Google SketchUp® 8 FOR DUMMIES®

by Aidan Chopra

Wiley Publishing, Inc.

Dedication

For my parents, Jenny and Shab, and my brother, Quincy, because I love them very much.

Acknowledgments

For helping in all the ways that it is possible to help with a book — offering technical advice, lending a critical ear, providing moral support and encouragement — I'd like to thank my wife, Sandra Winstead. It's rare to find everything you need in a single person, and I can't imagine having written this book without her.

I'd like to thank Chris Dizon for agreeing to be the Technical Editor for this volume; I can't think of anyone who brings more enthusiasm and curiosity to everything he does. As a dyed-in-the-wool SketchUpper who uses the software even more than I do, I knew he'd do a bang-up job of keeping me honest, and he did.

I thank Kyle Looper, Becky Huehls, and Jen Riggs, my editors at Wiley, for making what I fully expected to be a painful process not so at all. It was a delight to work with a team of such intelligent, thoughtful, and well-meaning professionals; I only hope I'm half as lucky on the next book I write.

Finally, I need to thank the very long list of individuals who provided critical help. From clearing the way for me to be able to write this book to patiently explaining things more than once, I owe the following people (and almost certainly a few more) a whole lot: Tommy Acierno, Brad Askins, John Bacus, Brian Brewington, Brian Brown, Todd Burch, Chris Campbell, Mark Carvalho, Chris Cronin, Tasha Danko, Steve Dapkus, Jonathan Dormody, Bil Eberle, Joe Esch, Rich Feit, Jody Gates, Toshen Golias, Scott Green, Adam Hecht, Barry Janzen, Alex Juhola, Tyson Kartchner, Chris Keating, Patrick Lacz, Mark Limber, Scott Lininger, Catherine Moats, Allyson McDuffie, Millard McQuaid, Tyler Miller, Parker Mitchell, Simone Nicolo, Steve Oles, Bruce Polderman, Alok Priyadarshi, Peter Saal, Brad Schell, Gopal Shah, Matt Simpson, Mike Springer, Tricia Stahr, Bryce Stout, Vicky Tait, Daniel Tal, James Therrien, Mason Thrall, Nancy Trigg, Tushar Udeshi, John Ulmer, David Vicknair, Greg Wirt, and Tom Wyman.

Publisher's Acknowledgments

We're proud of this book; please send us your comments at http://dummies.custhelp.com. For other comments, please contact our Customer Care Department within the U.S. at 877-762-2974, outside the U.S. at 317-572-3993, or fax 317-572-4002.

Some of the people who helped bring this book to market include the following:

Acquisitions, Editorial, and Media Development

Project Editor: Rebecca Huehls

Acquisitions Editor: Kyle Looper

Copy Editor: Jen Riggs

Technical Editor: Chris Dizon

Editorial Manager: Leah P. Cameron

Media Development Assistant Project Manager: Jenny Swisher

Editorial Assistant: Amanda Graham

Sr. Editorial Assistant: Cherie Case

Cartoons: Rich Tennant (www.the5thwave.com)

Composition Services

Project Coordinator: Katherine Crocker

Layout and Graphics: Carl Byers, Lavonne Roberts

Proofreaders: Melissa Cossell, Rebecca Denoncour, Toni Settle

Indexer: BIM Indexing & Proofreading Services

Publishing and Editorial for Technology Dummies

Richard Swadley, Vice President and Executive Group Publisher

Andy Cummings, Vice President and Publisher

Mary Bednarek, Executive Acquisitions Director

Mary C. Corder, Editorial Director

Publishing for Consumer Dummies

Diane Graves Steele, Vice President and Publisher

Composition Services

Debbie Stailey, Director of Composition Services

Contents at a Glance

Introduction 1

Part I: Getting Started with SketchUp 9

Chapter 1: Meeting Google SketchUp 11
Chapter 2: Establishing the Modeling Mind-Set 23
Chapter 3: Getting Off to a Running Start 59

Part II: Modeling in SketchUp 75

Chapter 4: Building Buildings 77
Chapter 5: Falling in Love with Components 127
Chapter 6: Going Beyond Buildings 163
Chapter 7: Keeping Your Model Organized 211
Chapter 8: Modeling with Photographs 223

Part III: Viewing Your Model in Different Ways 257

Chapter 9: Working with Styles and Shadows 259
Chapter 10: Presenting Your Model Inside SketchUp 295

Part IV: Sharing What You've Made 323

Chapter 11: Working with Google Earth and the 3D Warehouse 325
Chapter 12: Printing Your Work 347
Chapter 13: Exporting Images and Animations 361
Chapter 14: Creating Presentation Documents with LayOut 381
Chapter 15: Diving Deeper into LayOut 403

Part V: The Part of Tens 429

Chapter 16: Ten SketchUp Traps and Their Workarounds 431
Chapter 17: Ten Plugins, Extensions, and Resources Worth Getting 437
Chapter 18: Ten Ways to Discover Even More 445

Index 449

Bonus Chapter 1: Exporting to CAD, Illustration, and Other Modeling Software BC1
Bonus Chapter 2: Building Your Own Dynamic Components BC25

Table of Contents

Introduction 1

About This Book 1
Foolish Assumptions 3
How This Book Is Organized 4
Part I: Getting Started with SketchUp 4
Part II: Modeling in SketchUp 5
Part III: Viewing Your Model in Different Ways 5
Part IV: Sharing What You've Made 5
Part V: The Part of Tens 6
On the Web site 6
Icons Used in This Book 7

Part 1: Getting Started with SketchUp 9

Chapter 1: Meeting Google SketchUp 11

Things You Ought to Know Right Away 12
Where SketchUp Fits in Google's World 12
Comparing SketchUp to Other 3D Modeling Programs 13
Jumping right in 13
Understanding the difference between paper and clay 14
What You Should (And Shouldn't) Expect SketchUp to Do 15
Taking the Ten-Minute SketchUp Tour 18
Hanging out at the menu bar 19
Checking the status bar 20
Taking a peek at the dialog boxes 21

Chapter 2: Establishing the Modeling Mind-Set 23

All about Edges and Faces 24
Living on (with, actually) the edge 24
Facing the facts about faces 25
Understanding the relationship between edges and faces 27
Drawing in 3D on a 2D Screen 29
Giving instructions with the drawing axes 30
Keeping an eye out for inferences 31
Using inferences to help you model 32
Warming Up Your SketchUp Muscles 33
Getting the best view of what you're doing 33
Drawing edges with ease 36
Injecting accuracy into your model 37
Selecting what you mean to select 40
Moving and copying like a champ 44

Rotating the right way 50
Making and using guides 53
Painting your faces with color and texture 57

Chapter 3: Getting Off to a Running Start 59

Setting Things Up 59
Making a Quick Model 61
Slapping on Some Paint 68
Giving Your Model Some Style 71
Switching on the Sun 72
Sharing Your Masterpiece 74

Part II: Modeling in SketchUp 75

Chapter 4: Building Buildings 77

Drawing Floors and Walls 78
Starting out in 2D 79
Coming up with a simple plan 84
Going from 2D to 3D 92
Adding floors to your building 95
Inserting doors and windows 105
Staring Down Stairs 108
The Subdivided Rectangles method 110
The Copied Profile method 113
Raising the Roof 114
Building flat roofs with parapets 117
Creating eaves for buildings with pitched roofs 117
Constructing gabled roofs 119
Making hip roofs 121
Sticking your roof together 122

Chapter 5: Falling in Love with Components 127

Grouping Things Together 128
Working with Components 129
What makes components so great? 130
Exploring the Components dialog box 132
Creating your own components 139
Discovering Dynamic Components 144
Taking Advantage of Components to Build Better Models 152
Modeling symmetrically: Good news for lazy people 152
Modeling with repeated elements 158

Chapter 6: Going Beyond Buildings 163

Extruding with Purpose: Follow Me 163
Using Follow Me 164
Making lathed forms like spheres and bottles 165

Creating extruded shapes like gutters and handrails 167
Subtracting from a model with Follow Me 171
Modeling with the Scale tool 176
Getting the hang of Scale 178
Scaling profiles to make organic forms 180
Making and Modifying Terrain 185
Creating a new terrain model 186
Editing an existing terrain model 193
Building a Solid Tools Foundation 200
Understanding solids 201
Checking out the Solid Tools 203
Putting the Solid Tools to work 205

Chapter 7: Keeping Your Model Organized 211

Taking Stock of Your Organization Options 211
Seeing the Big Picture: The Outliner 212
Taking a good look at the Outliner 213
Making good use of the Outliner 214
Discovering the Ins and Outs of Layers 215
What layers are — and what they're not 215
Using layers in SketchUp 216
Staying out of trouble 217
Putting It All Together 218

Chapter 8: Modeling with Photographs 223

Painting Faces with Photos 224
Adding photos to flat faces 224
Editing your textures 229
Optimizing your photo textures 237
Adding photo textures to curved surfaces 238
Modeling Directly from a Photo: Introducing Photo-Matching 243
Looking at all the pretty colors 244
Getting set up for photo-matching 245
Modeling by photo-matching 250
Modeling on Top of Photo Textures 252
Making a texture projected 253
Modeling with projected textures: A basic workflow 254

Part III: Viewing Your Model in Different Ways 257

Chapter 9: Working with Styles and Shadows 259

Changing Your Model's Appearance with Styles 259
Choosing how and where to apply styles 260
Applying styles to your models 261
Editing your styles 262
Creating a new style 278
Saving and sharing styles you make 278

Working with Shadows 282
Discovering SketchUp's Shadow Settings 282
Using shadows to add depth and realism 284
Creating accurate shadow studies 288

Chapter 10: Presenting Your Model Inside SketchUp 295

Exploring Your Creation on Foot 296
These tools were made for walking 296
Stopping to look around 298
Setting your field of view 299
Taking the Scenic Route 300
Creating scenes 301
Moving from scene to scene 303
Modifying scenes after you make 'em 305
Mastering the Sectional Approach 312
Cutting plans and sections 312
Creating section animations with scenes 320

Part IV: Sharing What You've Made 323

Chapter 11: Working with Google Earth and the 3D Warehouse 325

Getting the Big (3D) Picture 326
Sending Your Models to Google Earth 327
Geo-modeling for Google Earth 328
Geo-locating your model 335
Viewing your model in Google Earth 339
Becoming a SketchUp All-Star with the 3D Warehouse 342
Getting to the 3D Warehouse 342
Uploading your models 343

Chapter 12: Printing Your Work 347

Printing from a Windows Computer 347
Making a basic print (Windows) 348
Decoding the Print Preview and Windows Print dialog box 349
Printing from a Mac 353
Making a basic print (Mac) 353
Deciphering the Mac printing dialog boxes 355
Printing to a Particular Scale 357
Preparing to print to scale 358
Printing to scale (Windows and Mac) 359

Chapter 13: Exporting Images and Animations 361

Exporting 2D Images of Your Model 362
Exporting a raster image from SketchUp 362
Looking at SketchUp's raster formats 367
Making sure that you're exporting enough pixels 369

Making Movies with Animation Export 374
Getting ready for prime time 374
Exporting a movie 375
Figuring out the Animation Export options settings 377

Chapter 14: Creating Presentation Documents with LayOut 381

Getting Your Bearings 382
Some menu bar minutiae 382
Perusing LayOut's panels 384
Building a Quick LayOut Document 386
Starting with a template 387
Inserting SketchUp model views 389
Adding images and other graphics 392
Annotating with text and dimensions 394
Getting Your Document Out the Door 397
Printing your work 398
Exporting a PDF 398
Exporting an image file 399
Exporting a DWG or DXF file 400
Going full-screen 401

Chapter 15: Diving Deeper into LayOut 403

Staying Organized with Layers and Pages 403
Using layers to maintain your sanity 404
Making layers and pages work together 406
Working with Inserted Model Views 407
Framing exactly the right view 408
Making your models look their best 413
Discovering More about Dimensions 417
Editing your dimensions 418
Keeping track of model space and paper space 420
Drawing with LayOut's Vector Tools 421
Customizing LayOut with Templates and Scrapbooks 425
Creating your own templates 425
Putting together your own scrapbooks 426

Part V: The Part of Tens 429

Chapter 16: Ten SketchUp Traps and Their Workarounds 431

SketchUp Won't Create a Face Where You Want It To 431
Your Faces Are Two Different Colors 432
Edges on a Face Won't Sink In 432
SketchUp Crashed, and You Lost Your Model 433
SketchUp Is Sooooo Slooooooooow 434
You Can't Get a Good View of the Inside of Your Model 434
A Face Flashes When You Orbit 435

You Can't Move Your Component the Way You Want 435
Bad Stuff Happens Every Time You Use the Eraser 435
All Your Edges and Faces Are on Different Layers 436

Chapter 17: Ten Plugins, Extensions, and Resources Worth Getting 437

Ruby Scripts 437
Renderers 442
Hardware 443

Chapter 18: Ten Ways to Discover Even More 445

Put Away Your Wallet 445
Now Get Out Your Wallet 446

Index 449

Bonus Chapter 1: Exporting to CAD, Illustration, and Other Modeling Software BC1

Exporting Drawings in 2D BC2
Sizing up the export formats BC2
Exporting a 2D drawing BC3
Getting to know PDF and EPS BC3
Coming to terms with DXF and DWG (in 2D) BC9
Peeking at EPIX BC13
Exporting 3D Data for Other Software BC14
Gathering your marbles (So that you don't lose them later) BC14
Getting a handle on OBJ, FBX, XSI, and DAE (COLLADA) BC16
Wrapping your head around 3DS BC18
Dealing with VRML BC21
Handling DWG and DXF (in 3D) BC22

Bonus Chapter 2: Building Your Own Dynamic Components BC25

Getting the Lay of the Land BC25
Coping with Component Attributes BC27
Damn the Torpedoes: Smart Scaling BC29
Moving Right Along: Smart Replication BC34
Just for Good Measure: Rotation and Animation BC38
