3 E-business infrastructure 92
Learning outcomes / Management issues 92
Links to other chapters 92
Introduction 93
E-business infrastructure components 94
Real-world e-business: lastminute.com 96
Internet technology 98
Hosting of websites and e-business services 99
The Internet timeline 99
Just how big is the Internet? 102
Case study 3.1 Innovation at Google 103
Intranets and extranets 105
Web technology 112
Internet-access software applications 116
Augmented reality 118
Blogs and blogging 118
Electronic mail or e-mail 120
Feeds 120
How does it work? Internet standards 124

Networking standards 124
The HTTP protocol 126
Uniform resource locators (URLs) 126
Domain names 126
Web presentation and data exchange standards 128
Audio and video standards 138
Focus on Internet governance 138
Managing e-business infrastructure 143
Managing hardware and systems software infrastructure 145
Managing Internet service and hosting providers 146
Managing employee access to the Internet and e-mail 150
Managing e-business applications infrastructure 150
Focus on Web services, SaaS and service-oriented architecture (SOA) 153
Benefits of web services or SaaS 153
Challenges of deploying SaaS 154
Case study 3.2 New architecture or just new hype? 159
EDI 161
Focus on Mobile commerce 162
Wireless Internet access standards 162
Wireless access devices 163
Popularity of applications of mobile communications 164
Mobile apps 164
Summary 173
Exercises 174
References 175
Further reading 177
Web links 177

4 E-environment 179
Learning outcomes / Management issues 179
Links to other chapters 179
Introduction 180
Real-world e-business: Lingo24 183
Social and legal factors 185
Factors governing e-commerce service adoption 185
Privacy and trust in e-commerce 194
Other e-commerce legislation 207
Environmental and green issues related to Internet usage 212
Taxation 213
Freedom-restrictive legislation 215
Economic and competitive factors 216
Focus on E-commerce and globalization 217
Case study 4.1 The implications of globalization for consumer attitudes 218
The implications of e-commerce for international B2B trading 219
Political factors 221
Internet governance 222
E-government 222
Technological innovation and technology assessment 223
Approaches to identifying emerging technology 226
Summary 228
Exercises 228
References 229
Further reading 231

Part 2 Strategy and applications 235

5 E-business strategy 237
Learning outcomes / Management issues 237
Links to other chapters 237
Introduction 238
Real-world e-business: Standard Life 238
What is e-business strategy? 241
The imperative for e-business strategy 243
E-channel strategies 244
Strategy process models for e-business 246
Strategic analysis 250
Resource and process analysis 250
Competitive environment analysis 257
Assessing competitive threats 257
Co-opetition 261
Competitor analysis 261
Strategic objectives 262
Defining vision and mission 262
How can e-business create business value? 265
Case study 5.1 Capital One creates value through e-business 266
Objective setting 267
Case study 5.2 Setting the Internet revenue contribution at Sandvik Steel 271
Strategy definition 275
Decision 1: E-business channel priorities 276
Decision 2: Market and product development strategies 278
Decision 3: Positioning and differentiation strategies 282
Decision 4: Business, service and revenue models 283
Decision 5: Marketplace restructuring 286
Decision 6: Supply-chain management capabilities 288
Decision 7: Internal knowledge management capabilities 288
Decision 8: Organizational resourcing and capabilities 288
Strategy implementation 291
Failed e-business strategies 291
E-business strategy implementation success factors for SMEs 292
Case study 5.3 Boo hoo – learning from the largest European dot-com failure 293
Focus on Aligning and impacting e-business strategies 296
Elements of IS strategy 297
Investment appraisal 297
Summary 301
Exercises 301
References 302
Further reading 305
Web links 306

6 Supply chain management 307
Learning outcomes / Management issues 307
Links to other chapters 307
Introduction 308
Problems of supply chain management 311
What is supply chain management? 312
Using technology to support supply chain management – an example 314
A simple model of a supply chain 317
Case study 6.1 Shell Chemicals redefines its customers' supply chains 318
What is logistics? 322
Push and pull supply chain models 324
Focus on The value chain 325
Restructuring the internal value chain 327
The value stream 327
Value chain analysis 328
Value networks 329
Towards the virtual organization 331
Options for restructuring the supply chain 332
Using e-business to restructure the supply chain 334
Technology options and standards for supply chain management 335
Adoption rates of e-business applications 335
Case study 6.2 Argos uses e-supply chain management to improve customer convenience 339
IS-supported downstream supply chain management 340
Outbound logistics management 341
IS infrastructure for supply chain management 341
Supply chain management implementation 342
Data standardization and exchange 342
The supply chain management strategy process 343
Goal-setting and performance management for e-SCM 345
Managing partnerships 346
Managing global distribution 347
Case study 6.3 RFID: keeping track starts its move to a faster track 348
Summary 349
Exercises 350
References 351
Further reading 353
Web links 353

7 E-procurement 354
Learning outcomes / Management issues 354
Links to other chapters 354
Introduction 355
What is e-procurement? 355
Understanding the procurement process 357
Types of procurement 359
Participants in different types of e-procurement 359
Drivers of e-procurement 360
Examples of the benefits of e-procurement 361
Case study 7.1 Cambridge Consultants reduce costs through e-procurement 362
Focus on Estimating e-procurement costs 364
The impact of cost savings on profitability 364
Barriers and risks of e-procurement adoption 366
Implementing e-procurement 367
Integrating company systems with supplier systems 368
Focus on B2B marketplaces 371
Case study 7.2 Covisint – a typical history of a B2B marketplace? 373
Types of marketplace 376
The future of e-procurement 377
Summary 378
Exercises 378
References 379
Further reading 381
Web links 381

8 E-marketing 382
Learning outcomes / Management issues 382
Links to other chapters 382
Introduction 383
Chapter structure 384
Real-world e-business: Guess 385
What is e-marketing? 386
Marketing defined 386
E-marketing defined 388
E-marketing planning 388
Is a separate e-marketing plan required? 389
Situation analysis 391
Demand analysis 392
Competitor analysis 396
Intermediary analysis 398
Internal marketing audit 398
Objective setting 399
Case study 8.1 The e-volution of easyJet's online revenue contribution 402
Strategy 404
Market and product positioning 407
Target market strategies 407
Focus on Characteristics of digital media communications 415
Tactics 420
Product 422
Case study 8.2 Dell gets closer to its customers online 425
Price 427
Place 431
Promotion 432
People, process and physical evidence 434
Focus on Online branding 434
The importance of brand online 437
Actions 439
Control 440
Case study 8.3 The new Napster changes the music marketing mix 441
Summary 445
Exercises 445
References 446
Further reading 449

Part 3

Implementation 529

10 Change management 530
Learning outcomes / Management issues 530
Links to other chapters 530
Introduction 531
Real-world e-business: Confused.com 532
The challenges of e-business transformation 534
The challenges of sell-side e-commerce implementation 535
Different types of change in business 539
Case study 10.1 Process management: making complex business simpler 543
Planning change 545
The imperative for project governance? 545
The project plan and schedule for an e-business system 547
Prototyping 551
Human resource requirements 552
Staff retention 552
Outsourcing 554
Revising organizational structures 555
Approaches to managing change 558
Senior management involvement 559
Models for achieving change 559
Organizational culture 562
Focus on Knowledge management 562
What is knowledge? 563
Objectives of knowledge management 565
Implementing knowledge management 565
Technologies for implementing knowledge management 566
Case study 10.2 Using Enterprise 2.0 tools to support knowledge management at Janssen-Cilag Australia 568
Risk management 571
Summary 572
Exercises 572
References 574
Further reading 575
Web links 575

11 Analysis and design 577
Learning outcomes / Management issues 577
Links to other chapters 577
Introduction 578
Real-world e-business: Arena Flowers 579
Analysis for e-business 582
Process modelling 582
Process mapping 582
Task analysis and task decomposition 583
Process dependencies 584
Workflow management 585
Validating a new process model 592
Data modelling 592
Design for e-business 594
Architectural design of e-business systems 594
Focus on User-centred site design 596
Use-case analysis 601
Designing the information architecture 608
Customer orientation 612
Elements of site design 614
Web accessibility 619
Case study 11.1 Dabs.com refines its web store 622

Focus on Security design for e-business 624
Managing computer viruses 628
Controlling information service usage 631
Monitoring of electronic communications 631
E-mail management 634
Hacking 638
Secure e-commerce transactions 639
Approaches to developing secure systems 640
Current approaches to e-commerce security 642
Reassuring the customer 642
Case study 11.2 Building an e-business fortress 643
Summary 644
Exercises 644
References 645
Further reading 647
Web links 647

12 E-business service implementation and optimization 649
Learning outcomes / Management issues 649
Links to other chapters 649
Introduction 650
Optimization of e-business services 651
Real-world e-business: Squarespace 651
Alternatives for acquiring e-business systems 654
Development of web-based content and services 655
Creating static web content 656
Software and services for developing e-business applications 658
Testing 662
The testing process 662
Testing environments 663
Changeover 663
Database creation and data migration 664
Deployment planning 665
Content management and maintenance 665
Frequency and scope of content updating 667
Maintenance process and responsibilities 668
Focus on Web analytics: measuring and improving performance of e-business services 673
Principles of performance management and improvement 674
Stage 1: Creating a performance management system 674
Stage 2: Defining the performance metrics framework 676
Stage 3: Tools and techniques for collecting metrics and summarizing results 679
Budgeting 692
Case study 12.1 Learning from Amazon's culture of metrics 695
Summary 701
Exercises 701
