# CONTENTS

## CHAPTER 1

INTRODUCTION . . . . .	1
1.1 ENVIRONMENTAL SCIENCE - AN INTERDISCIPLINARY FIELD .	1
1.2 RELATION BETWEEN ENVIRONMENTAL SCIENCE AND TECHNOLOGY, MANAGEMENT, ECOLOGY AND MODELLING . . . . .	3
1.3 LEVELS OF ORGANIZATION . . . . .	5
1.4 THE ENVIRONMENTAL CRISIS . . . . .	7
1.5 FOCUS ON PRINCIPLES OF ENVIRONMENTAL SCIENCE . . . . .	11
1.6 PRINCIPLES OF ENVIRONMENTAL TECHNOLOGY . . . . .	13

## PART A

### PRINCIPLES OF ENVIRONMENTAL SCIENCE

## CHAPTER 2

MASS CONSERVATION . . . . .	17
2.1 EVERYTHING MUST GO SOMEWHERE . . . . .	17
2.2 THRESHOLD LEVELS . . . . .	21
2.3 BASIC CONCEPTS OF MASS BALANCES . . . . .	27
2.4 PRINCIPLES OF ECOTOXICOLOGY . . . . .	33
2.5 LIFE CONDITIONS . . . . .	39
2.6 THE GLOBAL ELEMENT CYCLES . . . . .	48
2.7 OXYGEN BALANCE OF A RIVER . . . . .	54
2.8 THE EUTROPHICATION PROBLEM . . . . .	68
2.9 MASS CONSERVATION IN A FOOD CHAIN . . . . .	79
2.10 MASS CONSERVATION IN A SOCIETY . . . . .	82
2.11 THE HYDROLOGICAL CYCLE . . . . .	88
2.12 PLUME DISPERSION . . . . .	90

## CHAPTER 3

PRINCIPLES OF ENERGY BEHAVIOUR APPLIED TO ENVIRONMENTAL ISSUES . . . . .	101
3.1 FUNDAMENTAL CONCEPTS RELATED TO ENERGY . . . . .	101
3.2 ENERGY USE AND ENERGY RESOURCES . . . . .	105
3.3 PRODUCTIVITY . . . . .	108
3.4 ENERGY IN ECOSYSTEMS . . . . .	114
3.5 ENERGY CONSUMPTION AND THE GLOBAL ENERGY BALANCE . .	119
3.6 ENERGY BUDGETS OF ANIMALS AND PLANTS . . . . .	130

VIII

CHAPTER 4

ECOLOGICAL PRINCIPLES AND CONCEPTS . . . . .	137
4.1 ECOSYSTEMS CHARACTERISTICS . . . . .	137
4.2 ADAPTATION . . . . .	138
4.3 GROWTH AND SELF-REGULATION . . . . .	142
4.4 INTERACTION BETWEEN TWO OR MORE SPECIES . . . . .	148
4.5 ORGANIZATION OF ECOSYSTEMS . . . . .	154
4.6 DEVELOPMENT AND EVOLUTION OF THE ECOSYSTEM . . . . .	160
4.7 pH-BUFFERING CAPACITY IN ECOSYSTEMS . . . . .	168
4.8 OTHER BUFFERING EFFECTS IN ECOSYSTEMS . . . . .	182
4.9 THE ECOSPHERE . . . . .	185

CHAPTER 5

AN OVERVIEW OF THE MAJOR ENVIRONMENTAL PROBLEMS OF TODAY . . .	189
5.1 APPLICATION OF PRINCIPLES TO ENVIRONMENTAL PROBLEMS .	189
5.2 AIR POLLUTION . . . . .	191
5.3 PESTICIDES, AND OTHER TOXIC COMPOUNDS . . . . .	193
5.4 THE PROBLEM OF HEAVY METALS . . . . .	194
5.5 WATER POLLUTION PROBLEMS . . . . .	203
5.6 NOISE POLLUTION . . . . .	204
5.7 SOLID WASTE POLLUTION . . . . .	205
5.8 FOOD ADDITIVES . . . . .	207
5.9 ALTERNATIVE ENERGY . . . . .	209

PART B

PRINCIPLES OF ENVIRONMENTAL TECHNOLOGY

CHAPTER 6

WATER AND WASTE WATER PROBLEMS . . . . .	215
6.1 INTRODUCTION TO THE PROBLEMS OF WATER AND WASTE WATER	215
6.2 REDUCTION OF THE BIOLOGICAL OXYGEN DEMAND . . . . .	219
6.2.1 The BOD <sub>5</sub> -problem and its sources . . . . .	219
6.2.2 Mechanical treatment methods . . . . .	222
6.2.3 Biological treatment processes . . . . .	231
6.2.4 Mechanico-biological treatment systems . . . . .	241
6.2.5 Other methods used for BOD-removal . . . . .	243
6.3 NUTRIENT REMOVAL . . . . .	250
6.3.1 The eutrophication problem and its sources . . . . .	250
6.3.2 Chemical precipitation of phosphorus compounds . . . . .	252
6.3.3 Nitrification and denitrification . . . . .	267
6.3.4 Ammonia stripping . . . . .	271
6.3.5 Chlorination and adsorption on activated carbon . . . . .	275
6.3.6 Application of ion exchange for removal of nutrients . . . . .	277
6.3.7 Algal ponds . . . . .	285

6.4	REMOVAL OF TOXIC ORGANIC COMPOUNDS . . . . .	285
6.4.1	The problem and source of toxic organic compounds . . . . .	285
6.4.2	Application of chemical precipitation for treatment of industrial waste water . . . . .	290
6.4.3	Application of adsorption for treatment of industrial waste water . . . . .	291
6.4.4	Application of chemical oxidation and reduc- tion for treatment of industrial waste water . . . . .	299
6.5	REMOVAL OF (HEAVY) METALS . . . . .	306
6.5.1	The problem of heavy metals . . . . .	306
6.5.2	The application of chemical precipitation for removal of heavy metals . . . . .	307
6.5.3	The application of ion exchange for removal of heavy metals . . . . .	314
6.5.4	The application of extraction for removal of heavy metals . . . . .	316
6.5.5	Application of membrane processes for removal of heavy metals . . . . .	318
6.6	WATER RESOURCES . . . . .	323
6.6.1	Introduction . . . . .	323
6.6.2	Softening . . . . .	325
6.6.3	Disinfection processes . . . . .	328
CHAPTER 7		
THE SOLID WASTE PROBLEMS . . . . .		341
7.1	SOURCES, MANAGEMENT AND METHODS . . . . .	341
7.1.1	Classification of solid waste . . . . .	341
7.1.2	Examination of mass flow . . . . .	341
7.1.3	Methods for treatment of solid waste . . . . .	343
7.2	TREATMENT OF SLUDGE . . . . .	344
7.2.1	Sludge handling . . . . .	344
7.2.2	Characteristics of sludge . . . . .	345
7.2.3	Conditioning of sludge . . . . .	348
7.2.4	Thickening of sludge . . . . .	349
7.2.5	Centrifugation of sludge . . . . .	350
7.2.6	Digestion of sludge . . . . .	351
7.2.7	Drying and combustion . . . . .	352
7.3	DOMESTIC GARBAGE . . . . .	356
7.3.1	Characteristics of domestic garbage . . . . .	356
7.3.2	Separation methods . . . . .	357
7.3.3	Dumping ground . . . . .	358
7.3.4	Composting . . . . .	358
7.3.5	Incineration of domestic garbage . . . . .	361
7.3.6	Pyrolysis . . . . .	363
7.4	INDUSTRIAL, MINING AND HOSPITAL WASTE . . . . .	365
7.4.1	Characteristics of the waste . . . . .	365
7.4.2	Treatment methods . . . . .	365

## CHAPTER 8

AIR POLLUTION PROBLEMS . . . . .	367
8.1 THE PROBLEMS OF AIR POLLUTION - AN OVERVIEW . . . . .	367
8.2 PARTICULATE POLLUTION . . . . .	368
8.2.1 Sources of particulate pollution . . . . .	368
8.2.2 The particulate pollution problem . . . . .	369
8.2.3 Control methods applied to particulate pollution . . . . .	370
8.2.4 Modifying the distribution patterns . . . . .	371
8.2.5 Settling chambers . . . . .	375
8.2.6 Cyclones . . . . .	376
8.2.7 Filters . . . . .	379
8.2.8 Electrostatic precipitators . . . . .	382
8.2.9 Wet scrubbers . . . . .	385
8.2.10 Modification of particulate characteristics . . . . .	390
8.3 THE AIR POLLUTION PROBLEMS OF CARBON DIOXIDE, CARBON HYDRIDES AND CARBON MONOXIDE . . . . .	391
8.3.1 Sources of pollutants . . . . .	391
8.3.2 The pollution problem of carbon dioxide, carbon hydrides and carbon monoxide . . . . .	392
8.3.3 Control methods applied to carbon dioxide, carbon hydrides and carbon monoxide pollution . . . . .	393
8.4 THE AIR POLLUTION PROBLEM OF SULPHUR DIOXIDE . . . . .	395
8.4.1 The sources of sulphur dioxide pollution . . . . .	395
8.4.2 The sulphur dioxide pollution problem . . . . .	396
8.4.3 Control methods applied to sulphur dioxide . . . . .	396
8.4.4 Flue gas cleaning of sulphur dioxide . . . . .	397
8.5 THE AIR POLLUTION PROBLEM OF NITROGENOUS GASES . . . . .	398
8.5.1 The sources of nitrogenous gases . . . . .	398
8.5.2 The nitrogenous gas pollution problem . . . . .	399
8.5.3 Control methods applied to nitrogenous gases . . . . .	399
8.6 INDUSTRIAL AIR POLLUTION . . . . .	399
8.6.1 Overview . . . . .	399
8.6.2 Control methods applied to industrial air pollution . . . . .	401
8.6.3 Gas absorption . . . . .	401
8.6.4 Gas adsorption . . . . .	403
8.6.5 Combustion . . . . .	407

## CHAPTER 9

EXAMINATION OF POLLUTION . . . . .	409
9.1 INTRODUCTION . . . . .	409
9.2 EXAMINATION OF WATER AND WASTE WATER . . . . .	409
9.2.1 Collection and preservation of samples . . . . .	409
9.2.2 Insoluble material . . . . .	412
9.2.3 Biological oxygen demand . . . . .	413
9.2.4 Chemical kinetics and dynamics in water systems . . . . .	415
9.2.5 Analysis of organic compounds in aqueous systems . . . . .	416
9.2.6 Analysis of inorganic compounds in aqueous systems . . . . .	419

CHAPTER 9 (continued)

9.2.7	Bacterial and viral analysis of water . . . . .	422
9.2.8	Toxicity of bioassay techniques . . . . .	424
9.2.9	Standards in quality control . . . . .	427
9.3	EXAMINATION OF SOLIDS . . . . .	429
9.3.1	Pretreatment and digestion of solid material . . . . .	429
9.3.2	Examination of sludge . . . . .	430
9.3.3	Examination of sediments . . . . .	431
9.4	EXAMINATION OF AIR POLLUTION . . . . .	432
9.4.1	Introduction . . . . .	432
9.4.2	Meteorological conditions . . . . .	435
9.4.3	Gaseous air pollutants . . . . .	439
9.4.4	Particulate matter . . . . .	443
9.4.5	Heavy metals . . . . .	445
9.4.6	Hydrocarbons and carbon monoxide . . . . .	448
9.4.7	Biological monitoring . . . . .	448
APPENDIXES	. . . . .	455
REFERENCES	. . . . .	487
INDEX	. . . . .	507
