

Introduction to Languages and The Theory of Computation

Fourth Edition

John C. Martin

North Dakota State University

CONTENTS

Preface vii

Introduction x

CHAPTER 1

Mathematical Tools and Techniques 1

- 1.1 Logic and Proofs 1
- 1.2 Sets 8
- 1.3 Functions and Equivalence Relations 12
- 1.4 Languages 17
- 1.5 Recursive Definitions 21
- 1.6 Structural Induction 26
 - Exercises* 34

CHAPTER 2

Finite Automata and the Languages They Accept 45

- 2.1 Finite Automata: Examples and Definitions 45
- 2.2 Accepting the Union, Intersection, or Difference of Two Languages 54
- 2.3 Distinguishing One String from Another 58
- 2.4 The Pumping Lemma 63
- 2.5 How to Build a Simple Computer Using Equivalence Classes 68
- 2.6 Minimizing the Number of States in a Finite Automaton 73
 - Exercises* 77

CHAPTER 3

Regular Expressions, Nondeterminism, and Kleene's Theorem 92

- 3.1 Regular Languages and Regular Expressions 92
- 3.2 Nondeterministic Finite Automata 96
- 3.3 The Nondeterminism in an NFA Can Be Eliminated 104
- 3.4 Kleene's Theorem, Part 1 110
- 3.5 Kleene's Theorem, Part 2 114
 - Exercises* 117

CHAPTER 4

Context-Free Languages 130

- 4.1 Using Grammar Rules to Define a Language 130
- 4.2 Context-Free Grammars: Definitions and More Examples 134
- 4.3 Regular Languages and Regular Grammars 138
- 4.4 Derivation Trees and Ambiguity 141
- 4.5 Simplified Forms and Normal Forms 149
 - Exercises* 154

CHAPTER 5

Pushdown Automata 164

- 5.1 Definitions and Examples 164
- 5.2 Deterministic Pushdown Automata 172

5.3 A PDA from a Given CFG 176

5.4 A CFG from a Given PDA 184

5.5 Parsing 191

Exercises 196

CHAPTER 6

Context-Free and Non-Context-Free Languages 205

6.1 The Pumping Lemma for Context-Free Languages 205

6.2 Intersections and Complements of CFLs 214

6.3 Decision Problems Involving Context-Free Languages 218

Exercises 220

CHAPTER 7

Turing Machines 224

7.1 A General Model of Computation 224

7.2 Turing Machines as Language Acceptors 229

7.3 Turing Machines That Compute Partial Functions 234

7.4 Combining Turing Machines 238

7.5 Multitape Turing Machines 243

7.6 The Church-Turing Thesis 247

7.7 Nondeterministic Turing Machines 248

7.8 Universal Turing Machines 252

Exercises 257

CHAPTER 8

Recursively Enumerable Languages 265

8.1 Recursively Enumerable and Recursive 265

8.2 Enumerating a Language 268

8.3 More General Grammars 271

8.4 Context-Sensitive Languages and the Chomsky Hierarchy 277

8.5 Not Every Language Is Recursively Enumerable 283

Exercises 290

CHAPTER 9

Undecidable Problems 299

9.1 A Language That Can't Be Accepted, and a Problem That Can't Be Decided 299

9.2 Reductions and the Halting Problem 304

9.3 More Decision Problems Involving Turing Machines 308

9.4 Post's Correspondence Problem 314

9.5 Undecidable Problems Involving Context-Free Languages 321

Exercises 326

CHAPTER 10

Computable Functions 331

10.1 Primitive Recursive Functions 331

10.2 Quantification, Minimalization, and μ -Recursive Functions 338

10.3 Gödel Numbering 344

10.4 All Computable Functions Are μ -Recursive 348

10.5 Other Approaches to Computability 352

Exercises 353

CHAPTER 11

Introduction to Computational Complexity 358

11.1 The Time Complexity of a Turing Machine, and the Set P 358

11.2	The Set NP and Polynomial Verifiability	363
11.3	Polynomial-Time Reductions and NP -Completeness	369
11.4	The Cook-Levin Theorem	373
11.5	Some Other NP -Complete Problems	378
	<i>Exercises</i>	383

Solutions to Selected Exercises	389
Selected Bibliography	425
Index of Notation	427
Index	428
