
John M. deMan • John W. Finley
W. Jeffrey Hurst • Chang Yong Lee

Principles of Food Chemistry

Fourth Edition

 Springer

Contents

1	Water	1
	Yrjo H. Roos, John W. Finley, and John M. deMan	
	Water in Foods	1
	Physical Properties of Water and Ice	1
	Structure of the Water Molecule	4
	Structure of Ice	6
	Growth of Ice Crystals	7
	Latent Heat of Fusion	7
	Solidification Without Crystallization	8
	Surface Tension of Water	10
	Examples of Surface Tension	11
	Colligative Properties of Aqueous Solutions	11
	Freezing Point Depression	11
	Boiling Point Elevation	12
	Osmotic Pressure	12
	Vapor Pressure Lowering	12
	Ionic Interactions Are Attractions Between Oppositely Charged Ions	13
	Properties of Hydrogen Bonds	15
	Hydrophobic Interactions	16
	Water Activity and Sorption Phenomena	17
	Types of Water	24
	Phase Diagram	26
	The Glass Transition	27
	Water Activity and Reaction Rate	30
	Water Activity and Food Spoilage	30
	Water Activity and Packaging	33
	Water Activity and Food Processing	34
	References	35
2	Lipids	39
	John W. Finley and John M. deMan	
	Shorthand Description of Fatty Acids and Glycerides	40
	Fatty Acids	43
	Lipid Nomenclature	43
	<i>Cis</i> and <i>trans</i> Fatty Acids	44

Triglycerides	48
Component Glycerides	53
Waxes	58
Phospholipids	60
Unsaponifiables	63
Terpenes	63
Steroids	63
Phytosterols	66
Lipid Reactions	68
Fatty Acid Salts	68
Hydrolysis	68
Interesterification	68
Hydrogenation	72
Lipid Oxidation	78
Initiation	79
Propagation	79
Termination	79
Photooxidation	88
Heated Fats: Frying	90
Flavor Reversion	93
Physical Properties	95
Fractionation	105
Emulsions and Emulsifiers	106
Fat Replacers	110
References	113
3 Amino Acids and Proteins	117
Michael Appell, W. Jeffrey Hurst, John W. Finley, and John M. deMan	
Introduction	117
Amino Acids	117
Peptides and Proteins	118
Protein Classification	120
Simple Proteins	120
Conjugated Proteins	123
Derived Proteins	123
Protein Structure	123
Denaturation	125
Non-enzymic Browning	127
Chemical Changes	136
Functional Properties	139
Surface Activity of Proteins	140
Gel Formation	142
Animal Proteins	142
Milk Proteins	142
Meat Proteins	147
Meromyosin	147

Collagen	149
Fish Proteins	152
Egg Proteins	153
Plant Proteins	154
Wheat Proteins	154
Maize Proteins	156
Rice Proteins	157
Soybean Proteins	158
Gluten Sensitivity	161
Test Methods	161
References	162
4 Carbohydrates	165
Gillian Eggleston, John W. Finley, and John M. deMan	
Introduction	165
Monosaccharides	166
Related Compounds to Monosaccharides	171
Amino Sugars	171
Glycosides	172
Sugar Alcohols	172
Oligosaccharides	175
Disaccharides	175
Chemical Reactions of Sugars	179
Compounds Related to Sugars	191
Polysaccharides	191
Starch	192
Starch Degrading Enzymes	200
High Fructose Corn Syrup (HFCS)	201
Starch Hydrolyzates: Corn Sweeteners	202
Modified Starches	202
Glycogen	207
Cellulose	209
Pentosans/Hemicelluloses	210
Lignin	211
Cyclodextrins	212
Polydextrose	214
Pectins	215
Gums	216
Dietary Fiber	222
References	226
5 Minerals	231
John W. Finley and John M. deMan	
Introduction	231
Interactions with Other Food Components	236
Major Minerals	237
Sodium	237
Potassium	237
Magnesium	238

Calcium	238
Phosphates	238
Minerals in Milk	239
Minerals in Meat	241
Minerals in Plant Products	242
Chloride	243
Trace Elements	244
Iron	244
Cobalt	245
Copper	245
Zinc	245
Manganese	245
Molybdenum	246
Selenium	246
Fluorine	246
Iodine	246
Chromium	246
Additional Information on Trace Elements	247
Metal Uptake in Canned Foods	247
References	250
6 Color and Food Colorants	253
John W. Finley, John M. deMan, and Chang Yong Lee	
Introduction	253
CIE System	253
Munsell System	258
Hunter System	260
Lovibond System	261
Gloss	262
Food Colorants	262
Certified (Synthetic) Color	263
Colors Exempt from Certification (Natural)	263
Tetrapyrrole Pigments	266
Myoglobins	266
Chlorophylls	268
Isoprenoid Derivative Pigments	270
Carotenoids	270
Benzopyran Derivative Pigments	276
Anthocyanins and Flavonoids	276
Other Pigments	281
Betalains	281
References	283
7 Flavor	285
Han-Seok Seo, John W. Finley, and John M. deMan	
Taste Sensations	290
Chemical Structure and Taste	290
Sweet Taste	293
Sour Taste	294

Salty Taste	295
Bitter Taste	298
Other Aspects of Taste	301
Taste Inhibition and Modification	303
Flavor Enhancement—Umami	304
Odor	306
Odor and Molecular Structure	310
Description of Food and Beverage Flavors	314
Astringency	316
Flavor and Off-Flavor	317
Flavor of Some Foods	319
Bread	319
Meat	320
Fish	320
Milk	321
Cheese	321
Fruits	322
Vegetables	322
Tea	322
Coffee	323
Alcoholic Beverages	324
References	325
8 Texture	329
Harry Levine and John W. Finley	
Introduction	329
Fluids	330
Texture of Solids	333
Texture Profile	334
Measurement of Texture	335
Force and Stress	336
Deformation and Strain	336
Principles of Measurement	337
Different Types of Bodies	337
The Elastic Body	337
The Retarded Elastic Body	338
The Viscous Body	338
The Viscoelastic Body	338
The Plastic Body	339
The Thixotropic Body	341
Dynamic Behavior	341
Rheology Applications in Foods	342
Textural Properties of some Foods	348
Meat Texture	348
Wheat Flour Dough	349
Fats	350
Fruits and Vegetables	353
Starch	353

Microstructure	355
Water Activity and Texture	359
References	361
9 Vitamins	365
John W. Finley and John M. deMan	
Introduction	365
Fat-Soluble Vitamins	367
Vitamin A (Retinol)	367
Vitamin D	372
Tocopherols (Vitamin E)	372
Vitamin K	378
Water-Soluble Vitamins	378
Vitamin C (L-Ascorbic Acid)	378
Vitamin B ₁ (Thiamin)	382
Vitamin B ₂ (Riboflavin)	383
Vitamin B ₆ (Pyridoxine)	385
Niacin	386
Vitamin B ₁₂ (Cyanocobalamine)	388
Folic Acid (Folacin)	389
Pantothenic Acid	391
Biotin	391
Vitamins as Food Ingredients	392
References	394
10 Enzymes	397
John M. deMan and Chang Yong Lee	
Introduction	397
Nature and Kinetics of Enzymes	400
Nature of Enzymes	400
Kinetics of Enzymes	400
Specificity	404
Classification	405
Enzyme Production	405
Hydrolases	405
Esterases	405
Amylases	411
Pectic Enzymes	413
Proteases	415
Protein Hydrolysates	419
Oxidoreductases	421
Phenolases	421
Glucose Oxidase (β -D-Glucose: Oxygen Oxidoreductase)	423
Catalase (Hydrogen Peroxide: Hydrogen Peroxide Oxidoreductase)	423
Peroxidase (Donor: Hydrogen Peroxide Oxidoreductase)	424

Lipoxygenase (Linoleate: Oxygen Oxidoreductase)	426
Xanthine Oxidase (Xanthine: Oxygen Oxidoreductase).	427
Immobilized Enzymes	429
References.	432
11 Fruits and Vegetables	435
Chang Yong Lee	
Major and Minor Components	435
Water.	435
Carbohydrates	436
Proteins and Nitrogenous Compounds	438
Lipids	438
Minor Composition.	438
Organic Acids	438
Phenolic Compounds	441
Minerals	443
Pigments	444
Postharvest Deterioration	445
Cellular Components and Physiology of Fruits and Vegetables.	446
Respiration	447
Environmental Factors that Influence Deterioration.	448
Effects of Processing on Fruits and Vegetables	448
Carbohydrate Reactions	449
Protein Reactions	449
Lipid Reactions.	450
Color Change	450
Flavor Change.	451
Texture Change.	452
Nutrient Loss.	452
Dehydration of Fruits and Vegetables	453
Canning of Fruits and Vegetables	454
Freezing of Fruits and Vegetables.	454
Lactic Acid Fermentation	454
References.	455
12 Herbs and Spices.	457
Zhuohong Xie and John W. Finley	
Black Pepper.	463
Vanilla	464
Cardamom.	468
Ginger	469
Turmeric	471
Cinnamon	473
Ginseng	477
Ginkgo.	478
Food Fraud Risks	478
References.	478

13 Beer and Wine	483
John W. Finley	
Alcoholic Fermentation	484
Beer	486
Raw Materials	488
Hops	489
Yeast	493
Wine	495
Wine Grape Production	496
Wine Production	498
References	506
14 Genetically Modified Crops	511
W. Jeffrey Hurst and John W. Finley	
Applications of Genetically Modified Crops	518
Testing	521
Regulation	522
Future Challenges	522
GMO Dictionary	523
Flour	525
References	526
15 Additives and Contaminants	527
W. Jeffrey Hurst, John W. Finley and John M. deMan	
Introduction	527
Food Toxins	527
Food Additives	531
Benzoic Acid	533
Parabens	533
Sorbic Acid	536
Sulfites	536
Nitrates and Nitrites	538
Hydrogen Peroxide	539
Sodium Chloride	539
Bacteriocins	540
Antioxidants	540
Emulsifiers	542
Bread Improvers	543
Incidental Additives or Contaminants	549
Pesticides	549
Dioxin	551
Polychlorinated Biphenyls (PCBs)	552
Antibiotics	555
