

MARKET RESEARCH in PRACTICE

A GUIDE TO THE BASICS

PAUL HAGUE & NICK HAGUE

MARKET RESEARCH IN PRACTICE

Contents

<i>The Market Research Society</i>	viii
<i>The editorial board</i>	ix
<i>Preface</i>	xi
1. Introduction	1
Who needs market research? 1; New roles for market research 2; The effect of regional culture on the use of market research 3; The use of market research in business models and frameworks 4; Consumer and business-to-business market research 6; The scope of market research information 7; Quantitative and qualitative research 8; The market research process 10; The organization of market research 13; Summary 16	
2. Market research design	17
How ideas arise for market research 17; Market research suppliers 18; The market research brief – a statement of the problem 19; The market research proposal – the return of brief (ROB) 22; The information required 23; The accuracy 24; The budget 25; The timetable 26; What to expect in a proposal (return of brief) 27; Summary 30	
3. Desk research	32
Why reinvent the wheel? 32; Resources 33; Sources of sources – the high level view 33; Industry experts 34; The Internet 35; Online databases and market data 37; Company data 38; Government statistics 39; Trade and industry bodies 40; Market research reports 40; The press 41; Directories 41; The range of information available from desk research 42; Distribution and retailing 44; Planning, recording and evaluating desk research 45; The limits of desk research 46; Summary 47	

4. Focus groups	48
The focus group 48; When to use focus groups 50; Areas of special consideration 51; Planning and recruiting groups 54; Number of groups 54; Venues of groups 54; Getting respondents to attend 55; The group moderator 56; Tools of the group moderator 57; Summary 59	
5. Depth interviewing	60
Why use depth interviews? 61; Depth interviews in market research design 63; How many depth interviews are needed? 63; The role of the telephone in depth interviewing 64; Winning cooperation for the interview 65; The principles of interviewing 66; The interview itself 66; The line of questioning 67; Developing the discussion guide for the interview 68; Probes and prompts 69; Summary 72	
6. Observation	73
Observation – a research method you can believe 73; When to use observation 74; The audit – a major application for observation 75; Observation in shopping surveys 75; Observation in product research 77; Observation in poster checks 78; Observation in checking television viewing 78; Setting up observation programmes 79; Reporting observational data 80; Summary 80	
7. Sampling and statistics	82
The principles of sampling 82; Random sampling in consumer markets 82; Choosing the size of the sample 83; Sampling error 84; Random sampling and non-response 89; Quota samples 89; Sampling in business-to-business markets 93; Using statistics to derive importance of factors 94; Using statistics to arrive at needs-based segmentations 95; Summary 97	
8. Questionnaire design	98
What is so difficult about designing a questionnaire? 98; The role of a questionnaire 98; The different types of questionnaire 99; The different types of questions 100; Behavioural questions 102; Attitudinal questions 103; Classification questions 107; Three steps in questionnaire design 110; Special questionnaires – conjoint analysis 117; Trade-off grids (simalto – simulated multi-attribute level trade-off) 119; Summary 121	

9. Face-to-face interviewing	123
Advantages of face-to-face interviews 123; Disadvantages of face-to-face interviews 124; Street interviews 126; Household interviews 127; Questionnaire design 129; Response rates to surveys – an industry problem 129; Hall tests (mall intercepts) 131; Summary 133	
10. Telephone interviewing	134
Why interview by telephone? 134; CATI – Computer assisted telephone interviewing 135; The art of telephone interviewing – carrying out a successful interview 136; Some limitations of telephone interviews 139; Summary 140	
11. Self-completion questionnaires	141
The ubiquitous self-completion questionnaire 141; When to use and when not to use self-completion questionnaires 142; Important aspects in self-completion questionnaire design 143; Recommendations for practice 147; Summary 154	
12. E-surveys	155
A new research tool in the kit bag 155; Collecting information from a Web site 155; Sending out e-based surveys 156; Conjoint online 158; E-focus groups 159; Using the net to pose questions 160; Summary 161	
13. Data analysis	162
The analysis of closed questions 164; Data analysis of open-ended questions 169; Analysis of numerical responses 171; Multivariate analysis 172; Qualitative data analysis 175; Summary 176	
14. Reporting	177
Common rules for both written reports and presentations 177; Reporting qualitative data 182; Reporting quantitative data 184; Drawing conclusions 189; Making a presentation 191; Summary 193
