## Part I Introduction

|   |    |
|---|----|
| <b>1 New Product Development: systematic industrial technology</b> .. | 3  |
| <i>Mary Earle and Richard Earle, New Zealand</i>                      |    |
| 1.1 Introduction .....  | 4  |
| 1.2 Food products in the food chain .....                             | 5  |
| 1.3 Strategy and management in different situations .....             | 7  |
| 1.4 Product Development Processes .....                               | 9  |
| 1.5 Technological development .....                                   | 12 |
| 1.6 Consumer and market research .....                                | 14 |
| 1.7 Managing the Product Development Process .....                    | 16 |
| 1.8 Educating the next generation of product developers .....         | 18 |
| 1.9 New Product Development: a technology .....                       | 19 |

## Part II Product development strategy and management

|  |    |
|--|----|
| <b>2 The multinational food business – strategic, organizational and management issues for product development</b> ..... | 23 |
| <i>Dick Inwood, Australia and Europe</i>   |    |
| 2.1 Introduction .....   | 24 |
| 2.2 Multinational food businesses .....  | 24 |

|          |   |           |
|----------|---|-----------|
| 2.3      | Recent history shaping the behaviour of multinational food businesses .....                         | 27        |
| 2.4      | Current state of innovation in multinational food businesses .                                      | 28        |
| 2.5      | The roles of the research and development manager .....   | 29        |
| 2.6      | Organization of research and development .....  | 31        |
| 2.7      | Marketing of research and development .....   | 35        |
| 2.8      | Research and development and its contribution to corporate growth .....                             | 37        |
| 2.9      | The New Product Development programme – establishing the investment in the ‘R’ of R&D .....         | 38        |
| 2.10     | Bundling .....  | 39        |
| 2.11     | The research and development role .....   | 41        |
| 2.12     | Organizing and acquiring knowledge .....  | 46        |
| 2.13     | Multinational research and development organization .....   | 48        |
| 2.14     | Problems met and lessons learnt .....   | 51        |
| 2.15     | References and further reading .....  | 51        |
| <b>3</b> | <b>The food research centre – assisting small and medium sized industry .....</b>                   | <b>53</b> |
|          | <i>Paiboon Thammarutwasik, Thailand</i>   |           |
| 3.1      | Introduction .....  | 54        |
| 3.2      | Product development in the research centre .....  | 54        |
| 3.3      | Guidelines for technology transfer in the Agro-Industry Development Centre for Export (ADCET) ..... | 56        |
| 3.4      | Cost estimation and return on investment .....  | 58        |
| 3.5      | Intellectual property .....   | 59        |
| 3.6      | Communication with clients .....  | 60        |
| 3.7      | Case Study 1 in ADCET related to food product development .....                                     | 60        |
| 3.8      | Case Study 2 in ADCET related to food process development .....                                     | 61        |
| 3.9      | Problems met and lessons learnt .....   | 65        |
| 3.10     | References .....  | 65        |
| <b>4</b> | <b>The supermarket industry – private label brand development .</b>                                 | <b>67</b> |
|          | <i>Sam Adapa and Kumaresh Chakraborty, USA</i>  |           |
| 4.1      | Introduction .....  | 68        |
| 4.2      | Development of store brands and brand equity .....  | 68        |
| 4.3      | Product Development Process for private brands .....  | 73        |
| 4.4      | New Product Development leadership culture .....  | 75        |
| 4.5      | Future trends and evolution in food retailing .....   | 76        |
| 4.6      | Pursuit of global food retailing strategies .....   | 78        |
| 4.7      | Problems met and lessons learnt .....   | 79        |
| 4.8      | References and bibliography .....   | 80        |

|   |           |
|---|-----------|
| <b>5 Rural agroenterprise – cassava development in Latin America</b>                | <b>81</b> |
| <i>Bill Edwardson and Rupert Best, Canada</i>                                       |           |
| 5.1 Introduction .....  | 82        |
| 5.2 Background .....  | 82        |
| 5.3 Cassava development in Colombia .....   | 83        |
| 5.4 Product development strategy for cassava .....                                  | 85        |
| 5.5 Product Development Process for cassava flour .....                             | 86        |
| 5.6 Phase 1. Research on the product, the process and the<br>market .....           | 89        |
| 5.7 Phase 2. Pilot plant establishment and test marketing of<br>cassava flour ..... | 90        |
| 5.8 Phase 3. Commercial development .....   | 92        |
| 5.9 Problems met and lessons learnt .....   | 93        |
| 5.10 Impact .....   | 95        |
| 5.11 References .....   | 97        |

### Part III Product Development Process

|  |            |
|--|------------|
| <b>6 From farm to consumer – pioneering an early<br/>nutriceutical, Stolle milk</b>        | <b>101</b> |
| <i>David Woodhams, New Zealand</i>   |            |
| 6.1 Introduction .....   | 102        |
| 6.2 Setting up operations in New Zealand .....   | 104        |
| 6.3 Government requirements .....  | 106        |
| 6.4 Research and development in New Zealand .....  | 108        |
| 6.5 Initial production .....   | 111        |
| 6.6 Overall outcomes of the 1988/89 season .....   | 114        |
| 6.7 Review of the 1988/89 season and planning for the 1989/90<br>season .....              | 117        |
| 6.8 Commercial production 1989/90 .....  | 121        |
| 6.9 Product launch in Taiwan .....   | 123        |
| 6.10 More recent history .....   | 123        |
| 6.11 Problems met and lessons learnt .....   | 124        |
| 6.12 References .....  | 126        |
| <b>7 From concept to international company – development of a<br/>new pet food product</b> | <b>127</b> |
| <i>Brian Wilkinson and John Palamountain, New Zealand</i>                                  |            |
| 7.1 Introduction .....   | 128        |
| 7.2 Background .....   | 129        |
| 7.3 Product concept .....  | 129        |
| 7.4 Product formulation and process development .....                                      | 130        |
| 7.5 Storage tests .....  | 133        |
| 7.6 Equipment selection and production development .....                                   | 134        |

|          |  |            |
|----------|--|------------|
| 7.7      | Changing consumers .....   | 136        |
| 7.8      | Product testing .....  | 139        |
| 7.9      | Market development .....   | 142        |
| 7.10     | Patenting, trademarking and licensing .....  | 144        |
| 7.11     | Problems met and lessons learnt .....  | 146        |
| 7.12     | References and bibliography .....  | 148        |
| <b>8</b> | <b>From kitchen to market – first came the oat cake, now the<br/>oat bake, a traditional product for today’s consumers .....</b> | <b>149</b> |
|          | <i>Liz (Ashworth) Bowie, Scotland</i>  |            |
| 8.1      | Introduction .....   | 150        |
| 8.2      | Initial idea .....   | 150        |
| 8.3      | Protection of the idea .....   | 151        |
| 8.4      | Home kitchen development .....   | 151        |
| 8.5      | Market research .....  | 152        |
| 8.6      | Initial factory trials .....   | 154        |
| 8.7      | Further kitchen work .....   | 155        |
| 8.8      | Co-operation with Aberdeen company .....   | 155        |
| 8.9      | The commercial partner: Simmers of Edinburgh .....   | 156        |
| 8.10     | Initial product and packaging development .....  | 156        |
| 8.11     | Manufacture .....  | 158        |
| 8.12     | Shelf life testing .....   | 159        |
| 8.13     | Marketing development .....  | 159        |
| 8.14     | Launch of product .....  | 161        |
| 8.15     | Evaluation of launch .....   | 161        |
| 8.16     | Problems met and lessons learnt .....  | 161        |
| 8.17     | Conclusions .....  | 161        |
| <b>9</b> | <b>From basic research to marketable product – success and<br/>failure of instant baked potatoes .....</b>                       | <b>163</b> |
|          | <i>Buncha Oraikul, Canada</i>  |            |
| 9.1      | French fry industry and waste problems .....   | 164        |
| 9.2      | Product development challenge .....  | 164        |
| 9.3      | Product conception .....   | 165        |
| 9.4      | Development of prototype product .....   | 166        |
| 9.5      | Market assessment of prototype product .....   | 169        |
| 9.6      | Fine-tuning the product .....  | 171        |
| 9.7      | Process development .....  | 172        |
| 9.8      | Pilot plant development .....  | 172        |
| 9.9      | Production trial .....   | 177        |
| 9.10     | Consumer test .....  | 179        |
| 9.11     | Intellectual property development .....  | 179        |
| 9.12     | Commercial trial .....   | 180        |
| 9.13     | Problems met and lessons learnt .....  | 183        |
| 9.14     | References .....   | 184        |

**Part IV Technological development**

|  |     |
|--|-----|
| <b>10 Radical process development – cutting techniques for an aerated sugar confectionery</b> .....  | 187 |
| <i>Rex Perreau, UK</i>   |     |
| 10.1 Introduction .....  | 188 |
| 10.2 The history .....   | 188 |
| 10.3 Methods explored for cutting of sugar glass foam .....  | 191 |
| 10.4 Pilot plant development of liquid jet cutting of sugar foam ..  | 192 |
| 10.5 The full-scale plant .....  | 197 |
| 10.6 Problems met and lessons learnt .....   | 199 |
| 10.7 Conclusions .....   | 201 |
| <b>11 Process innovation from research and development to production in a large company – development and commercialisation of a low temperature extrusion process</b> ..... | 202 |
| <i>Andrew Russell, UK</i>  |     |
| 11.1 Introduction .....  | 203 |
| 11.2 Invention .....   | 204 |
| 11.3 Building a business case .....  | 209 |
| 11.4 Equipment development and scale up .....  | 211 |
| 11.5 Building the science base .....   | 212 |
| 11.6 Developing and testing prototype extruder in the factory ....   | 215 |
| 11.7 Factory implementation .....  | 217 |
| 11.8 Roll-out .....  | 218 |
| 11.9 Problems met and lessons learnt .....   | 219 |
| 11.10 Further reading .....  | 221 |
| 11.11 Acknowledgements .....   | 222 |
| 11.12 References .....   | 222 |
| <b>12 Up-scaling from development to production by small manufacturers – fishing, baking and sauce industries</b> .....  | 223 |
| <i>Torben Sorensen, New Zealand</i>  |     |
| 12.1 Introduction .....  | 224 |
| 12.2 Case study 1: Raw materials that vary .....   | 225 |
| 12.3 Case study 2: The importance of correctly designed facilities ..  | 231 |
| 12.4 Case study 3: The need for qualified and trained people in product and process development .....  | 235 |
| 12.5 References .....  | 243 |
| <b>13 Spirit of entrepreneurship in commercialisation – product and process development of coconut beverage mix</b> .....  | 244 |
| <i>Choon Nghee Gwee, Malaysia</i>  |     |
| 13.1 Introduction .....  | 245 |
| 13.2 Entrepreneur's dream .....  | 245 |

|       |   |     |
|-------|---|-----|
| 13.3  | Product idea .....  | 246 |
| 13.4  | Product design qualities .....  | 247 |
| 13.5  | Process development: improving the solubility of coconut cream powder ..... | 249 |
| 13.6  | Process development: other coconut cream powder problems .....              | 251 |
| 13.7  | Testing of prototype product .....  | 252 |
| 13.8  | Sourcing capital .....  | 252 |
| 13.9  | Marketing development .....   | 253 |
| 13.10 | Post-launch activities .....  | 256 |
| 13.11 | Problems met and lessons learnt .....                                       | 258 |
| 13.12 | Acknowledgements .....  | 258 |
| 13.13 | References .....  | 258 |

**Part V Consumer and market research**

|           |  |            |
|-----------|--|------------|
| <b>14</b> | <b>Sensory testing in the Product Development Process – the sensory researcher as a trusted advisor .....</b>                            | <b>261</b> |
|           | <i>Anne Goldman and Elizabeth O’Neil, Canada</i>   |            |
| 14.1      | Introduction .....   | 262        |
| 14.2      | Scenario 1 – The diagnostic technician .....   | 263        |
| 14.3      | The changing business environment .....  | 264        |
| 14.4      | The effects of the changing business environment in the food company .....   | 264        |
| 14.5      | Some results of the changing business environment .....  | 266        |
| 14.6      | Scenario 2 – The research coach .....  | 269        |
| 14.7      | Scenario 3 – The trusted advisor .....   | 270        |
| 14.8      | Establishment of mutual trust in the food company .....  | 271        |
| 14.9      | Problems met and lessons learnt in developing and maintaining a model of trust .....   | 274        |
| 14.10     | References .....   | 276        |
| <b>15</b> | <b>Consumer research in the early stages of New Product Development – market-oriented development of meal complement beverages .....</b> | <b>277</b> |
|           | <i>Joe Bogue and Douglas Sorenson, Ireland</i>   |            |
| 15.1      | Introduction .....   | 278        |
| 15.2      | Market dynamics and New Product Development trends: meal complement beverages .....  | 279        |
| 15.3      | Concept ideation and development during the early stages of the New Product Development process .....                                    | 281        |
| 15.4      | Selection of methods for consumer research on meal complement beverages .....  | 282        |
| 15.5      | Concept screening and development for meal complement beverages .....  | 286        |

|  |   |            |
|--|---|------------|
| 15.6   | Product concept optimisation and refinement .....   | 288        |
| 15.7   | Final product concept and its use in product design .....   | 295        |
| 15.8   | Problems met and lessons learnt .....   | 296        |
| 15.9   | Summary .....   | 297        |
| 15.10  | References .....  | 298        |
| <b>16</b>                                      | <b>Consumer research in product design – market-oriented<br/>development of healthy vegetable-based food for children</b> ..... | <b>301</b> |
|  | <i>Helle Alsted Søndergaard and Merete Edelenbos, Denmark</i>   |            |
| 16.1   | Introduction .....  | 302        |
| 16.2   | The background .....  | 303        |
| 16.3   | The means-end chain (MEC) theory and practice .....   | 304        |
| 16.4   | Study design .....  | 305        |
| 16.5   | Generation of new ideas in the early stages of the New<br>Product Development process .....                                     | 306        |
| 16.6   | The development of new product concepts by the New<br>Product Development team .....  | 308        |
| 16.7   | Testing product concepts in the later phases of the New<br>Product Development process .....                                    | 309        |
| 16.8   | Selection of products for further development .....   | 313        |
| 16.9   | Problems met and lessons learnt .....   | 313        |
| 16.10  | Further information .....   | 315        |
| 16.11  | References .....  | 315        |
| <b>17</b>                                      | <b>Customer-centric product development – supermarket private<br/>label brands</b> .....  | <b>317</b> |
|  | <i>Andrea Currie, Australia</i>   |            |
| 17.1   | Introduction .....  | 318        |
| 17.2   | Step 1 – Know what they want .....  | 319        |
| 17.3   | Step 2 – Design what they want .....  | 323        |
| 17.4   | Step 3 – Tell them you have what they want .....  | 327        |
| 17.5   | Step 4 – Keep checking that you are still providing what<br>they want .....   | 328        |
| 17.6   | Left field ideas, individual opinions, sudden opportunities –<br>how they fit .....   | 330        |
| <b>Part VI Product development in practice</b> |   |            |
| <b>18</b>                                      | <b>Product design, process development and manufacturing –<br/>a roadmap for the technologist</b> .....                         | <b>333</b> |
|  | <i>Ed Neff, Australia</i>   |            |
| 18.1   | Introduction .....  | 334        |
| 18.2   | Managing the Product Development Process .....  | 334        |
| 18.3   | Company strategy and product development management ...   | 339        |
| 18.4   | Stage 1 – feasibility .....   | 341        |

|                    |   |            |
|--------------------|---|------------|
