CONTENTS

List of figures	ix	
List of tables	xii	
Introduction	xv	
<hr/>		
Chapter 1	Collecting data	1
	Introduction	1
	1.1 Types of data	2
	1.2 Sources of information	4
	1.3 Primary data collection methods	6
	1.4 Estimation of sample size	7
	1.5 Choosing a suitable, representative sample	8
	1.6 Sampling methods	8
	1.7 Questionnaire design	12
	1.8 Sources of error	15
	1.9 Overall survey design	16
	Key points to remember	17
	Additional exercises	18
	Spreadsheet exercise	20
<hr/>		
Chapter 2	Presenting data	22
	Introduction	22
	2.1 Tabulation	22
	2.2 Cross-tabulation of two or more data variables	28
	2.3 Graphical presentation of data	29
	Key points to remember	41
	Additional exercises	42
	Spreadsheet exercise	43
<hr/>		
Chapter 3	Summarizing data	55
	Introduction	55
	3.1 Measures of central tendency: the mode	56
	3.2 Measures of central tendency: the median	58
	3.3 Measures of central tendency: the mean	60
	3.4 Choosing the appropriate measures of central tendency for a data set	62
	3.5 Measures of dispersion: the range	64
	3.6 Measures of dispersion: the inter-quartile range	65

	3.7 Measures of dispersion: variance and standard deviation	68
	3.8 Using the measures	72
	Key points to remember	74
	Additional exercises	76
	Spreadsheet exercise	78
<hr/>		
Chapter 4	Correlation and regression	81
	Introduction	81
	4.1 The scatter diagram	82
	4.2 Correlation coefficients	83
	4.3 Calculating the correlation coefficient	85
	4.4 The rank correlation coefficient	88
	4.5 Linear models	91
	4.6 Simple linear regression	94
	4.7 Assessing the accuracy of forecasts	97
	4.8 More complex regression models	98
	Key points to remember	99
	Additional exercises	101
	Spreadsheet exercise	104
<hr/>		
Chapter 5	Probability and expected value	106
	Introduction	106
	5.1 Variability in data	107
	5.2 Probability	108
	5.3 Simple probability models	112
	5.4 Expected values	113
	5.5 Sensitivity analysis	116
	Key points to remember	117
	Additional exercises	118
	Spreadsheet exercise	120
<hr/>		
Chapter 6	The normal distribution and confidence intervals	122
	Introduction	122
	6.1 The standard normal distribution	125
	6.2 Transforming a general normal distribution to the standard normal distribution	130
	6.3 Confidence intervals	135
	Key points to remember	139
	Additional exercises	140
	Spreadsheet exercise	142

Chapter 7	Financial models	145
	Introduction	145
	7.1 Types of interest	145
	7.2 Effective and nominal interest rates	150
	7.3 Discounting	152
	Key points to remember	156
	Additional exercises	156
	Spreadsheet exercise	158
<hr/>		
Chapter 8	Linear programming	160
	Introduction	160
	8.1 Formulating the linear program	160
	8.2 Finding the solution	164
	8.3 Sensitivity analysis	168
	8.4 Real life linear programming	170
	Key points to remember	171
	Additional exercises	171
	Spreadsheet exercise	173
<hr/>		
Chapter 9	Index numbers	177
	Introduction	177
	9.1 Simple index numbers	177
	9.2 Selecting the base period	179
	9.3 Accounting for change of base period	179
	9.4 Chain base index numbers	181
	9.5 Presenting index numbers graphically	182
	9.6 A commonly used index number	183
	Key points to remember	185
	Additional exercises	186
	Spreadsheet exercise	187
<hr/>		
Chapter 10	Time based forecasting models	189
	Introduction	189
	10.1 Linear time based models	189
	10.2 Forecasting using simple linear models	192
	10.3 Components of a time series	194
	10.4 Forecasting the trend	196
	10.5 Forecasting the seasonal effects	202
	Key points to remember	208
	Additional exercises	209
	Spreadsheet exercise	212

Worked solutions to review activities	215
Answers to even-numbered additional exercises	239
Appendix A Areas under the standard normal distribution	251
Appendix B Table of NPV factors	253
Index	254
