10.4	Where Do People Acquire Pets?	163
12.1	How Acceptable Is Data Sharing for Each of the Following Scenarios?	210

Acknowledgments

This book arose from a chance meeting with Sharon Golan, who helped me crystallize ideas that grew out of many years teaching Consumer Behavior to undergraduate and MBA students at the University of Portland. I had never thought about writing a textbook until that meeting. Sharon made it seem possible and encouraged me to submit a proposal, which she shepherded through the lengthy review process to its acceptance the day before Thanksgiving, 2013—serendipitous timing, and the start of a journey I never expected to take.

Erin Arata has been my contact and ally at Routledge during the past year, and I appreciate her patience, encouragement, and responsiveness to questions throughout the process.

I'm deeply grateful to Judy Ferguson and Elizabeth Cooper-Martin for their constructive and insightful comments on early drafts of the chapters.
