

FUNDAMENTALS OF AIR POLLUTION

FIFTH EDITION

DANIEL VALLERO

AMSTERDAM • BOSTON • HEIDELBERG • LONDON
NEW YORK • OXFORD • PARIS • SAN DIEGO
SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO
Academic Press is an imprint of Elsevier

Contents

Preface ix

I

FOUNDATIONS OF AIR POLLUTION

1. The State of the Atmosphere 3
 - 1.1 Introduction 3
 - 1.2 Physical and Chemical Properties of the Atmosphere 3
 - 1.3 Atmospheric Chemical Concentrations 6
 - 1.4 Fluid Properties and Dynamics 17Questions 20
References 21
2. The Physics of the Atmosphere 23
 - 2.1 Energy 23
 - 2.2 Motion 28
 - 2.3 Energy–Motion Relationships 32
 - 2.4 Local Wind Systems 35
 - 2.5 General Circulation 38Questions 41
References 41
Suggested Reading 42
3. The Science of Air Pollution 43
 - 3.1 Air Pollution in Perspective 43
 - 3.2 Emergence of Air Pollution Science, Engineering, and Technology 46
 - 3.3 What is Air Pollution? 46
 - 3.4 Atmospheric Transport and Fate 52
 - 3.5 Air Pollution Engineering 57
 - 3.6 Social Aspects of Air Pollution 58
 - 3.7 Air Pollution Laws 58
 - 3.8 Air Pollution before the Industrial Revolution 74
 - 3.9 Air Pollution and the Industrial Revolution 75
 - 3.10 Air Pollution Events in the Twentieth and Twenty-First Centuries 77
 - 3.11 The Future 80Questions 80
References 81
4. Air Pollution Decision Tools 83
 - 4.1 Introduction 83
 - 4.2 Interpreting Data 85
 - 4.3 Rare Events: Perfect Storms and Black Swans 95Questions 108
References 109

5. Life Cycle Assessment of Air Pollutants 111

- 5.1 Systems Context for Air Pollution 111
 - 5.2 Energy 111
 - 5.3 Energy Life Cycles 112
 - 5.4 Environmental Justice during Extraction 122
 - 5.5 Fuel Cycle Impacts 123
 - 5.6 Refining Stressors 125
 - 5.7 Operation Stage 127
 - 5.8 Downstream Impacts 131
- Questions 132
-
- References 132

II

THE RISKS OF AIR POLLUTION

6. Inherent Properties of Air Pollutants 139
 - 6.1 Inherency 139
 - 6.2 Vapor Pressure 175
 - 6.3 Solubility 178
 - 6.4 Persistence 179
 - 6.5 Physical Phase 184Questions 194
References 194
7. Air Pollutant Hazards 197
 - 7.1 Hazards 197
 - 7.2 Dose Response 201
 - 7.3 Air Pollution Hazards 204
 - 7.4 Air Toxics 204
 - 7.5 Criteria Pollutants 209Questions 213
References 213
8. Air Pollutant Exposures 215
 - 8.1 Exposure 215
 - 8.2 Exposure Calculations 221
 - 8.3 Chemical Intake and Exposure 224
 - 8.4 Exposure Data 231Questions 245
References 245
9. Respiratory Effects of Air Pollutants 247
 - 9.1 Respiration in Humans 247
 - 9.2 Lung Kinetics 249
 - 9.3 Air Pollutant Properties Important to Respiration 251

- 9.4 Respiratory System Transport and Fluid Dynamics 252
 9.5 Respiratory Health Effects 255
 Questions 255
 References 256

10. Cardiovascular Effects of Air Pollutants 257

- 10.1 Human Cardiovascular System 257
 10.2 Cardiovascular Disease and Air Pollution
 Associations 257
 10.3 Cardiovascular Effects 264
 Questions 268
 References 268

11. Cancer and Air Pollutants 271

- 11.1 Linking Air Pollution to Cancer 271
 11.2 Estimating Risk from Airborne Carcinogens 276
 11.3 National Air Toxics Assessment 288
 11.4 Cancer Dose–Response 288
 11.5 Airborne Carcinogens 291
 11.6 Indirect Relationships 306
 Questions 310
 References 310

12. Reproductive and Hormonal Effects of Air Pollutants 313

- 12.1 Reproductive and Developmental Effects 313
 12.2 Endocrine Disruption 313
 Questions 324
 References 324

13. Neurological Effects of Air Pollutants 327

- 13.1 Neurotoxicity 327
 13.2 Neurotoxic Metals 330
 13.3 Neurotoxic Organic Compounds 338
 13.4 Neurotoxic Particulates 338
 13.5 Relationship to Other Effects 338
 Questions 339
 References 339

14. Air Pollution's Impact on Ecosystems 341

- 14.1 Ecosystem Risk 341
 14.2 Ecosystem Susceptibility to Air Pollution 341
 14.3 Air Pollution Impacts on Aquatic Ecosystems 343
 14.4 Air Pollution Impacts on Terrestrial Ecosystems 346
 Questions 366
 References 367
 Suggested Reading 368

15. Air Pollution's Impact on Materials and Structures 369

- 15.1 Abiotic Receptors 369
 15.2 Effects on Metals 370

- 15.3 Effects on Stone 372
 15.4 Effects on Fabrics and Dyes 373
 15.5 Effects on Leather, Paper, Paint, and Glass 374
 15.6 Effects on Rubber 375
 15.7 Material Value 376
 Questions 377
 References 377
 Suggested Reading 378

III

TROPOSPHERIC POLLUTION

16. Scale and Complexity of Air Pollution 381

- 16.1 Mechanical Scale and Complexity 381
 16.2 Air Pollution Variability and Uncertainty 398
 16.3 Air Pollution Scales 398
 Questions 411
 References 412

17. Air Pollutant Kinetics and Transformation 413

- 17.1 Chemical Transformation 413
 17.2 Kinetics 416
 17.3 Rate Laws and Air Pollution Thermodynamics 421
 17.4 Atmospheric Transformation 427
 Questions 434
 References 435

18. Air Pollutant Kinetics and Equilibrium 437

- 18.1 Kinetics vs Equilibrium 437
 18.2 Air Pollution Chemodynamics 438
 18.3 Fugacity 454
 18.4 Integrating Inherent Properties and Substrate
 Characteristics 456
 18.5 Movement into the Atmosphere 460
 18.6 Application of the Octanol–Water
 Coefficient 463
 18.7 Partitioning between Air and Tissue 465
 18.8 Dynamics within an Organism 466
 Questions 472
 References 473

19. Temporal Aspects of Air Pollution 475

- 19.1 Time and Air Pollution 475
 19.2 Persistence 476
 19.3 Temporal Aspects of Transformation 481
 19.4 Bioaccumulation 482
 19.5 Temporal Aspects of Toxicokinetics 484
 19.6 Temporal Aspects of Air Quality Models 487
 Questions 487
 References 488

IV

BIOGEOCHEMISTRY OF AIR POLLUTANTS

20. The Hydrologic Cycle 491
- 20.1 The Water Planet 491
20.2 The Water Molecule 491
20.3 The Hydrosphere 492
20.4 Scale and Complexity of Water Cycles 495
Questions 501
References 501
21. The Carbon Cycle 503
- 21.1 Carbon Chemistry 503
21.2 Carbon Sinks and Sources 506
21.3 Carbon Equilibrium and Cycling 507
21.4 Carbon Cycling and Climate 509
21.5 Carbon Geoengineering 512
Questions 518
References 518
22. The Nitrogen and Sulfur Cycles 519
- 22.1 The Nitrogen Cycle 519
22.2 Interactions between Sulfur and Nitrogen 524
22.3 The Sulfur Cycle 526
22.4 Other Nutrient Cycles 527
Questions 528
References 529
23. Metal and Metalloid Cycles 531
- 23.1 Heavy Metal Cycling 535
23.2 Metalloid Cycling 540
Questions 542
References 544
24. Source Sampling and Emission
Measurement 559
- 24.1 Sources of Pollution 559
24.2 Anthropogenic Sources 563
Questions 575
References 576
Suggested Reading 577
25. Methods for Measuring Air Pollutants 579
- 25.1 Introduction 579
25.2 Gases and Vapors 586
25.3 Particulate Matter 607
25.4 Measuring Gas and Particulate Phases Together 612
25.5 Analysis and Measurement of Odors 612
25.6 Analysis and Measurement of Visibility 614
25.7 Analysis and Measurement of Acidic Deposition 619
25.8 Measuring Air Toxics 622
Questions 623
References 624
Suggested Readings in Addition to the References 626
26. Applying and Interpreting Air Quality
Monitoring Data 627
- 26.1 Introduction 627
26.2 Stationary Monitoring Networks 627
26.3 Air Pollutant Phases 630
26.4 Air Pollution from Hazardous
Wastes Sites 634
26.5 Quality Assurance 644
26.6 Monitoring Plan Example 648
26.7 Laboratory Analysis 650
26.8 Statistical Analysis and Display 655
26.9 Criteria and Standards 656
26.10 Indoor Air 670
26.11 Personal Monitoring 678
Questions 678
References 680
Suggested Readings in Addition to the References 682
27. Modeling Applications 683
- 27.1 Value of Models 683
27.2 Meteorological Bases of Atmospheric
Pollution 684
27.3 Transport and Dispersion of Air
Pollutants 690
27.4 Air Pollution Modeling and Prediction 704
27.5 Modeling Air Pollution Partitioning 735
27.6 Exposure and Dose Models 746
Questions 748
References 751
Suggested Reading 753
28. Air Quality Status and Trends 755
- 28.1 Introduction 755
28.2 Tropospheric Ozone and Smog 761
28.3 Carbon Monoxide 764
28.4 Nitrogen Dioxide 764
28.5 Sulfur Dioxide 766
28.6 Particulate Matter 768
28.7 Airborne Lead 769
28.8 Air Toxics 769
28.9 Acid Deposition 770
28.10 Stratospheric Ozone 771
28.11 Global GHGs 771
28.12 Indoor Air Quality 773
28.13 Air Quality Indices 777
Questions 783
References 784

V

ADDRESSING AIR POLLUTION

29. Air Pollutant Emissions	787	32.5 Removal of Pollutants	941
29.1 Introduction	787	32.6 Disposal and Waste Minimization of Pollutants	941
29.2 Combustion Emissions	789	32.7 Green Principles and Air Quality	942
29.3 Stationary Emission Sources	792	32.8 Socioeconomic Costs and Benefits	949
29.4 Air Emissions from Hazardous Wastes	799	Questions	950
29.5 Mobile Emission Sources	814	References	951
29.6 Means of Implementing Emission Standards	815	Suggested Readings	951
29.7 Air Toxics Emissions	821		
29.8 Emission Inventory	822	33. Grand Challenges	953
Questions	824	33.1 Introduction	953
References	826	33.2 Grand Challenge #1: Shared Knowledge of Lessons Learned	954
Suggested Reading	827	33.3 Grand Challenge #2: Extending Air Pollution Information	954
30. Air Pollution Control Technologies	829	33.4 Grand Challenge #3: Need to Characterize Real-World Exposures	954
30.1 Engineering Control Concepts	829	33.5 Grand Challenge #4: Improvements and Adaptations to Control Technologies	955
30.2 Air Pollution Control Devices	832	33.6 Grand Challenge #5: Systems and Sustainable Thinking	956
30.3 Particulate Matter Control Device Physics	833	33.7 Grand Challenge #6: Transdisciplinary Science	957
30.4 Removal of Dry PM	843	33.8 Grand Challenge #7: Translational Science	958
30.5 Electrostatic Precipitators	857	33.9 Grand Challenge #8: Future Generations	960
30.6 Scrubbers	860	Questions	961
30.7 Removal of Liquid Droplets and Mists	864	References	961
30.8 Comparison of Particulate Removal Systems	866		
30.9 Removal of Gaseous Pollutants	868	Abbreviations and Symbols	963
30.10 Mercury Removal	874	Index	971
30.11 Removal of Odors	875		
Questions	876		
References	878		
Suggested Reading	879		
31. Controlling Air Pollution from Sources	881		
31.1 Introduction	881		
31.2 Stationary Source Control Technologies	882		
31.3 Mobile Source Control Technologies	918		
Questions	923		
References	924		

VI

THE FUTURE FOR AIR POLLUTION SCIENCE AND ENGINEERING

32. Sustainable Approaches 929

32.1 Introduction	929
32.2 Utility and the Benefit–Cost Analysis	931
32.3 Process Change	938
32.4 Fuel Change	940
