Foreword to the First Edition .....	xvii
Preface to the First Edition .....	xix
Preface to the Second Edition .....	xxiii
Preface to the Third Edition.....	xxv
Preface to the Fourth Edition .....	xxvii

<b>CHAPTER 1 Embedded Computing.....</b>	<b>1</b>
1.1 Introduction.....	1
1.2 Complex systems and microprocessors.....	1
1.2.1 Embedding computers .....	2
1.2.2 Characteristics of embedded computing applications.....	4
1.2.3 Why use microprocessors?.....	5
1.2.4 Cyber-physical systems.....	7
1.2.5 Safety and security .....	8
1.2.6 Challenges in embedded computing system design...	10
1.2.7 Performance of embedded computing systems .....	11
1.3 The embedded system design process .....	12
1.3.1 Requirements .....	14
1.3.2 Specification .....	18
1.3.3 Architecture design .....	19
1.3.4 Designing hardware and software components .....	21
1.3.5 System integration.....	22
1.3.6 Formalisms for system design .....	22
1.3.7 Structural description .....	23
1.3.8 Behavioral description.....	28
1.4 Design example: model train controller.....	31
1.4.1 Requirements .....	32
1.4.2 DCC .....	33
1.4.3 Conceptual specification .....	35
1.4.4 Detailed specification .....	38
1.4.5 Lessons learned .....	45
1.5 A guided tour of this book .....	46
1.5.1 Chapter 2: Instruction sets .....	46
1.5.2 Chapter 3: CPUs.....	47
1.5.3 Chapter 4: Computing platforms .....	47
1.5.4 Chapter 5: Program design and analysis .....	48

<b>1.5.5</b>	Chapter 6: Processes and operating systems .....	49
<b>1.5.6</b>	Chapter 7: System design techniques .....	50
<b>1.5.7</b>	Chapter 8: Internet-of-Things .....	50
<b>1.5.8</b>	Chapter 9: Automotive and aerospace systems .....	50
<b>1.5.9</b>	Chapter 10: Embedded multiprocessors .....	50
<b>1.6</b>	Summary .....	51
	What we learned .....	51
	Further reading .....	51
	Questions .....	52
	Lab exercises .....	53
<b>CHAPTER 2</b>	<b>Instruction Sets .....</b>	<b>55</b>
<b>2.1</b>	Introduction .....	55
<b>2.2</b>	Preliminaries .....	55
<b>2.2.1</b>	Computer architecture taxonomy .....	56
<b>2.2.2</b>	Assembly languages .....	58
<b>2.2.3</b>	VLIW processors .....	60
<b>2.3</b>	ARM processor .....	62
<b>2.3.1</b>	Processor and memory organization .....	62
<b>2.3.2</b>	Data operations .....	63
<b>2.3.3</b>	Flow of control .....	70
<b>2.3.4</b>	Advanced ARM features .....	76
<b>2.4</b>	PICmicro midrange family .....	77
<b>2.4.1</b>	Processor and memory organization .....	77
<b>2.4.2</b>	Data operations .....	78
<b>2.4.3</b>	Flow of control .....	81
<b>2.5</b>	TI C55x DSP .....	82
<b>2.5.1</b>	Processor and memory organization .....	82
<b>2.5.2</b>	Addressing modes .....	84
<b>2.5.3</b>	Data operations .....	88
<b>2.5.4</b>	Flow of control .....	89
<b>2.5.5</b>	C coding guidelines .....	91
<b>2.6</b>	TI C64x .....	92
<b>2.7</b>	Summary .....	95
	What we learned .....	96
	Further reading .....	96
	Questions .....	96
	Lab exercises .....	98

<b>CHAPTER 3 CPUs.....</b>	<b>99</b>
<b>3.1 Introduction .....</b>	<b>99</b>
<b>3.2 Programming input and output .....</b>	<b>99</b>
<b>3.2.1 Input and output devices .....</b>	<b>100</b>
<b>3.2.2 Input and output primitives.....</b>	<b>102</b>
<b>3.2.3 Busy-wait I/O .....</b>	<b>103</b>
<b>3.2.4 Interrupts.....</b>	<b>104</b>
<b>3.3 Supervisor mode, exceptions, and traps.....</b>	<b>117</b>
<b>3.3.1 Supervisor mode.....</b>	<b>117</b>
<b>3.3.2 Exceptions .....</b>	<b>118</b>
<b>3.3.3 Traps .....</b>	<b>118</b>
<b>3.4 Coprocessors.....</b>	<b>119</b>
<b>3.5 Memory system mechanisms .....</b>	<b>119</b>
<b>3.5.1 Caches.....</b>	<b>120</b>
<b>3.5.2 Memory management units and address             translation .....</b>	<b>126</b>
<b>3.6 CPU performance .....</b>	<b>131</b>
<b>3.6.1 Pipelining.....</b>	<b>131</b>
<b>3.6.2 Cache performance.....</b>	<b>136</b>
<b>3.7 CPU power consumption.....</b>	<b>137</b>
<b>3.7.1 CMOS power consumption.....</b>	<b>137</b>
<b>3.7.2 Power management modes.....</b>	<b>138</b>
<b>3.7.3 Program-level power management.....</b>	<b>141</b>
<b>3.8 Safety and security .....</b>	<b>141</b>
<b>3.9 Design example: data compressor.....</b>	<b>143</b>
<b>3.9.1 Requirements and algorithm .....</b>	<b>143</b>
<b>3.9.2 Specification .....</b>	<b>145</b>
<b>3.9.3 Program design.....</b>	<b>147</b>
<b>3.9.4 Testing .....</b>	<b>153</b>
<b>3.10 Summary .....</b>	<b>154</b>
What we learned.....	155
Further reading .....	155
Questions.....	155
Lab exercises .....	159
<b>CHAPTER 4 Computing Platforms .....</b>	<b>161</b>
<b>4.1 Introduction .....</b>	<b>161</b>
<b>4.2 Basic computing platforms .....</b>	<b>161</b>
<b>4.2.1 Platform hardware components .....</b>	<b>162</b>
<b>4.2.2 Platform software components.....</b>	<b>164</b>

<b>4.3</b>	The CPU bus .....	165
<b>4.3.1</b>	Bus organization and protocol .....	165
<b>4.3.2</b>	DMA.....	171
<b>4.3.3</b>	System bus configurations.....	175
<b>4.4</b>	Memory devices and systems.....	177
<b>4.4.1</b>	Memory system organization.....	179
<b>4.5</b>	Designing with computing platforms.....	181
<b>4.5.1</b>	Example platforms .....	181
<b>4.5.2</b>	Choosing a platform.....	183
<b>4.5.3</b>	Intellectual property .....	184
<b>4.5.4</b>	Development environments.....	185
<b>4.5.5</b>	Watchdog timers.....	186
<b>4.5.6</b>	Debugging techniques .....	187
<b>4.5.7</b>	Debugging challenges .....	189
<b>4.6</b>	Consumer electronics architecture .....	191
<b>4.6.1</b>	Consumer electronics use cases and requirements .....	191
<b>4.6.2</b>	File systems .....	193
<b>4.7</b>	Platform-level performance analysis.....	194
<b>4.8</b>	Platform-level power management .....	200
<b>4.9</b>	Design example: alarm clock.....	201
<b>4.9.1</b>	Requirements .....	201
<b>4.9.2</b>	Specification .....	202
<b>4.9.3</b>	System architecture .....	205
<b>4.9.4</b>	Component design and testing .....	208
<b>4.9.5</b>	System integration and testing .....	208
<b>4.10</b>	Design example: audio player.....	208
<b>4.10.1</b>	Theory of operation and requirements .....	208
<b>4.10.2</b>	Specification .....	211
<b>4.10.3</b>	System architecture .....	211
<b>4.10.4</b>	Component design and testing .....	214
<b>4.10.5</b>	System integration and debugging.....	215
<b>4.11</b>	Summary.....	215
	What we learned .....	215
	Further reading .....	215
	Questions.....	215
	Lab exercises .....	219
<b>CHAPTER 5</b>	<b>Program Design and Analysis .....</b>	<b>221</b>
<b>5.1</b>	Introduction .....	221
<b>5.2</b>	Components for embedded programs .....	222

<b>5.2.1</b>	State machines.....	222
<b>5.2.2</b>	Circular buffers and stream-oriented programming .....	224
<b>5.2.3</b>	Queues and producer/consumer systems .....	229
<b>5.3</b>	Models of programs .....	231
<b>5.3.1</b>	Data flow graphs.....	232
<b>5.3.2</b>	Control/data flow graphs .....	234
<b>5.4</b>	Assembly, linking, and loading.....	236
<b>5.4.1</b>	Assemblers.....	238
<b>5.4.2</b>	Linking .....	242
<b>5.4.3</b>	Object code design .....	243
<b>5.5</b>	Compilation techniques.....	244
<b>5.5.1</b>	The compilation process .....	244
<b>5.5.2</b>	Basic compilation methods .....	246
<b>5.5.3</b>	Compiler optimizations .....	254
<b>5.6</b>	Program-level performance analysis.....	262
<b>5.6.1</b>	Analysis of program performance .....	264
<b>5.6.2</b>	Measurement-driven performance analysis .....	268
<b>5.7</b>	Software performance optimization.....	271
<b>5.7.1</b>	Basic loop optimizations.....	271
<b>5.7.2</b>	Cache-oriented loop optimizations .....	273
<b>5.7.3</b>	Performance optimization strategies.....	275
<b>5.8</b>	Program-level energy and power analysis and optimization .....	276
<b>5.9</b>	Analysis and optimization of program size .....	280
<b>5.10</b>	Program validation and testing .....	281
<b>5.10.1</b>	Clear-box testing .....	282
<b>5.10.2</b>	Black-box testing .....	289
<b>5.10.3</b>	Evaluating functional tests.....	290
<b>5.11</b>	Safety and security .....	291
<b>5.12</b>	Design example: software modem.....	292
<b>5.12.1</b>	Theory of operation and requirements .....	292
<b>5.12.2</b>	Specification .....	295
<b>5.12.3</b>	System architecture .....	295
<b>5.12.4</b>	Component design and testing.....	296
<b>5.12.5</b>	System integration and testing.....	297
<b>5.13</b>	Design example: digital still camera.....	297
<b>5.13.1</b>	Theory of operation and requirements .....	297
<b>5.13.2</b>	Specification .....	301
<b>5.13.3</b>	System architecture .....	305

<b>5.13.4</b>	Component design and testing.....	308
<b>5.13.5</b>	System integration and testing.....	308
<b>5.14</b>	Summary.....	308
	What we learned .....	308
	Further reading .....	309
	Questions.....	309
	Lab exercises .....	318
<b>CHAPTER 6</b>	<b>Processes and Operating Systems.....</b>	<b>321</b>
<b>6.1</b>	Introduction .....	321
<b>6.2</b>	Multiple tasks and multiple processes .....	322
<b>6.3</b>	Multirate systems .....	324
<b>6.3.1</b>	Timing requirements on processes.....	326
<b>6.3.2</b>	CPU usage metrics .....	330
<b>6.3.3</b>	Process state and scheduling.....	331
<b>6.3.4</b>	Running periodic processes.....	332
<b>6.4</b>	Preemptive real-time operating systems .....	334
<b>6.4.1</b>	Two basic concepts .....	335
<b>6.4.2</b>	Processes and context.....	336
<b>6.4.3</b>	Processes and object-oriented design .....	339
<b>6.5</b>	Priority-based scheduling .....	339
<b>6.5.1</b>	Rate-monotonic scheduling.....	341
<b>6.5.2</b>	Earliest-deadline-first scheduling.....	345
<b>6.5.3</b>	RMS versus EDF.....	349
<b>6.5.4</b>	Shared resources.....	349
<b>6.5.5</b>	Priority inversion.....	351
<b>6.5.6</b>	Scheduling for low power.....	352
<b>6.5.7</b>	A closer look at our modeling assumptions .....	352
<b>6.6</b>	Interprocess communication mechanisms.....	355
<b>6.6.1</b>	Shared memory communication .....	355
<b>6.6.2</b>	Message passing .....	356
<b>6.6.3</b>	Signals .....	357
<b>6.6.4</b>	Mailboxes .....	358
<b>6.7</b>	Evaluating operating system performance .....	359
<b>6.8</b>	Example real-time operating systems .....	363
<b>6.9</b>	Design example: telephone answering machine.....	369
<b>6.9.1</b>	Theory of operation and requirements.....	369
<b>6.9.2</b>	Specification .....	372
<b>6.9.3</b>	System architecture .....	374
<b>6.9.4</b>	Component design and testing .....	377
<b>6.9.5</b>	System integration and testing .....	377

<b>6.10</b>	Design example: engine control unit .....	378
<b>6.10.1</b>	Theory of operation and requirements .....	378
<b>6.10.2</b>	Specification .....	379
<b>6.10.3</b>	System architecture .....	380
<b>6.10.4</b>	Component design and testing .....	382
<b>6.10.5</b>	System integration and testing .....	382
<b>6.11</b>	Summary .....	383
	What we learned .....	383
	Further reading .....	383
	Questions .....	383
	Lab exercises .....	389
<b>CHAPTER 7 System Design Techniques .....</b>		<b>391</b>
<b>7.1</b>	Introduction .....	391
<b>7.2</b>	Design methodologies .....	391
<b>7.2.1</b>	Why design methodologies? .....	391
<b>7.2.2</b>	Design flows .....	393
<b>7.3</b>	Requirements analysis .....	400
<b>7.4</b>	Specifications .....	401
<b>7.4.1</b>	Control-oriented specification languages .....	401
<b>7.4.2</b>	Advanced specifications .....	404
<b>7.5</b>	System analysis and architecture design .....	407
<b>7.5.1</b>	CRC cards .....	407
<b>7.6</b>	Dependability, safety, and security .....	410
<b>7.6.1</b>	Examples .....	411
<b>7.6.2</b>	Quality assurance techniques .....	413
<b>7.6.3</b>	Verifying the specification .....	415
<b>7.6.4</b>	Design reviews .....	417
<b>7.6.5</b>	Safety-oriented methodologies .....	418
<b>7.7</b>	Summary .....	421
	What we learned .....	421
	Further reading .....	421
	Questions .....	421
	Lab exercises .....	422
<b>CHAPTER 8 Internet-of-Things Systems .....</b>		<b>423</b>
<b>8.1</b>	Introduction .....	423
<b>8.2</b>	IoT system applications .....	423
<b>8.3</b>	IoT system architectures .....	425

<b>8.4</b>	Networks for IoT .....	427
<b>8.4.1</b>	The OSI model .....	427
<b>8.4.2</b>	Internet Protocol .....	428
<b>8.4.3</b>	IoT networking concepts .....	430
<b>8.4.4</b>	Bluetooth and Bluetooth Low Energy .....	434
<b>8.4.5</b>	802.15.4 and ZigBee .....	437
<b>8.4.6</b>	Wi-Fi .....	438
<b>8.5</b>	Databases and timewheels .....	440
<b>8.5.1</b>	Databases .....	440
<b>8.5.2</b>	Timewheels .....	443
<b>8.6</b>	Example: smart home .....	444
<b>8.7</b>	Summary .....	446
	What we learned .....	447
	Further reading .....	447
	Questions .....	447
	Lab exercises .....	448
<b>CHAPTER 9</b>	<b>Automotive and Aerospace Systems .....</b>	<b>449</b>
<b>9.1</b>	Introduction .....	449
<b>9.2</b>	Networked control systems in cars and airplanes .....	449
<b>9.3</b>	Vehicular networks .....	453
<b>9.3.1</b>	CAN bus .....	453
<b>9.3.2</b>	Other automotive networks .....	455
<b>9.4</b>	Safety and security .....	457
<b>9.5</b>	Summary .....	459
	What we learned .....	459
	Further reading .....	459
	Questions .....	459
	Lab exercises .....	460
<b>CHAPTER 10</b>	<b>Embedded Multiprocessors .....</b>	<b>461</b>
<b>10.1</b>	Introduction .....	461
<b>10.2</b>	Why multiprocessors? .....	461
<b>10.3</b>	Categories of multiprocessors .....	464
<b>10.4</b>	MPSOCs and shared memory multiprocessors .....	466
<b>10.4.1</b>	Heterogeneous shared memory multiprocessors .....	466
<b>10.4.2</b>	Accelerators .....	467
<b>10.4.3</b>	Accelerator performance analysis .....	469
<b>10.4.4</b>	Scheduling and allocation .....	474
<b>10.4.5</b>	System integration .....	476
<b>10.4.6</b>	Debugging .....	480

<b>10.5</b>	Design example: video accelerator .....	481
<b>10.5.1</b>	Video compression .....	481
<b>10.5.2</b>	Algorithm and requirements .....	483
<b>10.5.3</b>	Specification .....	485
<b>10.5.4</b>	Architecture .....	486
<b>10.5.5</b>	Component design .....	488
<b>10.5.6</b>	System testing .....	489
<b>10.6</b>	Application example: optical disk .....	489
<b>10.7</b>	Summary .....	494
	What we learned .....	494
	Further reading .....	494
	Questions .....	495
	Lab exercises .....	496
	Glossary .....	497
	References .....	517
	Index .....	527
