

Woodhead Publishing Series in Food Science,
Technology and Nutrition

Food Processing Technology

Principles and Practice

Fourth Edition

P.J. Fellows

Consultant Food Technologist

ELSEVIER

AMSTERDAM • BOSTON • HEIDELBERG • LONDON
NEW YORK • OXFORD • PARIS • SAN DIEGO
SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO

Contents

Biography	xi
Acknowledgements	xiii
Introduction	xv
Part I Basic Principles	1
1 Properties of food and principles of processing	3
1.1 Composition of foods	3
1.2 Physical properties	35
1.3 Biochemical properties	50
1.4 Food quality, safety, spoilage and shelf-life	54
1.5 Quality assurance: management of food quality and safety	90
1.6 Process monitoring and control	105
1.7 Hygienic design and cleaning of processing facilities and equipment	126
1.8 Engineering principles	143
References	180
Recommended further reading	200
Part II Ambient Temperature Processing	201
2 Raw material preparation	203
2.1 Cooling crops and carcasses	203
2.2 Cleaning foods	210
2.3 Sorting and grading	219
2.4 Peeling	229
References	231
Recommended further reading	234
3 Extraction and separation of food components	235
3.1 Centrifugation	236
3.2 Filtration	245
3.3 Expression	252
3.4 Extraction using solvents	259
3.5 Membrane separation	266
3.6 Effects on foods and microorganisms	283
3.7 Effect on microorganisms	283
References	284
Recommended further reading	289

4	Size reduction	291
4.1	Size reduction of solid foods	292
4.2	Size reduction in liquid foods	314
	References	324
	Recommended further reading	328
5	Mixing, forming and coating	329
5.1	Mixing	330
5.2	Forming	353
5.3	Coating foods	364
	References	380
	Recommended further reading	386
6	Food biotechnology	387
6.1	Fermentation technology	387
6.2	Microbial enzymes	406
6.3	Bacteriocins and antimicrobial ingredients	410
6.4	Functional foods	411
6.5	Genetic modification	414
6.6	Nutritional genomics	421
	References	422
	Recommended further reading	430
7	Minimal processing methods	431
7.1	Introduction	431
7.2	High-pressure processing	434
7.3	Irradiation	451
7.4	Ozone	467
7.5	Pulsed electric field processing	473
7.6	Pulsed light and ultraviolet light	482
7.7	Power ultrasound	487
7.8	Other minimal processing methods under development	490
	References	498
	Recommended further reading	511
Part III Processing by Application of Heat		513
8	Overview of heat processing	515
8.1	Sources of heat and methods of application to foods	515
8.2	Energy use and methods to reduce energy consumption	518
8.3	Types of heat exchanger	520
	References	521
	Recommended further reading	522

Part III.A	Heat Processing Using Steam or Hot Water	523
9	Blanching	525
	9.1 Theory	525
	9.2 Equipment	527
	9.3 Effect on foods	534
	9.4 Effect on microorganisms	536
	References	536
	Recommended further reading	538
10	Industrial cooking	539
	10.1 Cooking using moist heat	539
	10.2 Sous vide cooking	546
	10.3 Cooking using dry heat	557
	References	560
	Recommended further reading	562
11	Pasteurisation	563
	11.1 Theory	563
	11.2 Equipment	569
	11.3 Effects on foods	578
	References	578
	Recommended further reading	580
12	Heat sterilisation	581
	12.1 In-container sterilisation	582
	12.2 Ultrahigh-temperature/aseptic processes	601
	12.3 Effects on foods	612
	References	618
	Recommended further reading	622
13	Evaporation and distillation	623
	13.1 Evaporation	623
	13.2 Distillation	647
	References	656
	Recommended further reading	658
Part III.B	Processing Using Hot Air or Heated Surfaces	659
14	Dehydration	661
	14.1 Theory	661
	14.2 Equipment	679
	14.3 Control of dryers	703
	14.4 Rehydration	705

14.5	Effects on foods and microorganisms	705
	References	711
	Recommended further reading	716
15	Smoking	717
15.1	Theory	717
15.2	Processing	722
15.3	Effects on foods	726
15.4	Effects on microorganisms	728
	References	730
	Recommended further reading	732
16	Baking and roasting	733
16.1	Theory	733
16.2	Equipment	736
16.3	Effects on foods and microorganisms	744
	References	749
	Recommended further reading	752
17	Extrusion cooking	753
17.1	Theory	755
17.2	Equipment	761
17.3	Applications	768
17.4	Effect on foods and microorganisms	774
	References	777
	Recommended further reading	780
Part III.C Heat Processing Using Hot Oils		781
18	Frying	783
18.1	Theory	785
18.2	Equipment	791
18.3	Types of oils used for frying	798
18.4	Effects of frying on oils	800
18.5	Effects of frying on foods	802
18.6	Effects of frying on microorganisms	805
	References	805
	Recommended further reading	810
Part III.D Processing by Direct and Radiated Energy		811
19	Dielectric, ohmic and infrared heating	813
19.1	Dielectric heating	813
19.2	Ohmic heating	831

19.3 Infrared heating	838
References	840
Recommended further reading	844
Part IV Processing by Removal of Heat	845
20 Heat removal by refrigeration	847
20.1 Theory	847
20.2 Equipment	859
References	865
Recommended further reading	868
21 Chilling	869
21.1 Theory	871
21.2 Equipment	875
21.3 Applications to processed foods	878
21.4 Effects on foods	880
21.5 Effects on microorganisms	880
References	882
Recommended further reading	884
22 Freezing	885
22.1 Theory	886
22.2 Equipment	898
22.3 Effects on foods	915
22.4 Effects on microorganisms	922
References	922
Recommended further reading	928
23 Freeze drying and freeze concentration	929
23.1 Freeze drying	930
23.2 Freeze concentration	940
References	943
Recommended further reading	945
Part V Postprocessing Operations	947
24 Packaging	949
24.1 Theory	953
24.2 Types of packaging materials	963
24.3 Packaging materials for modified atmosphere packaging (MAP)	992
24.4 Printing	1001

24.5	Packaging developments	1005
24.6	Environmental and regulatory considerations	1023
	References	1032
	Recommended further reading	1044
25	Filling and sealing of containers	1045
25.1	Rigid and semirigid containers	1045
25.2	Flexible containers	1060
25.3	Twist-wrapping	1066
25.4	Shrink-wrapping and stretch-wrapping	1068
25.5	Tamper-evident and tamper-resistant closures	1069
25.6	Labelling	1069
25.7	Checkweighing	1071
25.8	Metal detection	1072
	References	1073
	Recommended further reading	1076
26	Materials handling, storage and distribution	1077
26.1	Materials handling	1077
26.2	Storage	1087
26.3	Logistics and control of storage and distribution	1099
	References	1104
	Recommended further reading	1108
Index		1109
