Acknowledgements

In writing this book I have become increasingly aware of the ways in which my ideas about ‘development’ have been influenced by a range of people. While I cannot possibly thank them all individually, there are a number of people who deserve a special mention. During my student years, Colin Clarke, my tutor and later doctoral supervisor, encouraged my enthusiasm in development debates and in particular my interests in Latin America. Discussions with fellow DPhil students, Alina Darbellay, Sarah Howard and Elsbeth Robson were enlightening as we sought to examine the commonalities and differences between Mexico, Bolivia, Nigeria and Nicaragua where we were working in the early 1990s.

During my time teaching at Liverpool University, I was very fortunate to be part of an enthusiastic and friendly department. In particular, I was very lucky to teach courses with Bill Gould, Mark Pelling, Ola Uduku and the late David Smith. The courses that we taught together certainly contributed a great deal to the formulation of the book and some of the material will be familiar to the Liverpool Geography, International Development and Latin American Studies students. Since moving to Royal Holloway, the first year Geography students have been given a ‘taster’ of the book’s contents. Many thanks to them for their contributions to class discussions and also to my Royal Holloway colleagues for making me feel so welcome. I am also very grateful to all the MA and PhD students I have had the pleasure to work with both in Liverpool and

at Royal Holloway. The work of Andrea Kilgour and Claire Mercer is referred to in this book, but all ‘my’ graduate students have had a great influence on the ways in which I think about ‘development’ and research.

I have been very lucky to be able to work with a range of individuals and organizations throughout the world as part of my job. In particular I would like to thank Brenda Yeoh in Singapore and all the Oaxacan researchers associated with the Instituto Welte in Mexico. Very special thanks to the Cruz Family in Oaxaca for their hospitality over the past 12 years.

In producing this book I would like to say a special thank you to Andrew Mould, Melanie Attridge, Ann Michael and Anna Somerville at Routledge for their patience, and to Tony Binns the Series Editor for his support. Many thanks to anonymous colleagues in the UK and USA whose referees’ comments on the draft manuscript certainly helped me clarify my ideas and alerted me to new approaches or examples. Suzanne Yee in the Graphics Unit at Liverpool and Jenny Kynaston at Royal Holloway produced the maps and figures from my scribblings, so to them I owe a particular note of thanks.

On a personal note I would like to thank Chris and Lorna for providing me with somewhere to live and finish the manuscript when I moved to London. Finally, a very big thank you to Carolyn for all her support and encouragement and for providing the soundtrack for the writing of ‘the book’.
