Contents

1 The Role of Statistics in Engineering 1

1.1 The Engineering Method and Statistical Thinking 2
- 1.1.1 Variability 3
- 1.1.2 Populations and Samples 5

1.2 Collecting Engineering Data 5
- 1.2.1 Basic Principles 5
- 1.2.2 Retrospective Study 5
- 1.2.3 Observational Study 6
- 1.2.4 Designed Experiments 6
- 1.2.5 Observing Processes Over Time 9

1.3 Mechanistic and Empirical Models 12

1.4 Probability and Probability Models 15

2 Probability 17

2.1 Sample Spaces and Events 18
- 2.1.1 Random Experiments 18
- 2.1.2 Sample Spaces 19
- 2.1.3 Events 21

2.2 Counting Techniques 23

2.3 Interpretations and Axioms of Probability 26

2.4 Unions of Events and Addition Rules 29

2.5 Conditional Probability 31

2.6 Intersections of Events and Multiplication and Total Probability Rules 34

2.7 Independence 36

2.8 Bayes' Theorem 39

2.9 Random Variables 40

3 Discrete Random Variables and Probability Distributions 42

3.1 Probability Distributions and Probability Mass Functions 43

3.2 Cumulative Distribution Functions 45

3.3 Mean and Variance of a Discrete Random Variable 47

3.4 Discrete Uniform Distribution 49

3.5 Binomial Distribution 51

3.6 Geometric and Negative Binomial Distributions 55

3.7 Hypergeometric Distribution 59

3.8 Poisson Distribution 63

4 Continuous Random Variables and Probability Distributions 66

4.1 Probability Distributions and Probability Density Functions 67

4.2 Cumulative Distribution Functions 70

4.3 Mean and Variance of a Continuous Random Variable 71

4.4 Continuous Uniform Distribution 72

4.5 Normal Distribution 73

4.6 Normal Approximation to the Binomial and Poisson Distributions 79

4.7 Exponential Distribution 83

4.8 Erlang and Gamma Distributions 86

4.9 Weibull Distribution 89

4.10 Lognormal Distribution 90

4.11 Beta Distribution 92

5 Joint Probability Distributions 95

5.1 Joint Probability Distributions for Two Random Variables 96

5.2 Conditional Probability Distributions and Independence 102

5.3 Joint Probability Distributions for More Than Two Random Variables 107

5.4 Covariance and Correlation 110

5.5 Common Joint Distributions 113
- 5.5.1 Multinomial Probability Distribution 113
- 5.5.2 Bivariate Normal Distribution 115

5.6 Linear Functions of Random Variables 117

5.7 General Functions of Random Variables 120

5.8 Moment-Generating Functions 121

6 Descriptive Statistics 126

6.1 Numerical Summaries of Data 127

6.2 Stem-and-Leaf Diagrams 131

6.3 Frequency Distributions and Histograms 135
6.4 Box Plots 139
6.5 Time Sequence Plots 140
6.6 Scatter Diagrams 142
6.7 Probability Plots 144

7 Point Estimation of Parameters and Sampling Distributions 148

7.1 Point Estimation 149
7.2 Sampling Distributions and the Central Limit Theorem 150
7.3 General Concepts of Point Estimation 156
7.3.1 Unbiased Estimators 156
7.3.2 Variance of a Point Estimator 157
7.3.3 Standard Error: Reporting a Point Estimate 158
7.3.4 Bootstrap Standard Error 159
7.3.5 Mean Squared Error of an Estimator 160
7.4 Methods of Point Estimation 161
7.4.1 Method of Moments 162
7.4.2 Method of Maximum Likelihood 163
7.4.3 Bayesian Estimation of Parameters 167

8 Statistical Intervals for a Single Sample 170

8.1 Confidence Interval on the Mean of a Normal Distribution, Variance Known 172
8.1.1 Development of the Confidence Interval and Its Basic Properties 172
8.1.2 Choice of Sample Size 175
8.1.3 One-Sided Confidence Bounds 176
8.1.4 General Method to Derive a Confidence Interval 176
8.1.5 Large-Sample Confidence Interval for μ 177
8.2 Confidence Interval on the Mean of a Normal Distribution, Variance Unknown 179
8.2.1 *t* Distribution 180
8.2.2 *t* Confidence Interval on μ 181
8.3 Confidence Interval on the Variance and Standard Deviation of a Normal Distribution 182
8.4 Large-Sample Confidence Interval for a Population Proportion 185
8.5 Guidelines for Constructing Confidence Intervals 188
8.6 Bootstrap Confidence Interval 189
8.7 Tolerance and Prediction Intervals 189
8.7.1 Prediction Interval for a Future Observation 189
8.7.2 Tolerance Interval for a Normal Distribution 191

9 Tests of Hypotheses for a Single Sample 193

9.1 Hypothesis Testing 194
9.1.1 Statistical Hypotheses 194
9.1.2 Tests of Statistical Hypotheses 196
9.1.3 One-Sided and Two-Sided Hypotheses 202
9.1.4 *P*-Values in Hypothesis Tests 203
9.1.5 Connection between Hypothesis Tests and Confidence Intervals 206
9.1.6 General Procedure for Hypothesis Tests 206
9.2 Tests on the Mean of a Normal Distribution, Variance Known 208
9.2.1 Hypothesis Tests on the Mean 208
9.2.2 Type II Error and Choice of Sample Size 211
9.2.3 Large-Sample Test 215
9.3 Tests on the Mean of a Normal Distribution, Variance Unknown 215
9.3.1 Hypothesis Tests on the Mean 215
9.3.2 Type II Error and Choice of Sample Size 220
9.4 Tests on the Variance and Standard Deviation of a Normal Distribution 222
9.4.1 Hypothesis Tests on the Variance 222
9.4.2 Type II Error and Choice of Sample Size 224
9.5 Tests on a Population Proportion 225
9.5.1 Large-Sample Tests on a Proportion 225
9.5.2 Type II Error and Choice of Sample Size 227
9.6 Summary Table of Inference Procedures for a Single Sample 229
9.7 Testing for Goodness of Fit 229
9.8 Contingency Table Tests 232
9.9 Nonparametric Procedures 234
9.9.1 The Sign Test 235
9.9.2 The Wilcoxon Signed-Rank Test 239
9.9.3 Comparison to the *t*-Test 240
9.10 Equivalence Testing 240
9.11 Combining *P*-Values 242

10 Statistical Inference for Two Samples 244

10.1 **Inference on the Difference in Means of Two Normal Distributions, Variances Known 245**
- 10.1.1 Hypothesis Tests on the Difference in Means, Variances Known 247
- 10.1.2 Type II Error and Choice of Sample Size 249
- 10.1.3 Confidence Interval on the Difference in Means, Variances Known 251

10.2 **Inference on the Difference in Means of Two Normal Distributions, Variances Unknown 253**
- 10.2.1 Hypotheses Tests on the Difference in Means, Variances Unknown 253
- 10.2.2 Type II Error and Choice of Sample Size 259
- 10.2.3 Confidence Interval on the Difference in Means, Variances Unknown 260

10.3 **A Nonparametric Test for the Difference in Two Means 261**
- 10.3.1 Description of the Wilcoxon Rank-Sum Test 262
- 10.3.2 Large-Sample Approximation 263
- 10.3.3 Comparison to the *t*-Test 264

10.4 **Paired *t*-Test 264**

10.5 **Inference on the Variances of Two Normal Distributions 268**
- 10.5.1 *F* Distribution 268
- 10.5.2 Hypothesis Tests on the Equity of Two Variances 270
- 10.5.3 Type II Error and Choice of Sample Size 272
- 10.5.4 Confidence Interval on the Ratio of Two Variances 273

10.6 **Inference on Two Population Proportions 273**
- 10.6.1 Large-Sample Tests on the Difference in Population Proportions 274
- 10.6.2 Type II Error and Choice of Sample Size 276
- 10.6.3 Confidence Interval on the Difference in Population Proportions 277

10.7 **Summary Table and Road Map for Inference Procedures for Two Samples 278**

11 Simple Linear Regression and Correlation 280

11.1 **Empirical Models 281**

11.2 **Simple Linear Regression 284**

11.3 **Properties of the Least Squares Estimators 288**

11.4 **Hypothesis Tests in Simple Linear Regression 288**
- 11.4.1 Use of *t*-Tests 289
- 11.4.2 Analysis of Variance Approach to Test Significance of Regression 291

11.5 **Confidence Intervals 292**
- 11.5.1 Confidence Intervals on the Slope and Intercept 292
- 11.5.2 Confidence Interval on the Mean Response 293

11.6 **Prediction of New Observations 295**

11.7 **Adequacy of the Regression Model 296**
- 11.7.1 Residual Analysis 296
- 11.7.2 Coefficient of Determination (R^2) 298

11.8 **Correlation 299**

11.9 **Regression on Transformed Variables 303**

11.10 **Logistic Regression 305**

12 Multiple Linear Regression 310

12.1 **Multiple Linear Regression Model 311**
- 12.1.1 Introduction 311
- 12.1.2 Least Squares Estimation of the Parameters 314
- 12.1.3 Matrix Approach to Multiple Linear Regression 316
- 12.1.4 Properties of the Least Squares Estimators 321

12.2 **Hypothesis Tests in Multiple Linear Regression 322**
- 12.2.1 Test for Significance of Regression 322
- 12.2.2 Tests on Individual Regression Coefficients and Subsets of Coefficients 325

12.3 **Confidence Intervals in Multiple Linear Regression 329**
- 12.3.1 Confidence Intervals on Individual Regression Coefficients 329
- 12.3.2 Confidence Interval on the Mean Response 330

12.4 **Prediction of New Observations 331**

12.5 **Model Adequacy Checking 333**
- 12.5.1 Residual Analysis 333
- 12.5.2 Influential Observations 335

12.6 **Aspects of Multiple Regression Modeling 337**
- 12.6.1 Polynomial Regression Models 337
- 12.6.2 Categorical Regressors and Indicator Variables 339
- 12.6.3 Selection of Variables and Model Building 341
- 12.6.4 Multicollinearity 349

13 Design and Analysis of Single-Factor Experiments: The Analysis of Variance 351

13.1 Designing Engineering Experiments 352
13.2 Completely Randomized Single-Factor Experiment 353
- 13.2.1 Example: Tensile Strength 353
- 13.2.2 Analysis of Variance 354
- 13.2.3 Multiple Comparisons Following the ANOVA 359
- 13.2.4 Residual Analysis and Model Checking 361
- 13.2.5 Determining Sample Size 363

13.3 The Random-Effects Model 365
- 13.3.1 Fixed Versus Random Factors 365
- 13.3.2 ANOVA and Variance Components 365

13.4 Randomized Complete Block Design 368
- 13.4.1 Design and Statistical Analysis 368
- 13.4.2 Multiple Comparisons 372
- 13.4.3 Residual Analysis and Model Checking 373

14 Design of Experiments with Several Factors 375

14.1 Introduction 376
14.2 Factorial Experiments 378
14.3 Two-Factor Factorial Experiments 382
- 14.3.1 Statistical Analysis 382
- 14.3.2 Model Adequacy Checking 386
- 14.3.3 One Observation per Cell 387

14.4 General Factorial Experiments 388
14.5 2^k Factorial Designs 390
- 14.5.1 2^2 Design 390
- 14.5.2 2^k Design for $k \geq 3$ Factors 396

14.6 Single Replicate of the 2^k Design 402
14.7 Addition of Center Points to a 2^k Design 405
14.8 Blocking and Confounding in the 2^k Design 408
14.9 One-Half Fraction of the 2^k Design 413
14.10 Smaller Fractions: The 2^{k-p} Fractional Factorial 418
14.11 Response Surface Methods and Designs 425

15 Statistical Quality Control 434

15.1 Quality Improvement and Statistics 435
- 15.1.1 Statistical Quality Control 436
- 15.1.2 Statistical Process Control 436

15.2 Introduction to Control Charts 436
- 15.2.1 Basic Principles 436
- 15.2.2 Design of a Control Chart 440
- 15.2.3 Rational Subgroups 441
- 15.2.4 Analysis of Patterns on Control Charts 442

15.3 $\bar{X}$ and R or S Control Charts 444
15.4 Control Charts for Individual Measurements 450
15.5 Process Capability 452
15.6 Attribute Control Charts 456
- 15.6.1 P Chart (Control Chart for Proportions) 456
- 15.6.2 U Chart (Control Chart for Defects per Unit) 458

15.7 Control Chart Performance 460
15.8 Time-Weighted Charts 462
- 15.8.1 Exponentially Weighted Moving-Average Control Chart 462
- 15.8.2 Cumulative Sum Control Chart 465

15.9 Other SPC Problem-Solving Tools 471
15.10 Decision Theory 473
- 15.10.1 Decision Models 473
- 15.10.2 Decision Criteria 474

15.11 Implementing SPC 476

APPENDIX A Statistical Tables and Charts A-3

Table I Summary of Common Probability Distributions A-4
Table II Cumulative Binomial Probabilities $P(X \leq x)$ A-5
Table III Cumulative Standard Normal Distribution A-8
Table IV Percentage Points $\chi^2_{\alpha,\nu}$ of the Chi-Squared Distribution A-10
Table V Percentage Points $t_{\alpha,\nu}$ of the t Distribution A-11
Table VI Percentage Points f_{α,ν_1,ν_2} of the F Distribution A-12
Chart VII Operating Characteristic Curves A-17
Table VIII Critical Values for the Sign Test A-26
Table IX Critical Values for the Wilcoxon Signed-Rank Test A-26
Table X Critical Values for the Wilcoxon Rank-Sum Test A-27
Table XI Factors for Constructing Variables Control Charts A-28
Table XII Factors for Tolerance Intervals A-29

APPENDIX B Bibliography A-31
