

C# PROGRAMMING:

FROM PROBLEM ANALYSIS TO PROGRAM DESIGN

FOURTH EDITION

BARBARA DOYLE

Australia • Brazil • Japan • Korea • Mexico • Singapore • Spain • United Kingdom • United States

BRIEF CONTENTS

Neale Cousland / Shutterstock.com

PREFACE	xxi
1. Introduction to Computing and Programming	1
2. Data Types and Expressions	65
3. Methods and Behaviors	131
4. Creating Your Own Classes	191
5. Making Decisions	247
6. Repeating Instructions	313
7. Arrays	383
8. Advanced Collections	439
9. Introduction to Windows Programming	493
10. Programming Based on Events	577
11. Advanced Object-Oriented Programming Features	691
12. Debugging and Handling Exceptions	775
13. Working with Files	837
14. Working with Databases	893
15. Web-Based Applications	979

APPENDIX A	Visual Studio Configuration	1083
APPENDIX B	Code Editor Tools	1099
APPENDIX C	Character Sets	1111
APPENDIX D	Operator Precedence	1113
APPENDIX E	C# Keywords	1115
GLOSSARY		1117
INDEX		1131

TABLE OF CONTENTS

Neale Cousland / Shutterstock.com

	Preface	xxi
1	INTRODUCTION TO COMPUTING AND PROGRAMMING	1
	History of Computers	2
	System and Application Software	4
	System Software	4
	Application Software	6
	Software Development Process	6
	Steps in the Program Development Process	7
	Programming Methodologies	13
	Structured Procedural Programming	14
	Object-Oriented Programming	16
	Evolution of C# and .NET	19
	Programming Languages	19
	.NET	21
	Why C#?	23
	Types of Applications Developed with C#	24
	Web Applications	24
	Windows Applications	25
	Console Applications	26
	Exploring the First C# Program	27
	Elements of a C# Program	28
	Comments	28
	Using Directive	30
	Namespace	32
	Class Definition	32

Main() Method	33
Method Body Statements	34
Compiling, Building, and Running an Application	38
Typing Your Program Statements	38
Compilation and Execution Process	39
Compiling the Source Code Using Visual Studio IDE	39
Debugging an Application	45
Syntax Errors	45
Run-time Errors	47
Creating an Application	47
Coding Standards	52
Pseudocode	52
Resources	53
Quick Review	53
Exercises	56
Programming Exercises	61

2

DATA TYPES AND EXPRESSIONS 65

Data Representation	66
Bits	66
Bytes	66
Binary Numbering System	66
Character Sets	69
Kilobyte, Megabyte, Gigabyte, Terabyte, Petabyte. . .	70
Memory Locations for Data	70
Identifiers	71
Variables	75
Literal Values	75
Types, Classes, and Objects	76
Types	76
Classes	77
Objects	78
Predefined Data Types	79
Value Types	80

Integral Data Types	82
Floating-Point Types	85
Decimal Types	86
Boolean Variables	87
Declaring Strings	88
Making Data Constant	88
Assignment Statements	89
Basic Arithmetic Operations	92
Increment and Decrement Operations	95
Compound Operations	98
Order of Operations	100
Mixed Expressions	102
Casts	103
Formatting Output	104
Width Specifier	109
Coding Standards	119
Naming Conventions	119
Spacing Conventions	119
Declaration Conventions	120
Resources	120
Quick Review	120
Exercises	121
Programming Exercises	127

3

METHODS AND BEHAVIORS 131

Anatomy of a Method	132
Modifiers	134
Return Type	137
Method Name	138
Parameters	138
Method Body	139
Calling Class Methods	141
Predefined Methods	143
Writing Your Own Class Methods	157
Void Methods	157
Value-Returning Method	159

Types of Parameters	164
Named and Optional Parameters	169
Default Values with Optional Parameters	170
Named Parameters	171
Coding Standards	180
Naming Conventions	180
Spacing Conventions	180
Declaration Conventions	180
Commenting Conventions	181
Resources	181
Quick Review	181
Exercises	182
Programming Exercises	189

4	CREATING YOUR OWN CLASSES	191
	The Object Concept	192
	Private Member Data	193
	Constructor	197
	Writing Your Own Instance Methods	200
	Accessor	200
	Mutators	201
	Other Instance Methods	202
	Property	202
	ToString() Method	204
	Calling Instance Methods	206
	Calling the Constructor	206
	Calling Accessor and Mutator Methods	208
	Calling Other Instance Methods	209
	Testing Your New Class	210
	Coding Standards	235
	Naming Conventions	235
	Classes	235
	Properties	235
	Methods	236

	Constructor Guidelines	236
	Spacing Conventions	236
	Resources	236
	Quick Review	237
	Exercises	238
	Programming Exercises	244
5	MAKING DECISIONS	247
	Boolean Expressions	248
	Boolean Results	248
	Conditional Expressions	249
	Equality, Relational, and Logical Tests	250
	Short-Circuit Evaluation	258
	Boolean Data Type	260
	if . . . else Selection Statements	261
	One-Way if Statement	261
	Two-Way if Statement	266
	Nested if . . . else Statement	273
	Switch Selection Statements	279
	Ternary Operator ? :	283
	Order of Operations	285
	Coding Standards	298
	Guidelines for Placement of Curly Braces	299
	Guidelines for Placement of else with Nested if Statements	299
	Guidelines for Use of White Space with a Switch Statement	299
	Spacing Conventions	300
	Advanced Selection Statement Suggestions	300
	Resources	300
	Quick Review	301
	Exercises	302
	Programming Exercises	310

6	REPEATING INSTRUCTIONS	313
	Why Use a Loop?	314
	Using the While Statement	314
	Counter-Controlled Loop	316
	Sentinel-Controlled Loop	321
	State-Controlled Loops	332
	Using the for Statement Loop	335
	Using the Foreach Statement	342
	Using the Do...while Structure	343
	Nested Loops	346
	Recursive Calls	351
	Unconditional Transfer of Control	354
	Continue Statement	355
	Deciding Which Loop to Use	356
	Coding Standards	370
	Guidelines for Placement of Curly Braces	371
	Spacing Conventions	371
	Advanced Loop Statement Suggestions	371
	Resources	372
	Quick Review	372
	Exercises	373
	Programming Exercises	379
7	ARRAYS	383
	Array Basics	384
	Array Declaration	385
	Array Initializers	388
	Array Access	390
	Sentinel-Controlled Access	394
	Using Foreach with Arrays	395
	Array Class	396
	Arrays as Method Parameters	401
	Pass by Reference	401
	Array Assignment	405
	Params Parameters	406

Arrays in Classes	408
Array of User-Defined Objects	410
Arrays as Return Types	410
Coding Standards	428
Guidelines for Naming Arrays	428
Advanced Array Suggestions	428
Resources	429
Quick Review	429
Exercises	430
Programming Exercises	437

8**ADVANCED COLLECTIONS 439**

Two-Dimensional Arrays	440
Rectangular Array	440
Jagged Array	450
Multidimensional Arrays	450
ArrayList Class	455
String Class	459
Other Collection Classes	465
BitArray	466
Hashtable	467
Queue	469
Stack	470
Coding Standards	479
Guidelines for Naming Collections	479
Advanced Array Suggestions	479
Resources	479
Quick Review	480
Exercises	481
Programming Exercises	488

9**INTRODUCTION TO WINDOWS PROGRAMMING 493**

Contrasting Windows and Console Applications	494
Graphical User Interfaces	496

Elements of Good Design	500
Consistency	500
Alignment	500
Avoid Clutter	501
Color	501
Target Audience	501
Using C# and Visual Studio to Create Windows-Based Applications	502
Windows Forms	505
Windows Forms Properties	505
Inspecting the Code Generated by Visual Studio	511
Windows Forms Events	515
Controls	517
Placing, Moving, Resizing, and Deleting Control Objects	520
Methods and Properties of the Control Class	521
Derived Classes of the System.Windows.Forms.Control Class	524
Coding Standards	567
Guidelines for Naming Controls	567
Resources	567
Quick Review	568
Exercises	569
Programming Exercises	574

10	PROGRAMMING BASED ON EVENTS	577
	Delegates	578
	Defining Delegates	578
	Creating Delegate Instances	579
	Using Delegates	580
	Relationship of Delegates to Events	583
	Event Handling in C#	583
	Event-Handler Methods	584
	ListBox Control Objects	585
	Creating a Form to Hold ListBox Controls	585
	ListBox Event Handlers	588
	Multiple Selections with a ListBox Object	589

ComboBox Control Objects	601
Adding ComboBox Objects	602
Handling ComboBox Events	602
Registering a KeyPress Event	603
Programming Event Handlers	603
MenuStrip Control Objects	605
Adding Menus	606
Adding Predefined Standard Windows Dialog Boxes	610
CheckBox and RadioButton Objects	618
CheckBox Objects	618
Adding CheckBox Objects	619
Registering CheckBox Object Events	619
Wiring One Event Handler to Multiple Objects	621
GroupBox Objects	622
RadioButton Objects	622
Adding RadioButton Objects	622
Registering RadioButton Object Events	624
Windows Presentation Foundation (WPF)	633
TabControl Objects	639
Coding Standards	680
Resources	680
Quick Review	680
Exercises	682
Programming Exercises	688

11

ADVANCED OBJECT-ORIENTED PROGRAMMING FEATURES

691

Object-Oriented Language Features	692
Component-Based Development	693
Inheritance	694
Inheriting from the Object Class	695
Inheriting from Other .NET FCL Classes	695
Creating Base Classes for Inheritance	696
Overriding Methods	699
Creating Derived Classes	700

Making Stand-Alone Components	705
Creating a Client Application to Use the DLL	715
Using ILDASM to View the Assembly (Optional)	719
Abstract Classes	721
Abstract Methods	721
Sealed Classes	724
Sealed Methods	725
Partial Classes	725
Creating Partial Classes	726
Interfaces	726
Defining an Interface	727
Implementing the Interface	728
.NET Framework Interfaces	733
Polymorphism	734
Polymorphic Programming in .NET	736
Generics	737
Generic Classes	737
Generic Methods	741
Dynamic	742
Dynamic data type	743
var data type	744
Coding Standards	764
Resources	765
Quick Review	765
Exercises	767
Programming Exercises	772

12

DEBUGGING AND HANDLING EXCEPTIONS 775

Errors	776
Run-Time Errors	777
Debugging in C#	778
Exceptions	786
Raising an Exception	790
Bugs, Errors, and Exceptions	791

Exception-Handling Techniques	793
Try. . .Catch. . .Finally Blocks	794
Exception Object	798
Exception Classes	799
Derived Classes of the Base Exception Class	799
ApplicationException Class	800
SystemException Class	801
Filtering Multiple Exceptions	802
Throwing an Exception	809
Input Output (IO) Exceptions	810
Coding Standards	828
Resources	829
Quick Review	829
Exercises	830
Programming Exercises	835

13

WORKING WITH FILES	837
System.IO Namespace	838
File and Directory Classes	840
File Class	840
Directory Class	844
FileInfo and DirectoryInfo Classes	845
File Streams	848
Writing Text Files	851
Reading Text Files	856
Adding a Using Statement	860
Random Access	863
BinaryReader and BinaryWriter Classes	863
Other Stream Classes	869
FileDialog Class	870
Coding Standards	884
Resources	884
Quick Review	884
Exercises	885
Programming Exercises	890

14	WORKING WITH DATABASES	893
	Database Access	894
	Database Management Systems	894
	ADO.NET	895
	Data Providers	896
	Connecting to the Database	899
	Retrieving Data from the Database	901
	Processing the Data	905
	Updating Database Data	913
	Using Datasets to Process Database Records	913
	Data Source Configuration Tools	921
	Add New Data Source	921
	Dataset Object	931
	TableAdapterManager	941
	DataSet Designer	942
	Connecting Multiple Tables	953
	Displaying Data Using Details View	959
	Language-Integrated Query (LINQ)	962
	Query Expressions	963
	Implicitly Typed Local Variables	966
	LINQ with Databases	966
	LINQ to SQL	968
	Coding Standards	969
	Resources	969
	Quick Review	969
	Exercises	971
	Programming Exercises	976
15	WEB-BASED APPLICATIONS	979
	Web-Based Applications	980
	Web Programming Model	980
	Static Pages	981
	Dynamic Pages	984

ASP.NET	986
Visual Studio for Web Development	986
ASP.NET Programming Models	987
Web Forms Page	988
Creating an ASP.NET Web Forms Site	988
Master Pages	993
Cascading Style Sheet (CSS)	997
ASP.NET Empty Web Site	1001
Controls	1004
HTML Controls	1004
HTML Server Controls	1008
Web Forms Standard Server Controls	1012
Available Web Forms Controls	1012
Web Forms Controls of the Common Form Type	1014
Adding Common Form-Type Controls	1018
Validation, Custom, and Composite Controls	1021
Validation Controls	1021
Calendar Control	1026
GridView Control	1033
AccessDataSource	1039
Using Visual Tools to Connect	1040
Setting the Visibility Property	1045
Other Controls	1047
Web Services	1050
Web Services Protocols	1050
Windows Communication Foundation (WCF)	1052
Smart Device Applications (Optional)	1052
Windows 7.x Phone	1053
Silverlight	1054
Creating a Smart Device Application for Windows 7.x Phones	1054
Windows 8 Phone Apps	1061
Creating a Windows 8 Phone App	1063
XML	1064
Code-Behind File	1065
XAML Code	1067
Running the App	1068
Deploying to an Emulator	1068
Deploying to a Device	1071

Coding Standards	1073
Resources	1074
Quick Review	1075
Exercises	1076
Programming Exercises	1081
APPENDIX A: VISUAL STUDIO CONFIGURATION	1083
Customizing the Development Environment	1083
Environment	1085
Projects and Solutions	1088
Text Editor	1089
Debugging	1093
HTML Designer	1093
Windows Forms Designer	1094
Other Options Settings	1095
Choose Toolbox Items	1096
Customize the Toolbars	1097
APPENDIX B: CODE EDITOR TOOLS	1099
Code Snippets	1099
Refactoring	1101
Extrace Method	1102
Rename	1104
Other Refactoring Options	1105
Working with Class Diagrams	1106
Class Details View	1107
Using the Class Diagram to Add Members	1108
Other Code Editor Tips	1109
APPENDIX C: CHARACTER SETS	1111
APPENDIX D: OPERATOR PRECEDENCE	1113
APPENDIX E: C# KEYWORDS	1115
GLOSSARY	1117
INDEX	1131
