Introduction xvii

Part I

Mathematical Prerequisites 1
Vectors in 3-Space 2
 Vector Equality 5
 Computing the Magnitude of a Vector 6
 Normalizing a Vector 7
 Vector Addition 7
 Vector Subtraction 8
 Scalar Multiplication 9
 Dot Products 9
 Cross Products 10
Matrices 11
 Equality, Scalar Multiplication, and Addition 12
 Multiplication 13
 The Identity Matrix 14
 Inverses 15
 The Transpose of a Matrix 15
 D3DX Matrices 16
Basic Transformations 18
 The Translation Matrix 20
 The Rotation Matrices 21
 The Scaling Matrix 22
 Combining Transformations 23
 Some Functions to Transform Vectors 25
Planes (Optional) 25
 D3DXPLANE 26
 Point and Plane Spatial Relation 27
 Construction 27
 Normalizing a Plane 28
 Transforming a Plane 29
 Nearest Point on a Plane to a Particular Point 29
Rays (Optional) 30
 Rays 30
 Ray/Plane Intersection 31
Summary 32

<i>Part II</i>	Direct3D Fundamentals.	33
<i>Chapter 1</i>	Direct3D Initialization	35
	1.1 Direct3D Overview	35
	1.1.1 The REF Device	36
	1.1.2 D3DDEVTYPE	37
	1.2 COM	37
	1.3 Some Preliminaries	37
	1.3.1 Surfaces	38
	1.3.2 Multisampling	39
	1.3.3 Pixel Formats	40
	1.3.4 Memory Pools.	41
	1.3.5 The Swap Chain and Page Flipping	42
	1.3.6 Depth Buffers	43
	1.3.7 Vertex Processing.	44
	1.3.8 Device Capabilities	44
	1.4 Initializing Direct3D	45
	1.4.1 Acquiring an IDirect3D9 Interface	46
	1.4.2 Checking for Hardware Vertex Processing	47
	1.4.3 Filling Out the D3DPRESENT_PARAMETERS Structure	48
	1.4.4 Creating the IDirect3DDevice9 Interface	50
	1.5 Sample Application: Initializing Direct3D.	51
	1.5.1 d3dUtility.h/cpp	52
	1.5.2 Sample Framework	54
	1.5.3 Sample: D3D Init	54
	1.6 Summary	57
<i>Chapter 2</i>	The Rendering Pipeline.	59
	2.1 Model Representation	60
	2.1.1 Vertex Formats	61
	2.1.2 Triangles.	62
	2.1.3 Indices.	62
	2.2 The Virtual Camera	63
	2.3 The Rendering Pipeline	64
	2.3.1 Local Space	65
	2.3.2 World Space	65
	2.3.3 View Space	66
	2.3.4 Backface Culling	68
	2.3.5 Lighting	69
	2.3.6 Clipping	69
	2.3.7 Projection	70
	2.3.8 Viewport Transform	72
	2.3.9 Rasterization	73
	2.4 Summary	73

Chapter 3	Drawing in Direct3D	75
3.1	Vertex/Index Buffers	75
3.1.1	Creating a Vertex and Index Buffer	76
3.1.2	Accessing a Buffer's Memory	78
3.1.3	Retrieving Information about a Vertex and Index Buffer	79
3.2	Render States	80
3.3	Drawing Preparations	81
3.4	Drawing with Vertex/Index Buffers	82
3.4.1	IDirect3DDevice9::DrawPrimitive	82
3.4.2	IDirect3DDevice9::DrawIndexedPrimitive	82
3.4.3	Begin/End Scene	84
3.5	D3DX Geometric Objects	84
3.6	Sample Applications: Triangle, Cube, Teapot, D3DXCreate*	85
3.7	Summary	89
Chapter 4	Color	91
4.1	Color Representation	91
4.2	Vertex Colors	94
4.3	Shading	94
4.4	Sample Application: Colored Triangle	95
4.5	Summary	97
Chapter 5	Lighting	98
5.1	Light Components	98
5.2	Materials	99
5.3	Vertex Normals	101
5.4	Light Sources	104
5.5	Sample Application: Lighting	107
5.6	Additional Samples	109
5.7	Summary	110
Chapter 6	Texturing	111
6.1	Texture Coordinates	112
6.2	Creating and Enabling a Texture	113
6.3	Filters	114
6.4	Mipmaps	115
6.4.1	Mipmap Filter	116
6.4.2	Using Mipmaps with Direct3D	116
6.5	Address Modes	116
6.6	Sample Application: Textured Quad	118
6.7	Summary	120

Chapter 7	Blending	121
	7.1 The Blending Equation	121
	7.2 Blend Factors	123
	7.3 Transparency	124
	7.3.1 Alpha Channels	125
	7.3.2 Specifying the Source of Alpha	125
	7.4 Creating an Alpha Channel Using the DirectX Texture Tool.	126
	7.5 Sample Application: Transparency	127
	7.6 Summary	130
Chapter 8	Stenciling	131
	8.1 Using the Stencil Buffer	132
	8.1.1 Requesting a Stencil Buffer	133
	8.1.2 The Stencil Test	133
	8.1.3 Controlling the Stencil Test	134
	8.1.3.1 Stencil Reference Value	134
	8.1.3.2 Stencil Mask	134
	8.1.3.3 Stencil Value	135
	8.1.3.4 Comparison Operation	135
	8.1.3 Updating the Stencil Buffer	135
	8.1.4 Stencil Write Mask	137
	8.2 Sample Application: Mirrors	137
	8.2.1 The Mathematics of Reflection	137
	8.2.2 Mirror Implementation Overview	139
	8.2.3 Code and Explanation	140
	8.2.3.1 Part I	141
	8.2.3.2 Part II	141
	8.2.3.3 Part III	142
	8.2.3.4 Part IV	143
	8.2.3.5 Part V	143
	8.3 Sample Application: Planar Shadows.	144
	8.3.1 Parallel Light Shadows	145
	8.3.2 Point Light Shadows.	146
	8.3.3 The Shadow Matrix	146
	8.3.4 Using the Stencil Buffer to Prevent Double Blending	147
	8.3.5 Code and Explanation	148
	8.4 Summary	150
Part III	Applied Direct3D	151
Chapter 9	Fonts	153
	9.1 ID3DXFont	153
	9.1.1 Creating an ID3DXFont	153

9.1.2	Drawing Text	154
9.1.3	Computing the Frames Rendered Per Second	155
9.2	CD3DFont	155
9.2.1	Constructing a CD3DFont	156
9.2.2	Drawing Text	156
9.2.3	Cleanup	157
9.3	D3DXCreateText	157
9.4	Summary	159
Chapter 10	Meshes Part I	160
10.1	Geometry Info	160
10.2	Subsets and the Attribute Buffer	161
10.3	Drawing	163
10.4	Optimizing	163
10.5	The Attribute Table	165
10.6	Adjacency Info	167
10.7	Cloning	169
10.8	Creating a Mesh (D3DXCreateMeshFVF)	170
10.9	Sample Application: Creating and Rendering a Mesh	171
10.10	Summary	177
Chapter 11	Meshes Part II	178
11.1	ID3DXBuffer	178
11.2	XFiles	179
11.2.1	Loading an XFile	180
11.2.2	XFile Materials	181
11.2.3	Sample Application: XFile	181
11.2.4	Generating Vertex Normals	184
11.3	Progressive Meshes	185
11.3.1	Generating a Progressive Mesh	186
11.3.2	Vertex Attribute Weights	187
11.3.3	ID3DXPMesh Methods	188
11.3.4	Sample Application: Progressive Mesh	190
11.4	Bounding Volumes	193
11.4.1	Some New Special Constants	194
11.4.2	Bounding Volume Types	195
11.4.3	Sample Application: Bounding Volumes	196
11.5	Summary	198
Chapter 12	Building a Flexible Camera Class	199
12.1	Camera Design	199
12.2	Implementation Details	201
12.2.1	Computing the View Matrix	201
12.2.1.1	Part 1: Translation	202
12.2.1.2	Part 2: Rotation	203

12.2.1.3	Combining Both Parts	204
12.2.2	Rotation about an Arbitrary Axis	205
12.2.3	Pitch, Yaw, and Roll.	205
12.2.4	Walking, Strafing, and Flying	207
12.3	Sample Application: Camera	209
12.4	Summary.	211
Chapter 13	Basic Terrain Rendering.	212
13.1	Heightmaps	213
13.1.1	Creating a Heightmap	214
13.1.2	Loading a RAW File	215
13.1.3	Accessing and Modifying the Heightmap	215
13.2	Generating the Terrain Geometry	216
13.2.1	Computing the Vertices	217
13.2.2	Computing the Indices—Defining the Triangles	220
13.3	Texturing.	221
13.3.1	A Procedural Approach.	222
13.4	Lighting	224
13.4.1	Overview	224
13.4.2	Computing the Shade of a Quad	225
13.4.3	Shading the Terrain	227
13.5	“Walking” on the Terrain	228
13.6	Sample Application: Terrain.	231
13.7	Some Improvements	233
13.8	Summary.	234
Chapter 14	Particle Systems	235
14.1	Particles and Point Sprites	235
14.1.1	Structure Format.	236
14.1.2	Point Sprite Render States.	236
14.1.3	Particles and Their Attributes	238
14.2	Particle System Components	239
14.2.1	Drawing a Particle System.	244
14.2.2	Randomness	248
14.3	Concrete Particle Systems: Snow, Firework, Particle Gun	249
14.3.1	Sample Application: Snow	250
14.3.2	Sample Application: Firework	252
14.3.3	Sample Application: Particle Gun	254
14.4	Summary.	256
Chapter 15	Picking.	257
15.1	Screen to Projection Window Transform	259
15.2	Computing the Picking Ray	260
15.3	Transforming Rays	261

15.4 Ray-Object Intersections	262
15.5 Picking Sample	264
15.6 Summary.	265

Part IV Shaders and Effects 267

Chapter 16 Introduction to the High-Level Shading

Language	269
16.1 Writing an HLSL Shader	270
16.1.1 Globals	272
16.1.2 Input and Output Structures.	272
16.1.3 Entry Point Function.	273
16.2 Compiling an HLSL Shader	275
16.2.1 The Constant Table	275
16.2.1.1 Getting a Handle to a Constant.	275
16.2.1.2 Setting Constants	275
16.2.1.3 Setting the Constant Default Values.	278
16.2.2 Compiling an HLSL Shader	278
16.3 Variable Types	280
16.3.1 Scalar Types	280
16.3.2 Vector Types	281
16.3.3 Matrix Types	282
16.3.4 Arrays.	283
16.3.5 Structures	283
16.3.6 The typedef Keyword	284
16.3.7 Variable Prefixes	284
16.4 Keywords, Statements, and Casting	285
16.4.1 Keywords.	285
16.4.2 Basic Program Flow	285
16.4.3 Casting	286
16.5 Operators	287
16.6 User-Defined Functions.	288
16.7 Built-in Functions	290
16.8 Summary.	292

Chapter 17 Introduction to Vertex Shaders 293

17.1 Vertex Declarations	294
17.1.1 Describing a Vertex Declaration.	295
17.1.2 Creating a Vertex Declaration	297
17.1.3 Enabling a Vertex Declaration.	297
17.2 Vertex Data Usages	298
17.3 Steps to Using a Vertex Shader.	300
17.3.1 Writing and Compiling a Vertex Shader	300
17.3.2 Creating a Vertex Shader	300
17.3.3 Setting a Vertex Shader	301

17.3.4 Destroying a Vertex Shader	301
17.4 Sample Application: Diffuse Lighting	301
17.5 Sample Application: Cartoon Rendering	307
17.5.1 Cartoon Shading	308
17.5.2 The Cartoon Shading Vertex Shader Code	309
17.5.3 Silhouette Outlining	311
17.5.3.1 Edge Representation	312
17.5.3.2 Testing for a Silhouette Edge.	313
17.5.3.3 Edge Generation	314
17.5.4 The Silhouette Outlining Vertex Shader Code	315
17.6 Summary.	316
Chapter 18 Introduction to Pixel Shaders	318
18.1 Multitexturing Overview	319
18.1.1 Enabling Multiple Textures	320
18.1.2 Multiple Texture Coordinates	321
18.2 Pixel Shader Inputs and Outputs	322
18.3 Steps to Using a Pixel Shader.	323
18.3.1 Writing and Compiling a Pixel Shader.	323
18.3.2 Creating a Pixel Shader	324
18.3.3 Setting a Pixel Shader	324
18.3.4 Destroying a Pixel Shader	325
18.4 HLSL Sampler Objects	325
18.5 Sample Application: Multitexturing in a Pixel Shader	326
18.6 Summary.	333
Chapter 19 The Effects Framework	335
19.1 Techniques and Passes	336
19.2 More HLSL Intrinsic Objects	337
19.2.1 Texture Objects	337
19.2.2 Sampler Objects and Sampler States	337
19.2.3 Vertex and Pixel Shader Objects	338
19.2.4 Strings	339
19.2.5 Annotations	339
19.3 Device States in an Effect File	340
19.4 Creating an Effect	341
19.5 Setting Constants	342
19.6 Using an Effect	344
19.6.1 Obtaining a Handle to an Effect	345
19.6.2 Activating an Effect	345
19.6.3 Beginning an Effect	345
19.6.4 Setting the Current Rendering Pass.	346
19.6.5 Ending an Effect	346
19.6.6 Example	346

19.7 Sample Application: Lighting and Texturing in an Effect File	347
19.8 Sample Application: Fog Effect	352
19.9 Sample Application: Cartoon Effect.	355
19.10 EffectEdit.	356
19.11 Summary	356
Appendix An Introduction to Windows Programming	359
Overview	360
Resources	360
Events, the Message Queue, Messages, and the Message Loop	360
GUI.	362
Hello World Windows Application	363
Explaining Hello World	366
Includes, Global Variables, and Prototypes	366
WinMain	367
WNDCLASS and Registration	368
Creating and Displaying the Window	370
The Message Loop	372
The Window Procedure	373
The MessageBox Function	375
A Better Message Loop	375
Summary	376
Bibliography	377
Index.	379
