Index I-1

Contents

Preface	xv
---------------	----

CHAPTER 1

Introduction to Strategic Reasoning 1

1.1 Who Wants to Be a Game Theorist? ...	1
1.2 A Sampling of Strategic Situations	3
1.3 Whetting Your Appetite: The Game of Concentration	5
1.4 Psychological Profile of a Player	8
1.4.1 Preferences	8
1.4.2 Beliefs	11
1.4.3 How Do Players Differ?	12
1.5 Playing the Gender Pronoun Game ...	13
References	14

CHAPTER 2

Building a Model of a Strategic Situation 17

2.1 Introduction	17
2.2 Extensive Form Games: Perfect Information	18
<i>Baseball, I</i>	21
<i>Galileo Galilei and the Inquisition, I</i>	22
<i>Haggling at an Auto Dealership, I</i>	24
2.3 Extensive Form Games: Imperfect Information	27
<i>Mugging</i>	29
<i>U.S. Court of Appeals for the Federal Circuit</i>	30
<i>The Iraq War and Weapons of Mass Destruction</i> ...	32
2.4 What Is a Strategy?	34
2.5 Strategic Form Games	36
<i>Tosca</i>	37

<i>Competition for Elected Office</i>	38
<i>The Science 84 Game</i>	39

2.6 Moving from the Extensive Form and Strategic Form

<i>Baseball, II</i>	39
<i>Galileo Galilei and the Inquisition, II</i>	40
<i>Haggling at an Auto Dealership, II</i>	41

2.7 Going from the Strategic Form to the Extensive Form

2.8 Common Knowledge	43
2.9 A Few More Issues in Modeling Games	45
Summary	48
Exercises	49
References	54

CHAPTER 3

Eliminating the Impossible: Solving a Game when Rationality Is Common Knowledge 55

3.1 Introduction	55
3.2 Solving a Game when Players Are Rational	56
3.2.1 Strict Dominance	56
<i>White Flight and Racial Segregation in Housing</i>	59
<i>Banning Cigarette Advertising on Television</i>	60
3.2.2 Weak Dominance	64
<i>Bidding at an Auction</i>	64
<i>The Proxy Bid Paradox at eBay</i>	66
3.3 Solving a Game when Players Are Rational and Players Know that Players Are Rational	68
<i>Team-Project Game</i>	68

<i>Existence-of-God Game</i>	70
<i>Boxed-Pigs Game</i>	71
3.4 Solving a Game when Rationality Is Common Knowledge	73
3.4.1 The Doping Game: Is It Rational for Athletes to Use Steroids?	73
3.4.2 Iterative Deletion of Strictly Dominated Strategies	76
Summary	78
Exercises	79
3.5 Appendix: Strict and Weak Dominance	84
3.6 Appendix: Rationalizability (Advanced)	84
References	87

CHAPTER 4

Stable Play: Nash Equilibria in Discrete Games with Two or Three Players 89

4.1 Defining Nash Equilibrium	89
4.2 Classic Two-Player Games	92
<i>Prisoners' Dilemma</i>	93
<i>A Coordination Game—Driving Conventions</i>	95
<i>A Game of Coordination and Conflict—Telephone</i> ..	95
<i>An Outguessing Game—Rock—Paper—Scissors</i>	97
<i>Conflict and Mutual Interest in Games</i>	99
4.3 The Best-Reply Method	99
4.4 Three-Player Games	101
<i>American Idol Fandom</i>	101
<i>Voting, Sincere or Devious?</i>	102
<i>Promotion and Sabotage</i>	106
4.5 Foundations of Nash Equilibrium ...	109
4.5.1 Relationship to Rationality Is Common Knowledge	109
4.5.2 The Definition of a Strategy, Revisited .	110
Summary	111
Exercises	112
4.6 Appendix: Formal Definition of Nash Equilibrium	116
References	116

CHAPTER 5

Stable Play: Nash Equilibria in Discrete n -Player Games 117

5.1 Introduction	117
5.2 Symmetric Games	118
<i>The Sneetches</i>	119
<i>Airline Security</i>	122
<i>Operating Systems: Mac or Windows?</i>	125
<i>Applying for an Internship</i>	128
5.3 Asymmetric Games	130
<i>Entry into a Market</i>	130
<i>Civil Unrest</i>	134
5.4 Selecting among Nash Equilibria ...	137
Summary	141
Exercises	141
References	145

CHAPTER 6

Stable Play: Nash Equilibria in Continuous Games 147

6.1 Introduction	147
6.2 Solving for Nash Equilibria without Calculus	148
<i>Price Competition with Identical Products</i>	149
<i>Neutralizing Price Competition with Price-Matching Guarantees</i>	152
<i>Competing for Elected Office</i>	154
6.3 Solving for Nash Equilibria with Calculus (Optional)	157
<i>Price Competition with Differentiated Products</i>	160
<i>Tragedy of the Commons—The Extinction of the Woolly Mammoth</i>	164
<i>Charitable Giving and the Power of Matching Grants</i>	169
Summary	174
Exercises	175
References	179

CHAPTER 7

Keep 'Em Guessing: Randomized Strategies 181

7.1 Police Patrols and the Drug Trade	181
7.2 Making Decisions under Uncertainty	182
7.2.1 Probability and Expectation	182
7.2.2 Preferences over Uncertain Options ...	185
7.2.3 Ordinal vs. Cardinal Payoffs	186
7.3 Mixed Strategies and Nash Equilibrium	187
7.3.1 Back on the Beat	187
7.3.2 Some General Properties of a Nash Equilibrium in Mixed Strategies	191
7.4 Examples	192
<i>Avranches Gap in World War II</i>	193
<i>Entry into a Market</i>	197
7.5 Advanced Examples	198
<i>Penalty Kick in Soccer</i>	198
<i>Slash 'em Up: Friday the 13th</i>	201
<i>Bystander Effect</i>	204
7.6 Games of Pure Conflict and Cautious Behavior	207
Summary	211
Exercises	212
7.7 Appendix: Formal Definition of Nash Equilibrium in Mixed Strategies	215
References	216

CHAPTER 8

Taking Turns: Sequential Games with Perfect Information 219

8.1 Introduction	219
8.2 Backward Induction and Subgame Perfect Nash Equilibrium	221

8.3 Examples	225
<i>Cuban Missile Crisis</i>	225
<i>Enron and Prosecutorial Prerogative</i>	227
<i>Racial Discrimination and Sports</i>	229
8.4 Waiting Games: Preemption and Attrition	235
8.4.1 Preemption	236
8.4.2 War of Attrition	238
8.5 Do People Reason Using Backward Induction?	239
8.5.1 Experimental Evidence and Backward Induction	239
8.5.2 A Logical Paradox with Backward Induction	242
Summary	243
Exercises	244
References	254

CHAPTER 9

Taking Turns in the Dark: Sequential Games with Imperfect Information 255

9.1 Introduction	255
9.2 Subgame Perfect Nash Equilibrium	257
<i>British Intelligence</i>	260
9.3 Examples	263
<i>OS/2</i>	264
<i>Agenda Control in the Senate</i>	268
9.4 Commitment	270
9.4.1 Deterrence of Entry	270
9.4.2 Managerial Contracts and Competition: East India Trade in the Seventeenth Century	277
Summary	280
Exercises	281
References	289

CHAPTER 10

I Know Something You Don't Know: Games with Private Information 291

10.1 Introduction	291
10.2 A Game of Incomplete Information: The Munich Agreement	291
10.3 Bayesian Games and Bayes–Nash Equilibrium	296
<i>Gunfight in the Wild West</i>	298
10.4 When All Players Have Private Information: Auctions	301
<i>Independent Private Values and Shading Your Bid</i>	302
<i>Common Value and the Winner's Curse</i>	304
10.5 Voting on Committees and Juries	307
10.5.1 Strategic Abstention	307
10.5.2 Sequential Voting in the Jury Room ...	309
Summary	312
Exercises	313
10.6 Appendix: Formal Definition of Bayes–Nash Equilibrium	318
10.7 Appendix: First-Price, Sealed-Bid Auction with a Continuum of Types	319
10.7.1 Independent Private Values	319
10.7.2 Common Value	321
References	323

CHAPTER 11

What You Do Tells Me Who You Are: Signaling Games 325

11.1 Introduction	325
11.2 Perfect Bayes–Nash Equilibrium ...	326
<i>Management Trainee</i>	329
11.3 Examples	333
<i>Lemons and the Market for Used Cars</i>	333

<i>Courtship</i>	337
<i>Brinkmanship</i>	343
Summary	346
Exercises	348
11.4 Appendix: Bayes's Rule and Updating Beliefs	354
References	357

CHAPTER 12

Lies and the Lying Liars That Tell Them: Cheap Talk Games 359

12.1 Introduction	359
12.2 Communication in a Game-Theoretic World	360
12.3 Signaling Information	363
<i>Defensive Medicine</i>	363
<i>Stock Recommendations</i>	367
12.4 Signaling Intentions	374
12.4.1 Preplay Communication in Theory	374
12.4.2 Preplay Communication in Practice	379
Summary	381
Exercises	382
References	388

CHAPTER 13

Playing Forever: Repeated Interaction with Infinitely Lived Players 391

13.1 Trench Warfare in World War I	391
13.2 Constructing a Repeated Game ...	393
13.3 Trench Warfare: Finite Horizon	398
13.4 Trench Warfare: Infinite Horizon	401
13.5 Some Experimental Evidence for the Repeated Prisoners' Dilemma ...	406
Summary	410
Exercises	411

13.6 Appendix: Present Value of a Payoff Stream	416
13.7 Appendix: Dynamic Programming	420
References	422

CHAPTER 14

Cooperation and Reputation: Applications of Repeated Interaction with Infinitely Lived Players 423

14.1 Introduction	423
14.2 A Menu of Punishments	424
14.2.1 Price-Fixing	424
14.2.2 Temporary Reversion to Moderate Rates	427
14.2.3 Price Wars: Temporary Reversion to Low Rates	428
14.2.4 A More Equitable Punishment	430
14.3 Quid-Pro-Quo	431
<i>U.S. Congress and Pork-Barrel Spending</i>	431
<i>Vampire Bats and Reciprocal Altruism</i>	434
14.4 Reputation	437
<i>Lending to Kings</i>	437
<i>Henry Ford and the \$5 Workday</i>	439
14.5 Imperfect Monitoring and Antiballistic Missiles	441
Summary	444
Exercises	445
References	450

CHAPTER 15

Interaction in Infinitely Lived Institutions 451

15.1 Introduction	451
15.2 Cooperation with Overlapping Generations	452

<i>Tribal Defense</i>	453
<i>Taking Care of Your Elderly Parents</i>	456
<i>Political Parties and Lame-Duck Presidents</i>	458

15.3 Cooperation in a Large Population	463
<i>eBay</i>	464
<i>Medieval Law Merchant</i>	469
Summary	473
Exercises	474
References	478

CHAPTER 16

Evolutionary Game Theory and Biology: Evolutionarily Stable Strategies 479

16.1 Introducing Evolutionary Game Theory	479
16.2 Hawk–Dove Conflict	481
16.3 Evolutionarily Stable Strategy	484
<i>“Stayin’ Alive” on a Cowpat</i>	488
16.4 Properties of an ESS	491
<i>Side-Blotched Lizards</i>	493
16.5 Multipopulation Games	496
<i>Parental Care</i>	497
16.6 Evolution of Spite	499
Summary	501
Exercises	502
References	505

CHAPTER 17

Evolutionary Game Theory and Biology: Replicator Dynamics 507

17.1 Introduction	507
17.2 Replicator Dynamics and the Hawk–Dove Game	508
17.3 General Definition of the Replicator Dynamic	512

17.4 ESS and Attractors of the Replicator Dynamic	513
17.5 Examples	515
<i>Stag Hunt</i>	515
<i>Handedness in Baseball</i>	517
<i>Evolution of Cooperation</i>	521
Summary	529

Exercises	530
References	532
