

RESEARCH METHODS IN PSYCHOLOGY

A Handbook

Third Edition

Wendy A. Schweigert
Bradley University

Long Grove, Illinois

Contents

Preface xi

1 Introduction to the Scientific Method 1

Ways of Knowing 3

Intuition and Superstition 4

Authority 4

Rational-Inductive Argument 5

The Scientific Method 6

The Objectives of Science and the Scientific Method 11

Description as a Research Objective 11

Explanation and Prediction as Research Objectives 12

Control as a Research Objective 12

A Word about Theories 13

Research Criticism 15

Summary 16

■ IMPORTANT TERMS AND CONCEPTS 17 ■ EXERCISES 17

■ ANSWERS TO CONCEPT QUESTIONS AND

ODD-NUMBERED EXERCISES 19

2 Ethics in Research 21

Ethical Treatment of Research Participants 21

Internet Research Ethics 31

Ethical Dilemmas 33

Ethical Treatment of Animal Participants 35

Ethics and the Reporting of Research Results 37

Ethics and the Sponsorship of Research 39

Summary 40

■ IMPORTANT TERMS AND CONCEPTS 40 ■ EXERCISES 41

■ ANSWERS TO CONCEPT QUESTIONS AND

ODD-NUMBERED EXERCISES 42

3 The Research Process 45

- Reliability and Validity 47
 - Internal Validity and Confounds 47
 - External Validity 48
- Hypotheses 50
- Hypothesis Testing 52
 - Errors in Hypothesis Testing 53
 - The Probability of a Type I Error 55
 - The Probability of a Type II Error 56
 - Why We Don't Accept the Null Hypothesis 57
- How to Do Science 59
- Summary 62
- IMPORTANT TERMS AND CONCEPTS 63 ■ EXERCISES 63
- ANSWERS TO CONCEPT QUESTIONS AND ODD-NUMBERED EXERCISES 64

4 Research Reports and Literature Searches 67

- Research Reports 68
- The Review Process 69
- The Organization of Research Reports 70
- How to Find Research Reports: The Literature Search 70
 - Using the Internet for Literature Searches 71
 - An Internet Search Example 72
 - A Citation 73
- Other Sources of Potentially Useful Citations 74
- Citing the References 75
 - Citing References in Text 75
 - The Reference List 76
- Summary 77
- IMPORTANT TERMS AND CONCEPTS 78 EXERCISES 78
- ANSWERS TO CONCEPT QUESTIONS AND ODD-NUMBERED EXERCISES 78

5 The Role of Statistics in Research 79

- Scales of Measurement 80
 - Nominal Scale 81
 - Ordinal Scale 81
 - Interval Scale 82
 - Ratio Scale 82
 - Importance of Scales of Measurement 83

Types of Statistical Techniques	84
Describing the Data	84
Measures of Relationships	88
Comparing Groups	91
Summary	93
■ IMPORTANT TERMS AND CONCEPTS	94
■ EXERCISES	95
■ ANSWERS TO CONCEPT QUESTIONS AND ODD-NUMBERED EXERCISES	95
6 Introduction to Experimentation and the Between-Groups Design	97
Experiments versus Correlational Studies	97
Equivalent Groups	99
Control over Extraneous Variables	103
Internal Validity and Confounds	104
Experimenter Bias and Demand Characteristics	105
Instrumentation Effects	106
Subject Attrition	106
Comparable Treatment of Groups	107
Sensitivity of the Dependent Variable	108
Summary	110
■ IMPORTANT TERMS AND CONCEPTS	110
■ EXERCISES	111
■ ANSWERS TO CONCEPT QUESTIONS AND ODD-NUMBERED EXERCISES	111
7 The Within-Subjects Design	115
Types of Within-Subjects Designs	116
Benefits of the Within-Subjects Design	117
Disadvantages of the Within-Subjects Design	119
Order Effects and Counterbalancing	122
Complete Within-Subjects Design	122
Incomplete Within-Subjects Design	125
Summary	128
■ IMPORTANT TERMS AND CONCEPTS	129
■ EXERCISES	129
■ ANSWERS TO CONCEPT QUESTIONS AND ODD-NUMBERED EXERCISES	130
8 Quasi-Experimental Designs	133
Types of Quasi-Experimental Designs	134
Nonequivalent-Control-Group Designs	135
Time-Series Designs	136

Threats to Internal Validity
of Quasi-Experimental Designs 139

Summary 141

■ IMPORTANT TERMS AND CONCEPTS 142 ■ EXERCISES 143

■ ANSWERS TO CONCEPT QUESTIONS AND
ODD-NUMBERED EXERCISES 144

9 Factorial Designs and Correlational Studies 147

Using a Factorial Design 150

Interpreting Main Effects 152

Graphing the Cell Means 154

Other Types of Two-Factor Designs 156

Other Higher-Order Designs and Their Interactions 158

Correlational Studies 160

Summary 161

■ IMPORTANT TERMS AND CONCEPTS 163 ■ EXERCISES 163

■ ANSWERS TO CONCEPT QUESTIONS AND
ODD-NUMBERED EXERCISES 165

**10 Using Natural Settings:
Observational Studies and Field Experiments 169**

Observational Research Designs 169

Uses of Observational Studies 170

Two Types of Observational Research Designs 170

Naturalistic Observation 170

Participant Observation 172

Field Experiments 174

Problems and Pitfalls of Observational Studies 174

Influence of the Observer on Behavior 175

Expectancy Effects 176

Biases Resulting from the Use of Nonhuman Observers 176

Choosing the Type of Observational Design 177

Data Collection 178

Reliability 178

Techniques for Data Collection 179

Narrative Records 179

Checklists 180

Types of Data Collected 182

Sampling Techniques	183	
Behavior Sampling	183	
Situation Sampling	184	
Summary	184	
■ IMPORTANT TERMS AND CONCEPTS	185	■ EXERCISES 185
■ ANSWERS TO CONCEPT QUESTIONS AND		
ODD-NUMBERED EXERCISES	186	
11 Surveys and Interviews		189
Surveys: How and Why To Use Them	190	
Written Surveys	191	
Interviews	196	
Survey Construction	200	
Layout of Questions	200	
Wording of Questions and Response Options	201	
Measurement Tools	207	
Survey Development	209	
Sampling Techniques	209	
Summary	212	
■ IMPORTANT TERMS AND CONCEPTS	213	■ EXERCISES 214
■ ANSWERS TO CONCEPT QUESTIONS AND		
ODD-NUMBERED EXERCISES	215	
12 Single-Subject Designs		217
Types of Single-Subject Designs	220	
Baseline Measures	220	
Single-Subject Time-Series Designs	223	
Reversal Design	224	
Alternating-Treatments Design	226	
Multiple-Baselines Design	227	
Changing-Criterion Design	228	
Threats to the Internal Validity of		
Single-Subject Designs	230	
Summary	231	
■ IMPORTANT TERMS AND CONCEPTS	232	■ EXERCISES 232
■ ANSWERS TO CONCEPT QUESTION AND		
ODD-NUMBERED EXERCISES	233	

13 Physical Trace and Archival Data Studies: Two Nonreactive Measurement Techniques 237

Physical Traces 238

Traces 238

Products 239

Concerns with Physical Trace Studies 239

Ethical Considerations 240

Archival Data Investigations 241

Concerns with Archival Data Studies 242

Ethical Considerations 244

Summary 245

■ IMPORTANT TERMS AND CONCEPTS 246 ■ EXERCISES 246

■ ANSWERS TO CONCEPT QUESTION AND

ODD-NUMBERED EXERCISES 247

Appendix A: Basic Statistical Techniques 249

Appendix B: Statistical Tables 284

Appendix C: APA Publication Style 298

Glossary 315

Bibliography 337

Index 345
