PART 1 THE BALANCE OF PAYMENTS AND MACROECONOMIC POLICY IN AN OPEN ECONOMY

1 The Foreign Exchange Market	3
1.1 Introduction	3
1.2 Exchange rate definitions	5
1.3 Characteristics and participants of the foreign exchange market	6
1.4 Arbitrage in the foreign exchange market	8
1.5 The spot and forward exchange rates	9
1.6 Nominal, real and effective exchange rates	9
1.7 A simple model of the determination of the spot exchange rate	13
1.8 Alternative exchange rate regimes	17
1.9 The determination of the forward exchange rate	20
1.10 The interaction of hedgers, arbitrageurs and speculators	24
1.11 Conclusions	25
2 The Balance of Payments	27
2.1 Introduction	27
2.2 What is the balance of payments?	28
2.3 Collection, reporting and presentation of the balance of payments statistics	28
2.4 Balance of payments accounting and accounts	29
2.5 An overview of the sub-accounts in the balance of payments	30
2.6 Recording of transactions in the balance of payments	32
2.7 What is meant by a balance of payments surplus or deficit?	34
2.8 Alternative concepts of surplus and deficit	34
2.9 Do the record United States current account deficits matter?	36
2.10 Some open economy identities	42
2.11 Open economy multipliers	45
2.12 Conclusions	50
3 Elasticity and Absorption Approaches to the Balance of Payments	52
3.1 Introduction	52
3.2 The elasticity approach to the balance of payments	53

3.3	Empirical evidence on import and export demand elasticities	56
3.4	The pass-through effect of a depreciation or appreciation	60
3.5	The absorption approach	61
3.6	The effects of a devaluation on national income	62
3.7	The effects of a devaluation on direct absorption	63
3.8	A synthesis of the elasticity and absorption approaches	66
3.9	Conclusions	66
4	Macroeconomic Policy in an Open Economy	69
4.1	Introduction	69
4.2	The problem of internal and external balance	70
4.3	The Mundell–Fleming model	72
4.4	Derivation of the IS schedule for an open economy	73
4.5	Derivation of the LM schedule for an open economy	75
4.6	Derivation of the BP schedule for an open economy	76
4.7	Equilibrium of the model	79
4.8	Factors shifting the IS–LM–BP schedules	79
4.9	Internal and external balance	81
4.10	Internal and external balance under fixed exchange rates	84
4.11	Internal and external balance under floating exchange rates	85
4.12	A small open economy with perfect capital mobility	87
4.13	The principle of effective market classification	92
4.14	Limitations of the Mundell–Fleming model	95
4.15	Conclusions	96
5	The Monetary Approach to the Balance of Payments	98
5.1	Introduction	98
5.2	A simple monetary model	99
5.3	The monetarist concept of a balance of payments disequilibrium	104
5.4	The effects of a devaluation	105
5.5	A monetary exchange rate equation	106
5.6	A money supply expansion under fixed exchange rates	108
5.7	A money supply expansion under floating exchange rates	110
5.8	The effects of an increase in income under fixed exchange rates	112
5.9	The effects of an increase in income under floating exchange rates	114
5.10	An increase in foreign prices under fixed exchange rates	115
5.11	An increase in foreign prices under floating exchange rates	116
5.12	Implications of the monetary approach	118
5.13	Empirical evidence on the monetary approach	119
5.14	Criticisms of the monetary approach	120
5.15	Conclusions	121
 PART 2 EXCHANGE RATE DETERMINATION: THEORY, EVIDENCE AND POLICY		
6	Purchasing Power Parity and Floating Exchange Rate Experience	125
6.1	Introduction	125
6.2	Purchasing power parity theory and the law of one price	126

6.3	Absolute and relative PPP	126
6.4	A generalized version of PPP	128
6.5	Measurement problems in testing for PPP	129
6.6	Empirical evidence on PPP	130
6.7	Summary of empirical evidence on PPP	135
6.8	Explaining the poor performance of purchasing power parity theory	139
6.9	The Balassa–Samuelson model	141
6.10	Per capita income levels, the relative sizes of economies and the importance of PPP estimates	143
6.11	Conclusions	145
7	Modern Models of Exchange Rate Determination	147
7.1	Introduction	147
7.2	Asset prices	148
7.3	Uncovered interest rate parity	149
7.4	The monetary models of exchange rate determination	152
7.5	The flexible-price monetary model	152
7.6	The Dornbusch sticky-price monetarist model	154
7.7	A simple explanation of the Dornbusch model	155
7.8	A formal explanation of the Dornbusch model	157
7.9	Derivation of the goods-market equilibrium schedule	158
7.10	Derivation of the money-market equilibrium schedule	159
7.11	A money supply expansion and exchange rate ‘overshooting’	162
7.12	Importance of the sticky-price monetary model	163
7.13	The Frankel real interest rate differential model	164
7.14	Implications of the monetary views of exchange rate determination	166
7.15	Allowing for imperfect substitutability between domestic and foreign bonds	169
7.16	A synthesis portfolio balance model	172
7.17	The importance of the portfolio balance model	174
7.18	Conclusions	175
8	The Portfolio Balance Model	178
8.1	Introduction	178
8.2	The concept of a risk premium	179
8.3	Different types of risk	181
8.4	A portfolio balance model	183
8.5	Derivation of the asset demand functions	186
8.6	Equilibrium of the model	187
8.7	The effects of a foreign exchange operation	188
8.8	The effects of an open market operation	189
8.9	The effects of a sterilized foreign exchange operation	190
8.10	A comparison of an FXO, OMO and SFXO	192
8.11	The dynamics of the model	193
8.12	The effects of a change in risk perceptions	194
8.13	Money versus bond-financed fiscal expansion	195
8.14	The risk premium, imperfect and perfect substitutability	198
8.15	Conclusions	200

9	Empirical Evidence on Exchange Rates	202
9.1	Introduction	202
9.2	What is an efficient market?	203
9.3	Exchange market efficiency tests	204
9.4	Alternative tests of the efficient market hypothesis	209
9.5	Summary of findings on exchange market efficiency	210
9.6	Empirical tests of exchange rate models	211
9.7	Exchange rate models: a forecasting analysis	213
9.8	Explaining the poor results of exchange rate models	216
9.9	The 'news' approach to modelling exchange rates	218
9.10	The longer-run predictability of exchange rate movements	221
9.11	Modelling exchange rate expectations	225
9.12	Empirical tests of different expectations mechanisms	227
9.13	Alternative approaches to modelling exchange rates: the role of chartists and fundamentalists	228
9.14	Conclusions	230
10	Fixed, Floating and Managed Exchange Rates	235
10.1	Introduction	235
10.2	The case for fixed exchange rates	236
10.3	The case for floating exchange rates	238
10.4	The modern evaluation of fixed and flexible exchange rate regimes	242
10.5	Specification of the objective function	242
10.6	The model	243
10.7	Determining equilibrium	245
10.8	Money demand shock	247
10.9	Aggregate demand shock	248
10.10	Aggregate supply shock	249
10.11	Managed floating	252
10.12	Conclusions	256
 PART 3 THE POSTWAR INTERNATIONAL MONETARY SYSTEM		
11	The International Monetary System	261
11.1	Introduction	261
11.2	The Bretton Woods system	263
11.3	Features of the system	263
11.4	A brief history of the Bretton Woods system	265
11.5	Why did the Bretton Woods system break down?	268
11.6	The post-Bretton Woods era	273
11.7	The Jamaica Conference of 1976	277
11.8	The Snake and the EMS	278
11.9	The second oil shock	279
11.10	The dazzling dollar, 1980-85	279
11.11	From Plaza to Louvre and beyond	280
11.12	Currency turmoil and crises post-1990	281
11.13	The present exchange rate system	289

11.14	The bipolar view of the international monetary system: which exchange rate regime is best?	289
11.15	Reform of the international monetary system	295
11.16	The Williamson target zone proposal	295
11.17	The McKinnon global monetary target proposal	295
11.18	The Tobin foreign exchange tax proposal	296
11.19	Reform of the international financial architecture	297
11.20	Conclusions	300
12	The Eurocurrency and Eurobond Markets	304
12.1	Introduction	304
12.2	Participants in the Eurocurrency and Eurobond markets	306
12.3	The origins and development of the Eurocurrency market	306
12.4	The characteristics of the Eurodollar market	308
12.5	The competitive advantage of Eurobanks	309
12.6	The coexistence of domestic and Eurobanking	310
12.7	The creation of Eurodollar deposits and loans	310
12.8	The pros and cons of the Eurocurrency markets	312
12.9	Euromarkets and government regulation and policy	313
12.10	The international capital market and the Eurobond market	314
12.11	The origins and development of the Eurobond market	314
12.12	Typical features of a Eurobond	315
12.13	Control and regulation of the Eurobond market	316
12.14	The management of a Eurobond issue	318
12.15	Innovations in the Eurobond market	320
12.16	Conclusions	320
13	Currency Derivatives: Futures, Options and Swaps	323
13.1	Introduction	323
13.2	The growth of derivative markets	324
13.3	Exchange-traded futures and options contracts	325
13.4	Currency futures and currency forwards	326
13.5	The use of currency futures for hedging purposes	328
13.6	The symmetry of profit/losses on futures/forward positions	330
13.7	The pricing of currency futures	331
13.8	Currency options	332
13.9	A currency option versus a forward contract for hedging	335
13.10	A currency option versus a forward for speculating	336
13.11	The pricing of currency options	339
13.12	Intrinsic value and time value	340
13.13	The distribution of the option premium between time and intrinsic value	341
13.14	The Garman and Kohlhagen option-pricing formula	346
13.15	A numerical example of the Garman-Kohlhagen formula	347
13.16	Problems with the currency option-pricing formula	349
13.17	The over-the-counter market in options	350
13.18	The swaps market	350
13.19	Potential currency swap scenarios	351
13.20	A currency swap agreement	352

13.21	Distinguishing characteristics of the swap market from the forward and futures markets	354
13.22	Conclusions	355
14	International Macroeconomic Policy Coordination	358
14.1	Introduction	358
14.2	What is meant by international policy coordination?	359
14.3	Why does the need for international policy coordination arise?	360
14.4	The benefits from international policy coordination	361
14.5	A game theory demonstration of the gains from coordination	366
14.6	Other potential benefits from coordination	367
14.7	The potential for coordination to make countries worse off	368
14.8	Estimates of the benefits and losses from international policy coordination	369
14.9	Problems and obstacles to international policy coordination	372
14.10	Conclusions	374
15	The International Debt Crisis	377
15.1	Introduction	377
15.2	The low and middle-income developing countries	378
15.3	Characteristics of typical middle-income developing countries	379
15.4	The economics of developing country borrowing	380
15.5	Different types of capital inflows into developing countries	381
15.6	Measures of indebtedness	382
15.7	Background and origins of the debt crisis	384
15.8	The emergence of the debt crisis	385
15.9	The Mexican moratorium	387
15.10	The dimensions of the debt crisis	388
15.11	A supply and demand framework for analysing the debt crisis	389
15.12	The economics of default	391
15.13	The role and viewpoints of the actors in the debt crisis	393
15.14	The management of the debt crisis	395
15.15	An overall evaluation of the debt-crisis management	404
15.16	Post-Brady Plan crises in three of the countries	406
15.17	Conclusions	406
16	Economic and Monetary Union in Europe	409
16.1	Introduction	409
16.2	The Snake in the Tunnel	410
16.3	The background to the European Monetary System	411
16.4	The Exchange Rate Mechanism	412
16.5	The European Currency Unit and its role as an indicator of divergence	413
16.6	Financing facilities and monetary cooperation	415
16.7	An assessment of the European Monetary System	416
16.8	The EMS as an anti-inflation zone	418
16.9	Intervention policy in the EMS	422
16.10	The economic performance of ERM and non-ERM countries	423
16.11	What is meant by economic and monetary union?	423

16.12	Benefits of Economic and Monetary Union	425
16.13	Costs of Economic and Monetary Union	427
16.14	A history of the road to European Monetary Union	430
16.15	The Maastricht Treaty	433
16.16	An evaluation of the Maastricht criteria	434
16.17	The Stability and Growth Pact	436
16.18	The changeover to the single currency	436
16.19	The performance of the euro in the foreign exchange market	438
16.20	The eurosystem	438
16.21	The Exchange Rate Mechanism II	442
16.22	The accession countries and EMU	444
16.23	Conclusions	447
17	Currency Crises and the East Asian Financial Crisis	450
17.1	Introduction	450
17.2	First-generation models of currency crises	451
17.3	Second-generation models of currency crises	455
17.4	Third-generation and other models of currency and financial crises	457
17.5	The run-up to the Asian crisis	460
17.6	The macroeconomic fundamentals	460
17.7	The role of external factors in the crisis	466
17.8	The role of the financial system	467
17.9	The immediate causes of the crisis	469
17.10	An analysis of the crisis	473
17.11	The IMF handling of the crisis	475
17.12	An evaluation of the IMF programmes	477
17.13	The crisis and post-crisis performance of the economies	478
17.14	Early-warning systems	479
17.15	Conclusions	481
