	Microwaves	205
8.2.1	Operating principle	207
8.2.2	Effects on product properties	207
8.2.3	State of the art and opportunities	209
8.3	High Pressure	209
8.3.1	Operating principle	210
8.3.2	Effect on product properties	210
8.3.3	State of the art and opportunities	212
8.4	Pulsed electric fields	213
8.4.1	Operating principle	213

8.4.2	Effect on product properties	214
8.4.3	State of the art and opportunities	215
8.5	Ultrasound	216
8.5.1	Operating principle	216
8.5.2	Effects on product properties	216
8.5.3	State of the art and opportunities	217
8.6	Microfiltration	218
8.6.1	Operating principle	219
8.6.2	Effect on product properties	219
8.6.3	State of the art and opportunities	220
8.7	Innovative steam injection – a novel heating method	220
8.7.1	Operating principle	221
8.7.2	Effect on product properties	221
8.7.3	State of the art and opportunities	222
8.8	Combined technologies	222
8.8.1	Effect on product properties	224
8.8.2	Preservation in the presence of antimicrobials	224
8.8.3	State of the art and opportunities	225
8.9	Computer models for design and implementation of novel milk-processing methods	226
8.9.1	Optimisation of milk-processing methods with models	226
8.9.2	Availability of models	227
	References	228
<b>9</b>	<b>Hygiene Practices in Liquid Milk Dairies</b>	<b>237</b>
	A.J. VAN ASSELT AND M.C. TE GIFFEL	
9.1	Introduction	237
9.2	Principal hazards	237
9.2.1	Raw milk	237
9.2.2	Pasteurised milk	238
9.2.3	Sterilised milk	240
9.3	Hygienic processing	240
9.3.1	General	240
9.3.2	Building construction	241
9.3.3	Zoning	241
9.3.4	Processing equipment	242
9.3.5	Cleaning	243
9.3.6	Packaging materials	244
9.3.7	Processing aids	244
9.4	Monitoring and control	244
9.4.1	In-line detection of microorganisms	245
9.4.2	Optimisation of CIP procedures	245
9.5	Concluding remarks	246
	References	249

<b>10 Hazard Analysis (Appraisal) Critical Control Point (HACCP) in Milk Processing – A Practical Overview</b>	<b>253</b>
A. SAYLER	
10.1 Introduction	253
10.2 General aspects of the benefits of the HACCP system	254
10.3 HACCP definitions	255
10.4 Implementation and maintenance of the HACCP programme	257
10.4.1 Commitment by management	259
10.4.2 Letter of endorsement of an HACCP programme	259
10.5 Steps to HACCP implementation	260
10.5.1 Assemble the HACCP team	260
10.5.2 Describe the food and its distribution	262
10.5.3 Intended use and consumers of the food (see form above)	263
10.5.4 Develop a flow diagram that describes the process	263
10.5.5 Verify the flow diagram	263
10.6 Hazard components	263
10.6.1 Biological hazards	264
10.6.2 Chemical hazards	266
10.6.3 Physical hazards	267
10.6.4 Potential hazards identified by source	267
10.7 Prerequisite programme	269
10.7.1 Background	269
10.7.2 Prerequisite examples and forms	277
10.8 The principles of an HACCP plan	277
10.8.1 Principle 1 – conduct hazard analysis	277
10.8.2 Principle 2 – determine CCPs	283
10.8.3 Principle 3 – establishments of critical limits	283
10.8.4 Principle 4 – establish monitoring procedures	284
10.8.5 Principle 5 – establish corrective actions	285
10.8.6 Principle 6 – establish verification procedure	287
10.8.7 Principle 7 – records	289
10.9 Internal and external auditing in the HACCP process	291
10.10 Overview and summary	293
<b>11 Sensory Profiling of Market Milks</b>	<b>294</b>
E. MOLINA, L. AMIGO AND A. QUIRÓS	
11.1 Introduction	294
11.2 Sensory properties of market milks	295
11.2.1 Sensory evaluation of milk	295
11.2.2 Sensory attributes of flavour defects	297
11.2.3 Other factors influencing the sensory properties	303
11.3 Different types of market milks	305
11.3.1 Raw and heat processed milk	306
11.3.2 Whole and fat-reduced milk	306

11.3.3	Enriched and modified milks	309
11.3.4	Other types of milks	311
11.4	Conclusion	312
	References	313
