Brief Contents

<i>Preface</i>		xv
<i>Publisher's acknowledgements</i>		xix
Chapter 1	Information systems	1
Chapter 2	Strategy and information systems	45
Chapter 3	Business information technology	79
Chapter 4	Distributed systems, networks and the organization	135
Chapter 5	The Internet and the World Wide Web	174
Chapter 6	Electronic commerce and business	210
Chapter 7	Decision support and end-user computing	242
Chapter 8	File organization and databases for business information systems	283
Chapter 9	Information systems: control and responsibility	339
Chapter 10	Information systems development: an overview	393
Chapter 11	The systems project: early stages	418
Chapter 12	Process analysis and modelling	438
Chapter 13	Data analysis and modelling	475
Chapter 14	Systems design	502
Chapter 15	Detailed design, implementation and review	524
Chapter 16	Systems development: further tools, techniques and alternative approaches	556
Chapter 17	Expert systems and knowledge bases	604
<i>Index</i>		651

Contents

<i>Preface</i>	xv
<i>Publisher's acknowledgements</i>	xix
Chapter 1 Information systems	1
Learning outcomes	1
Introduction	1
1.1 Introduction	2
1.2 Decisions	5
1.3 Value of information	12
1.4 The idea of a system	15
1.5 Management information systems	25
1.6 Informal and formal information	37
Summary	38
Review questions	40
Exercises	40
Case study	41
References	43
Recommended reading	43
Chapter 2 Strategy and information systems	45
Learning outcomes	45
Introduction	45
2.1 The need for a business strategy	46
2.2 Strategic business planning	46
2.3 Business information systems strategy	48
2.4 Information systems strategy today	66
Summary	72
Review questions	74
Exercises	74
Case study	75
References	76
Recommended reading	77
Chapter 3 Business information technology	79
Learning outcomes	79
Introduction	79
3.1 Historical development of computing technology	80
3.2 Hardware	85
3.3 Software	116
Summary	130

Review questions	131
Exercises	131
Case study	132
Recommended reading	134
Chapter 4 Distributed systems, networks and the organization	135
Learning outcomes	135
Introduction	135
4.1 Networks and distributed systems	136
4.2 The idea of a distributed system	138
4.3 Organizational benefits of distributed systems	139
4.4 Organizational levels and distributed systems	142
4.5 The extent of distribution	143
4.6 The distribution of data	145
4.7 Networks and communications	147
4.8 Standards	161
4.9 Electronic data interchange	164
4.10 The effects of the Internet on business	168
Summary	168
Review questions	170
Exercises	170
Case study	171
Recommended reading	172
Chapter 5 The Internet and the World Wide Web	174
Learning outcomes	174
Introduction	174
5.1 The evolution of the Internet	174
5.2 How the Internet works	177
5.3 What the Internet offers	185
5.4 The World Wide Web	191
5.5 The Internet and copyright	200
5.6 The Internet and financial transactions	201
5.7 Intranets and extranets	203
Summary	205
Review questions	206
Exercises	207
Case study	207
Recommended reading	208
Chapter 6 Electronic commerce and business	210
Learning outcomes	210
Introduction	210
6.1 A brief introduction to e-commerce	211
6.2 E-commerce – key features	212
6.3 Conducting business over the Internet	214
6.4 Trade cycles and e-commerce	216

6.5 E-commerce business models	220
6.6 The development and management of a business website	231
6.7 Trends in e-commerce	234
Summary	236
Review questions	237
Exercises	237
Case study	238
References and recommended reading	240
Chapter 7 Decision support and end-user computing	242
Learning outcomes	242
Introduction	242
7.1 Features of decision support systems	243
7.2 Types of decision support system	245
7.3 The development of decision support systems	247
7.4 Group decision support	257
7.5 End-user computing	259
7.6 Human–computer interaction	272
Summary	277
Review questions	278
Exercises	278
Case study	279
References	281
Recommended reading	281
Chapter 8 File organization and databases for business information systems	283
Learning outcomes	283
Introduction	283
8.1 Files and file structures	283
8.2 Records and record structure	286
8.3 Physical and logical views of data	287
8.4 Data storage – files, records and lists	289
8.5 File-based and database approaches to data storage	290
8.6 A three-level architecture for databases	298
8.7 Models and schemas	300
8.8 Network models	302
8.9 Hierarchical models	306
8.10 Relational models	311
8.11 Object-oriented databases	320
8.12 PC databases	322
8.13 Data warehouses	322
Summary	330
Review questions	331
Exercises	332
Case study	335
Recommended reading	337

Chapter 9	Information systems: control and responsibility	339
	Learning outcomes	339
	Introduction	339
	9.1 Control systems	340
	9.2 Controls over computerized information systems	347
	9.3 Ethics, social responsibility and corporate governance	370
	9.4 Data protection legislation	380
	9.5 Risk identification and controls	383
	Summary	387
	Review questions	388
	Exercises	388
	Case study	390
	References and recommended reading	392
Chapter 10	Information systems development: an overview	393
	Learning outcomes	393
	Introduction	393
	10.1 The need for systems analysis and design	393
	10.2 The need for a structured approach to analysis and design	399
	10.3 The life cycle of a system	404
	10.4 The structured approach and the life cycle	411
	10.5 Alternative approaches to information systems development	412
	Summary	413
	Review questions	413
	Exercises	414
	Case study	414
	Recommended reading	416
Chapter 11	The systems project: early stages	418
	Learning outcomes	418
	Introduction	418
	11.1 Initial stages	418
	11.2 Statement of scope and objectives	421
	11.3 Systems investigation	422
	11.4 The feasibility study and report	430
	Summary	436
	Review questions	437
	Exercises	437
	Recommended reading	437
Chapter 12	Process analysis and modelling	438
	Learning outcomes	438
	Introduction	438
	12.1 Systems analysis	438
	12.2 Manual systems flowcharts	439
	12.3 Data flow diagrams	444
	12.4 Data dictionaries	455

12.5	Decision tables	456
12.6	Logic flowcharts	461
12.7	Structured English	465
	Summary	469
	Review questions	469
	Exercises	470
	Case study	473
	Recommended reading	474
Chapter 13 Data analysis and modelling		475
	Learning outcomes	475
	Introduction	475
13.1	Top-down versus bottom-up approaches to data modelling	475
13.2	Entity–relationship modelling	477
13.3	Data analysis and modelling – an overview of the method	480
13.4	Process modelling and data modelling – the links	495
	Summary	497
	Review questions	498
	Exercises	498
	Case study	499
	Recommended reading	500
Chapter 14 Systems design		502
	Learning outcomes	502
	Introduction	502
14.1	The transition from analysis to design	502
14.2	Suggesting alternative designs	508
14.3	Automation boundaries	514
14.4	Walkthroughs and formal reviews	519
	Summary	521
	Review questions	521
	Exercises	522
	Case study	522
	Recommended reading	522
Chapter 15 Detailed design, implementation and review		524
	Learning outcomes	524
	Introduction	524
15.1	Detailed design	525
15.2	Systems specification	542
15.3	Implementation	543
15.4	Systems changeover	548
15.5	Evaluation and maintenance	551
	Summary	553
	Review questions	553
	Exercises	554
	Case study	555
	Recommended reading	555

Chapter 16	Systems development: further tools, techniques and alternative approaches	556
Learning outcomes		556
Introduction		556
16.1	Computer-aided software engineering	557
16.2	Rapid applications development	562
16.3	Object-oriented analysis and design	564
16.4	An evaluation of 'hard' approaches to systems analysis and design	574
16.5	'Soft' approaches to systems analysis and design	580
16.6	Contemporary usage of methodologies, tools and techniques	595
Summary		596
Review questions		599
Exercises		599
Case study		600
References and recommended reading		602
Chapter 17	Expert systems and knowledge bases	604
Learning outcomes		604
Introduction		604
17.1	Expert systems architecture	605
17.2	Representation of knowledge	623
17.3	Drawing inferences	635
17.4	Intelligence and the Internet	642
Summary		643
Review questions		645
Exercises		645
Case study		647
References and recommended reading		649
<i>Index</i>		651
