

EIGHTH EDITION

PROGRAMMING WITH MICROSOFT® VISUAL BASIC® 2017

DIANE ZAK

Australia • Brazil • Mexico • Singapore • United Kingdom • United States

Brief Contents

	Preface	xiv
	Read This Before You Begin	xviii
CHAPTER 1	An Introduction to Visual Studio 2017 and Visual Basic	1
CHAPTER 2	Planning Applications and Designing Interfaces	49
CHAPTER 3	Coding with Variables, Named Constants, and Calculations	73
CHAPTER 4	The Selection Structure	119
CHAPTER 5	The Repetition Structure	181
CHAPTER 6	Sub and Function Procedures	237
CHAPTER 7	String Manipulation	287
CHAPTER 8	Arrays	341
CHAPTER 9	Sequential Access Files and Menus	392
CHAPTER 10	Classes and Objects	427
CHAPTER 11	SQL Server Databases	475
CHAPTER 12	Database Queries with SQL	529
CHAPTER 13	Web Site Applications	565
APPENDIX A	GUI Design Guidelines	599
APPENDIX B	Additional Topics	604
APPENDIX C	Finding and Fixing Program Errors	632
APPENDIX D	Visual Basic 2017 Cheat Sheet	647
APPENDIX E	Case Projects	667
	Index	671

Contents

	Preface	xiv
	Read This Before You Begin	xviii
CHAPTER 1	An Introduction to Visual Studio 2017 and Visual Basic	1
	FOCUS ON THE CONCEPTS LESSON	2
	F-1 Computer Programming Terminology	2
	F-2 The Programmer's Job	3
	F-3 The Visual Basic Programming Language	3
	F-4 The Visual Studio IDE	6
	F-5 Assigning Names to Objects	7
	APPLY THE CONCEPTS LESSON	9
	A-1 Start and Configure Visual Studio Community 2017	9
	A-2 Create a Windows Forms Application	11
	A-3 Manage the Windows in the IDE	13
	A-4 Change a Form File's Name	14
	A-5 Change the Properties of a Form	15
	The Name Property	17
	The Font Property	17
	The MaximizeBox, StartPosition, and Text Properties	17
	A-6 Save a Solution	18
	A-7 Close and Open a Solution	18
	A-8 Add a Control to a Form	19
	A-9 Use the Format Menu	24
	A-10 Lock the Controls on the Form	24
	A-11 Start and End an Application	25
	A-12 Enter Code and Comments in the Code Editor Window	28
	The Me.Close() Statement	29
	Assignment Statements and Comments	31
	A-13 Print an Application's Code and Interface	32
	A-14 Exit Visual Studio and Run an Executable File	33
	Summary	34
	Key Terms	38
	Review Questions	40
	Exercises	42

CHAPTER 2 Planning Applications and Designing Interfaces **49**

FOCUS ON THE CONCEPTS LESSON **50**

F-1 Planning a Windows Forms Application 50

F-2 Windows Standards for Interfaces 52

 Guidelines for Identifying Labels and Buttons 53

 Guidelines for Including Graphics 53

 Guidelines for Selecting Fonts. 53

 Guidelines for Using Color 53

F-3 Access Keys. 54

F-4 Tab Order 55

APPLY THE CONCEPTS LESSON **58**

A-1 Create a Planning Chart for a Windows Forms Application 58

A-2 Design an Interface Using the Windows Standards 59

A-3 Add a Label Control to the Form. 60

A-4 Add a Text Box to the Form 62

A-5 Set the Tab Order 63

Summary 65

Key Terms 67

Review Questions 67

Exercises 69

CHAPTER 3 Coding with Variables, Named Constants, and Calculations . . . **73**

FOCUS ON THE CONCEPTS LESSON **74**

F-1 Pseudocode and Flowcharts. 74

F-2 Main Memory of a Computer 76

F-3 Variables 77

 Selecting an Appropriate Data Type 77

 Selecting an Appropriate Name 78

 Examples of Variable Declaration Statements. 79

F-4 TryParse Method 81

F-5 Arithmetic Expressions 83

F-6 Assigning a Value to an Existing Variable 85

F-7 ToString Method 87

F-8 Option Statements 88

F-9 Named Constants 90

APPLY THE CONCEPTS LESSON **94**

A-1 Determine a Memory Location’s Scope and Lifetime. 94

A-2 Use Procedure-Level Variables 95

A-3 Use Procedure-Level Named Constants. 97

A-4 Use a Class-Level Variable 98

A-5 Use a Static Variable 101

A-6 Use a Class-Level Named Constant 103

A-7 Professionalize Your Application’s Interface. 104

 Coding the TextChanged Event Procedure 104

 Coding the Enter Event Procedure. 105

	Summary	106
	Key Terms	108
	Review Questions	109
	Exercises	112
CHAPTER 4	The Selection Structure	119
	FOCUS ON THE CONCEPTS LESSON	120
	F-1 Selection Structures	120
	F-2 If...Then...Else Statement.	122
	F-3 Comparison Operators	122
	Comparison Operator Example: Total Due Application	124
	Comparison Operator Example: Net Income/Loss Application	125
	F-4 Logical Operators	128
	Logical Operator Example: Gross Pay Calculator Application	131
	F-5 Summary of Operators	134
	F-6 String Comparisons	135
	String Comparison Example: Shipping Application.	137
	F-7 Nested Selection Structures	139
	F-8 Multiple-Alternative Selection Structures	143
	F-9 Select Case Statement	145
	Specifying a Range of Values in a Case Clause	147
	APPLY THE CONCEPTS LESSON	151
	A-1 Add a Check Box to a Form	151
	A-2 Code an Interface That Contains Check Boxes	151
	CheckBox's CheckedChanged Event	153
	A-3 Add a Radio Button to a Form	154
	A-4 Code an Interface That Contains Radio Buttons	154
	RadioButton's CheckedChanged Event	156
	Using the Select Case Statement with Radio Buttons	157
	A-5 Group Objects Using a Group Box Control	157
	A-6 Professionalize Your Application's Interface.	159
	Coding a Text Box's KeyPress Event Procedure	159
	A-7 Professionalize Your Code Using Arithmetic Assignment Operators	161
	Summary	163
	Key Terms	165
	Review Questions	167
	Exercises	172
CHAPTER 5	The Repetition Structure	181
	FOCUS ON THE CONCEPTS LESSON	182
	F-1 Repetition Structures	182
	F-2 Do...Loop Statement (Pretest Loop)	184
	F-3 String Concatenation	186
	F-4 Infinite Loops	187
	F-5 Do...Loop Statement (Posttest Loop)	188
	F-6 Counters and Accumulators	190
	F-7 For...Next Statement	192
	Comparing the For...Next and Do...Loop Statements	195
	Flowcharting a For...Next Loop	195

APPLY THE CONCEPTS LESSON 197

A-1 Use a Loop, a Counter, and an Accumulator 197
 A Different Version of the Projected Sales Application 200

A-2 Add a List Box to a Form 202
 Using the String Collection Editor to Add Items to a List Box. 203
 The Sorted Property 204
 The SelectedItem and SelectedIndex Properties 204
 The SelectedValueChanged and SelectedIndexChanged Events 205

A-3 Use the Methods and a Property of the Items Collection 206
 Count Property 208
 Clearing the Items from a List Box. 208

A-4 Calculate a Periodic Payment 208
 ListBox, Loop, and Financial.Pmt Example: Monthly Payment Application 210

A-5 Nest Repetition Structures 213
 Nested Repetition Structure Example: Savings Account Application 214
 A Caution About Real Numbers 216

A-6 Professionalize Your Application's Interface. 218

Summary 219
 Key Terms 221
 Review Questions 223
 Exercises 228

CHAPTER 6 Sub and Function Procedures 237

FOCUS ON THE CONCEPTS LESSON 238

F-1 Event-Handling Sub Procedures 238

F-2 Independent Sub Procedures 240
 No Parameters/Arguments Example: History Grade Application. 242

F-3 Passing Information to a Procedure 245
 Passing Variables by Value Example: Gross Pay Application 245
 Passing Variables by Reference Example: Concert Tickets Application 248

F-4 Rounding Numbers 250

F-5 Function Procedures 252

APPLY THE CONCEPTS LESSON 256

A-1 Add a Combo Box to the Form 256

A-2 Add Items to a Combo Box and Select a Default Item 260

A-3 Code a Combo Box's KeyPress Event Procedure 261

A-4 Create an Event-Handling Sub Procedure 261

A-5 Calculate Federal Withholding Tax 262

A-6 Invoke an Independent Sub Procedure and a Function 264

A-7 Create an Independent Sub Procedure 266

A-8 Create a Function 267

A-9 Validate an Application's Code. 269

A-10 Professionalize Your Application's Interface 271

Summary 275
 Key Terms 277
 Review Questions 278
 Exercises 282

CHAPTER 7	String Manipulation	287
	FOCUS ON THE CONCEPTS LESSON	288
	F-1 Length Property	288
	The Product ID Application	288
	F-2 Insert Method	290
	F-3 PadLeft and PadRight Methods	290
	The Net Pay Application	291
	F-4 Contains and IndexOf Methods	293
	The City and State Application	294
	F-5 Substring Method	296
	The Rearrange Name Application	296
	F-6 Character Array	298
	The First Name Application	299
	F-7 Remove Method	301
	F-8 Trim, TrimStart, and TrimEnd Methods	302
	The Tax Calculator Application	303
	F-9 Replace Method	304
	F-10 Like Operator.	305
	Inventory Application	307
	APPLY THE CONCEPTS LESSON	309
	A-1 Code the Check Digit Application	309
	A-2 Code the Password Application	314
	A-3 Generate Random Integers	317
	A-4 Code the Guess a Letter Application	318
	Use the Enabled Property and Focus Method	319
	A-5 Code the Guess the Word Game Application	322
	Coding the btnNewWord_Click Procedure.	323
	Coding the btnTryLetter_Click Procedure.	325
	Summary	329
	Key Terms	330
	Review Questions	331
	Exercises	335
CHAPTER 8	Arrays	341
	FOCUS ON THE CONCEPTS LESSON	342
	F-1 Arrays	342
	F-2 Declaring One-Dimensional Arrays	342
	Storing Data in a One-Dimensional Array	345
	Determining the Number of Elements in a One-Dimensional Array	346
	Determining the Highest Subscript in a One-Dimensional Array	346
	Traversing a One-Dimensional Array	347
	F-3 For Each...Next Statement	349
	F-4 Calculating the Average Array Value	350
	F-5 Finding the Highest Array Value	353
	F-6 Sorting a One-Dimensional Array.	355
	F-7 Two-Dimensional Arrays.	358
	Declaring a Two-Dimensional Array	358
	Storing Data in a Two-Dimensional Array	360

Determining the Highest Subscript in a Two-Dimensional Array 361

Traversing a Two-Dimensional Array 361

Totaling the Values Stored in a Two-Dimensional Array 363

APPLY THE CONCEPTS LESSON 366

A-1 Associate an Array with a Collection 366

A-2 Create Accumulator and Counter Arrays 367

A-3 Create Parallel One-Dimensional Arrays 371

A-4 Search a Two-Dimensional Array 374

Summary 377

Key Terms 378

Review Questions 379

Exercises 383

CHAPTER 9 Sequential Access Files and Menus **392**

FOCUS ON THE CONCEPTS LESSON 393

F-1 Sequential Access Files 393

F-2 Sequential Access Output Files 393

 Output File Example: Game Show Application 395

F-3 Sequential Access Input Files 397

 ReadToEnd Method Example: Game Show Application 399

 ReadLine Method Example: Game Show Application 401

APPLY THE CONCEPTS LESSON 404

A-1 Add a Menu to a Form 404

 GUI Guidelines for Menus 404

 Menu Example: Continents Application 405

A-2 Code the Items on a Menu 408

A-3 Modify a Menu 410

A-4 Accumulate the Values Stored in a File 412

A-5 Sort the Data Contained in a File 414

A-6 Professionalize Your Application’s Interface 416

Summary 417

Key Terms 418

Review Questions 419

Exercises 420

CHAPTER 10 Classes and Objects **427**

FOCUS ON THE CONCEPTS LESSON 428

F-1 Object-Oriented Programming 428

F-2 Creating a Class 429

F-3 Instantiating an Object 430

F-4 Attributes Section of a Class 431

 Attributes Section Example: Franklin Decks Application 433

F-5 Behaviors Section of a Class 436

 Constructors 436

 Methods Other than Constructors 437

 Behaviors Section Example: Franklin Decks Application 438

 Using the Rectangle Class: Franklin Decks Application 438

	F-6 Adding a Parameterized Constructor to a Class	443
	F-7 Reusing a Class	447
	APPLY THE CONCEPTS LESSON	452
	A-1 Use a ReadOnly Property	452
	A-2 Create Auto-Implemented Properties	457
	A-3 Overload Methods	459
	Summary	465
	Key Terms	466
	Review Questions	467
	Exercises	469
CHAPTER 11	SQL Server Databases	475
	FOCUS ON THE CONCEPTS LESSON	476
	F-1 Basic Database Terminology	476
	F-2 Creating a SQL Server Database.	478
	F-3 Adding a Table to a Database	480
	F-4 Adding Records to a Table	483
	F-5 Data Source Configuration Wizard	484
	F-6 Binding the Objects in a Dataset.	487
	Having the Computer Create a Bound Control.	488
	F-7 DataGridView Control	491
	F-8 Copy to Output Directory Property	495
	F-9 Try...Catch Statement	497
	F-10 Two-Table Databases	499
	Relating the Tables.	502
	Creating a Database Query	504
	Displaying the Query Information	506
	APPLY THE CONCEPTS LESSON	508
	A-1 Create a Data Form	508
	A-2 Bind Field Objects to Existing Controls.	511
	A-3 Perform Calculations on the Fields in a Dataset.	513
	Summary	516
	Key Terms	517
	Review Questions	518
	Exercises	520
CHAPTER 12	Database Queries with SQL	529
	FOCUS ON THE CONCEPTS LESSON	530
	F-1 SELECT Statement	530
	F-2 Creating a Query.	533
	F-3 Parameter Queries	540
	F-4 Saving a Query	544
	F-5 Invoking a Query from Code.	547
	APPLY THE CONCEPTS LESSON	549
	A-1 Add a Calculated Field to a Dataset	549
	A-2 Use the SQL Aggregate Functions	552
	A-3 Professionalize Your Application's Interface.	556

	Summary	556
	Key Terms	557
	Review Questions	558
	Exercises	560
CHAPTER 13	Web Site Applications	565
	FOCUS ON THE CONCEPTS LESSON	566
	F-1 Basic Web Terminology	566
	F-2 Creating a Web Site Application	568
	F-3 Starting a Web Application	571
	F-4 Modifying the Site.master Page	573
	F-5 Personalizing the Default.aspx Page	576
	F-6 Personalizing the About.aspx Page	577
	F-7 Testing with Different Browsers	579
	F-8 Closing and Opening a Web Site Application	579
	APPLY THE CONCEPTS LESSON	580
	A-1 Repurpose an Existing Web Page	580
	A-2 Add a Table and Controls to a Web Page	582
	A-3 Code a Control on a Web Page	585
	A-4 Use a Validation Control	587
	Summary	589
	Key Terms	590
	Review Questions	591
	Exercises	592
APPENDIX A	GUI Design Guidelines	599
APPENDIX B	Additional Topics	604
APPENDIX C	Finding and Fixing Program Errors.	632
APPENDIX D	Visual Basic 2017 Cheat Sheet	647
APPENDIX E	Case Projects.	667
	Index	671
