Color and Value Perspective . . . Detail and Pattern Perspective . . . Focus Effect, 13	
Professional Applications of Fundamentals, 14	
Chapter 2: REALITY AND APPEARANCE	15
In Perspective Drawing You Draw What You See, Not Your Idea or Mental Image of the Subject, 15	
Reality and Appearance—Example: United Nations Buildings from Different Viewpoints, 16	
Reality and Appearance—Example: Park Bench from Different Viewpoints, 17	
Chapter 3: HOW WE SEE FOR PERSPECTIVE DRAWING	18
Cone of Vision . . . Central Visual Ray . . . Picture Plane, 18	
Basis of Perspective—Lines of Sight Through a Picture Plane, 19	
Chapter 4: WHY APPEARANCE DIFFERS FROM REALITY — THEORY	20
“Lines of Sight Through Picture Plane” Applied to Diminution, 20	
“Lines of Sight Through Picture Plane” Applied to Diminution and Convergence, 21	
“Lines of Sight Through Picture Plane” Applied to Foreshortening and Overlapping, 22	
Chapter 5: PRINCIPAL AIDS: VANISHING POINTS AND EYE LEVEL (HORIZON LINE)	23
Aid No. 1: Vanishing Points—All Lines which in Reality are Parallel will Converge toward a Single Vanishing Point, 23	
Vanishing Points (cont.)—When There are Many Sets of Parallel Lines going in Different Directions, Each will Converge toward its own Vanishing Point, 24	
Professional Examples, 25	
Aid No. 2: Eye Level (Horizon Line)—All Horizontal Lines Converge to a Single Horizontal Vanishing Line, 26	
What Locates the Vanishing Line for All Horizontal Lines?, 27	
Why the Observer’s Eye Level Dictates the Horizontal Vanishing Line — Theory, 28	
What Locates the Vanishing Point of a Particular Set of Parallel Lines?, 29	
Why the “Parallel Pointing” Method of Locating Vanishing Points is Important, 30	
Nature’s Horizon Always Appears at Observer’s Eye Level. Therefore, it Can be Used as the Vanishing Line for Horizontal Lines, 31	
Why Nature’s Horizon Appears at Observer’s Eye Level—Theory, 32	
What Happens to Eye Level (Horizon Line) When You Look Straight Out, Down or Up?, 33	
Professional Examples, 34	
What Happens to Eye Level (Horizon Line) When You Look Straight Out, Down or Up (cont.)?, 35	
Reasons for Choosing a Particular Eye Level (Horizon Line), 36
