Appendices		
1	Glossary	165
2	ICT in your subject	169
3	Sample teaching units for ICT	180
Index		182

The author

John Woollard is a lecturer in information technology education at the School of Education, University of Southampton. He was teacher-in-charge and head of special educational needs in three different Hampshire schools before becoming teacher adviser for IT and SEN. During the early 1990s John held a variety of positions as consultant, adviser and inspector. He now teaches on the MSc computer-based learning and initial teacher training programmes and completed his PhD in 2004. John's research focus is pedagogy and the teaching of difficult concepts in and with computers including e-learning and computer-assisted learning.

Dedication

My thanks go to my colleagues, past and present, in my earlier schools and the advisory service. In particular, my thanks go to teachers and my trainees working in partnership schools of the School of Education, University of Southampton. They have given me a wealth of good ideas and have helped make this writing possible.

This book is dedicated to my family, Heather, Mattie and Becky.
