Preface to the Third Edition ix
 Introduction xi

Chapter 1 Objective Sound 1

An Old Story 1
Properties of Physical Sound 1
 Propagation 1
 A Medium Is Required 3
 Speed of Sound 3
 Amplitude 4
 Wavelength and Frequency 4
 Importance of Sine Waves 6
 Sympathetic Vibration and
 Resonance 8
 Phase 8
 Influences on Sound Propagation 9
Room Acoustics 14
 Sound Fields in Rooms 15
 Sum of Effects 17
 Standing Waves 18
 Noise 19
 Scaling the Dimensions 20

Chapter 2 Psychoacoustics 23

Introduction 23
The Physical Ear 23
 Hearing Conservation 24
**Auditory Sensitivity versus
 Frequency 26**
 Threshold Value—the Minimum
 Audible Field 26
 Equal-Loudness Curves 26
**What’s Wrong with the Decibel-
 Magnitude Scaling 27**
Loudness versus Time 27
Spectrum of a Sound 28
 Critical Bands of Hearing 28
Frequency Masking 28
Temporal Masking 29
Pitch 29
Spatial Perception 30
 Transients and the Precedence
 Effect 30
 Influence of Sight on Sound
 Localization 30

Localization in Three Dimensions:
 Horizontal, Vertical, and Depth 30
 The Cocktail Party Effect (Binaural
 Discrimination) 32
Auditory Pattern and Object
Perception 32
 Information Used to Separate
 Auditory Objects 33
 Gestalt Principles 34
Speech Perception 36
 Speech for Film and Television 36
 Influence of Sight on Speech
 Intelligibility 37
 The Edge of Intelligibility 37
Conclusion 37

Chapter 3 Audio Fundamentals 39

Audio Defined 39
Tracks and Channels 39
Signals: Analog and Digital 39
**Paradigms: Linear versus
 Nonlinear 41**
Level 42
 Microphone Level 42
 Line Level 42
 Speaker Level 43
 Level Comparison 43
Analog Interconnections 44
 Impedance Bridging versus
 Matching 45
 Connectors 45
Quality Issues 47
 Dynamic Range: Headroom
 and Noise 47
 Linear and Nonlinear
 Distortion 48
 Wow and Flutter 50
 Digital Audio-Specific
 Problems 50

Chapter 4 Capturing Sound 55

Introduction 55
Microphones in General 55
**Production Sound for Fiction
 Films 56**

Preproduction—Location		Microphone Specifications	88
Scouting	56	Sensitivity	88
Microphone Technique—Mono . .	57	Frequency Response	88
Distance Effect	57	Choice of Microphone	
Microphone Directionality	58	Frequency Response	88
Microphone Perspective	58	Polar Pattern and Its Uniformity	
The Boom—Why, Isn't That Old		with Frequency	89
Fashioned?	58	Equivalent Acoustic Noise Level	
Booms and Fishpoles	59	and Signal-to-Noise Ratio . . .	89
Boom and Fishpole Operation . .	60	Maximum Undistorted Sound	
Checklist for Boom/Fishpole		Pressure Level	90
Operation	61	Dynamic Range	90
Planted Microphones	61	Susceptibility to Wind Noise . . .	90
Lavalier Microphones	63	Susceptibility to Pop Noise	90
Using Multiple Microphones . . .	65	Susceptibility to Handling	
Typical Monaural Recording		Noise	90
Situations	66	Susceptibility to Magnetic	
Microphone Technique—Stereo . .	72	Hum Fields	90
Background	72	Impedance	90
Techniques	73	Power Requirements	91
Recommendations	75	Microphone Accessories	91
Microphone Damage	76	Pads	91
Worldized and Futzed		High-Pass (Low-Cut) Filters . . .	91
Recording	76	Shock and Vibration Mounts . . .	91
Other Telephone Recordings	76	Mic Stands	92
		Mic Booms and Fishpoles	92
		Windscreens	92
		Silk Discs	93
		Microphone Cables and	
		Connectors	93
Chapter 5 Microphone Technicalities . 79			
Pressure Microphones	79	Chapter 6 Handling the Output of	
Boundary-Layer Microphones . .	80	Microphones	95
Wind Susceptibility	80	What Is the Output of a	
Pressure-Gradient Microphones . .	80	Microphone?	95
Wind Susceptibility	81	Analog Microphones	95
Combinations of Pressure and		Where to Put the Pad/Gain	
Pressure-Gradient Responding		Function	96
Microphones	82	Case History	97
Super- and Hypercardioids	82	Quiet Sounds	98
Subcardioid	83	Impedance	98
Variable-Directivity		Digital Microphones	99
Microphones	83	Digital Microphone Level	100
Interference Tube (Shotgun		The Radio Part of Radio Mics . . .	100
or Rifle Microphone)	83	Selecting Radio Mics	100
Microphone Types by Method of		Radio Mics in Use	102
Transduction	84	Frequency Coordination	102
Carbon	84	Minimize Signal Dropouts and	
Ceramic	84	Multipath	103
Electrodynamic (Commonly		Added Gain Staging	
Called "Dynamic")		Complications in Using	
Microphone	84	Radio Mics	104
Electrostatic (Also Known as		Radio Mics Conclusion	104
Condenser or Capacitor)			
Microphone	85		
Microphone Types by Directivity			
(Polar Pattern)	86		

Chapter 7 Production Sound Mixing 105

- Introduction 105
- Single- versus Double-System Sound 105
- Combined Single and Double System 106
- Next Decision for Single-System Setups: On-Camera or Separate Mix Facilities? 106
- For Double-System Setups: Separate Mixer and Recorder or Combined? 106
- Production Sound Consoles: Processes 107
 - Accommodating Microphone Dynamic Range 107
 - Other Processes 109
- Production Sound Mixers: Signal Routing 110
- Examples 110
 - Small Mixers 110
 - Small Mixer/Recorders 110
 - A Production Sound Mixer and Separate Recorder 111
 - Production Sound Mixer/Recorders 112
- Production Sound Equipment on a Budget 112
- Cueing Systems, IFB, and IEM 114
- Equipment Interactions 114
 - Radio Frequency Interactions 114
 - Audio Frequency Range Interactions: Inputs 115
 - Audio Frequency Range Interactions: Outputs 115
- Initial Setup 115
 - Toning Heads of “Reels” 115
 - Slating 115
- Mixing 117
- Level Setting 117
- Coverage 117
 - Dialog Overlaps 117
 - Crowd Scenes 118
- Logging 118
- Shooting to Playback 118
- Other Technical Activities in Production 119
- Set Politics 119

Chapter 8 Sync, Sank, Sunk 121

- In Case of Emergency 121
- Introduction 123

- A Little History 124
- Telecine or Scanner Transfer 125
- The European Alternative 127
- SMPTE Time Code Sync 127
 - Types of Time Code 128
 - Time Code Slates 131
 - Jam Syncing 131
 - Syncing Sound on the Telecine 132
 - Latent Image Edge Numbers 132
 - Synchronizers 132
 - Machine Control 132
 - Time Code Midnight 133
 - Time Code Recording Method 133
- Time Code for Video 133
- Conclusion 134
- Locked versus Unlocked Audio 134
- The 2 Pop 134
- Principle of Traceability 134

Chapter 9 Transfers 137

- Introduction 137
- Digital Audio Transfers 137
- Transfers into Digital Audio Workstations 137
 - Types of Transfers 137
 - File Transfers 138
 - Audio File Formats 139
 - Common Problems in Digital Audio File Transfers for Film and Television 140
 - Streaming Digital Audio Transfers 141
 - Problems Affecting Streaming Transfers 142
 - Audio Sample Rate 142
 - Revert to Analog 143
 - Digital Audio Levels 143
- Analog Transfers 143
- Analog-to-Digital and Digital-to-Analog Systems 144

Chapter 10 Sound Design 145

- Where Does Sound Design Come From? 146
- Sound Styles 147
- Example of Sound Design Evolution 149
- Sound Design Conventions 150
- Observing Sound 151

Chapter 11 Editing 153

- Introduction 153
- Overall Scheme 153

- Computer-Based Digital Audio**
- Editing 155
- Digital Editing Mechanics 155
- Types of Cuts 156
- Fade Files 156
- Cue-Sheet Conventions 157
- Feature Film Production** 157
- Syncing Dailies 157
- Dialog-Editing Specialization . . . 157
- Sound-Effects Editing
- Specialization 161
- Music-Editing Specialization . . . 164
- Scene Changes 165
- Premix Operations for Sound
- Editors 166
- Television Sitcom** 166
- Documentary and Reality**
- Production 167
- Bit Slinging 168
- Back to Our Story 168

Chapter 12 Mixing 171

- Introduction** 171
- Sound Source Devices Used in
- Rerecording 172
- Mixing Consoles 172
- Processes** 173
- Level 173
- Multiple Level Controls in
- Signal Path 174
- Dynamic Range Control 174
- Processes Primarily Affecting
- Frequency Response 177
- Processes Primarily Affecting
- the Time Domain 180
- Combination Devices 183
- Configuration** 183
- Early Rerecording Consoles . . . 183
- Adding Mix in Context 183
- Busing 183
- Patching 184
- Panning 184
- Auxiliary and Cue Buses 185

- Automation** 186
- Punch-In/Punch-Out (Insert)**
- Recording 186

Chapter 13 From Print Masters to Exploitation 189

- Introduction** 189
- Print Master Types** 189
- Print Masters for Various Digital
- Formats 190
- Low-Bitrate Audio 190
- Print Masters for Analog
- Soundtracks 191
- Other Types of Delivered
- Masters for Film Uses 192
- Digital Cinema 192
- Masters for Video Release 192
- Television Masters 193
- Sound Negatives** 193
- Theater and Dubbing Stage Sound**
- Systems** 194
- A-Chain and B-Chain
- Components 194
- Theater Sound Systems 194
- Theater Acoustics 196
- Sound Systems for Video** 197
- Home Theater 197
- Desktop Systems 198
- Toward the Future** 199

- Appendix I Working with Decibels 201
- Appendix II Filmography 203
- Appendix III The Eleven Commandments of
- film sound 205
- Appendix IV Bibliography 207
- Glossary 209
- Index 229
- About the Author 241
- Companion Website Page 243
- Instructions for accompanying DVD 245
