5th Edition

Creating MOTION GRAPHICS *with* After Effects

Trish & Chris Meyer

AMSTERDAM • BOSTON • HEIDELBERG • LONDON NEW YORK • OXFORD • PARIS • SAN DIEGO SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO Focal Press is an imprint of Elsevier

Table of Contents

Introduction

How to Use This Book

1. After Effects 101: Moving in and getting comfortable

Welcome to After Effects

The After Effects Project

Compositions

The Application Window

The Tools Panel

The Project Panel

Importing Footage

The Footage Panel

Adobe Bridge

Rearranging the Furniture

Resizing Frames

<u>Tabs</u>

Re-docking Panels

Opening New Panels

<u>Workspaces</u>

2. <u>Creating a Composition: Procedures and shortcuts for setting up a blank</u> <u>canvas</u>

The New Composition

The Composition Panel

The Timeline Panel

Adding Footage to a Comp

More on Layers

Keeping Tabs on Multiple Comps

Closing Comps

Side-by-Side View

Navigating in Space

Mouse Wheel Scrolling

Resolution

Quality

Navigating in Time

Zooming in Time

The Work Area

Visual Aids

Safe Areas

<u>Grids</u>

Rulers and Guides

Show Channel

The Background Color

Black versus Black

3. <u>Basic Animation: Animating a layer's transformations along with</u> <u>mastering motion paths</u>

Position in Time and Space

Animating Position

Editing the Motion Path

Keyframe Navigation

Editing Keyframes Numerically

<u>T is for Opacity</u>

Crossed-up Dissolves

Fading Layers as a Group

S is for Scale

Animating Scale

<u>R is for Rotation</u>

Animating Rotation

An Orientation in 3D Rotation

Auto-keyframe Mode

A is for Anchor Point

Moving Anchor and Position Together

Anchor Point Examples

Orbiting Objects

Motion Control Moves

Smooth Operator

Keyframe Tips and Gotchas

4. <u>Keyframe Velocity: The secrets to creating sophisticated animations</u>

Easy Ease

Auto Bezier

The Graph Editor

Value Graphs

Editing Handles

Velocity Graphs

Multiple Values

Position Graphs

Position Value Graphs

Position Speed Graphs

Separate X, Y, and Z

Graph Gotchas

Hold Interpolation

Continuing from Hold

Roving Keyframes

5. <u>Animation Assistance: A series of tips, tricks, and Keyframe Assistants to</u> <u>make your life easier</u>

Things to Do with Keyframes

Copying and Pasting Keyframes

Moving and Nudging Motion Paths

Scaling a Motion Path

Sketching and Smoothing

Motion Sketch

Applying Sketch to Others

<u>Smoother</u>

Auto-Orient Rotation

A Wiggly World

Wiggly Practice

Customizing Wiggles

Exponential Scale

6. The Layer Essentials: Tips for managing multiple layers efficiently, including hot keying, markers, and the layer switches

Selecting Layers

Moving Layers in Time

Moving Layers in the Stack

Duplicating Layers and Comps

Soloing Layers

Renaming Layers

Replace Source

Replace Footage

Taking Snapshots

<u>Align Panel</u>

Color-Coding

What Does That Switch Do?

 7. Trimming Layers: Learning how to edit layers through trimming, splitting, and sequencing

The Ins and Outs of In and Out

Trimming Layers

Method A: Trimming in the Timeline Panel

Method B: Trimming in the Layer Panel

Comparing Methods

Slip Sliding Away

Slipping Keyframes

Sequence Layers

Splitting Layers

Overlay and Ripple Insert Edits

8. Motion Blur and More: Life's a blur – at least, to a camera it is

<u>Applying Motion Blur</u>

Shutter Angle and Phase

Blur and Masks

Blur and Nested Comps

Render Settings

Faux Motion Blur

Echoed Effects

An Original Echo

Echoed Animation

Cycore Time Effects

CC Force Motion Blur & Wide Time

CC Time Blend & Time Blend FX

9. <u>Blending Modes: One of the most creative tools After Effects offers is</u> <u>mixing images together using blending modes</u>

Modus Operandi

Mode Swings

Experimenting

Darkening Modes

Darken/Darker Color

Multiply

Linear Burn

Color Burn/Classic Color Burn

Lightening Modes

Add

Lighten/Lighter Color

<u>Screen</u>

Linear Dodge

Color Dodge/Classic Color Dodge

Lighting Modes

<u>Overlay</u>

Soft Light

Hard Light

Linear Light

Vivid Light

Pin Light

Hard Mix

Subtraction and Division Modes

Difference/Classic Difference

Exclusion

<u>Subtract</u>

<u>Divide</u>

Property-Replacing Modes

<u>Hue</u>

Saturation

<u>Color</u>

<u>Luminosity</u>

Summarizing H, S, L, and Color modes

10. <u>All About Masking: Masking tools create transparency using standard or</u> <u>freeform Bezier shapes</u>

Masking Basics

Masking in the Comp Panel

Masking in the Layer Panel

Shape Shortcuts

The Free Transform Tour

Masks of a Feather

Mask Expansion

Mask Opacity

Freeform Bezier Masking

Editing with the Selection Tool

Editing with the Pen Tool

RotoBezier Masks

Converting between Bezier and RotoBezier

Animating a Mask

Masks and Velocity

More Mask-Animating Advice

Inverting a Mask

Fixing Seams with Inverted Masks

Multiple Masks

Mask Modes

Problem-Solving Modes: Lighten and Darken

Management Advice

Rotoscoping Figures

Panning a Layer Inside a Mask

Interchangeable Paths

Working with Illustrator Paths

Wiping on Curved Shapes

More on Pasting Paths

Mask Paths to Motion Paths

Mask Interpolation

The Smart Approach

Along the Curve

Straight and Narrow

Inside-Out Interpolation

Smart Practice

11. <u>All About Track Mattes: Mastering track mattes is a prerequisite for</u> creating complex multilayered compositions

What's in a Matte?

Creating a Luma Matte Effect

Creating an Alpha Matte Effect

To Luma or To Alpha?

Adding a Background

Track Matte Inverted

Using the Invert Effect

Increasing the Contrast of a Matte

Soft Mattes

Specifying One Channel as a Matte

Creating Animated Mattes

Animating the Fill

Parental Bond

Options for Applying Effects

Building a Track Matte Hierarchy

Precomposing After Track Matte

Precomposing Before Track Matte

Effects in a Nested Comp Hierarchy

Unmultiplying a Separate Matte

Fade the Movie or the Matte?

Head Burn Fadeout

Custom Transition Mattes

12. <u>Stencils and the "T": Stencils are a great way to add transparency to</u> <u>multiple layers. And then there's that "T" switch...</u>

Stencil Luma

Stencil Alpha

Silhouettes and Alpha versus Luma

Adding a Background Layer

Preserve Underlying Transparency

Glints, Backgrounds, and Effects

Alpha Add with Stencils

13. <u>3D Space: Adding depth to your animations by mastering Z space</u>

Enter a New Dimension

Postcards in Space

The Z Factor

Taking a Spin in 3D

Anchors and Offsets

Working with 3D Compositions

<u>3D Views</u>

View Layouts

Getting a Grip

Twirl versus Spin

3D Motion Paths

Auto-Orient Along 3D Path

Rendering Orders

What a Difference a Dimension Makes

Intersections

Mixing 2D and 3D Layers

Breaking the Render Order

Other Layer Interactions

Blending Modes

Track Mattes

<u>Stencils</u>

Adjustment Layers

Compound Effects

14. <u>Cameras: Get new perspective on your 3D layers by placing cameras</u> around them

Shooting Script

Instant Gratification

Pointing the Camera

One-Node Cameras

Animating Cameras

Auto-Orientation

Camera Rigs

Orbit Camera Rig

Dolly Camera Rig

Animation Advice

Editing Between Cameras

Camera Settings

Angle of View

Depth of Field

Depth Charges

15. Lighting in 3D: We continue our exploration of 3D by discussing how to illuminate your layers

Lights and Surfaces

Lights 101

Rotating a Light

<u>A Light Menu</u>

Spot Light

Point Light

Parallel Light

Ambient Light

<u>Intensity</u>

<u>Color</u>

The Material World

Accepts Lights

<u>Ambient</u>

Diffuse and Specular

<u>Shininess</u>

<u>Metal</u>

Out of the Shadows

Shadows 101

Light Transmission

Creating Gels

<u>Gobos</u>

Fake Reflections

Adjustment Lights

Light as a Creative Tool

16. Parallel Worlds: Combining 3D layers from different sources

2D versus 3D Layers

Different Types of 3D Layers

3D Shadows onto 2D Layers

3D Shadows for 3D Effects

3D Objects from Photoshop Extended

Vanishing Point Exchange

Live Photoshop 3D Layers

Adobe Repoussé

Digieffects FreeForm

Warping Practice

Animating a Curl

Displacement Mapping

17. Parenting Skills: The ability to group layers together greatly eases the creation of complex animations

Developing an Attachment

Family Tree

Breaking the Bonds

Basic Parenting Lessons

Saving Time

Move as a Group

Children and Effects

<u>Anthropomorphism</u>

Parenting with a Null Object

<u>Getting a Handle</u>

Local Coordinates

The Face Inside the Window

Jump Parenting

18. <u>Nesting Compositions: Creating complex motion graphics that are easy to</u> <u>edit requires building a hierarchy of compositions</u>

Nesting 101

Nesting a Comp

Easy Editing for Effects

Editing a Sequence of Clips

Size Doesn't Matter

Repetition and Variation

Navigating Nested Comps

Composition Navigator

Composition Mini-Flowchart

Edit This, Look At That

Locking the Comp Panel

Locking the Effect Controls Panel

Nesting Options

General Nesting Tips

The Rendering Order

Two Comps Are Better Than One

Manipulating the Rendering Order

Problem Solving

The Best Laid Plans

19. Precomposing: Continuing our tour of After Effects' rendering order, we prove that precomposing is easy once you know how...

Precompose for Grouping

Precompose Options

Option #1: Leave All Attributes

Option #2: Move All Attributes

Fixing Render Order Problems

Fixing the Edge

Trimming Out Empty Calories

Removing Empty Calories by Trimming

Removing Empty Calories by Moving Layers

20. Collapsing Transformations: Options for maximizing resolution also rewire the rendering order

Resolution Lost

Collapsing 101

Collapsing 102

Under the Hood

Problems and Opportunities

The Pasteboard

Blending Modes

Adjustment Layers

Opacity and Fade-Outs

Stencils and Silhouettes

Collapsed Space

Discontinuous Space

Continuous Rasterization

Render Order Trickery

Mask Feather Foolery

Eccentric Effects

21. $\frac{\text{Textacy: Mastering this powerful text animation engine is well worth the}}{\frac{\text{effort}}{1}}$

Creating Text

Editing Type Attributes

Composing for Paragraphs

Text Along a Path

Text Animators

Creating a Typing On Animation

Properties Parade

Creating a Cascading Animation

Per-character 3D

Text Position in Z

3D Text Rotation

Per-character Align to Camera

3D Text in a 3D World

Animator Shapes

The Lowdown on Ease High and Low

More Options

Animating Amount & Property Values

Anchor Point Grouping and Alignment

Inter-Character Blending

Adding a Wiggly Selector

Wiggly Options

Multiple Range Selectors

The Case for Multiple Animators

Adding and Managing Animators

Exporting Text to SWF

Photoshop Text Integration

Create Outlines

Closing Characters

22. <u>Applying and Using Effects: After animating layers comes treating their</u> <u>images with special effects</u>

Applying an Effect

Effects & Presets Panel

The Search Party

Effect Controls

<u>Sliders</u>

Rotary Dials

Color Swatches

Popups

Effect Points

Option Dialogs

Custom Interface Items

Animating Effects

Tricks to Click

Effect Point Animation

Pasting Position and Masks to Effect Point

Masks as Paths

Render Settings

Adjustment Layers

Adjustment Logic 101

Edited Sequence

Additional Adjusting Tricks

Simple Selections

Masking Shapes

Any Alpha Will Do

Animating Adjustments

Blending Modes

Luma Track Mattes

Transforming Adjustments

Adjusting in 3D

Effects and Solids

Dropping Out the Black

Divide and Conquer

23. Effects Roundup Overview: Where to find tips on our favorite effects

Getting More from Effects

Third-Party Effects

24. <u>Compound Effects: Compound effects may seem nonintuitive at first, but</u> <u>they require learning only a few simple rules</u>

That Other Layer

Size Matters

Short Circuit

Longer (and Better) Circuit

Compound Blur

<u>Texturize</u>

Texturizing by Nesting

Texturizing by Precomposing

Displacement Map

Animating the Map

Different Sizes

Slice 'n' Dice

The Mirror Cracked

Why Isn't It Working?

25. <u>Presets and Variations: Alternatives to reinventing the wheel every time</u> you use an effect

Presets in Action

Precut Masks

Presets and Effects

Adobe's Presets

Browsing Presets

Quick Tasks

Text Presets

Behaviors

Brainstorm

More Brainwaves

26. <u>Color Management: Preserving your colors through your workflow</u>

Color Management Overview

Project Working Space

Input Profiles

Some Examples

Output Profiles

Display Management

Output Simulation

Apply Color LUT

Scene-Referred Profiles

Image States

Mixing Profiles

Luminance Range Issues

Linear Blending and Gamma

Linear Blending Examples

Linearize Working Space versus Blend Colors

32-Bit Floating Point

Altering Exposure

Creative Float

Cineon Log Color Space

Broadcast Safe Colors

27. <u>Keying: Effectively removing a color background requires attention</u> <u>throughout the chain</u>

Keying 101

Approaches

<u>A Box Full of Keys</u>

Color Key

Luma Key

Color Range Key

Linear Color Key

Color Difference Key

Extract

Inner/Outer Key

Difference Matte

<u>Keylight</u>

<u>Fixing It in the Mix</u>

Living on the Edge

The Matte Effects

Blurring the Lines

Seeing the Light

28. <u>Frame Rate Manipulation: Time Stretch, Reverse, and Remap, plus</u> <u>smoothing the result with Frame Blending</u>

Time Stretch

Stretching Animations

Going in Reverse

Backward Logic

Slipping into Reverse

Time Remapping

Getting Started (and Stopped)

Freeze Frames

Doing Time

Repairing Shot Timing

Adding Handle

Remapping a Comp

Remapping Sequenced Layers

Remapping Exponential Scale

Remapping a Sequence of Frames

Stepping Out with Time Remap

Frame Blending

Applying Frame Blending

Rendering with Frame Blending

Blending Advice

Blending Steps

29. <u>Motion Stabilization: After Effects includes the ability to stabilize wobbly</u> footage. <u>Mastering this is also the key to having one object track another</u>

Stabilizing 101

Essential Options

Track and Apply

Broken Tracks

Practice, Practice

Stabilizing 102

Stabilizing 103

Stabilize Position & Rotation

Motion Tracking: Motion Tracking allows you to add an object to a scene ^{30.} after it was shot – if you're both lucky and good...

Tracking 101

Tracking Regions and Attach Point

Tracking Scale and Rotation

Realworld Examples

Multipart Track

Corner Pin Choices

Tracking with Dots

A Challenging Replacement

31. <u>mocha: Advanced motion tracking using mocha for After Effects plus</u> <u>mocha shape</u> Perspective Tracking with mocha

Preparing a Project

Performing a Track

Perfecting the Track

Exporting to After Effects

Mattes with mocha shape

Creating a Shape

Linking a Shape to a Track

Exporting Shape Data to After Effects

32.	Shape Layers: possibilities	These new	vectorbased	<u>layers</u>	open a	multitude	of graphic
	<u>possibilities</u>						

Shape Tool Overview

Creating Parametric Shapes

Transformations

Multiple Shapes

Pen Path Shapes

Editing Pen Shapes

Free Transform Points

Open Paths

Stroke Over Fill Over Stroke

Gradients

Corners and Caps

Dashed Lines

Managing Multiple Shapes

Grouping

Merge Paths

Shape Effects

The Repeater

Flowers, Pinwheels, and Tick Marks

Spirals

Lines and Grids

Wiggle Transform

<u>Repeater + Wiggle Transform</u>

Shapes from Other Places

Create Outlines

Masks into Shapes

Illustrator Paths into Shapes

Closing Shapes

33. Paint and Clone: A painting workout in After Effects using the Brush,
<u>Erase, and Clone tools</u>

Getting Started with Paint

Editing Existing Strokes

Managing Your Strokes

Paint on Transparent

Transforming Brush Strokes

Choosing Channels

Painting with Modes

Eraser Logic

Erasing the Paint Only

Erase Last Stroke

Animating Strokes

Start Here, End There

Using Write On Mode

Rotoscoping Frame by Frame

Interpolating Brush Strokes

<u>Using the Clone Stamp Tool</u>

Clone Source Overlay

Shifting the Source Time

Tracking the Clone

Creating the Dummy Clone Stroke

Tracking the Boat

Expressing the Clone Stroke

Random Paint Splatters

34. Roto Brush: A new tool for separating foregrounds from backgrounds

Roto Brush Workflow

Creating a Base Frame

Propagation

Tracking the Rest of the Shot

Refining the Matte

35. <u>The Puppet Tools: A fun way to organically warp and animate layers</u>

Puppet Pins

Keyframing Puppets

Motion Sketching Pins

<u>The Overlap Tool</u>

The Starch Tool

Deforming Text

36. Working with Audio: An overview of handling audio in After Effects, including how to "read" audio as clues for editing and animation

Seeing Sound

Good Vibrations

Spotting Audio

On the Level

You've Got the Power

Mixing Audio

Stereo Mixer

More Natural Fades

Trimming Layers with Audio

37. Expressions: Expressions hold the key to animating repetitive tasks or

complex relationships

Introductory Expressions

Enabling and Disabling

Breaking Expressions

Pick Whipping for Pleasure

Crossing Signals

Linking Effects and Transformations

Moving Between Dimensions

Array Math Basics

Controlling Expressions

Other Controller Ideas

Variables and Multiline Expressions

The Wiggle Expression

 38. Import and Interpret: Getting files in, deciding how After Effects should interpret them...and changing your mind later

Footage Pointers

Importing with Alphas

Straight versus Premultiplied Alphas

Import Specifics

Movie Issues

Audio Issues

Still Issues

Sequences Issues

Photoshop Issues

Illustrator, PDF, SWF, and EPS Issues

The Illustrator Artboard

Importing Projects

Interpret Footage

<u>Alpha</u>

Frame Rate

Fields and Pulldown

Pixel Aspect Ratio

<u>Looping</u>

More Options

Interpretation Rules

39. Integration 101: Going beyond the simple exchange of rendered movies and images

Web Integration

GIF and PNG

<u>SWF</u>

FLV and F4V

Flash Professional

Non-Linear Editing Systems

Adobe Premiere Pro

Apple and Avid

Dynamic Link

Mobile Media

<u>3D Integration</u>

40. Integrating with 3D Applications: Techniques to get more information from your 3D program into After Effects

3D Advice

The Camera Move

When Worlds Align

<u>Mattes</u>

Case Studies

Study #1: Videowall

Study #2: Shadow Trickery

41. <u>Video Issues: An overview of all those pesky technical issues you need to</u> <u>keep straight when you're working with video</u>

Fields and Interlaced Frames

Field Flicker

Frame Rates and Timecode

Film Rates and Pulldown

Frame Sizes

Non-square Pixels

Anamorphic Widescreen

Working Square

Clean versus Production Aperture

Safe Areas

Moving Between Aspect Ratios

From 16:9 to 4:3

From 4:3 to 16:9

Safe Colors and Video

Composite Dot Crawl

Monitoring Your Work

Creating Good Web Video

42. <u>Render Queue: The Render Queue is where you set up and manage the</u> <u>creation of your final work</u>

<u>Movies</u>

<u>Stills</u>

RAM Preview

Names and Paths

Render Settings

<u>Quality</u>

Resolution

Disk Cache

Use OpenGL Renderer

Proxy Use

Effects

Solo Switches

Guide Layers

Color Depth

Frame Blending

Field Render

<u>3:2 Pulldown</u>

Motion Blur

Time Span

Frame Rate

Skip Existing Files

Output Module Settings

<u>Format</u>

Include Project Link

Include Source XMP Metadata

Post-Render Action

Video Output

Format Options

Starting #

<u>Channels</u>

<u>Depth</u>

<u>Color</u>

<u>Resize</u>

<u>Crop</u>

Audio Output

The Render Queue Panel

Render Progress

Creating and Editing Templates

Using Templates

43. <u>Advanced Rendering: Network rendering and project management</u> <u>features</u>

Streamlining Projects

Collect Files

Network Rendering

<u>Cloning</u>

Setting Up a Distributed Render

Recovering from Failure

Converting Sequences to Movies

Merging Projects for Render

44. Prerendering and Proxies: Planning ahead can save time later

Prerendering

Proxies

Applying Proxies

Proxy Behavior

Working with Proxies

Rendering with Proxies

45. What's Your Preference?: Setting preferences to optimize your workflow

<u>General</u>

Previews

Display

<u>Import</u>

<u>Output</u>

Grids & Guides

Labels

Media & Disk Cache

Appearance

Auto-Save

Memory & Multiprocessing

Audio Hardware

Audio Output Mapping
