INTRODUCTION	1
Who is this book for?	1
How is this book different?	1
The rationale and history behind the contributions from researchers and from an information specialist	2
Features of the book	4
Layout of the book	5
PART I Getting Information	7
1 PRELIMINARIES	9
What is a literature review?	9
Terminology used in this book	10
Different styles of review	13
Two styles or approaches	14
A critical approach	16
Knowledge and literature	16
Why and when will you need to review the literature?	17
The research question and the literature review	18
What is appropriate literature?	20
Choosing which style of review: a traditional narrative review or a systematic review?	23
Project management	24
Summary	25
2 SEARCHING FOR INFORMATION	26
Introduction	26
Developing online searches by identifying key words and creating a search record	27
The range of information sources available for complex searches	31

What do you need from a resource to make it appropriate for locating journal articles for your review?	43
Summary	45
3 READING SKILLS	46
Introduction	46
Be analytical in your reading	48
Where to start	48
Reading techniques – scan, skim and understand	49
Reading different types of material	52
Grey literature: non-academic sources and policy reports	54
Recording and note-making	56
Summary	57
4 FROM MAKING NOTES TO WRITING	58
Introduction	58
Note-making	59
From notes to writing	62
Writing: critical writing and types of argument	66
Making a value judgement and bias	66
Summary	69
PART II Using Information	71
5 THE TRADITIONAL REVIEW	73
Overview of the debate	73
Types of review: critical, conceptual state of the art, expert and scoping	76
Drawing up an analytical framework – how to sort the material	82
Moving to analysis and synthesis	85
The presentation of your review	87
Summarising the gap – dare to have an opinion	88
Summary	88
6 WRITING UP YOUR REVIEW	89
Overview	89
A short summary	90
A self-standing review	92
Abstract, executive summary and annotated bibliography	93

Writing the review	97
Key words or phrases to help you move from stage 1 to stage 2	99
The 'so what?' question, originality and making a value judgement	101
Summary	102
7 THE SYSTEMATIC REVIEW	103
Overview	103
Definitions	104
Development of the review protocol	109
Formulating the review question	110
Documenting your progress	111
Locating studies and sources of information	113
Selecting studies: inclusion and exclusion criteria	115
Appraisal – assessing the quality of research	116
Data extraction	122
Synthesis, drawing conclusions, what the review shows	123
Evolving formats of systematic review	124
Summary	127
8 META-ANALYSIS	128
Overview	128
What is meta-analysis?	129
Can I use meta-analysis to summarise the results of my systematic review?	131
Undertaking your meta-analysis	138
Displaying the results of a meta-analysis	139
Is your meta-analysis free from bias?	140
Performing a sensitivity analysis	143
Summary	144
9 REFERENCING AND PLAGIARISM	145
Introduction	145
Why is referencing important?	146
What do you need to reference?	146
How many references should I provide?	146
When and how to reference	147
Referencing systems	147
Where to find citation information you need	150

Plagiarism	151
Copyright	154
Conclusion	155
Summary	155
Appendix 1: Further Reading	156
Appendix 2: Critical Review Checklist	157
Appendix 3: Systematic Review – Online Resources	159
Appendix 4: Resources for Meta-analysis	160
Glossary	161
References	166
Index	172
