

Introduction to Remote Sensing

FIFTH EDITION

JAMES B. CAMPBELL
RANDOLPH H. WYNNE

THE GUILFORD PRESS
New York • London

Contents

Preface	xv
List of Tables	xix
List of Figures	xxi
List of Plates	xxxii

PART I. FOUNDATIONS

1. History and Scope of Remote Sensing	3
1.1. Introduction	3
1.2. Definitions	4
1.3. Milestones in the History of Remote Sensing	7
1.4. Overview of the Remote Sensing Process	18
1.5. Key Concepts of Remote Sensing	19
1.6. Career Preparation and Professional Development	21
1.7. Some Teaching and Learning Resources	25
Review Questions	27
References	28
2. Electromagnetic Radiation	31
2.1. Introduction	31
2.2. The Electromagnetic Spectrum	31
2.3. Major Divisions of the Electromagnetic Spectrum	34
2.4. Radiation Laws	36
2.5. Interactions with the Atmosphere	38
2.6. Interactions with Surfaces	48
2.7. Summary: Three Models for Remote Sensing	54
2.8. Some Teaching and Learning Resources	56
Review Questions	56
References	57

PART II. IMAGE ACQUISITION

3. Mapping Cameras	61
3.1. Introduction	61
3.2. Fundamentals of the Aerial Photograph	62

viii Contents

3.3.	Geometry of the Vertical Aerial Photograph	66	
3.4.	Digital Aerial Cameras	72	
3.5.	Digital Scanning of Analog Images	77	
3.6.	Comparative Characteristics of Digital and Analog Imagery	78	
3.7.	Spectral Sensitivity	79	
3.8.	Band Combinations: Optical Imagery	80	
3.9.	Coverage by Multiple Photographs	84	
3.10.	Photogrammetry	90	
3.11.	Sources of Aerial Photography	91	
3.12.	Summary	94	
3.13.	Some Teaching and Learning Resources	94	
	Review Questions	95	
	References	95	
	Your Own Infrared Photographs	97	
	Your Own 3D Photographs	98	
	Your Own Kite Photography	99	
4.	Digital Imagery		101
4.1.	Introduction	101	
4.2.	Electronic Imagery	101	
4.3.	Spectral Sensitivity	106	
4.4.	Digital Data	109	
4.5.	Data Formats	111	
4.6.	Band Combinations: Multispectral Imagery	115	
4.7.	Image Enhancement	117	
4.8.	Image Display	121	
4.9.	Image Processing Software	125	
4.10.	Summary	128	
4.11.	Some Teaching and Learning Resources	128	
	Review Questions	128	
	References	129	
5.	Image Interpretation		130
5.1.	Introduction	130	
5.2.	The Context for Image Interpretation	131	
5.3.	Image Interpretation Tasks	132	
5.4.	Elements of Image Interpretation	133	
5.5.	Collateral Information	138	
5.6.	Imagery Interpretability Rating Scales	138	
5.7.	Image Interpretation Keys	139	
5.8.	Interpretive Overlays	139	
5.9.	The Significance of Context	140	
5.10.	Stereovision	143	
5.11.	Data Transfer	147	
5.12.	Digital Photointerpretation	147	
5.13.	Image Scale Calculations	148	
5.14.	Summary	151	
5.15.	Some Teaching and Learning Resources	152	
	Review Questions	152	
	References	153	

6. Land Observation Satellites	158
6.1. Satellite Remote Sensing	158
6.2. Landsat Origins	159
6.3. Satellite Orbits	160
6.4. The Landsat System	162
6.5. Multispectral Scanner Subsystem	167
6.6. Landsat Thematic Mapper	172
6.7. Administration of the Landsat Program	176
6.8. Current Satellite Systems	178
6.9. Data Archives and Image Research	192
6.10. Summary	194
6.11. Some Teaching and Learning Resources	195
Review Questions	195
References	196
CORONA	198
7. Active Microwave	204
7.1. Introduction	204
7.2. Active Microwave	204
7.3. Geometry of the Radar Image	208
7.4. Wavelength	212
7.5. Penetration of the Radar Signal	212
7.6. Polarization	214
7.7. Look Direction and Look Angle	215
7.8. Real Aperture Systems	217
7.9. Synthetic Aperture Systems	219
7.10. Interpreting Brightness Values	221
7.11. Satellite Imaging Radars	226
7.12. Radar Interferometry	236
7.13. Summary	239
7.14. Some Teaching and Learning Resources	239
Review Questions	240
References	241
8. Lidar	243
8.1. Introduction	243
8.2. Profiling Lasers	244
8.3. Imaging Lidars	245
8.4. Lidar Imagery	247
8.5. Types of Imaging Lidars	247
8.6. Processing Lidar Image Data	249
8.7. Summary	253
8.8. Some Teaching and Learning Resources	254
Review Questions	254
References	255
9. Thermal Imagery	257
9.1. Introduction	257
9.2. Thermal Detectors	258

x Contents

9.3.	Thermal Radiometry	260	
9.4.	Microwave Radiometers	263	
9.5.	Thermal Scanners	263	
9.6.	Thermal Properties of Objects	265	
9.7.	Geometry of Thermal Images	268	
9.8.	The Thermal Image and Its Interpretation	269	
9.9.	Heat Capacity Mapping Mission	277	
9.10.	Landsat Multispectral Scanner and Thematic Mapper Thermal Data	279	
9.11.	Summary	280	
9.12.	Some Teaching and Learning Resources	281	
	Review Questions	282	
	References	283	
10.	Image Resolution		285
10.1.	Introduction and Definitions	285	
10.2.	Target Variables	286	
10.3.	System Variables	287	
10.4.	Operating Conditions	287	
10.5.	Measurement of Resolution	288	
10.6.	Mixed Pixels	290	
10.7.	Spatial and Radiometric Resolution: Simple Examples	294	
10.8.	Interactions with the Landscape	296	
10.9.	Summary	298	
	Review Questions	298	
	References	299	
PART III. ANALYSIS			
11.	Preprocessing		305
11.1.	Introduction	305	
11.2.	Radiometric Preprocessing	305	
11.3.	Some More Advanced Atmospheric Correction Tools	308	
11.4.	Calculating Radiances from DN _s	311	
11.5.	Estimation of Top of Atmosphere Reflectance	312	
11.6.	Destriping and Related Issues	313	
11.7.	Identification of Image Features	316	
11.8.	Subsets	320	
11.9.	Geometric Correction by Resampling	321	
11.10.	Data Fusion	326	
11.11.	Image Data Processing Standards	329	
11.12.	Summary	330	
	Review Questions	330	
	References	331	
12.	Image Classification		335
12.1.	Introduction	335	
12.2.	Informational Classes and Spectral Classes	337	

12.3.	Unsupervised Classification	339	
12.4.	Supervised Classification	349	
12.5.	Ancillary Data	364	
12.6.	Fuzzy Clustering	367	
12.7.	Artificial Neural Networks	368	
12.8.	Contextual Classification	370	
12.9.	Object-Oriented Classification	371	
12.10.	Iterative Guided Spectral Class Rejection	373	
12.11.	Summary	373	
12.12.	Some Teaching and Learning Resources	373	
	Review Questions	374	
	References	375	
13.	Field Data		382
13.1.	Introduction	382	
13.2.	Kinds of Field Data	382	
13.3.	Nominal Data	383	
13.4.	Documentation of Nominal Data	384	
13.5.	Biophysical Data	384	
13.6.	Field Radiometry	387	
13.7.	Unmanned Airborne Vehicles	389	
13.8.	Locational Information	392	
13.9.	Using Locational Information	397	
13.10.	Ground Photography	397	
13.11.	Geographic Sampling	397	
13.12.	Summary	403	
13.13.	Some Teaching and Learning Resources	403	
	Review Questions	403	
	References	404	
14.	Accuracy Assessment		408
14.1.	Definition and Significance	408	
14.2.	Sources of Classification Error	410	
14.3.	Error Characteristics	411	
14.4.	Measurement of Map Accuracy	412	
14.5.	Interpretation of the Error Matrix	418	
14.6.	Summary	424	
	Review Questions	425	
	References	426	
15.	Hyperspectral Remote Sensing		429
15.1.	Introduction	429	
15.2.	Spectroscopy	429	
15.3.	Hyperspectral Remote Sensing	430	
15.4.	The Airborne Visible/Infrared Imaging Spectrometer	430	
15.5.	The Image Cube	431	
15.6.	Spectral Libraries	432	
15.7.	Spectral Matching	433	
15.8.	Spectral Mixing Analysis	434	

xii Contents

15.9. Spectral Angle Mapping 437
15.10. Analyses 437
15.11. Wavelet Analysis for Hyperspectral Imagery 438
15.12. Summary 439
Review Questions 440
References 441

16. Change Detection 445

16.1. Introduction 445
16.2. Bitemporal Spectral Change Detection Techniques 446
16.3. Multitemporal Spectral Change Detection 452
16.4. Summary 460
Review Questions 460
References 461

PART IV. APPLICATIONS

17. Plant Sciences 465

17.1. Introduction 465
17.2. Structure of the Leaf 470
17.3. Spectral Behavior of the Living Leaf 472
17.4. Forestry 476
17.5. Agriculture 479
17.6. Vegetation Indices 483
17.7. Applications of Vegetation Indices 484
17.8. Phenology 485
17.9. Advanced Very-High-Resolution Radiometer 487
17.10. Conservation Tillage 489
17.11. Land Surface Phenology 491
17.12. Separating Soil Reflectance from Vegetation Reflectance 493
17.13. Tasseled Cap Transformation 495
17.14. Foliar Chemistry 498
17.15. Lidar Data for Forest Inventory and Structure 500
17.16. Precision Agriculture 501
17.17. Remote Sensing for Plant Pathology 502
17.18. Summary 506
17.19. Some Teaching and Learning Resources 506
Review Questions 507
References 508

18. Earth Sciences 517

18.1. Introduction 517
18.2. Photogeology 518
18.3. Drainage Patterns 521
18.4. Lineaments 523
18.5. Geobotany 527
18.6. Direct Multispectral Observation of Rocks and Minerals 531
18.7. Photoclinometry 533

18.8.	Band Ratios	534	
18.9.	Soil and Landscape Mapping	537	
18.10.	Integrated Terrain Units	540	
18.11.	Wetlands Inventory	542	
18.12.	Radar Imagery for Exploration	542	
18.13.	Summary	543	
18.14.	Some Teaching and Learning Resources	543	
	Review Questions	543	
	References	544	
19.	Hydrospheric Sciences		549
19.1.	Introduction	549	
19.2.	Spectral Characteristics of Water Bodies	550	
19.3.	Spectral Changes as Water Depth Increases	553	
19.4.	Location and Extent of Water Bodies	555	
19.5.	Roughness of the Water Surface	557	
19.6.	Bathymetry	558	
19.7.	Landsat Chromaticity Diagram	564	
19.8.	Drainage Basin Hydrology	567	
19.9.	Evapotranspiration	570	
19.10.	Manual Interpretation	571	
19.11.	Sea Surface Temperature	575	
19.12.	Lidar Applications for Hydrospheric Studies	576	
19.13.	Summary	577	
19.14.	Some Teaching and Learning Resources	578	
	Review Questions	579	
	References	580	
20.	Land Use and Land Cover		585
20.1.	Introduction	585	
20.2.	Aerial Imagery for Land Use Information	586	
20.3.	Land Use Classification	587	
20.4.	Visual Interpretation of Land Use and Land Cover	588	
20.5.	Land Use Change by Visual Interpretation	596	
20.6.	Historical Land Cover Interpretation for Environmental Analysis	597	
20.7.	Other Land Use Classification Systems	599	
20.8.	Land Cover Mapping by Image Classification	601	
20.9.	Broad-Scale Land Cover Studies	603	
20.10.	Sources of Compiled Land Use Data	604	
20.11.	Summary	606	
20.12.	Some Teaching and Learning Resources	608	
	Review Questions	608	
	References	609	
21.	Global Remote Sensing		614
21.1.	Introduction	614	
21.2.	Biogeochemical Cycles	614	
21.3.	Advanced Very-High-Resolution Radiometer	621	

xiv Contents

21.4.	Earth Observing System	622	
21.5.	Earth Observing System Instruments	623	
21.6.	Earth Observing System Bus	627	
21.7.	Earth Observing System Data and Information System	629	
21.8.	Long-Term Environmental Research Sites	630	
21.9.	Earth Explorer	631	
21.10.	Global Monitoring for Environment and Security	632	
21.11.	Gridded Global Population Data	633	
21.12.	Summary	634	
21.13.	Some Teaching and Learning Resources	634	
	Review Questions	635	
	References	635
