Preface to the Second Edition.....	xxix
Preface to the First Edition.....	xxxi
Acknowledgments .....	xxxiii
Authors .....	xxxvii
Introduction .....	xxxix

## Section I Overview of Supply Chain Management

<b>1. Evolution of Supply Chains .....</b>	<b>3</b>
Learning Outcomes .....	3
What Is a Supply Chain?.....	6
Importance of SCM.....	7
Evolution of Supply Chains.....	9
Early Supply Chains .....	9
Local Supply Chains.....	9
Global Supply Chains.....	10
Changing Government Orientation.....	13
State-Controlled Governments .....	13
Market-Driven Governments .....	13
Current Trends That Link Supply Chain Participants More Closely.....	14
Relationship Building.....	14
Customer Relationship Management.....	14
Supplier Relationship Management .....	15
Product Life Cycle Management.....	15
Electronic Business .....	15
Developing Economies.....	16
Outsourcing.....	16
Need for Quality Improvement .....	17
Changing Customer Demands .....	18
Decreasing Response Time.....	18
Lean Supply Chains to Reduce Waste.....	18
Current Developments in SCM.....	19
Power Has Shifted from Manufacturers to Retailers .....	19
Consolidation of Small, Local, or Regional Retailers into National Chains .....	20
Emergence of “Killer Category” Retailers.....	20
From a Make-and-Sell Mentality to a Sense-and-Respond Orientation.....	20
Obstacles to Supply Chain Integration .....	21
Need for Globalization.....	22
Complexity of Arranging Entities with Common Interests .....	22
Lack of Effective Interorganizational Systems .....	23

Need for Multiple Supply Chains within Companies.....	23
Lack of Trust between Participants.....	23
Examples of Companies with Successful Supply Chains.....	25
Summary.....	25
Discussion Questions.....	28
References.....	28
<b>2. Supply Chains as a System.....</b>	<b>31</b>
Learning Outcomes.....	31
Company Profile: Zara’s.....	31
Introduction.....	35
Supply Chain Systems.....	37
Inputs.....	37
Transformation.....	38
Outputs.....	38
Manufacturing versus Services.....	39
Characteristics of Supply Chains.....	39
Physical Flow.....	40
Information Flow.....	41
Funds Flow.....	42
Relational Flow.....	42
Examples of Supply Chains in Different Industries.....	43
Internal and External Customers.....	45
Open Systems versus Closed Systems.....	46
Effect of External Influences on Supply Chains.....	48
Obstacles and Enablers of Supply Chain Integration.....	48
Obstacles.....	49
Enablers.....	50
Performance Measurement.....	50
Allocation of Costs, Resources, and Benefits along the Supply Chain.....	53
Value Creation as the Ultimate Objective.....	54
Summary.....	56
Hot Topic.....	56
Discussion Questions.....	59
References.....	59

## Section II Demand Perspective

<b>3. Determining Customer Needs.....</b>	<b>63</b>
Learning Outcomes.....	63
Company Profile: McDonald’s.....	63
Introduction.....	67
Group Customers into Homogeneous Segments.....	68
Determine Needs of the Ultimate Consumer.....	69
Product Needs.....	70
Service Needs.....	70
Marketing Mix.....	70
Manufacturing and Service Supply Chains.....	71

Accurately Determine Customer Needs.....	72
Approaches .....	72
Market Research.....	73
Open System Scanning .....	74
Competition .....	74
Technology .....	74
Economy .....	75
Government .....	76
Social Trends.....	76
Business Environment.....	77
Develop Reliable Demand Forecasts.....	78
Quantitative Forecasting Methods.....	78
Simple Moving Average .....	79
Weighted Moving Average .....	80
Exponential Smoothing.....	81
Exponential Smoothing with Trend Adjustment .....	81
Seasonal Factor Forecasting.....	81
Regression Analysis.....	82
Qualitative Forecasting Methods .....	83
Survey Method .....	83
Delphi Method.....	83
Collaborative Forecasting .....	84
Determine the Attributes of a Well-Designed Product.....	84
Functionality (Product Works to Satisfy Customers’ Needs).....	84
Validity (Product Has Value and Functions at a Reasonable Cost) .....	84
Manufacturability (Product Can Be Efficiently Produced).....	85
Reliability (Product Has a Variety of Quality Attributes).....	85
Serviceability (Product Can Be Serviced during Its Effective Life).....	85
Recyclability (Product Can Be Recycled along the Reverse Logistics Supply Chain) ..	86
Consider Alternative Product Design Approaches .....	86
Quality Function Deployment .....	87
Concurrent Engineering .....	87
Design for Manufacturability .....	88
Design for Sustainability .....	88
Determine the Number of Supply Chains Needed by a Company.....	89
Align with Customer Segment .....	89
Align with Product/Service Bundle.....	90
Align with Supplier Category .....	91
Align with Common Incentives.....	91
Respond to Needs of Internal Customers .....	92
Conclusion .....	92
Hot Topic: Human Trafficking .....	93
Discussion Questions .....	94
References .....	95
<b>4. A System to Meet Customer Needs.....</b>	<b>97</b>
Learning Outcomes .....	97
Company Profile: GE Aviation.....	97
Supply Chain Models .....	101
Global Supply Chain Forum Model .....	102

Customer Relationship Management .....	104
Origins of CRM .....	104
What Can CRM Do? .....	105
Benefits.....	105
CRM Processes .....	106
Problems.....	107
CRM's Future.....	108
Product Life Cycle Management .....	109
What Is PLM?.....	109
How Did PLM Evolve? .....	110
What Does PLM Include? .....	110
What Does PLM Not Include?.....	111
What Are the Benefits of PLM? .....	111
What Are the Obstacles? .....	112
What Is the Present Status of PLM? .....	113
What Does the Future Hold?.....	114
Supply Chain Configuration.....	115
Basic (Generic) Supply Chain .....	115
Variations for Different Industries .....	116
Supply Chain Mapping.....	116
Determining Resource Requirements .....	116
Facilities.....	116
Equipment.....	119
Employees .....	120
Inventory .....	120
Information Systems.....	120
Designing Processes to Match with Products .....	121
Make to Stock .....	122
Assemble to Order .....	122
Make to Order .....	122
Engineer to Order .....	122
Determining the Mix of Make and Buy .....	123
Core Competency Concept.....	123
Total Cost of Ownership .....	123
Cost Reduction versus Revenue Increase Considerations .....	124
Effect of Outsourcing Movement.....	124
Aligning Entities along the Supply Chain .....	125
Entities to Be Involved.....	126
Allocation of Authority and Responsibility among Entities .....	126
Collaboration Process.....	126
Implementation Plan .....	127
Evaluating the System Design .....	127
Will It Accomplish Its Objectives? .....	128
Is It Sustainable? .....	128
Is It Flexible?.....	129
Summary.....	129
Hot Topic: Sweatshops.....	130
Discussion Questions.....	132
References .....	133

**5. Demand Management** ..... 137

    Learning Outcomes ..... 137

    Company Profile: NextEra ..... 137

    Introduction ..... 143

    Definition of Demand Management ..... 144

    Importance of Demand Management ..... 146

    Managing Demand ..... 146

        Accept All Demand ..... 147

        Select the Types of Demand to Accept ..... 147

        Solicit External Input in Forming Demand Patterns ..... 147

        Design the Form in Which Demand Will Be Accepted ..... 147

        Impose Constraints on Demand Submission ..... 148

    Managing Supply ..... 148

        Select a Demand Management Strategy ..... 148

        Develop a Demand-Forecasting System ..... 148

        Determine the Resource Requirements to Meet the Demand ..... 149

    Merging Supply and Demand into a Demand Management Process ..... 149

        Sales and Operations Planning to Match Short-Term Supply and Demand ..... 149

        Collaboration among Supply Chain Participants ..... 150

    Demand Management in Manufacturing ..... 151

    Demand Management in Services ..... 152

    Proposed Demand Management Strategies ..... 154

    Factors That Affect Selection of a Demand Management Strategy ..... 155

        Resources’ Value ..... 155

        Type of Demand ..... 157

        Top Management Strategies ..... 157

    Relationship between Factors and Strategies ..... 158

    Model for Integrating Demand and Supply Management ..... 160

    Programs Used to Implement Demand Management Strategies ..... 164

        Provide Strategy Programs ..... 164

        Match Strategy Programs ..... 165

        Influence Strategy Programs ..... 165

        Control Strategy Programs ..... 166

    Demand Management along the Supply Chain ..... 166

        Retail ..... 167

        Wholesale ..... 167

        Manufacturer ..... 167

        Mining and Agriculture ..... 167

    Summary ..... 167

    Discussion Questions ..... 170

    References ..... 170

**Section III Supply Perspective—Distribution, Production, Procurement, and Logistics**

**6. Distribution and Retailing** ..... 175

    Learning Outcomes ..... 175

    Company Profile: Lowe’s ..... 175

Introduction.....	179
Retail Function.....	180
History of Retailing.....	180
Characteristics of the Industry.....	184
Customers and Markets.....	184
Outputs.....	186
Inputs.....	186
Transformation Process.....	187
Impact on Operations Management.....	188
Designing the Retail Process.....	188
Strategic Orientation.....	189
Critical Design Points: Keys to Success.....	190
Additional Factors to Consider in Retail Store Design.....	193
Multidiscipline Project.....	193
Continuing Need to Readjust or Redesign.....	193
E-Commerce Considerations (Direct vs. Indirect Selling).....	193
Strategic or Long-Term Considerations.....	194
Managing a Retail Business.....	194
Determine the Expected Demand.....	194
Plan Capacity to Meet Demand.....	195
Implement the Operating Plan.....	195
Measure Performance.....	196
Replan for the Next Period.....	196
Retail and Inventory Management.....	196
Value.....	196
Availability.....	197
Variety.....	197
Presentation.....	197
Service.....	197
Response Time.....	197
Present Situation in Retailing.....	197
Future in Retailing.....	198
Role of Wholesalers and Distribution Centers.....	199
Ordering.....	199
Receiving.....	199
Stocking.....	199
Picking.....	200
Loading the Trucks.....	200
Transporting to Stores.....	200
Unloading and Display at Stores.....	200
Critical Success Factors for Distribution.....	201
Inventory within Distribution Functions.....	201
Inventory Management between Retailer and Distributor.....	202
Technology in Distribution Functions.....	202
At the Retail Store.....	202
Movement of Goods.....	203
At the Distribution Center.....	203
Distribution Center Design.....	203
Positioning Services within the Distribution Functions.....	204

Presale Services .....	204
Postsale Services.....	204
Role of Third-Party Service Providers .....	205
Distribution Performance Measurement.....	205
Financial Performance Measures .....	205
Operating Performance Measures.....	205
Collaboration Performance Measures.....	205
Retailer–Distributor Relationship .....	206
Summary.....	206
Hot Topic: Contaminated Milk .....	207
Discussion Questions .....	209
References .....	210
<b>7. Production and Service Processes .....</b>	<b>211</b>
Learning Outcomes .....	211
Company Profile: Caterpillar .....	211
Introduction.....	216
Evolution of the Production Function.....	218
From Craft to Mass Production.....	219
From Mass Production to Mass Customization .....	219
Critical Success Factors for Manufacturers .....	220
Cost and Efficiency .....	220
Quality .....	220
Responsiveness: Timing of Delivery .....	220
Responsiveness: Product/Service Mix.....	221
Flexibility.....	221
Agility .....	221
Information Technology .....	221
Manufacturing Strategies .....	221
Make to Stock .....	222
Locate to Order.....	222
Assemble to Order .....	223
Make to Order .....	223
Engineer to Order .....	223
Batch to Lean Operations .....	223
Present Batch Flow.....	224
Machine Breakdowns .....	225
Supplier Failures.....	225
Worker Flexibility.....	225
Customer Lead Times.....	225
Customer Order Size.....	226
Proposed Lean Production Flow .....	226
Customer Lead Time.....	226
Extra Available Space.....	227
Faster Detection of Quality Problems .....	227
Ease of Transferring Operators .....	227
Reduced Scheduling Requirements .....	227
Smaller Lot Sizes .....	227

No Buildup of WIP Inventory .....	228
Empowered Employees .....	228
Reduced Equipment Breakdowns .....	228
Reduced Late Material Deliveries .....	228
Reduced Write-Off of Inventory .....	228
Obstacles to Implementing Lean .....	228
Make or Buy Strategies .....	229
Vertical Integration .....	229
Outsourcing .....	230
Capacity Planning .....	232
How Much Capacity? When? What Kind? .....	232
Location and Ownership .....	233
Service Production Strategies .....	233
Relationships with Downstream Customers .....	234
From Transactions to Processes .....	236
Transactions versus Processes .....	236
Basic Processes of a Business .....	237
Benefits of a Process Orientation .....	238
Effect of Process Orientation .....	238
Organizational Structure .....	238
Strategies .....	239
Knowledge Management .....	239
Change Management .....	240
Trends in Production .....	240
From Manual to Automated .....	240
From Domestic to Global .....	241
From Standard Products to Customized .....	241
Postponement .....	241
Sales and Operations Planning .....	242
Additive Manufacturing .....	242
Performance Measurement .....	242
As Measured by Accounting .....	242
As Measured by Production .....	243
Measures along the Supply Chain .....	243
Summary .....	243
Hot Topic: Clothing Manufacturing .....	244
Discussion Questions .....	246
References .....	247
<b>8. Procurement/Purchasing .....</b>	<b>249</b>
Learning Outcomes .....	249
Company Profile: Nestlé .....	249
Introduction .....	254
Role of Procurement in the Supply Chain .....	255
Traditional Purchasing .....	256
Contemporary Purchasing .....	258
Changing Role of Purchasing .....	259
Critical Success Factors for Purchasing .....	261
Functionality .....	261

Availability.....	261
Cost.....	261
Quality.....	262
Match Inflow with Outflow.....	262
Reduce Variances in Delivery.....	262
Increase Supplier Dependability.....	263
Reduce the Bullwhip Effect.....	263
Become an Intercompany Facilitator.....	263
Find Sustainable Suppliers.....	263
Purchasing Functions: Participating.....	264
Product Design.....	264
Product Specifications.....	264
New Product Introduction.....	264
Target Costing.....	266
Strategic Sourcing.....	267
Supplier Location.....	268
Inventory Management.....	268
Supplier Risk Management.....	269
Purchasing Functions: Directing.....	269
Purchasing Process.....	269
Supplier Evaluation.....	270
Supplier Relationship Management.....	271
Supply Chain Coordination/Collaboration.....	271
Purchasing along the Supply Chain.....	271
Consumer.....	271
Retail.....	272
Wholesale.....	272
Manufacturer.....	273
Mining and Agriculture.....	273
Services.....	273
Offshore Outsourcing.....	274
As a Strategic Concept.....	274
TCO Considerations.....	275
As a Project, with Project Management Needs.....	277
Other Considerations: Intangible Costs and Public Acceptance.....	277
Supplier Location as a Strategy for Entering an Offshore Market.....	278
Performance Measurement.....	278
Traditional: Positive Purchase Price Variance.....	278
Contemporary: Enhanced Value for the Consumer.....	278
Future of Purchasing.....	279
Summary.....	280
Hot Topic: Apple Juice.....	281
Discussion Questions.....	283
References.....	283
<b>9. Logistics: The Glue That Holds the Supply Chain Together.....</b>	<b>287</b>
Learning Outcomes.....	287
Company Profile: Transportation Insight.....	287

Scope of Logistics.....	293
Evolution of Integrated Logistics.....	295
Transportation.....	297
Truck: Privately Owned or Third-Party Carriers.....	298
Rail: For Selected Goods .....	298
Waterways.....	299
Air.....	299
Pipeline.....	299
Parcel.....	299
Transmission Lines .....	299
Fiber-Optic Cable Networks.....	300
Materials Management .....	300
Interim Storage.....	300
Exchange Points .....	301
Traceability.....	301
Integration.....	301
Outsourcing.....	302
Drivers of the Outsourcing Movement.....	303
Sustainability .....	304
Social Responsibility.....	304
Ethical Responsibility .....	304
Future Company Well-Being .....	304
Steps in the Outsourcing Decision .....	304
Step 1. Determine Project Feasibility.....	304
Step 2. Prepare a Project Plan.....	305
Step 3. Estimate Annual Savings .....	306
Step 4. Identify Risks or Disruption Costs .....	306
Step 5. Estimate the Return on Invested Capital .....	307
Step 6. Implement the Offshore Outsourcing Program.....	307
Step 7. Measure Progress.....	307
Step 8. Review and Revise .....	308
Summary .....	308
Reshoring Initiative .....	308
Rise of 3PLs.....	309
Benefits of 3PL Services.....	312
Reduces Total Cost .....	312
Decreases Total Time from Origin to Destination .....	312
Results in More Consistent Processing: Less Variability in Elapsed Time.....	312
Allows Individual Participants to Concentrate on Core Functions.....	313
Increases Flexibility of the Supply Chain.....	313
Leads to Market Development through 3PL Contacts.....	313
Taps into Specialized Knowledge Not Normally Internal to Company .....	313
Obstacles to Successful Implementation.....	313
Lack of Qualified Personnel within the Company to Manage the 3PLs.....	313
Lack of Full-Service Providers .....	314
Perceived Loss of Control by Outsourcing Company .....	314
Difficulty in Coordinating Disparate Participants.....	314
Lack of a Comprehensive Financial Analysis before Implementing.....	314
Difficulty in Selecting and Using Appropriate Performance Measures .....	314

Trend toward Outsourcing the Distribution Function.....	315
Major Companies .....	315
Role of 4PL in Building Supply Chain Relationships .....	315
High-Tech Industry Issues.....	316
Risk Management .....	317
Status Report .....	317
Hot Topic .....	319
Discussion Questions.....	321
References .....	321
<b>10. Reverse Supply Chains .....</b>	<b>325</b>
Learning Outcomes .....	325
Company Profile: GENCO.....	325
Introduction.....	329
Description of Reverse Supply Chain Networks .....	329
Benefits of Reverse Logistics .....	330
Barriers to Reverse Logistics .....	331
Continuation of Forward Supply Chains .....	331
History of Reverse Logistics.....	333
Principal Drivers of the Movement.....	333
Individual Consumers.....	333
Individual Businesses.....	335
Society as a Group .....	335
Environmental Concerns .....	335
Resource Scarcity Concerns.....	336
Business Sector .....	336
Economic Benefits Possible .....	336
New Businesses, Even New Industries, Possible.....	337
Educational Institutions.....	337
Governments: At All Levels .....	337
Activities in Reverse Logistics .....	338
Service: Assure Proper Use of Product.....	338
Returns: Repackaging or Relocation.....	338
Restoration: Minor Modification or Repair.....	338
Remanufacturing: Overhaul and Major Rebuilding .....	339
Recycling: Reconstitution as Part of Another Product.....	339
Disposal: Return to Natural State.....	339
Hazardous Waste Disposal.....	340
Role of Private Industry .....	340
New Paradigms in Product Design (Design for Sustainability) .....	341
Design and Operate Green Supply Chains.....	341
Develop Systems to Manage Reverse Logistics.....	341
Participate in Joint Ventures to Seek Social Objectives .....	342
Role of Government.....	342
Research: To Identify Threats and Opportunities .....	342
Legislation: To Standardize Business Requirements.....	344
Regulation: To Monitor Performance.....	345
Participation: To Encourage and Support Ongoing Programs.....	345
Role of Consumer.....	345

Participant in Reverse Supply Chain Programs ..... 346

Educated Consumer ..... 346

Supporter of Green Supply Chain Efforts ..... 346

Reverse Logistics Network..... 347

Continuation of the Forward Supply Chain ..... 347

Open System Environment..... 348

Heavily Outsourced by Major Businesses..... 348

Need for a Life Cycle Systems Approach ..... 349

Need for IT..... 351

Other Considerations in Designing Reverse Supply Chains ..... 352

Future ..... 352

    Growth in Amount of Materials Recycled ..... 352

    Increase in Number of Companies Performing Reverse Logistics Activities ..... 353

    Joint Ventures between Private Business and Government ..... 353

    Increased Emphasis on Prevention, Not Just Reusing ..... 353

    More Companies Will Design Integrated Reverse Logistics Systems..... 353

Summary..... 353

Discussion Questions ..... 356

References ..... 357

**Section IV Need for Integration**

**11. The Need to Integrate ..... 361**

    Expected Outcomes ..... 361

    Company Profile: Cisco..... 361

    Introduction..... 367

    Setting the Stage..... 368

        Reasons to Integrate..... 369

        Research in Support of Integration Efforts..... 370

    From Mass Production to Mass Customization ..... 372

        From Craft to Mass Production..... 372

        Prelude to Mass Customization ..... 373

    From Vertical Integration to Virtual Integration..... 375

    From Homogeneous Cultures to Diverse Cultures ..... 377

    From Bottom Line to Triple Bottom Line ..... 377

    Drivers of Change..... 379

        Global Competition..... 379

        Global Markets ..... 380

        Economic Advantage..... 380

            Lower Costs..... 380

            Higher Revenues ..... 381

    Relationships and Trust among Supply Chain Participants ..... 381

        Trust between Individuals..... 381

        Formal Contracts or Agreements ..... 381

        Common Interests or Projects (Enforced Trust) ..... 381

    Involves Change Management ..... 382

        Change Is Difficult within a Company..... 382

        Embedded Culture..... 382

Policies and Procedures.....	383
Organization Structure .....	383
Customer Relationships .....	383
Supplier Relationships.....	383
Union Relationships.....	384
Change Is More Difficult for a Community .....	384
Company–Community Relationship .....	384
Difficulty in Changing Laws and Regulations .....	385
Difficulty in Changing Infrastructure .....	385
Change Is Most Difficult for an Entire Country.....	385
Political Implications .....	385
Regional Differences.....	385
Steps in the Integration Process.....	386
Build Interfaces with Customers and Suppliers .....	386
Change Interfaces to Interlaces to Make the Relationships Closer.....	386
Change Interlaces to Integrated Relationships .....	386
Need for Strategic Planning .....	386
Categories of Operations .....	387
Normal Operations.....	387
Improvement Programs .....	388
Problem-Solving Programs .....	388
Crisis Management.....	388
Need for a Multiyear Project Plan.....	388
Performance Measurement across the Supply Chain.....	389
Integration Requires Sharing.....	389
Summary.....	389
Hot Topic: AECL, Part 1 .....	390
Discussion Questions.....	392
References .....	393
<b>12. Why Integration Is Difficult.....</b>	<b>395</b>
Learning Outcomes .....	395
Company Profile: Boeing .....	395
Introduction.....	400
Determining Strategic Objectives.....	401
Evaluating the Potential Return on Investment.....	401
Uncertainty of Benefits.....	401
Tangible or Direct.....	402
Intangible or Indirect.....	402
Uncertainty of Costs .....	402
Product Costs.....	402
Support (Overhead) Costs .....	403
Uncertainty of Assets Employed .....	403
Designing for Participant Differences .....	403
Participants Are Not Equal.....	403
Commitment.....	403
Contribution.....	404
Different Roles: Drivers and Followers .....	404

Technical Differences .....	404
Size .....	404
Proximity .....	405
Type of Operation.....	405
Need for Multiple Supply Chains.....	405
Different Customer Segments .....	406
Different Supplier Segments .....	406
Different Logistics Networks .....	407
Separating Interwoven Networks.....	408
Selecting and Implementing Technology.....	408
Product and Service Processes.....	408
Remove Barriers .....	408
Eliminate Redundancy.....	408
Develop Compatible Processes .....	409
Strive for Effectiveness and Efficiency .....	409
Incomplete Interorganizational Systems .....	409
Lack of Systems Compatibility.....	409
Lack of Information .....	410
Lack of a System .....	410
Financial Funds Flow .....	410
Realigning Infrastructure.....	411
Internal Organization.....	411
Effect of Outsourcing Movement.....	412
External Organization.....	412
Policies and Procedures .....	412
Physical Infrastructure.....	413
Transforming Company Cultures .....	413
Internal .....	413
External.....	413
Building Relationships.....	414
Communicate.....	414
Coordinate.....	414
Cooperate .....	414
Collaborate .....	414
Lack of Trust Inhibits Collaboration .....	415
Measuring Performance .....	418
Maintaining the System.....	419
During the Implementation Process .....	419
During the Operation of the Supply Chain .....	419
Extension into Reverse Logistics .....	420
Obstacles to International SCM.....	420
Summary.....	420
