xii

Main formulae for Part 1 Revision of some basic mathematics

Part 2 Basic electrical engineering principles

3	Units a	ssociated with basic electrical
	quanti	ties
	3.1	SI units

3.2	Charge	50
3.3	Force	50
3.4	Work	51
3.5	Power	52
3.6	Electrical potential and e.m.f.	53
3.7	Resistance and conductance	53

	3.8	Electrical power and energy	54	
	3.9	Summary of terms, units and their symbols	55	
4	An intr	oduction to electric circuits	56	
	4.1	Standard symbols for electrical		
		components	57	
	4.2	Electric current and quantity of		
		electricity	57	
	4.3	Potential difference and resistance	58	
	4.4	Basic electrical measuring	58	
	4.5	Linear and non-linear devices	58 59	
	4.6	Ohm's law	59	
	4.7	Multiples and sub-multiples	59	
	4.8	Conductors and insulators	61	
	4.9	Electrical power and energy	61	
	4.10	Main effects of electric current	64	
	4.11	Fuses	64	
	4.12	Insulation and the dangers of constant		
		high current flow	64	
5	Resista	nce variation	65	
	5.1	Resistor construction	66	
	5.2	Resistance and resistivity	66	
	5.3	Temperature coefficient of resistance	68	
	5.4	Resistor colour coding and ohmic values	70	
6	Batteri	es and alternative sources of energy	73	
	6.1	Introduction to batteries	74	
	6.2	Some chemical effects of electricity	74	
	6.3	The simple cell	75	
	6.4	Corrosion	76	
	6.5	E.m.f. and internal resistance of a cell	76	
	6.6	Primary cells	78	
	6.7	Secondary cells	79	
	6.8	Lithium-ion batteries	81	
	6.9	Cell capacity	84	
	6.10	Safe disposal of batteries	84	
	6.11		84 85	
	6.12 6.13	Alternative and renewable energy sources	85 86	
	0.13	Solar energy	00	
ł	Revision Test 1 89			

vi Contents

7	Series a	and parallel networks	90
	7.1	Series circuits	91
	7.2	Potential divider	92
	7.3	Parallel networks	94
	7.4	Current division	96
	7.5	Loading effect	99
	7.6	Potentiometers and rheostats	100
	7.7	Relative and absolute voltages	103
	7.8	Earth potential and short circuits	104
	7.9	Wiring lamps in series and in parallel	104
8	-	tors and capacitance	106
	8.1	Introduction to capacitors	107
	8.2	Electrostatic field	107
	8.3	Electric field strength	108
	8.4	Capacitance	108
	8.5	Capacitors	109
	8.6	Electric flux density	110
	8.7	Permittivity	110
	8.8	The parallel plate capacitor	111
	8.9	Capacitors connected in parallel and series	112
	8.10	Dielectric strength	116
	8.11	Energy stored	117
	8.12	Practical types of capacitor	117
	8.13	Supercapacitors	119
	8.14	Discharging capacitors	121
9	Magnet	tic circuits	122
9	Magner 9.1	Introduction to magnetism and	122
9	9.1	Introduction to magnetism and magnetic circuits	123
9	9.1 9.2	Introduction to magnetism and magnetic circuits Magnetic fields	123 124
9	9.1 9.2 9.3	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density	123
9	9.1 9.2	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density Magnetomotive force and magnetic	123 124 125
9	9.1 9.2 9.3 9.4	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density Magnetomotive force and magnetic field strength	123 124 125 125
9	9.1 9.2 9.3 9.4 9.5	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density Magnetomotive force and magnetic field strength Permeability and <i>B</i> – <i>H</i> curves	123 124 125 125 126
9	 9.1 9.2 9.3 9.4 9.5 9.6 	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density Magnetomotive force and magnetic field strength Permeability and <i>B</i> – <i>H</i> curves Reluctance	123 124 125 125 126 127
9	 9.1 9.2 9.3 9.4 9.5 9.6 9.7 	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density Magnetomotive force and magnetic field strength Permeability and <i>B–H</i> curves Reluctance Composite series magnetic circuits	123 124 125 125 126
9	 9.1 9.2 9.3 9.4 9.5 9.6 	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density Magnetomotive force and magnetic field strength Permeability and <i>B–H</i> curves Reluctance Composite series magnetic circuits Comparison between electrical and	123 124 125 125 126 127 129
9	 9.1 9.2 9.3 9.4 9.5 9.6 9.7 	Introduction to magnetism and magnetic circuits Magnetic fields Magnetic flux and flux density Magnetomotive force and magnetic field strength Permeability and <i>B–H</i> curves Reluctance Composite series magnetic circuits	123 124 125 125 126 127

11	Electro	magnetic induction	145
••		Introduction to electromagnetic induction	146
		Laws of electromagnetic induction	147
		Rotation of a loop in a magnetic field	150
		Inductance	151
		Inductors	152
		Energy stored	153
		Inductance of a coil	153
	11.8	Mutual inductance	155
12	Electric	al measuring instruments and	
	measure		158
		Introduction	159
		Analogue instruments	159
		Shunts and multipliers	159
		Electronic instruments	161
		The ohmmeter	161
		Multimeters	162
		Wattmeters	162
		Instrument 'loading' effect	162
		The oscilloscope	164
		Virtual test and measuring instruments	169
		Virtual digital storage oscilloscopes	170
		Waveform harmonics	173
		Logarithmic ratios	174
		Null method of measurement	176
		Wheatstone bridge	177
		D.c. potentiometer	177
		A.c. bridges	178
	12.18	Measurement errors	179
13		nductor diodes	182
		Types of material	183
		Semiconductor materials	183
		Conduction in semiconductor materials	185
		The p–n junction	185
	13.5		186
		Semiconductor diodes	189
		Characteristics and maximum ratings	190
		Rectification	190
		Zener diodes	190
		Silicon controlled rectifiers	192
		Light emitting diodes	193
		Varactor diodes	193
	13.13	Schottky diodes	193
14	Transist		195
	14.1	Transistor classification	196
	14.2	Bipolar junction transistors (BJTs)	196

14.2Bipolal junction transistors (BJ1S)19014.3Transistor action19714.4Leakage current19814.5Bias and current flow19914.6Transistor operating configurations199

14.7	Bipolar transistor characteristics	200
14.8	Transistor parameters	201
14.9	Current gain	202
14.10	Typical BJT characteristics and maximum	
	ratings	203
14.11	Field effect transistors	204
14.12	Field effect transistor characteristics	205
14.13	Typical FET characteristics and maximum	
	ratings	206
14.14	Transistor amplifiers	206
14.15	Load lines	208
Revision 7	Fest 3	213
