QUANTITATIVE METHODS FOR BUSINESS DECISIONS

JON CURWIN
ROGER SLATER
DAVID EADSON

Australia • Brazil • Japan • Korea • Mexico • Singapore • Spain • United Kingdom • United States

CONTENTS

Preface ix
List of Mini Cases xi
About the authors xii
About the digital resources xiii
Walk through tour xiv

1 Mathematical Background 1

1A Basic Mathematics 2

Objectives 2

1A.1 Basic arithmetic 3

1A.2 Basic algebra 9

1A.3 Logarithms 14

1A.4 Arithmetic and geometric progressions 15

1A.5 Functions 19

1A.6 Conclusions to Part A 32

1B Financial Mathematics 33

Objectives 33

1B.1 Interest: simple and compound 33

1B.2 Depreciation 36

1B.3 Present value 38

1B.4 The internal rate of return 43

1B.5 Incremental payments 45

1B.6 Annual percentage rate (APR) 50

1B.7 Conclusions to Part B 52

1.8 Questions for Parts A and B 53

PART ONE UNDERSTANDING QUANTITATIVE INFORMATION 59

2 The Quantitative Approach 65

Objectives 65

- 2.1 Problem solving 66
- 2.2 Methodology 70
- 2.3 Models 73
- 2.4 Measurement 79
- 2.5 Scoring models 81
- 2.6 Conclusions 85
- 2.7 Questions 86

3 Managing Data 90

Objectives 90

- 3.1 Issues of data collection 92
- 3.2 Published sources 94
- 3.3 Internet sources 96
- 3.4 A census or a sample? 98
- 3.5 Market research 100
- 3.6 Conclusions 101
- 3.7 Questions 102

4 Survey Methods 105

Objectives 105

- 4.1 Probability sampling 108
- 4.2 Non-probability sampling 113
- 4.3 Survey design 117
- 4.4 Questionnaire design 123
- 4.5 Non-response 128
- 4.6 Conclusions 130
- 4.7 Questions 131

PART TWO DESCRIBING DATA 135

5 Presentation of Data 139

Objectives 139

- 5.1 Raw data 140
- 5.2 Tabulation of data 140
- 5.3 Presentation of categorical data 147
- 5.4 Presentation of continuous data 154
- 5.5 Graphical representation 161
- 5.6 Conclusions 168
- 5.7 Questions 169

6 Measures of Location 174

Objectives 174

- 6.1 Raw data 177
- 6.2 Tabulated (ungrouped) discrete data 181

- 6.3** Tabulated (grouped) continuous data 184
- 6.4** Other measures of location 191
- 6.5** Relationships between averages 193
- 6.6** Conclusions 194
- 6.7** Questions 195

7 Measures of Dispersion 199

Objectives 199

- 7.1** The measures 199
- 7.2** Raw data 200
- 7.3** Tabulated data 204
- 7.4** Grouped data 206
- 7.5** Relative measures of dispersion 213
- 7.6** Variability in sample data 216
- 7.7** Conclusions 218
- 7.8** Questions 218

8 Index Numbers 223

Objectives 223

- 8.1** The interpretation of an index number 223
- 8.2** The construction of index numbers 229
- 8.3** The weighting of index numbers 235
- 8.4** The Consumer Prices Index and the Retail Prices Index 236
- 8.5** Conclusions 242
- 8.6** Questions 243

PART THREE MEASURING UNCERTAINTY 249

9 Probability 253

Objectives 253

- 9.1** Basic concepts 254
- 9.2** Definitions 256
- 9.3** Basic relationships in probability 261
- 9.4** Probability trees 266
- 9.5** Expected values 269
- 9.6** Decision trees 271
- 9.7** Bayes' theorem 274
- 9.8** Conclusions 276
- 9.9** Questions 277

10 Discrete Probability Distributions 282

Objectives 282

- 10.1** Probability distributions 283
- 10.2** Discrete probability distributions 284
- 10.3** Poisson approximation to the binomial 301
- 10.4** Conclusions 302
- 10.5** Questions 303

11 The Normal Distribution 307

Objectives 307

- 11.1** Characteristics of the Normal distribution 307
- 11.2** The standard Normal distribution 308
- 11.3** Combinations of variables 314
- 11.4** Normal approximations 317
- 11.5** Other continuous probability distributions 320
- 11.6** Conclusions 320
- 11.7** Questions 321

**PART FOUR USING STATISTICAL INFERENCE 325****12 Samples, Estimation and Confidence Intervals 330**

Objectives 330

- 12.1** Statistical inference 331
- 12.2** Sampling Distributions 332
- 12.3** Estimation – inference about a population 339
- 12.4** Confidence interval for the population mean 340
- 12.5** Confidence interval for a population percentage 347
- 12.6** The difference between means of independent samples 350
- 12.7** The finite population correction factor 353
- 12.8** The t -distribution 355
- 12.9** Conclusions 361
- 12.10** Questions 363

13 Significance Testing 367

Objectives 367

- 13.1** Significance testing using confidence intervals 368
- 13.2** Hypothesis testing for single large samples 370
- 13.3** One-sided significance tests 377
- 13.4** Types of error 383
- 13.5** Hypothesis testing with two large samples 385
- 13.6** Hypothesis testing with small samples 388
- 13.7** Reservations about test conclusions 395
- 13.8** Conclusions 396
- 13.9** Questions 397

14 Non-Parametric Tests 401

Objectives 401

- 14.1** Chi-squared tests 402
- 14.2** Mann-Whitney U test 416
- 14.3** Wilcoxon test 419
- 14.4** Runs test 423
- 14.5** Conclusions 424
- 14.6** Questions 426

PART FIVE RELATING VARIABLES AND PREDICTING OUTCOMES 431

15 Correlation and Simple Regression Analysis 434

Objectives 434

- 15.1 Correlation 435
- 15.2 Measuring linear association 440
- 15.3 Regression analysis 447
- 15.4 Simple linear regression 448
- 15.5 Predictions from the regression line 451
- 15.6 Regression analysis using EXCEL 456
- 15.7 Interpretation 457
- 15.8 Non-linear relationships 458
- 15.9 Conclusions 462
- 15.10 Questions 463

16 Multiple Regression Analysis 470

Objectives 470

- 16.1 The multiple regression model 471
- 16.2 The effects of adding variables 472
- 16.3 Investigating the assumptions 475
- 16.4 Analysis of a multiple regression model 484
- 16.5 Using multiple regression models 489
- 16.6 Conclusions 490
- 16.7 Questions 491

17 Time Series 495

Objectives 495

- 17.1 Time series models 496
- 17.2 The trend 499
- 17.3 The seasonal factors 508
- 17.4 The cyclical factors 513
- 17.5 The residual or random factor 514
- 17.6 Predictions 516
- 17.7 Developing models for short-term forecasts 519
- 17.8 Conclusions 525
- 17.9 Questions 526

ONLINE CONTENTS 531

The following Parts 6-8 can be found by visiting our premium online platform. See the 'About the digital resources' page for more details.

PART SIX MODELLING

- 18 Linear programming
- 19 Networks
- 20 Modelling stock control and queues
- 21 Simulation
- 22 Game theory
- 23 Factor analysis

PART SEVEN MATHEMATICAL TOPICS

- 24 Matrices
- 25 Use of Calculus

PART EIGHT STUDENT GUIDES

- Guide to creative problem solving
- Guide to EXCEL
- Guide to SPSS
- Guide to project management software
- Guide to writing and reporting statistics

Appendices 532

- A Cumulative binomial probabilities 533*
- B Cumulative Poisson probabilities 534*
- C Areas in the right-hand tail of the Normal distribution 535*
- D Student's t critical points 537*
- E χ^2 critical values 538*
- F Present value factors 540*
- G Mann-Whitney test statistic 542*
- H Wilcoxon test statistic 545*
- I Runs test 546*
- J Durbin-Watson statistic 548*
- K Random number table 550*

Answers section 552

- Glossary 587*
- Statistics formula sheet 595*
- Index 600*
