TABLE OF CONTENTS

Preface	xvii
About the Authors	xxvii
1 Communication Networks and Services	1
1.1 Evolution of Network Architecture and Services	2
1.1.1 <i>Telegraph Networks and Message Switching</i>	2
1.1.2 <i>Telephone Networks and Circuit Switching</i>	5
1.1.3 <i>The Internet, Computer Networks, and Packet Switching</i>	9
1.2 Future Network Architectures and Their Services	22
1.3 Key Factors in Communication Network Evolution	24
1.3.1 <i>Role of Technology</i>	25
1.3.2 <i>Role of Regulation</i>	27
1.3.3 <i>Role of the Market</i>	28
1.3.4 <i>Role of Standards</i>	28
Checklist of Important Terms	29
Further Reading	30
Problems	31
2 Applications and Layered Architectures	34
2.1 Examples of Protocols, Services, and Layering	36
2.1.1 <i>HTTP, DNS, and SMTP</i>	36
2.1.2 <i>TCP and UDP Transport Layer Services</i>	42
2.2 The OSI Reference Model	43
2.2.1 <i>The Seven-Layer OSI Reference Model</i>	44
2.2.2 <i>Unified View of Layers, Protocols, and Services</i>	48
2.3 Overview of TCP/IP Architecture	52
2.3.1 <i>TCP/IP Architecture</i>	52
2.3.2 <i>TCP/IP Protocol: How the Layers Work Together</i>	55
2.3.3 <i>Protocol Overview</i>	61
◆ 2.4 The Berkeley API	62
2.4.1 <i>Socket System Calls</i>	64
2.4.2 <i>Network Utility Functions</i>	68
◆ 2.5 Application Layer Protocols and TCP/IP Utilities	77
2.5.1 <i>Telnet</i>	78
2.5.2 <i>File Transfer Protocol</i>	78
2.5.3 <i>Hypertext Transfer Protocol and the World Wide Web</i>	82
2.5.4 <i>IP Utilities</i>	86
2.5.5 <i>Tcpdump and Network Protocol Analyzers</i>	89
Summary	90
Checklist of Important Terms	91
Further Reading	91
Problems	92

3	Digital Transmission Fundamentals	99
3.1	Digital Representation of Information	100
	3.1.1 <i>Block-Oriented Information</i>	101
	3.1.2 <i>Stream Information</i>	103
3.2	Why Digital Communications?	107
	3.2.1 <i>Comparison of Analog and Digital Transmission</i>	107
	3.2.2 <i>Basic Properties of Digital Transmission Systems</i>	110
3.3	Digital Representation of Analog Signals	114
	3.3.1 <i>Bandwidth of Analog Signals</i>	115
	3.3.2 <i>Sampling of an Analog Signal</i>	118
	3.3.3 <i>Digital Transmission of Analog Signals</i>	119
	◆ 3.3.4 <i>SNR Performance of Quantizers</i>	123
3.4	Characterization of Communication Channels	124
	3.4.1 <i>Frequency Domain Characterization</i>	124
	3.4.2 <i>Time Domain Characterization</i>	128
3.5	Fundamental Limits in Digital Transmission	130
	3.5.1 <i>The Nyquist Signaling Rate</i>	130
	3.5.2 <i>The Shannon Channel Capacity</i>	132
3.6	Line Coding	135
3.7	Modems and Digital Modulation	138
	3.7.1 <i>Binary Phase Modulation</i>	140
	3.7.2 <i>QAM and Signal Constellations</i>	141
	3.7.3 <i>Telephone Modem Standards</i>	144
3.8	Properties of Media and Digital Transmission Systems	146
	3.8.1 <i>Twisted Pair</i>	148
	3.8.2 <i>Coaxial Cable</i>	152
	3.8.3 <i>Optical Fiber</i>	156
	3.8.4 <i>Radio Transmission</i>	162
	3.8.5 <i>Infrared Light</i>	166
3.9	Error Detection and Correction	166
	3.9.1 <i>Error Detection</i>	167
	3.9.2 <i>Two-Dimensional Parity Checks</i>	171
	3.9.3 <i>Internet Checksum</i>	172
	3.9.4 <i>Polynomial Codes</i>	173
	3.9.5 <i>Standardized Polynomial Codes</i>	177
	3.9.6 <i>Error-Detecting Capability of a Polynomial Code</i>	178
	◆ 3.9.7 <i>Linear Codes</i>	180
	◆ 3.9.8 <i>Error Correction</i>	186
	Summary	190
	Checklist of Important Terms	191
	Further Reading	192
	Problems	192
	Appendix 3A: Asynchronous Data Transmission	201
	Appendix 3B: Fourier Series	203
	Appendix 3C: Sampling Theorem	204

4	Circuit-Switching Networks	206
4.1	Multiplexing	207
4.1.1	<i>Frequency-Division Multiplexing</i>	208
4.1.2	<i>Time-Division Multiplexing</i>	209
4.1.3	<i>Wavelength-Division Multiplexing</i>	212
4.2	SONET	213
4.2.1	<i>SONET Multiplexing</i>	214
4.2.2	<i>SONET Frame Structure</i>	216
4.3	Transport Networks	221
4.3.1	<i>SONET Networks</i>	222
4.3.2	<i>Optical Transport Networks</i>	231
4.4	Circuit Switches	234
4.4.1	<i>Space-Division Switches</i>	235
4.4.2	<i>Time-Division Switches</i>	238
4.5	The Telephone Network	242
4.5.1	<i>Transmission Facilities</i>	245
4.5.2	<i>End-to-End Digital Services</i>	248
4.6	Signaling	250
4.6.1	<i>Signaling in the Telephone Network</i>	250
4.6.2	<i>Signaling System #7 Architecture</i>	253
◆ 4.7	Traffic and Overload Control in Telephone Networks	255
4.7.1	<i>Concentration</i>	256
4.7.2	<i>Routing Control</i>	259
4.7.3	<i>Overload Controls</i>	261
4.8	Cellular Telephone Networks	263
	Summary	270
	Checklist of Important Terms	270
	Further Reading	271
	Problems	272
5	Peer-to-Peer Protocols and Data Link Layer	282
	Part I: Peer-to-Peer Protocols	283
5.1	Peer-to-Peer Protocols and Service Models	284
5.1.1	<i>Service Models</i>	284
5.1.2	<i>Examples of Services</i>	286
5.1.3	<i>End to End versus Hop by Hop</i>	288
5.2	ARQ Protocols and Reliable Data Transfer Service	291
5.2.1	<i>Stop-and-Wait ARQ</i>	293
5.2.2	<i>Go-Back-N ARQ</i>	300
5.2.3	<i>Selective Repeat ARQ</i>	309
5.3	Other Peer-to-Peer Protocols	315
5.3.1	<i>Sliding-Window Flow Control</i>	315
5.3.2	<i>Timing Recovery for Synchronous Services</i>	317
5.3.3	<i>TCP Reliable Stream Service and Flow Control</i>	320

Part II:	Data Link Controls	324
5.4	Framing	325
5.5	Point-to-Point Protocol	329
5.6	HDLC Data Link Control	333
5.6.1	<i>Data Link Services</i>	333
5.6.2	<i>HDLC Configurations and Transfer Modes</i>	335
5.6.3	<i>HDLC Frame Format</i>	335
5.6.4	<i>Typical Frame Exchanges</i>	337
◆ 5.7	Link Sharing Using Packet Multiplexers	340
5.7.1	<i>Statistical Multiplexing</i>	340
5.7.2	<i>Speech Interpolation and the Multiplexing of Packetized Speech</i>	348
	Summary	352
	Checklist of Important Terms	353
	Further Reading	354
	Problems	354
	Appendix 5A: Derivation of Efficiency of ARQ Protocols	365
6	Medium Access Control Protocols and Local Area Networks	368
Part I:	Medium Access Control Protocols	370
6.1	Multiple Access Communications	370
6.2	Random Access	377
6.2.1	<i>ALOHA</i>	378
6.2.2	<i>Slotted ALOHA</i>	380
6.2.3	<i>Carrier Sense Multiple Access</i>	381
6.2.4	<i>Carrier Sense Multiple Access with Collision Detection</i>	384
6.3	Scheduling Approaches to Medium Access Control	387
6.3.1	<i>Reservation Systems</i>	388
6.3.2	<i>Polling</i>	390
6.3.3	<i>Token-Passing Rings</i>	393
6.3.4	<i>Comparison of Scheduling Approaches in Medium Access Control</i>	396
6.3.5	<i>Comparison of Random Access and Scheduling Medium Access Controls</i>	397
◆ 6.4	Channelization	398
6.4.1	<i>FDMA</i>	399
6.4.2	<i>TDMA</i>	400
6.4.3	<i>CDMA</i>	401
6.4.4	<i>Channelization in Telephone Cellular Networks</i>	408
◆ 6.5	Delay Performance of MAC and Channelization Schemes	415
6.5.1	<i>Performance of Channelization Techniques with Bursty Traffic</i>	416
6.5.2	<i>Performance of Polling and Token Ring Systems</i>	418
6.5.3	<i>Random Access and CSMA-CD</i>	421

Part II: Local Area Networks	421
6.6 LAN Protocols	421
6.6.1 LAN Structure	422
6.6.2 The Medium Access Control Sublayer	423
6.6.3 The Logical Link Control Sublayer	425
6.7 Ethernet and IEEE 802.3 LAN Standard	427
6.7.1 Ethernet Protocol	427
6.7.2 Frame Structure	429
6.7.3 Physical Layers	431
6.7.4 Fast Ethernet	434
6.7.5 Gigabit Ethernet	435
6.7.6 10 Gigabit Ethernet	436
6.8 Token-Ring and IEEE 802.5 LAN Standard	438
6.8.1 Token-Ring Protocol	439
6.8.2 Frame Structure	442
6.9 FDDI	444
6.10 Wireless LANs and IEEE 802.11 Standard	446
6.10.1 Ad hoc and Infrastructure Networks	449
6.10.2 Frame Structure and Addressing	451
6.10.3 Medium Access Control	453
◆ 6.10.4 Physical Layers	459
6.11 LAN Bridges and Ethernet Switches	465
6.11.1 Transparent Bridges	468
6.11.2 Source Routing Bridges	474
6.11.3 Mixed-Media Bridges	477
6.11.4 Virtual LANs	477
Summary	479
Checklist of Important Terms	480
Further Reading	481
Problems	482
7 Packet-Switching Networks	490
7.1 Network Services and Internal Network Operation	492
7.2 Packet Network Topology	496
7.3 Datagrams and Virtual Circuits	501
7.3.1 Connectionless Packet Switching	502
7.3.2 Virtual-Circuit Packet Switching	507
7.3.3 Structure of a Packet Switch	511
7.4 Routing in Packet Networks	515
7.4.1 Routing Algorithm Classification	516
7.4.2 Routing Tables	517
7.4.3 Hierarchical Routing	518
7.4.4 Specialized Routing	520

7.5	Shortest-Path Routing	522
	7.5.1 <i>The Bellman-Ford Algorithm</i>	523
	7.5.2 <i>Dijkstra's Algorithm</i>	530
	7.5.3 <i>Source Routing versus Hop-by-Hop Routing</i>	532
	7.5.4 <i>Link-State Routing versus Distance-Vector Routing</i>	533
7.6	ATM Networks	534
7.7	Traffic Management at the Packet Level	539
	7.7.1 <i>FIFO and Priority Queues</i>	540
	7.7.2 <i>Fair Queueing</i>	542
	7.7.3 <i>Weighted Fair Queueing</i>	545
	7.7.4 <i>Random Early Detection</i>	548
7.8	Traffic Management at the Flow Level	549
	7.8.1 <i>Open-Loop Control</i>	550
	7.8.2 <i>Closed-Loop Control</i>	558
7.9	Traffic Management at the Flow-Aggregate Level	560
	Summary	561
	Checklist of Important Terms	562
	Further Reading	562
	Problems	563
8	TCP/IP	572
8.1	The TCP/IP Architecture	573
8.2	The Internet Protocol	576
	8.2.1 <i>IP Packet</i>	576
	8.2.2 <i>IP Addressing</i>	579
	8.2.3 <i>Subnet Addressing</i>	581
	8.2.4 <i>IP Routing</i>	583
	8.2.5 <i>Classless Interdomain Routing (CIDR)</i>	584
	8.2.6 <i>Address Resolution</i>	585
	8.2.7 <i>Reverse Address Resolution</i>	587
	8.2.8 <i>Fragmentation and Reassembly</i>	587
	8.2.9 <i>ICMP: Error and Control Messages</i>	589
8.3	IPv6	592
	8.3.1 <i>Header Format</i>	593
	8.3.2 <i>Network Addressing</i>	594
	8.3.3 <i>Extension Headers</i>	597
	8.3.4 <i>Migration Issues from IPv4 to IPv6</i>	599
8.4	User Datagram Protocol	601
8.5	Transmission Control Protocol	602
	8.5.1 <i>TCP Operation and Reliable Stream Service</i>	602
	8.5.2 <i>TCP Protocol</i>	605
	8.5.3 <i>TCP Congestion Control</i>	617

8.6	Internet Routing Protocols	620
	8.6.1 <i>Routing Information Protocol</i>	621
	8.6.2 <i>Open Shortest Path First</i>	622
	8.6.3 <i>Border Gateway Protocol</i>	631
8.7	Multicast Routing	640
	8.7.1 <i>Reverse-Path Broadcasting</i>	641
	8.7.2 <i>Internet Group Management Protocol</i>	643
	8.7.3 <i>Reverse-Path Multicasting</i>	644
	8.7.4 <i>Distance-Vector Multicast Routing Protocol</i>	646
8.8	DHCP, NAT, and Mobile IP	646
	8.8.1 <i>Dynamic Host Configuration Protocol</i>	646
	8.8.2 <i>Network Address Translation</i>	647
	8.8.3 <i>Mobile IP</i>	647
	Summary	650
	Checklist of Important Terms	650
	Further Reading	651
	Problems	652
9	ATM Networks	660
9.1	Why ATM?	661
9.2	BISDN Reference Model	662
9.3	ATM Layer	665
	9.3.1 <i>ATM Cell Header</i>	666
	9.3.2 <i>Virtual Connections</i>	668
	9.3.3 <i>QoS Parameters</i>	668
	9.3.4 <i>Traffic Descriptors</i>	670
	9.3.5 <i>ATM Service Categories</i>	671
	9.3.6 <i>Traffic Contracts, Connection Admission Control, and Traffic Management</i>	673
9.4	ATM Adaptation Layer	674
	9.4.1 <i>AAL1</i>	675
	9.4.2 <i>AAL2</i>	678
	9.4.3 <i>AAL3/4</i>	680
	9.4.4 <i>AAL5</i>	683
	9.4.5 <i>Signaling AAL</i>	684
	9.4.6 <i>Applications, AALs, and ATM Service Categories</i>	686
9.5	ATM Signaling	688
	9.5.1 <i>ATM Addressing</i>	688
	9.5.2 <i>UNI Signaling</i>	690
	9.5.3 <i>PNNI Signaling</i>	693
9.6	PNNI Routing	694
9.7	Classical IP Over ATM	697
	Summary	699
	Checklist of Important Terms	699
	Further Reading	699
	Problems	700

10	Advanced Network Architectures	705
10.1	Integrated Services in the Internet	706
10.1.1	<i>Guaranteed Service</i>	707
10.1.2	<i>Controlled-Load Service</i>	708
10.2	RSVP	708
10.2.1	<i>Receiver-Initiated Reservation</i>	710
10.2.2	<i>Reservation Merging</i>	711
10.2.3	<i>Reservation Styles</i>	712
10.2.4	<i>Soft State</i>	714
10.2.5	<i>RSVP Message Format</i>	715
10.3	Differentiated Services	717
10.3.1	<i>DS Field</i>	718
10.3.2	<i>Per-Hop Behaviors</i>	719
10.3.3	<i>Traffic Conditioner</i>	720
10.3.4	<i>Bandwidth Broker</i>	721
10.4	Network Interconnection Models	722
10.4.1	<i>Overlay Model</i>	723
10.4.2	<i>Peer-to-Peer Model</i>	725
10.5	MPLS	727
10.5.1	<i>Fundamentals of Labels</i>	729
10.5.2	<i>Label Stack and LSP Hierarchy</i>	730
10.5.3	<i>VC Merging</i>	732
10.5.4	<i>Label Distribution Protocols</i>	732
10.5.5	<i>MPLS Support for Virtual Networks</i>	735
10.5.6	<i>Survivability</i>	736
10.5.7	<i>GMPLS</i>	738
10.6	Real-Time Transport Protocol	740
10.6.1	<i>RTP Scenarios and Terminology</i>	741
10.6.2	<i>RTP Packet Format</i>	743
10.6.3	<i>RTP Control Protocol (RTCP)</i>	745
10.7	Session Control Protocols	747
10.7.1	<i>Session Initiation Protocol</i>	747
10.7.2	<i>H.323 Multimedia Communication Systems</i>	751
10.7.3	<i>Media Gateway Control Protocols</i>	753
	Summary	755
	Checklist of Important Terms	756
	Further Reading	756
	Problems	757
11	Security Protocols	763
11.1	Security and Cryptographic Algorithms	763
11.1.1	<i>Applications of Cryptography to Security</i>	765
11.1.2	<i>Key Distribution</i>	770
11.2	Security Protocols	773
11.2.1	<i>Application Scenarios</i>	773
11.2.2	<i>Types of Security Service</i>	775

11.2.3	<i>Setting Up a Security Association</i>	778
11.2.4	<i>IPSec</i>	780
11.2.5	<i>Secure Sockets Layer and Transport Layer Security</i>	782
11.2.6	<i>802.11 and Wired Equivalent Privacy</i>	788
11.3	Cryptographic Algorithms	790
11.3.1	<i>DES</i>	790
11.3.2	<i>RSA</i>	793
	Summary	794
	Checklist of Important Terms	795
	Further Reading	796
	Problems	797
12	Multimedia Information	800
12.1	Lossless Data Compression	801
12.1.1	<i>Huffman Codes</i>	801
12.1.2	<i>Run-Length Codes</i>	805
12.1.3	<i>Adaptive Data Compression Codes</i>	810
12.2	Compression of Analog Signals	812
12.2.1	<i>Adaptive Quantizers</i>	812
12.2.2	<i>Predictive Coding</i>	813
12.2.3	<i>Transform and Subband Coding</i>	818
12.3	Image and Video Coding	819
12.3.1	<i>Discrete Cosine Transform Coding</i>	819
12.3.2	<i>The JPEG Image-Coding Standard</i>	820
12.3.3	<i>Compression of Video Signals</i>	823
12.3.4	<i>The MPEG Video-Coding Standards</i>	826
12.3.5	<i>MPEG Multiplexing</i>	828
	Summary	830
	Checklist of Important Terms	830
	Further Reading	830
	Problems	831
	Epilogue	837
