<i>Woodhead Publishing Series in Food Science, Technology and Nutrition</i>	xxi

Part I Processed meats: market-driven changes, legislative issues and product development	1
1 Consumer demands and regional preferences for meat	3
<i>L. B. Catlett, New Mexico State University, USA</i>	
1.1 Introduction	3
1.2 The effect of taste on meat consumption	4
1.3 The effect of choice on meat consumption	5
1.4 Determinates of consumer demand for meat	5
1.5 Consumption patterns of meat and economic data for selected countries.....	16
1.6 Future trends in meat consumption	26
1.7 References.....	29
2 Processed meat products: consumer trends and emerging markets	30
<i>M. D. de Barcellos, Federal University of Rio Grande do Sul (UFRGS), Brazil and K. G. Grunert and J. Scholderer, Aarhus University, Denmark</i>	
2.1 Introduction: processed meats and modern life dilemmas.....	30

2.2	Consumer judgment of meat quality	31
2.3	Ongoing consumer trends	34
2.4	New positioning strategies for the meat industry.....	37
2.5	Emerging markets	45
2.6	Future trends	47
2.7	Sources of further information and advice.....	49
2.8	References.....	49
3	Food safety and processed meats: globalisation and the challenges.....	54
	<i>P. Wall and J. Kennedy, University College Dublin, Ireland</i>	
3.1	Introduction	54
3.2	Trade liberalisation	55
3.3	Safety of processed meat from a nutritional point of view	68
3.4	Conclusions	69
3.5	References.....	70
4	Listeriosis, salmonellosis and verocytotoxigenic <i>Escherichia coli</i>: significance and contamination in processed meats.....	72
	<i>C. C. Adley and C. Dillon, University of Limerick, Ireland</i>	
4.1	Introduction	72
4.2	<i>Listeria monocytogenes</i>	73
4.3	<i>Escherichia coli</i>	78
4.4	<i>Salmonella</i>	85
4.5	Conclusions	92
4.6	References.....	93
4.7	Appendix: glossary	107
5	The use of irradiation in processed meat products	109
	<i>E. J. Lee, Iowa State University, USA and D. U. Ahn, Iowa State University, USA and Seoul National University, Korea</i>	
5.1	Introduction	109
5.2	Control of pathogens in processed meat products	111
5.3	Effects of irradiation on meat quality.....	114
5.4	Prevention of quality changes in irradiated processed meat	121
5.5	Future trends	123
5.6	Acknowledgement	124
5.7	References and further reading	124
6	Regulation of processed meat labels in the European Union.....	134
	<i>M. Fogden, Agriculture and Horticulture Development Board, UK</i>	
6.1	Introduction	134

6.2	The European Union (EU) general food law regulation	136
6.3	Labelling and claims rules.....	137
6.4	Other measures	147
6.5	Codex Alimentarius ('food code')	151
6.6	Provision of food information to consumers.....	152
6.7	Sources of further information and advice.....	153
6.8	References.....	154
7	Use of sensory science as a practical commercial tool in the development of consumer-led processed meat products	156
	<i>M. G. O'Sullivan and J. P. Kerry, University College Cork, Ireland and D. V. Byrne University of Copenhagen, Denmark</i>	
7.1	Introduction	156
7.2	Past and present status of sensory-based quality control in processed meats.....	157
7.3	State of the art: an overview of specific sensory science methodologies and approaches used for processed meat product development.....	162
7.4	Future trends: a holistic implementation of sensory science at key stages of meat product development	166
7.5	Conclusions: success in processed meat product production development – sensory science-based development of successful consumer processed meat products	172
7.6	Case studies.....	173
7.7	Acknowledgements.....	175
7.8	References and further reading	177
Part II	Ingredients: past and future roles in processed meat manufacture	183
8	Scientific modeling of blended meat products	185
	<i>R. A. LaBudde, Least Cost Formulations Ltd, USA and T. C. Lanier, North Carolina State University, USA</i>	
8.1	Introduction	185
8.2	The least-cost formulation (LCF) model.....	190
8.3	Linear science-based models for meat product properties.....	196
8.4	Solving the least-cost formulation–science-based formulation (LCF-SBM) problem	208
8.5	Advanced topics	212
8.6	Conclusions	215
8.7	References.....	215

9	Blood by-products as ingredients in processed meat	218
	<i>D. Parés, E. Saguer and C. Carretero, University of Girona, Spain</i>	
9.1	Introduction: blood characterisation, recovery and processing	218
9.2	Applications of blood in processed meat products	223
9.3	Future trends	232
9.4	Sources of further information and advice	233
9.5	References	234
10	Utilisation of hydrocolloids in processed meat systems	243
	<i>R. McArdle and R. Hamill, Teagasc Food Research Centre, Ireland and J. P. Kerry, University College Cork, Ireland</i>	
10.1	Introduction	243
10.2	The meat matrix	245
10.3	Challenges faced by the meat industry today	247
10.4	Regulation and scrutiny concerning hydrocolloid usage in processed meats	248
10.5	Application of hydrocolloids in processed meats	249
10.6	Future trends and conclusions	262
10.7	References	264
11	Use of cold-set binders in meat systems	270
	<i>J. A. Boles, Montana State University, USA</i>	
11.1	Introduction	270
11.2	Meat source	272
11.3	Traditional restructured meat products	274
11.4	Cold-set binders	276
11.5	Particle size reduction	285
11.6	Binder comparisons	288
11.7	Advantages of restructuring	289
11.8	Advantages of cold set binders	290
11.9	Restructured meat products quality control	291
11.10	References and further reading	295
12	Using natural and novel antimicrobials to improve the safety and shelf-life stability of processed meat products	299
	<i>A. Lauková, Slovak Academy of Sciences, Slovakia</i>	
12.1	Introduction	299
12.2	Range of natural antimicrobials for food application	301
12.3	Combined effect of natural antimicrobials and/or other barriers	313
12.4	Food grade sanitisers: natural adjuncts as indirect sanitisers	315
12.5	Advantages of natural antimicrobials and new perspectives for their application	316
12.6	References	320

13	Reducing salt in processed meat products.....	331
	<i>J. M. Barat, Universidad Politécnica de Valencia, Spain and F. Toldrá, Instituto de Agroquímica y Tecnología de Alimentos (CSIC), Spain</i>	
13.1	Introduction	331
13.2	Influences of salt on processed meats	332
13.3	Development of processed meats with low salt content.....	335
13.4	Sources of further information and advice.....	340
13.5	References.....	340
14	Reducing fats in processed meat products	346
	<i>S. Barbut, University of Guelph, Canada</i>	
14.1	Introduction: importance of reducing fat in processed meat products	346
14.2	Role of fat in processed meat products	347
14.3	Consequences of reducing fat in processed meats from an organoleptic and functional perspective	349
14.4	Technological methods to reduce fat.....	350
14.5	Saturated fat replacement using healthier fats	351
14.6	Alternative fat-replacing ingredients.....	355
14.7	Future trends	365
14.8	Sources of further information and advice.....	366
14.9	References.....	366
15	The use of nutraceuticals in processed meat products and their effects on product quality, safety and acceptability	372
	<i>J. Hayes and N. Brunton, Teagasc Food Research Centre, Ireland</i>	
15.1	Introduction	372
15.2	Nutraceuticals and processed meats.....	374
15.3	Product quality	377
15.4	Microbial safety	384
15.5	Acceptability	390
15.6	Future trends	392
15.7	References.....	393
16	Use of probiotics and prebiotics in meat products.....	403
	<i>K. Arihara and M. Ohata, Kitasato University, Japan</i>	
16.1	Introduction	403
16.2	Probiotics.....	404
16.3	Probiotics and meat fermentation	405
16.4	Prebiotics.....	408
16.5	Meat protein-derived prebiotic peptides	409
16.6	Prebiotics and meat products	410
16.7	Future trends	411

16.8	Sources of further information and advice.....	413
16.9	References.....	413
Part III	Processing technologies: past and future roles in processed meat manufacture	419
17	Marinating and enhancement of the nutritional content of processed meat products	421
	<i>S. M. Yusop, University College Cork, Ireland and National University of Malaysia, Malaysia and M. G. O’Sullivan and J. P. Kerry, University College Cork, Ireland</i>	
17.1	Introduction	421
17.2	Background and terminology associated with marinating.....	423
17.3	Marinade action: absorption and retention in a marinating system	427
17.4	Functional ingredients of marinating	429
17.5	Methods of marinade delivery	435
17.6	Established effects of marinating.....	438
17.7	The significance of sensory evaluation in determining quality of marinated products	441
17.8	Future research in marinating technology.....	442
17.9	References and further reading	443
18	Improving the quality of restructured and convenience meat products.....	450
	<i>M. M. Farouk, AgResearch Limited, New Zealand</i>	
18.1	Introduction	450
18.2	Restructured whole-tissue and convenience meat products	451
18.3	Quality issues of restructured whole-tissue and convenience meat products.....	453
18.4	Improving product quality	463
18.5	Future trends	470
18.6	Sources of further information and advice.....	472
18.7	References and further reading	472
19	Heat and processing generated contaminants in processed meats	478
	<i>P. Šimko, Food Research Institute, Slovak Republic and Brno University of Technology, Czech Republic</i>	
19.1	Polycyclic aromatic hydrocarbons (PAHs).....	478
19.2	Biogenic amines (BAs).....	483
19.3	N-nitroso amines (NAs).....	488
19.4	Heterocyclic amines (HAs)	495

19.5	Conclusions	499
19.6	Acknowledgement	500
19.7	References and further reading	500
20	Improving the sensory quality of cured and fermented meat products.....	508
	<i>F. Toldrá, Instituto de Agroquímica y Tecnología de Alimentos (CSIC), Spain</i>	
20.1	Introduction	508
20.2	Biochemical basis for flavour development.....	509
20.3	Basis for colour and texture development in cured meats	515
20.4	Processing factors affecting sensory quality of cured meats	516
20.5	Trends to accelerate the processes and/or improve the sensory quality of cured meat products	517
20.6	Sources of further information and advice.....	519
20.7	References and further reading	520
21	Improving the sensory and nutritional quality of smoked meat products.....	527
	<i>E. P. Emmerson, Red Arrow Products, USA</i>	
21.1	The process of smoking muscle food products	527
21.2	Advantages of using natural smoke condensates compared with traditional smoking technologies.....	528
21.3	Application methods of liquid smoke condensates to muscle-based food products.....	533
21.4	Conclusions and future trends.....	544
21.5	References and further reading	545
22	Online quality assessment of processed meats.....	546
	<i>M. O'Farrell, SINTEF, Norway</i>	
22.1	Introduction	546
22.2	Meat composition and attributes	547
22.3	Visual inspection of products	552
22.4	Food safety	558
22.5	Automation and integration of the quality measurements	562
22.6	Sources of further information and advice.....	563
22.7	References.....	563
23	Impact of refrigeration on processed meat safety and quality	567
	<i>S. J. James and C. James, Food Refrigeration and Process Engineering Research Centre (FRPERC), UK</i>	
23.1	Introduction	567

23.2	Current understanding of the impact of refrigeration on processed meat safety and quality	570
23.3	Advances in technology and practice to improve processed meat safety and quality	582
23.4	Future trends	585
23.5	References.....	587
24	Recent advances in the application of high pressure technology to processed meat products	590
	<i>Y. Ikeuchi, Kyushu University, Japan</i>	
24.1	Introduction	590
24.2	Effect of high pressure on the quality of meat and meat products	592
24.3	Pressure-processed meat products.....	596
24.4	Microbial control in meat and meat products using high pressure.....	603
24.5	New applications of high pressure technology in the meat industry	606
24.6	Future trends in high pressure processing.....	606
24.7	References.....	609
25	Effects of novel thermal processing technologies on the sensory quality of meat and meat products.....	617
	<i>J. F. Kerry, Echo Ovens Ltd, Ireland</i>	
25.1	Introduction	617
25.2	Meat quality.....	620
25.3	Thermal processing	623
25.4	Thermal processing methods	628
25.5	Consumer preference	651
25.6	Future trends	653
25.7	Sources of further information and advice.....	655
25.8	References.....	657
26	Packaging of cooked meats and muscle-based, convenience-style processed foods.....	666
	<i>M. Cruz-Romero and J. P. Kerry, University College Cork, Ireland</i>	
26.1	Introduction	666
26.2	Cooked meat products	669
26.3	Definition of packaging and its functions.....	672
26.4	Influence of key trends on consumer behaviour	675
26.5	Consumer trends in food packaging.....	677
26.6	Choosing packaging materials for cooked meat products	679

26.7	Packaging materials and forms used on cooked meats and muscle-based, convenience-style food products.....	681
26.8	Developments and recent advances in the use of packaging materials for cooked meats and muscle-based, convenience-style food products.....	686
26.9	Future trends	701
26.10	References.....	701
